INSTALLATION FLUID HAMMER ARRESTORS

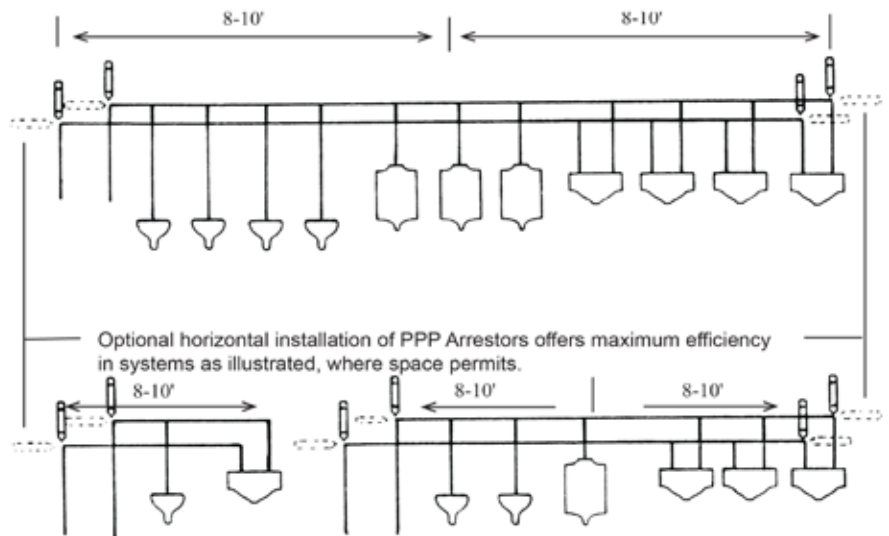

1. Flush line prior to installation.
2. Only use Teflon tape to seal the pipe thread.
3. To tighten place wrench on hex only.
4. For best results locate arrester as close to the quick closing valve as possible.
5. Either a vertical or horizontal installation is acceptable.
6. See product catalog for recommended pressure rating.
7. Failure to follow these instructions will make the product warranty null and void.

NSF/ANSI 61 Certified

RECOMMENDED ROUGH-IN OF PPP WATER HAMMER ARRESTORS.

Arrestors should always be installed so that there is an unobstructed shock path to the arrester. Doing otherwise could result in shake and rattle of the pipes when the valve is closed.

Arrestors should always be placed as near to the source of shock as possible - one each on the hot and cold water lines.
