

CONDENSATE DRAIN PANS

Seamless Metal Drain Pans

Seamless Metal Drain Pan is a seamless, nestable, metal drain pan, with rolled edges. The ultimate in drain pan design, tailored for easy distribution and installation.

The Seamless Metal Drain Pan is full of thoughtful features to make life easier on both the distributor and the contractor. The stout metal construction is backed up by rolled edges on all sides without any seams for maximum safety and integrity. These pans are nestable as well -- a stack of 70 pans is only a foot high!

Once at the site, there are no worries of having to return to the distributor for missing parts. The fittings are conveniently packaged with the pan for simple and efficient installation. Choose between two possible drain outlet positions and install with confidence.
