CABINET OPENING DIMENSIONS

Electrical supply junction box should be located 3" (7.6 cm) maximum below the support surface when oven is installed in a wall cabinet. Drill a 1" (2.5 cm) minimum diameter hole in the right rear or left rear corner of the support surface to pass the appliance cable through to the junction box. For undercounter installation, it is recommended that the junction box be located in the adjacent right or left cabinet. If installing the junction box on rear wall behind oven, junction box must be recessed and located in the upper or lower right or left corner of cabinet.
