

INTERCEPTORS

800 Series

Grease Interceptors, Series 800 - 801

TAG _____

Product Description: Recommended for removing, then retaining fat, oil, and grease from wastewater in kitchen and restaurant areas where food is prepared. The 800 series grease interceptor is constructed of coated corrosion-resistant fabricated steel with no-hub connections and separate no-hub flow control; a one-piece removable baffle; diamond plate, non-skid cover; and a unique, combination cover locking/lifting device.

Features and Benefits:

- Slip-resistant diamond plate cover
- Designed to be installed in above-the-floor installations or recessed where space is limited
- One piece removable baffle assembly
- Combination cover locking/lifting device
- Constructed of fabricated steel, corrosion-resistant coated
- Regularly furnished with no-hub inlet and outlet, threaded available
- Low type grease interceptor is designed to be installed under the sink or in an area where space is limited
- Conforms to PDI Grease Interceptor Standard PDI-G101
- IAPMO Listed, File No. 2697 and C-3878
