

INSTALLATION, MAINTENANCE AND OPERATION MANUALS

(-6) LAY-IN PRODUCTS:

1. Remove product from packaging, being careful to not scratch or damage the paint finish.
2. Locate the lay-in T-bar grid location in which the product will be installed.
3. Turn the product on it's side, and then push it up through the T-bar grid diagonal in order to avoid impacting any side of the T-bar grid. *(see Fig. 1)*
4. Once the product is above the ceiling grid, lay the product into the grid. *(see Fig. 2)*
5. The grid will support the weight of the product.
6. Ductwork can now be connected to the product from an adjacent opening in the ceiling grid. *(see Fig. 3)*

(see Fig. 1)

(see Fig. 2)

(see Fig. 3)

INSTALLATION, MAINTENANCE AND OPERATION MANUALS

(-1) SURFACE MOUNT PRODUCTS:

1. Remove product from packaging, being careful to not scratch or damage the paint finish.
2. Locate framed out hole in wall, floor or ceiling in which product will be installed.
3. Place product into hole, ensuring that the side-flanges of the product are flush with the wall/floor/ceiling. (see Fig. 1)
4. Use screws to fasten the product to the wall/floor/ceiling using the screw holes on the product. (see Fig. 2)

(see Fig. 1)

(see Fig. 2)
