

MAXI-FILTRA™ Air Admittance Valve

Manufacturer: Studor®, Inc.
Model #: MAXI-FILTRA™

Connection Size: 3" or 4"
Item #: 20297
Item #: 20700, Replacement Cartridge

General:

The MAXI-FILTRA is a two way vent, which filters air in both directions. It is designed for outdoor use only on septic tanks and lift stations. It is UV rated and comes with a replaceable carbon filter to eliminate bad odors.

Buildings connected to the main sewer can also benefit from the use of the MAXI-FILTRA, but Studor technical department must be contacted so that installation feasibility can be determined. The MAXI-FILTRA, as part of the complete STUDOR System® eliminates sewer gases from entering buildings or polluting the surrounding areas. It can also be retro-fitted in an existing plumbing system provided that all design and installation criteria are met.

Location:

A. The MAXI-FILTRA is for outdoor use only

Installation:

- Install filter after drainage and waste system has been roughed in and tested.
- Install valves in accessible locations to allow for filter cartridge replacement.
- Connect valves to piping in accordance with manufacturer's instructions.
- Do not install valves on chemical waste systems or in supply and return air plenums.
- The MAXI-FILTRA can be installed vertically or horizontally
- The MAXI-FILTRA contains a replaceable carbon filter cartridge which can last up to 2 years.

Features:

- UV inhibitor in resin compounds for exposure to sunlight
- Active Charcoal Filter replaceable cartridge

Materials:

- ABS (acrylonitrile butadiene styrene)
- Active Charcoal Filter replaceable cartridge
- Rubber connector
