

Canister (Dual Flush) Toilets

DUAL FLUSH
KOHLER

If you have a Dual Flush toilet, you will see a two-button actuator on top of the toilet rather than a trip lever. Inside the tank you will not see a flapper but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal.

If your toilet is leaking water into the bowl, the seal needs to be replaced, not the flush valve.

Part numbers are imprinted on the underside of the tank lid.

Toilet number is imprinted on the inside back of tank.

For detailed parts listings, see pages 18-19.

2-Inch-Flapper, One-Piece Toilets

Toilets manufactured prior to 2004 are most common with a 2-inch flapper.

Part numbers are imprinted on the underside of the tank lid.*

Toilet number is imprinted on the inside back of tank.

* Toilets manufactured prior to 1990 do not have part number labels on the underside of the lid.*

Some fill valves
See pages 20-29

Flappers

GP84995 – Used in various one-piece toilets

Replaces discontinued flapper 84995

GP83064 – Used in older one-piece toilets
