

**NEW**

**RIDGID®**

## **Model P-TEC 2550 Tailpiece Extension Cutter**

The RIDGID® Tailpiece Extension Cutter is the first cutter of its kind that provides the hassle free ability to execute a clean, fast, and straight cut on thin-walled plastic tube. The New Model P-TEC 2550 can be used on Polyethylene (PE), Polypropylene (PP), and Thin-Walled PVC disposer kits, tailpieces, and wall tubes of two standard sizes: 1 $\frac{1}{4}$ " and 1 $\frac{1}{2}$ " OD; both sizes with the same tool. The Tailpiece Extension Cutter is another addition to the RIDGID Under-the-Sink specialty tools family that have brought tremendous value to service plumbers, plumbing contractors and the DIY.

### **Unique Features and Benefits**

- **Clean Automatic Deburring** – The cut produces only a fine strand of plastic as opposed to the fuzz around the cut of a hacksaw. No need for a second tool to deburr, as it automatically deburrs in parallel to cutting action.
- **Automatic Beveling** – Allows for immediate, easy joining to other sink drain pieces.
- **Fast Cut** – On average six rotations to complete one cut, 4X faster than a hacksaw.
- **Straight Cut** – Easy-view windows ensure a straight cut on the marked pipe every time.
