

FAUCET SYSTEM ACCESSORIES HYDRO-GENERATOR

Model
HG01

FUNCTION:

The hydro-generator is a device that is used as an alternate power source with AMTC's sensor faucet systems. The hydro-generator easily adapts to the faucet system to provide for many years of dependable operation and eliminates the need to routinely replace batteries or use electrical power. The hydro-generator is recommended for high traffic facilities where the faucets get frequent use such as office buildings, restaurants, hospitals, schools, etc.

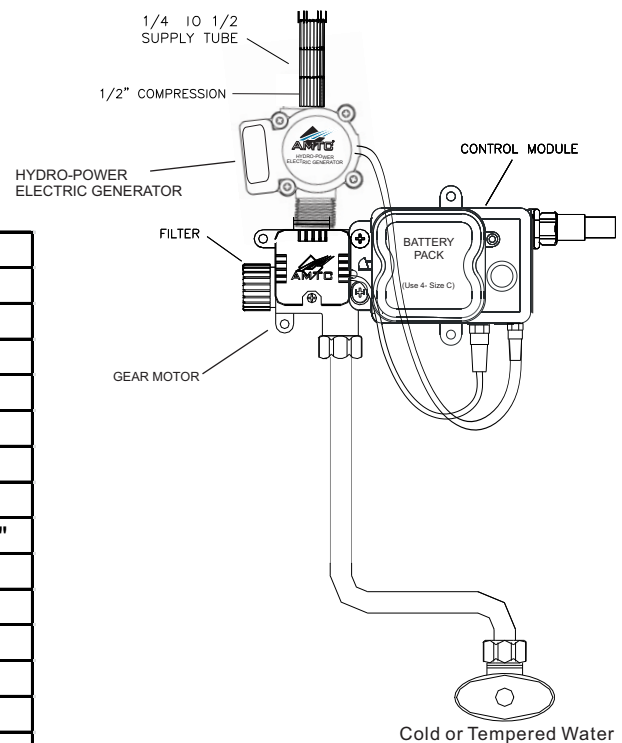

The hydro-generator includes a small rechargeable battery pack that charges itself with the water that flows through the faucet system after every use. With as little as five uses per day the hydro-generator will allow for 10+ years of operation making it the most eco-friendly and efficient way to power your automatic faucet system.
