Cured Concrete										
Brick & Pavers										
Block										
Asphalt										
Green Concrete										

**HIGHLIGHTS**

- Laser Welded
- DRY or WET cut with all of these blades.
- EQUIPMENT to be used is a high-speed hand-held saw, masonry saw or 5-13HP concrete saw.
- OTHER MATERIALS to cut include; brick pavers, retaining wall block and precast.

MULTI PURPOSE - WET OR DRY

Dual Blade

Concrete, Asphalt, Brick & Block

Note: If cutting Asphalt or Block ONLY, we recommend a material specific blade: Asphalt (pg. 10-11) Brick & Block (pg. 13-15).

GT Pro High Speed Blade

- Slanted directional gullets were designed to kick the cuttings away from the joint while keeping the blade cool.
- Free cutting diamond segments designed to cut heavily reinforced concrete such as pilings.
- Includes aggressive "U" segment design for fast cutting variety of materials with reduced friction: Concrete, Pavers, Brick and stone.

ALTERNATING STANDARD & TURBO SEGMENTS FOR HIGH SPEED CUTTING WITH TURBO COOLING CORE

PIPE, FIRE & RESCUE, GENERAL PURPOSE

Magnum Blade / Pipe Cutter / Fire & Rescue

- Premium vacuum-brazed blade
- Cuts ductile and plastic pipe and may be used for limited cutting of cast iron, metal roofs, steel studs and rebar.
- Silicon carbide on sides to eliminate pinching
- Use as a fire & rescue blade
- Wet or dry cutting

BLUE = PREMIUM

MP900 Wet Refractory

Refractory brick are typically harder and denser than standard brick. They usually contain additives like alumina and silica to make them more resistant to heat and/or chemicals. These bricks are used in furnaces, chimneys, kilns, ovens, and places of high acidity.

SPECIALTY PRODUCTS

CGH Grinding Heads

CGH - Diamond Concrete Grinding Heads are used for grinding concrete and finishes from floors. Hole pattern is designed to fit most floor grinding machines. 4 holes are 3/8" - 24 fine machine thread, and other 4 holes are 25/64" countersunk. Arbor is 3/4".

Item	Part #	2019 List Price
Medium to Hard Concrete		
10 SEGMENTED HEAD	CGH10	\$456
20 SEGMENTED HEAD	CGH20	\$651
Abrasive Concrete, Green Concrete or Asphalt		
10 SEGMENTED HEAD	CGH10A	\$456
20 SEGMENTED HEAD	CGH20A	\$651

DGI Diamond Grinding Inserts

The DGI Grinding Shoe Inserts are designed for replacement of the original shoes and bridges used on floor grinders. These inserts are for removing thin layers of coatings without clogging. Grinding Inserts can also be used for smoothing rough, uneven or patched slabs of concrete. Additional applications include leveling and feathering.

Item	Description	2019 List Price
DGI	1 GRINDING SHOE INSERT	\$223
DGI6	6 PACK GRINDING SHOE INSERTS	\$1,154

DGC Dry Green Concrete

- Use DGC blades for early entry sawing when concrete is less than 24 hours old.
- Concrete less than 48 hours old generally cuts as green concrete.
- Concrete older than 48 hours generally cuts as cured concrete.
- Arbor is 1" with 7/8" and 5/8" adaptors on 7", 8", 9" and 10" blades.

BOND INFORMATION

PROFESSIONAL

Quartz, River rock, Basalt	Flint, Chert,	APPLICATION DESCRIPTION
X		FAST CUTTING FOR 48+ HP SAWS WITH U SEGMENTS
X		CUT GENERAL AGGREGATE, RECOMMENDED FOR 35HP TO 65 HP
X		GENERAL PURPOSE BLADE IN MOST BRIDGES
		WORKS WELL ON 65HP OR HIGHER HP SAW
X	X	HARD AGGREGATE WITH MEDIUM STEEL CONTENT
X		MEDIUM HARD AGGREGATE WITH MEDIUM STEEL CONTENT
		HARD AGGREGATE WITH MEDIUM STEEL CONTENT
		MEDIUM AGGREGATE WITH MEDIUM STEEL CONTENT
X		HARD AGGREGATE WITH HEAVY STEEL CONTENT
X		HARD AGGREGATE WITH MEDIUM STEEL CONTENT
X		MEDIUM AGGREGATE WITH MEDIUM STEEL CONTENT
		MEDIUM TO SOFT AGGREGATE LIGHT REINFORCEMENT
X		MEDIUM AGGREGATE, WITH STEEL LONGER, LIFE
X		MEDIUM ABRASIVE AGGREGATE, WITH STEEL LONGER LIFE
		SOFTER ABRASIVE AGGREGATE FOR LONGER LIFE, OVERLAY APPLICATION
X	X	VERY HARD FINE GRAINED AGGREGATE, FLINT CHERT WITH STEEL
X	X	HARD FLINT AGGREGATE WITH STEEL AND LONGER LIFE
X	X	FAST CUTTING FOR LOW HP ELECTRIC SAWS - U SEGMENTS
X	X	GRANITE AND HARD LIMESTONE AGGREGATE - U SEGMENTS
X		GENERAL PURPOSE ELECTRIC SAW WITH REINFORCEMENT
X		MEDIUM HARD AGGREGATE WITH STEEL, HIGHER HP ELECTRIC SAWS
		HARD AGGREGATE WITH STEEL AND HIGHER HP ELECTRIC SAWS
X	X	FAST CUTTING CURB CUT WITH HARD BAZALT AND QUARTZ AGGREGATE
X		LIMESTONE TO GRANITE AGGREGATE
		LIMESTONE MEDIM HARD GRANITE AGGREGATE FOR LONGER LIFE
X		CONCRETE, HARD AGGREGATE WITH MEDIUM STEEL CONTENT
		CONCRETE, GENERAL PURPOSE WITH MEDIUM STEEL CONTENT
		ASPHALT, GENERAL PURPOSE
X	X	FASTER CUTTING JOINT BLADE WITH LOWER HP SAWS
		HARD AGGREGATE, FLINT CHERT FOR FAST CUTTING
		SOFTER ABRASIVE AGGREGATE FOR LONGER LIFE.
X	X	HARD AGGREGATE, FLINT CHERT FOR FAST CUTTING
X	X	FAST AND CLEAN CUTTING CHERT, ROSE QUARTZ, OPTIMUM LIFE
X	X	FAST CUTTING CHERT VERY LONG LIFE
		FAST CUTTING, LIMESTONE AND GRANITE AGGREGATE
		ABRASIVE CONCRETE, SHOULDER CUTTING BLADE LONGER LIFE
		LIME STONE, GRANITE AND HARD LIMESTONE, FAST AND LONG LIFE FORMULA
X		HARD GRANITE, QUARTZ TRAP ROCK, GREAT LIFE, FAST CUTTING
X	X	MEDIUM HARD & HARD AGGREGATE AND FAST CUTTING
X		MEDIUM HARD & HARD AGGREGATE AND LONGER LIFE
		GREAT LIFE IN GRANITE AND HARD AND SOFT LIMESTONE
X		FAST CUTTING OVERLAY BLADE WITH MOSTLY CONCRETE TO BE CUT
X		GREAT LIFE WITH DECENT SPEED GENERAL PURPOSE OVERLAY, 50/50 CONCRETE & ASPHALT COMBO

HARDNESS OF AGGREGATE

There are many different types of rock used as aggregate. Generally, hard aggregate breaks down the cutting diamonds faster which means the bond must be softer to expose new diamonds. Softer aggregate generally does not break down the cutting diamond as quickly and therefore requires a harder bond to hold the diamonds in place to use their full potential. The Mohs' scale is used to measure the hardness of aggregate and has a range of 1 - 10. Most aggregates fall into the 2 - 9 range.

BOND INFORMATION

Quartz, River rock, Basalt	Flint, Chert,	APPLICATION DESCRIPTION
		GRANITE, TRAP ROCK AND HARD LIMESTONE, GREAT LIFE 50+ HP
		FOR LIMESTONE AGGREGATE WITH HEAVY ASPHALT CUTTING IN THE CUT
X		FAST CUTTING WITH AIR SAWS
X	X	FAST CUTTING, GRANITE AND BLUE STONE CONCRETE WITH STEEL
X	X	FAST CUTTING MEDIUM HARD CONCRETE WITH STEEL
		SPLITED SEGMENT FOR MEDIUM HARD CONCRETE AND STEEL
		GRANITE AGGREGATE, MORE POWERFUL SAWS WITH IMPROVED LIFE
X		AIR SAWS, FAST CUTTING 5 LAYER SEGMENTS ABOVE 0.220" THICK BLADES
X	X	FAST CUTTING ALL PURPOSE WALL SAW BLADE IN MOST AGGREGATES
		HARD LIMESTONE TO GRANITE AGGREGATE IMPROVED LIFE
X	X	HARD AGGREGATE WITH QUARTZ AND BAZALT AGGREGATE AND HEAVY STEEL
X	X	HARD FLINT AND CHERT AGGREGATE WITH STEEL, GREAT LIFE!
X	X	FAST BRONZE BOND HARD AGGREGATE BOND - CUTS THROUGH STEEL
		DESIGNED FOR MEDIUM HARD AGGREGATE AND LONGGER LIFE
		ALL PURPOSE APPLICATION
X	X	CONCRETE, HARD AGGREGATE CONCRETE LOOP BLADE
		ALL PURPOSE CURED CONCRETE LOOP BLADE WITH SANDWICHED SEGMENTS
		ASPHALT, HARD AGGREGATE LOOP BLADE
		ALL PURPOSE ASPHALT LOOP BLADE WITH SANDWICH SEGMENTS

Product Spec Description

C4518 Hard aggregate with heavy steel content
 C4520 Hard aggregate with medium steel content
 C4521 Medium aggregate with medium steel content
 C4522 Medium to soft aggregate light reinforcement

C4523 Medium aggregate, with steel, longer life
 C4524 Medium abrasive aggregate, with steel, longer life
 C4534 Softer abrasive aggregate for longer life, Overlay application

PRO CURED CONCRETE BLADES - WET CUTTING

42 X 187	P7-42187	P7-42187R	\$2,833

Features

- 14 mm usable diamond height
- Pattern Flow Technology for optimum bond performance
- Highest diamond concentration for more life
- Available in .165" and .187" widths

Benefits

- Even diamond distribution for consistent performance
- Total diamond volume alignment on the interior and exterior of the segment
- Lowest cost per inch-foot
- Superior cutting performance

SPLIT SEGMENT FEATURES

- Tall segment heights for extra long life.
- Blades designed for specific electric horsepower saws.
- Split segment design for 10 and 20 horsepower saws for faster cutting.
- All blades manufactured in the USA at Dixie Diamond Mfg.

SILENT CORE FEATURES

- 34% Noise reduction over standard cores.
- Vibration reduction increases life and eliminates tension issues.
- Reduction in core cracks preventing catastrophic failures
- Stronger and lighter cores.

STANDARD SEGMENT FEATURES

- Tall segment heights for extra long life.
- Blades designed for specific electric horsepower saws.
- Standard segment design for 30 and 40 horsepower saws for faster cutting.
- All blades manufactured in the USA at Dixie Diamond Mfg.

Product Spec Description

- E10 Fast cutting for low HP electric saws - U segments
 E20 Granite and hard limestone aggregate - U segments
 E30 General purpose Electric saw with reinforcement
 E35 Medium hard aggregate with steel, Higher HP electric saws
 E40 Hard aggregate with steel and higher HP Electric saws

DIAMOND WIRE

DDM-CONCUT offers both sintered and brazed diamond wire. Sintered wire will generally provide the best life, while brazed wire will give excellent cutting speed and will not lose diameter with use. DDM-CONCUT offers wire that is rubber coated with spring spacers between the beads. Standard bead diameter is 10.5 mm with 40 beads per meter, although different bead sizes and concentrations are available.

BRAZED FEATURES:

- 48 beads per meter
- Bead diameter 10.2 mm
- Lengths: 50 ft. / 100 ft. / Also available above 100 ft. lengths

SINTERED WIRE FEATURES:

- 40 beads per meter
- Bead diameter 10.5 mm
- Lengths: 50 ft. / 100 ft. / Also available above 100 ft. lengths

Product Spec Description

RED Concrete, Hard aggregate with medium steel content

BLUE Concrete, General purpose with medium steel content

GREEN Asphalt, General purpose

Red & Blue Concrete Series

- Segment Height : .394"(10mm)

Green Asphalt Series

- Segment Height : .334"(8.5mm)

Please consider the following information when specifying blades:

Arbor: 1" with pin hole is standard. Louie, Roger, Long Year, and other patterns are available.

Actual Blade Diameters up to 26" are diameters plus segment height.

PART NUMBERS IN BLUE HAVE BLADES UP TO 20" MADE WITH VERTICALS,
BLADES 24" AND LARGER HAVE VERTICALS AND RECESS SEGMENTS

PART NUMBERS IN RED HAVE BLADES WITH RECESS SEGMENTS

Product Spec Description

- A3855 Hard granite, quartz trap rock, great life, fast cutting
A3860 Medium hard & Hard aggregate and fast cutting
A3865 Medium hard & Hard aggregate and longer life
A3870 Great life in Granite and hard and soft limestone

HAND SAW BLADES - WET CUTTING

Product Spec Description

W4015 Air saws, fast cutting 5 layer segments above 0.220" thick blades

W4025 Fast cutting all purpose wall saw blade in most aggregates

W4035 Hard limestone to granite aggregate improved life

W4040 Hard aggregate with quartz and bazalt aggregate and heavy steel

W4055 Hard flint and chert aggregate with steel, great life!

STANDARD ARBOR IS 1"
W/PH + LONG YEAR.

ALL OTHER ARBOR PATTERNS ARE
AVAILABLE UPON REQUEST.

SPECIALTY BLADES - WET CUTTING

Ring Saw Blades

Tech Notes

- Wet cutting diamond blade for all ring saw applications
- Offers a 10" cutting depth
- Use for precutting or following chaincuts
- Drive Wheel Included with each blade

Wire Brush

Size	Part Number	2019 List Price
12" X .375" X 1"	WBRUSH12	\$117

DESCRIPTION

Use our Wire Joint Brush for general purpose brushing of joint or crack cleaning in concrete or asphalt. The brush has an oil tempered steel wire with a 3/8" face width. Some machine models may require modification to accept a wire joint brush. Wire brush requires 5/8" minimum blade clamping thickness. Use only on low horsepower flat saws.

STRAIGHT AND CIRCLE LOOP BLADES

Loop Cutting Blades

Loop saw blades are specifically designed for cutting traffic loops. Both straight and circular loop saw blades are available in a variety of asphalt and concrete bonds. Retipping is available on most circle cutting cores. Other sizes and thicknesses are also available.

STB STORM BITS ARE DESIGNED WITH A LONGER SPEED STYLE TUBE TO INCREASE THE MAXIMUM HOLE CORING SPEED.

- Bit is designed with a 2 inch longer, light weight steel tube and a custom constructed turbo style segment to provide aggressive coring speed in hard concrete.

Dry Masonry Bits are designed for use on hand held core drill rigs and some hand drills. Use these bits for coring through BRICK and BLOCK walls only. Commonly used for conduit and other piping.

The BDX series bits use the ARIX™ Diamond Arrangement Technology to provide higher productivity and lower costs per hole.

COPPER WASHER

CUSTOM SIZED CORE BITS

Please call the factory to discuss your custom length application.

Tubing availability and factory volume determine lead time on special lengths. Please expect longer manufacturing time for bits with non-stocked tube lengths.

CARDI HAND HELD CORE DRILLS

Electronic Cardi Single Speed Hand Held Core Drill

Part # CARDI T1800-102-MU-EL-71X
Call for Pricing

- 1 Speed hand-held core drill
- Electronic Clutch with Soft Start
- 120 V, 50/60 Hz, 15 amp
- 1-1/4" male shaft with 5/8" adapter
- Wet and dry drilling
- 5" core bit capacity
- Case included
- Idle RPM: 940
- Load RPM: 730
- Built in GFI UL62841-1 on cord

Electronic Cardi 2 Speed Hand Held Core Drill

Part # CARDI TOL-MU-EL-71X
Call for Pricing

- 2 Speed hand-held core drill
- Electronic Clutch with Soft Start
- 120 V, 50/60 Hz, 15 amp, 2.0HP
- 1-1/4" male shaft with 5/8" adapter
- Wet and dry drilling
- 5" core bit capacity
- Case included
- Idle RPM: 1180/2150
- Load RPM: 930/1700
- Built in GFI UL62841-1 on cord

Electronic Cardi 3 Speed Hand Held Core Drill

Part # CARDI T1-MU-EL-71X
Call for Pricing

- 3 Speed hand-held core drill
- Electronic Clutch with Soft Start
- 120 V, 50/60 Hz, 15 amp, 2.5HP
- 1-1/4" male shaft with 5/8" adapter
- Wet and dry drilling
- 6" core bit capacity
- Case included
- Idle RPM: 770/1860/2580
- Load RPM: 570/1380/1920
- New! Built in GFI UL62841-1 on cord

Electronic Cardi 3 Speed Hand Held Core Drill

PISTOL GRIP

Part # CARDI T1-PU-EL-71X
Call for Pricing

- 3 Speed hand-held core drill
- Electronic Clutch with Soft Start
- 120 V, 50/60 Hz, 18 amp, 2.5HP
- 1-1/4" male shaft with 5/8" adapter
- Bubble Level
- Wet and dry drilling
- 6" core bit capacity
- Case included
- Idle RPM: 770/1860/2580
- Load RPM: 570/1380/1920
- Built in GFI UL62841-1 on cord

CARDI DRILL RIGS / HANDSAW

DM-160 Small Drill Stand

The DM-160 small drill stand is a sturdy and reliable stand for our hand-held drills. This stand will accept all of the most popular hand-held core drills.

Call for Pricing

Features include:

- Quick release cradle
- Clamp bracket neck
- Quick release crank handle
- Cutting depth scale on column
- Optional wheels on base
- Tilts up to 45 degrees
- Dimensions are 14" x 10" x 38"
- Lightweight, easy to carry
- Maximum drilling capacity of 8"
- Available Arbor Thread: 1 1/4"-7 and 5/8"-11

Cardi TP400-EL Handsaw

The Cardi TP-400-EL is the only 16" electric saw on the market. Powered by the same reliable motor used on the Cardi core drill, this saw can cut up to 6" deep. The soft start keeps you from blowing breakers. A flush cut kit is available.

EQUIPMENT - Diamond Chain Saws - Gas

ICS 680ES

DDM-CONCUT offers gas-powered diamond chain saws made by ICS, the world leader in diamond chain technology. All three gas models provide convenience, portability and reliability. The 680ES is a general purpose saw, perfect for occasional general construction use. It uses MAX series diamond chain and plunge cuts to 14".

680ES

680ES SPECIFICATIONS:

Weight	21 lbs. (with bar and chain)
Engine Speed	11500 +/- 500 rpm, 2800-3200 rpm idle
Bar Length	Up to 14"
Horsepower	5 HP @ 9500 rpm
Engine Type	2-stroke, single cylinder, air cooled
Displacement	4.7 cu. inch
Chain Speed	5300 fpm, free running
Powerhead Dimensions	18" L x 11.5"H x 10"W
Noise Level	100 dB @ 3 ft.
Vibration Level	10.5 meters/second (front handle)
Water Supply	Minimum 20 psi (1.5 bar)
Fuel Mix Ratio	25:1 (4%) fuel to oil
Fuel Capacity	0.23 gal., 15-18 minutes run time per tank

EQUIPMENT - Diamond Chain Saws - Gas

ICS 695XL-GC

The 695XL-GC is the most powerful gas saw, with an excellent power to weight ratio. This saw plunge cuts to 16". It uses MAX series diamond chain and can be converted to use FORCE4 chain.

695XL-GC

695XL-GC SPECIFICATIONS:

Weight	21 lbs. (without bar and chain)
Engine Speed	11500 +/- 500 rpm, 2500-2800 rpm idle
Bar Length	Up to 16"
Horsepower	6.4 HP @ 9000 rpm
Engine Type	2-stroke, single cylinder, air cooled
Displacement	5.7 cu. inch
Powerhead Dimensions	19"L x 14"H x 12"W
Noise Level	102 dB @ 3 ft.
Vibration Level	8 meters/second (front handle)
Water Supply	Minimum of 20 psi (1.5 bar)
Fuel Mix Ratio	25:1 (4%) fuel to oil
Fuel Capacity	0.26 gal (1.0 liter)

EQUIPMENT - Diamond Chain Saws - Gas

ICS 695XL-F4

The 695XL-F4 operates on FORCE4 technology and is designed for frequent, heavy use. This saw makes deep, straight cuts and square corners in concrete, stone, masonry or ductile pipe. It will plunge cut up to 16".

695XL-F4

695XL-F4 SPECIFICATIONS:

Weight	21 lbs. (without bar and chain)
Engine Speed	9300 +/- 150 rpm, 2700 rpm idle
Bar Length	Up to 16"
Horsepower	6.4 HP @ 9000 rpm
Engine Type	2-stroke, single cylinder, air cooled
Displacement	5.7 cu. inch
Powerhead Dimensions	19"L x 14"H x 12"W
Vibration Level	3.9/4.1 meters/sec (front/rear handle)
Water Supply	Minimum of 20 psi (1.5 bar)
Fuel Mix Ratio	25:1 (4%) fuel to oil
Fuel Capacity	0.26 gal (1.0 liter)

EQUIPMENT - Diamond Chain Saws - Hydraulic**ICS 814PRO**

ICS hydraulic diamond chain saws offer both performance and power.

The 814PRO is a general purpose hydraulic saw. It is lightweight and extremely easy to use. With the ability to cut perfectly square openings as small as 3 1/2 inches (9 cm), the 814PRO is a natural for utility work and other applications where a mix of portability and power are required.

Powerhead Dimensions	14.3"L x 11.3" H x 9.2" W
Torque	84 in-lbs.
Horsepower	11.5 HP
Hydraulic Supply	8 gpm, 2500 psi (172.5 bar)
Noise Level	88 dB @ 3 ft.
Vibration Level	3.5 meters/second (front handle)
Water Supply	Minimum 20 psi (1.5 bar)

EQUIPMENT - Diamond Chain Saws - Hydraulic

ICS 890F4/FL

The 890F4 is the most powerful model and is designed for heavy production use. This saw has a rugged die-cast aluminum body and a modular motor design for easy servicing. The 890F4 uses FORCE4 technology and has four guidebar lengths available. The 890F4-FL has the same powerful hydraulics, but is for flush cutting. This saw cuts as close as 3/16" to a wall or floor.

SPECIFICATIONS:

TROUBLESHOOTING

NOTE: Slow cutting and short blade life are common problems with diamond blades. It is very important to understand that the segment of the blade is designed to wear at a certain rate. That is one of the important factors that makes one blade different from another.

SLOW CUTTING SPEED

- Cause** Usually occurs when a blade is used to cut a material that is too hard for the segment. The hard material wears the exposed diamonds, but not the metal portion of the segment. The segment wears too slowly, no new diamonds are exposed, and you see slow cutting speed.
- Solution** Cut a soft, abrasive material until diamonds are well exposed. Try Asphalt, block, sandstone, or dried mortar. Choose the proper blade for the application.
- Potential** If this problem is allowed to continue, heat builds up and the blade begins to bounce leading to segment loss, core cracks and a very unsafe condition.

SHORT BLADE LIFE

- Cause** Usually occurs when a blade is used to cut a material that is too soft and abrasive for the segment. The abrasive material wears the metal of the segment too fast, and you see short blade life.
- Solution** Specify the correct blade, choose a more wear resistant bond. Check water flow. Make sure blade is rated for the equipment used. Check saw is in good condition.
- Potential** If blade specification is not changed the problem will reoccur. Customer will not get the full life and efficiency of the diamond tool.

CORE OR SEGMENT CRACKS

- Cause** Blade is too hard for material. Saw is in need of repair. Blade mounted improperly. Overheating. Twisting while cutting or attempting to cut curves.
- Solution** Specify a softer bonded blade for the material. Check all bearings, belts, shaft and flanges. Check direction of blade travel. Follow guidelines for proper blade operation and cooling procedures.
- Potential** If this problem is allowed to continue it will result in segment loss and possible core destruction. This is an extremely dangerous situation. Do not continue to use the blade.

WOBBLING/WARPED BLADE

- Cause** Blade is out of tension...the steel core is not straight. Wrong size collars or mounted incorrectly. Blade allowed to overheat (bluish black marks). Blade run at improper RPM.
- Solution** Return blade to factory for repair. Use the correct sized blade collars. Check flanges are smooth and tight fitting. Follow guidelines for proper blade operation and cooling procedures. Check RPM rating for blade and saw.
- Potential** If this problem is allowed to continue, heat builds up and the blade begins to bounce leading to segment loss, core cracks and a very unsafe condition. Produces poor quality cuts.

UNDERCUTTING

- Cause** Steel core is worn faster than segments by abrasive material being cut.
- Solution** Specify a blade with wear-retardant design. Increase water flow to flush cut.
- Potential** If this problem is allowed to continue, the core will wear out from under the segment and allow the segments to separate.

ORDERING, TERMS & WARRANTY

TERMS OF SALE

MINIMUM ORDER - None

TAXES apply to all product sales unless a tax exempt certificate is provided.

WARRANTY

ALL DIAMOND TOOLS ARE WARRANTED AGAINST MANUFACTURING DEFECTS FOR THE LIFE OF THE PRODUCT.

Applicability of warranty will be determined ONLY after inspection by a qualified DDM-CONCUT representative. DDM-CONCUT may pro-rate any warranty claim based upon a fair percentage of tool life prior to failure. Any tool covered under warranty will be replaced or repaired at the discretion of DDM-CONCUT. Warranty items include labor, parts, and return service shipping via UPS Ground or best-way.

RETURNED GOODS AUTHORIZATION (RGA) must be issued by a DDM-CONCUT customer service representative and must accompany all items returned to the factory. Please have the following information before you call for an RGA: type and size of tool, Part #, serial number, equipment used, and material being cut.

RESTOCKING FEES may apply to the return of any non-catalog item.

ORDERING INFORMATION

PLACE ORDERS with your local distributor, a DDM-CONCUT sales representative, customer service representative, by phone, fax, or e-mail. If you need help selecting tools, DDM-CONCUT will be glad to help you specify the tools you need. You do not need specific item numbers when placing orders.

DISTRIBUTION POLICY: Orders will be processed for customers with accounts in our system. DDM-CONCUT sales policy is to guide consumers to approved distributors whenever possible.

ITEM NUMBERS identify the specific tool you are ordering. DDM-CONCUT item numbers are used during order entry, and appear on picking tickets, packing slips, and invoices.

SHIPPING POLICY

- Minimum Order Requirement for Prepaid Ground Freight is \$400.00 of blades or core bits
- International shipments- All prepaid and add or collect
- ICS Chain/Bars, All parts and equipment are all shipped prepaid and add
