NuvoH2O Home Softener System w/ Cartridge

Citrus. Not Salt.

NuvoH2O uses a proprietary citrus formula to bind hard water minerals and neutralizes pH, rendering minerals incapable of forming scale. Unlike salt-based softeners, **NuvoH2O not only prevents hard water build-up, it also removes existing scale.**

Features

- Prevents scale build-up and removes existing hard water scale
- Eco-friendly — no salt, no waste water, no electricity
- Healthier skin and hair
- Softer, brighter clothing
- Use less soap, lotions and conditioners
- Compact design — fits almost anywhere
- Extends the life of your water heater, plumbing fixtures and appliances
- Developed from 25+ years of commercial experience
- FDA & NSF approved

Warranty

- **5-Year Limited Warranty** for systems purchased directly from and registered through NuvoH2O.

Specifications

- Home System
- For homes with 1 – 2 residents
- Size: 5" x 24"
- Weight: 7 pounds
- Connection Size: 1"
- Water flow: 12-15 gpm with 1" ports (minimal change to existing flow)
- Maximum pressure: 100 PSI (6.8 bar)
40 - 60 PSI for optimal treatment level
- Hardness range: 25 GPG or Less
- pH range: 7.3 – 8.2
- **Capacity: about 20,000 gallons**
- Built-in pressure relief valve
- FDA & NSF approved

Replacement Cartridges

- Uses 2" x 20" replacement cartridges
- Replace Cartridge every 20,000 gallons

Additional Important Considerations

- Not appropriate for homes with a private well
- Not recommended for closed loop recirculation systems or wood fired boiler applications.
- Over tightening the fitting can, and will, cause the system to fail prematurely.
- In homes with copper piping, air in the line can cause oxidization of the pipes. The NuvoH2O System works to remove the copper oxide, possibly resulting in blue tinged water for a short time. This is not cause for panic – The effect is harmless and will dissipate over time.
