

## Shower Pan Drain

### with **Double Duty™** Test Plug

- Double Duty™ seals drain for DWV pressure test and shower pan water test
- Plug is easy to install and remove, eliminates reaching through the collar to remove test caps
- No blow-up balls, no glue-in wafers, no mechanical plugs

821-T200P

The new Round-to-Square Adapter easily converts 821 drains from round strainer to square. See pg 366

After rough-in, install plug and perform DWV pressure test (plug will hold a 5 lb. air or water test). Plug can remain in place to prevent debris from clogging drain line.

After pan liner installation, re-install plug and perform pan liner test. Loosen plug to drain test water. Plug can remain in place until tile installation.

Align positioning lugs with the slot in the clamping collar threads and push plug into the collar.

Thread the plug into the collar hand-tight. Lugs ensure the o-ring is in the correct position to seal.
