HYDRAULIC HOSE ASSEMBLIES: THE MILTON® INDUSTRIAL WAY

From start to finish you can have the peace of mind knowing we use high quality equipment to create, assemble, and test our hoses to industry standards. We have specially trained team members operating our hose assembly equipment at all times

Uniflex EM 6 P

Starting with our Uniflex EM 6 P Hydraulic Hose Cutter we make precise, straight, cuts with a quality steel blade. Our safety guards allow for an accurate length cut with every assembly

Uniflex HM220

After cutting the hose to length, our team moves over to our greaseless Uniflex HM220 Production Hose Crimper. This machine has the ability to let the operator chose which side they want to work on, allowing the team member to get the most accurate and clean crimp possible. We have standard operating procedures in place that call for regular quality testing of the assemblies' crimp diameters, and our tolerances for any variances are extremely low

Uniflex P160

After our team members have cut and crimped the appropriate fittings onto our hoses, the team then moves over to our Uniflex P160 Hydraulic Test Bench. This testing bench has a fully enclosed test chamber that can test the hoses' burst and static pressure. We understand that hose lines that cannot withstand the high pressure for which they are designed can cause serious damage. We test our medium-high pressure hoses with a 4:1 safety factor and our extreme high-pressure hoses at 2:1. The Hydraulic Test Bench allows for the efficient and safe final inspection and testing of our hose lines

Uniflex KS6

In addition to our top of the line hose cutting, crimping, and test bench, we are proud to use a Uniflex KS6 Calibration Crimper for our hydraulic fittings. This calibration press is for the pre-assembly of one-piece fittings. Having this calibration crimper on site has allowed us the opportunity to offer all our fittings in either a two-piece or a one-piece "crimp" style, depending on your specific needs

HOW TO READ A HOSE ASSEMBLY PART NUMBER:

Example: M17-R2-04-1NPT

M17= Category R2= Hose Type 04= Hose ID 1NPT= 1 foot length with NPT fittings attached

ALL HOSE ASSEMBLIES COME IN THE FOLLOWING LENGTHS: 1ft, 2ft, 3ft, 6ft, 9ft.

If an assembly has the same category, same hose type, and has the same hose ID, regardless of the length, they will have the same product information (product description, maximum working pressure, fittings attached, etc.) unless otherwise noted. The only differentiation will be length and weight of product.

HYDRAULIC HOSE ASSEMBLIES

100R2AT Hose Assembly (M17)

Our Milton® Industrial 100R2AT hydraulic hose assemblies come with male NPT (National Pipe Thread) fittings installed on each end of the hose and are ready to connect to equipment. They are suitable for general purpose industrial and hydraulic applications with petroleum and water-based fluids. The hoses have a synthetic rubber tube and cover, and they are reinforced with two high-tensile steel wire braids meeting, or exceeding, SAE 100R2AT requirements. These assemblies come in both 1/4" and 3/8" ID. Each are assembled and individually labeled showing ID, length, and product specifications

Features

- Male NPT fittings on each end
- Reinforced with two braids of high-tensile steel wire
- Attached fittings made of carbon steel and zinc coated
- High-grade nitrile tubes
- Flexible and durable hydraulic hose
- All hoses assembled and regularly tested for quality in house
- Meets or exceeds the performance requirements of:
SAE 100R2AT; EN 853 2SN; DIN 20022 2SN
- Meets Flame Resistance USMSHA Designation
- SAE J1942/U.S. Coast Guard
- Black polychloroprene cover

HYDRAULIC HOSE ASSEMBLIES (cont)

100R16 Hose Assembly

Our Milton® Industrial 100R16 hydraulic hose assemblies come with male NPT (National Pipe Thread) fittings installed on each end of the hose and are ready to connect to equipment. They are suitable for general purpose industrial and hydraulic applications with petroleum and water-based fluids. The hoses have a synthetic rubber tube and cover, and they are reinforced with two high-tensile steel wire braids meeting, or exceeding, SAE 100R16 requirements. These assemblies come in both 1/4" and 3/8" ID. Each are assembled and labeled showing ID, length, and product specifications

Features

- Male NPT fittings on each end
- Reinforced with two braids of high-tensile steel wire
- Attached fittings made of carbon steel and zinc coated
- Hoses are built and tested according to industry specifications such as SAE and EN
- All hoses assembled and regularly tested for quality in house
- High-grade nitrile tubes
- Excellent impulse performance and flexibility exceeding SAE100R2 and SAE100R16 standards
- Meets or exceeds the performance requirements of: SAE 100R16; EN 857 2SC
- Meets Flame Resistance USMSHA Designation
- SAE J1942/U.S. Coast Guard
- Has an extra abrasion, oil and weather resistance nitrile rubber cover

HYDRAULIC HOSE ASSEMBLIES (cont)

Jack Hose Assembly

Our Milton® Industrial hydraulic hose assemblies for jacking systems come with male NPT (National Pipe Thread) fittings installed on the ends of the hoses and are ready to connect to equipment. These hydraulic hose assemblies are used for hydraulic jacking applications with petroleum and water-based fluids, and they are suitable for extreme high-pressure applications. The hoses have a synthetic rubber tube and cover, and they are reinforced with two high-tensile steel wire braids and meets Flame Resistance USMSHA Designation. These assemblies come in both 1/4" and 3/8" ID. Each are assembled and labeled showing ID, length, and product specifications

Features

- 1/4" and 3/8" Male NPT fittings on each end
- Reinforced with two braids of high-tensile steel wire
- Attached fittings made of carbon steel and are zinc coated
- High-grade nitrile tubes
- Flexible and durable hydraulic hose
- All hoses assembled and regularly tested for quality in house
- Meets Flame Resistance USMSHA Designation
- For extreme high pressure hydraulic lines and jacking systems
- Has a black polychloroprene cover

HYDRAULIC FITTINGS

JIC Hydraulic Fittings (M32, M33, M52)

Milton®'s Hydraulic Joint Industry Council (JIC) industrial hose fittings provide an ease of assembly, a wide range of fittings that can connect to any foreign or American port, and can expand or reduce between any size which grants extensive use across markets. For hydraulic high-pressure applications, the Society of Automotive Engineers (SAE) recommends using a 37° cone, commonly known as JIC. This cost-effective line is permanent and come already crimped (one-piece) for easy installation. All our JIC fittings are SAE J514 compliant

Female JIC 45° Bend						
Part No.	Thread	Hose ID	Length (in)	Width (in)	Height (in)	Port Connection

ORFS Hydraulic Fittings (M35)

Milton®'s Hydraulic O-Ring Face Seal (ORFS) industrial hose fittings are cost-effective, permanent, and they come as a crimp-style (one piece) fitting. ORFS fittings are becoming the most popular international fitting type used on global OEM machines due to their high level of sealing and their good vibration resistance. The female fittings have flat faces and straight threaded UNF swivel nuts. The male fittings have the O-ring in a groove in the flat face. All our ORFS fittings are ISO 121-51-1 / ISO 8434-3 / SAE J1453 compliant

Female ORFS Double Hexagon						
Part No.	Thread	Hose ID	Length (in)	Width (in)	Height (in)	Port Connection

HYDRAULIC FITTINGS (cont)

Metric Hydraulic Fittings (M34, M55)

Milton®'s Hydraulic Metric fittings seal using angled sealing surfaces (metal-to-metal) and are designed to deliver a leak proof seal. We have a limited offering of metric fittings available in the light (L) series and they come already crimped (one-piece) for easy installation. Our Industrial Metric fittings are highly resistant to vibration and create a strong, reliable, leak-free connection. Their cutting ring design dampens the effects of the vibration to your hydraulic systems. Milton® Metric Hydraulic fittings are compatible with petroleum-based hydraulic fluids and lubricating oils and with phosphate-ester-based hydraulic fluids. Perfect for following applications: constant working pressure, high temperature, low temperature, suction and return. All our metric fittings are DIN 2353 / DIN 3865 / ISO 8434-1 compliant

All female metric light fittings are ISO DIN 3865 compliant

Female Metric Light Straight

NPT Hydraulic Fittings (M37)

Milton®'s Hydraulic National Pipe Thread (NPT) industrial hose fittings are a cost-effective line of permanent crimp-style (one piece) hydraulic fittings. An NPT pipe thread is your classic tapered thread fitting that is used widely in hydraulic and pneumatic systems. It is recommended to use Teflon tape or pipe thread sealant to prevent leakage with any pipe thread fitting. The taper on NPT threads allows them to form a seal when torqued as the flanks of the threads compress against each other, as opposed to parallel/straight thread fittings, or compression fittings, in which the threads merely hold the pieces together and do not provide the seal. All our NPT fittings are SAE J516 compliant

Male NPT						
Part No.	Thread	Hose ID	Length (in)	Width (in)	Height (in)	Port Connection
M37-C00-4-4	1/4-18	1/4"	2.11	0.59	0.75	1/4"

M37-C00-8-8	1/2-14	1/2"	2.66	0.87	0.87	1/2"

HYDRAULIC FITTINGS (cont)**Hydraulic Flanges (Flange Heads and Split Flanges) (M50, M51, M53, M54)**

Milton®'s Hydraulic Code 61 & Code 62 Flanges are a cost-effective line of permanent crimp-style (one piece) industrial hydraulic fittings. We offer both code 61 (3,000 PSI) and code 62 (6,000 PSI) flanges. All our flanges are SAE J518 / ISO 6162-1 / ISO 6162-2 compliant. We offer both the flange head and the split flange as two separate part numbers for ease of ordering

All Hydraulic flanges are SAE J518 compliant

HYDRAULIC COUPLERS

3/8" High Flow Hydraulic Coupling (M42)

This 3/8" NPTF high flow coupling, with its threaded union locking system and precision check valves, is designed for extreme high-pressure applications, such as portable hydraulic jacks. Our couplings include a dust cap for protection against dust and debris when not in use and are ISO 14540 compliant.

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M42-06HFCFP	3/8"	Female	Poppet	9.25	10,000	YES
M42-06HFCMP		Male				
M42-06HFCSP		Complete Set (M & F)				

Flush Face Hydraulic Couplings (M43, M47, M48)

Flush face couplers are widely used in the public utility market where hydraulic oil spillage can be a serious safety hazard. These couplers are used for the quick change of hydraulic tools in a variety of industries. Our couplings include a dust cap for protection against dust and debris when not in use and are ISO 16028 compliant

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M43-06FFCF	3/8"	Female	Flush Face	5.9	5,000	YES
M43-06FFCM		Male				
M43-06FFCS		Complete Set (M & F)				

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M47-12FFCF	3/4"	Coupler	Flush Face	28.0	5,000	YES
M47-12FFCM		Plug				
M47-12FFSF		Complete Set (M & F)				

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M48-08FFCF	1/2"	Coupler	Flush Face	12.0	5,000	YES
M48-08FFCM		Plug				
M48-08FFCS		Complete Set (M & F)				

HYDRAULIC COUPLERS (cont)**3/8" Speedy Hydraulic Coupling (M44)**

These 3/8" NPTF quick-connect speedy couplers and plugs are suitable for medium-duty applications. They quickly allow the disconnection and reconnection of your equipment from our coupler, maximizing your efficiency in all aspects. Our speedy coupling would typically be used in a situation where the coupling needs to be changed out one or more times a week. This coupling is ISO 14540 compliant

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M44-06SPCFP	3/8"	Female	Poppet	5.9	10,000	YES
M44-06SPCMB		Male				
M44-06SPCSP		Complete Set (M & F)				

1/4" Regular Flow Hydraulic Coupling (M45)

This 1/4" NPTF regular flow coupling is used for the quick disconnection and reconnection of hydraulic lines and comes with a ball valve providing a metal-to-metal seal between the ball and coined seat. This coupling is ISO 14540 compliant and is machined from solid steel barstock for durability

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M45-04RFCFB	1/4"	Female	Ball	2.9	10,000	YES
M45-04RFCMB		Male				
M45-04RFCSB		Complete Set (M & F)				

1/4" Spin-On Hydraulic Coupling (M46)

This 1/4" NPTF Spin-On hydraulic coupling is for use with torque wrenches and has a locking ball valve. Our couplings include a dust cap for protection against dust and debris when not in use. The interface seal on this coupling is polyurethane, which resists high pressure extrusion, and is ISO 14540 compliant

Part No.	Size NPT	Connection	Valve Type	Capacity (GPM)	Operating PSI	Dust Cap?
M46-04SOCFB	1/4"	Female	Ball	2.9	10,000	YES
M46-04SOCMB		Male				
M46-04SOCSB		Complete Set (M & F)				

WARRANTY INFORMATION

- **Couplers and Fittings:** 1-Year Limited Warranty
- **Hose Assemblies:** 2-Year Limited Warranty

ISO/SAE CERTIFICATION

- All our Hydraulic Couplings are either ISO 14540 or ISO 16028 compliant
- **SAE 100R2AT**, also called DIN EN 853 2SN hydraulic hose, is suitable for engineering machinery and continuous working hydraulic equipment.
Meets Flame Resistance USMSHA Designation
- **SAE 100R16** Recommended for high pressure hydraulic oil lines where extra flexibility is required. Meets or exceeds requirements of SAE 100R16 EN 857 2 SC. Meets Flame Resistance USMSHA Designation
- **Jack Hose Assemblies** Recommended for extreme high pressure hydraulic lines and jacking systems. Meets Flame Resistance USMSHA Designation
- All of our JIC fittings are SAE J514 compliant
- All of our ORFS fittings are ISO 121-51-1 / ISO 8434-3 / SAE J1453 compliant
- All of our metric fittings are DIN 2353 / DIN 3865 / ISO 8434-1 compliant
- All of our NPT fittings are SAE J516 compliant
- All of our flanges are SAE J518 / ISO 6162-1 / ISO 6162-2 compliant

COUPLER/PLUG STYLES

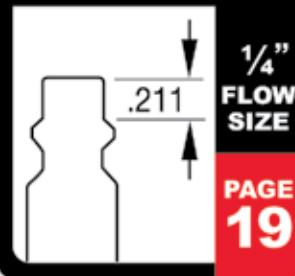

- Milton® offers 11 different automotive & industrial styles
- Most styles are not interchangeable. However, couplers & plugs within the same style, from most manufacturers, will work together
- Milton®'s "Match-Up System" ensures that all couplers and plugs with the same letter code can be used together regardless of thread size
- Milton®'s 3-way couplers (page 16) simplify the process by working with A, M® & T style plugs
- Milton®'s 5 in ONE™ universal couplers (page 15) are the ultimate in versatility. They securely connect with A, M®, T, V & L style plugs
- Couplers & plugs are not D.O.T. certified

WARNING: FOR USE WITH COMPRESSED SHOP AIR ONLY. NOT FOR BREATHABLE AIR USE

AIR HANDLING CAPACITY

- Basic Flow Size defines the air flow capacity
- Please do not confuse Basic Flow Size with Thread Size
- Thread Size is not directly related to air flow capacity in any way

**DEFINITION OF TERMS****DRAG GUARD**

Protects couplers from accidental disconnection

PUSH-TYPE

Eliminates need to retract coupler sleeve to connect. Convenient and time saving option

PUSH-ON & LOCK

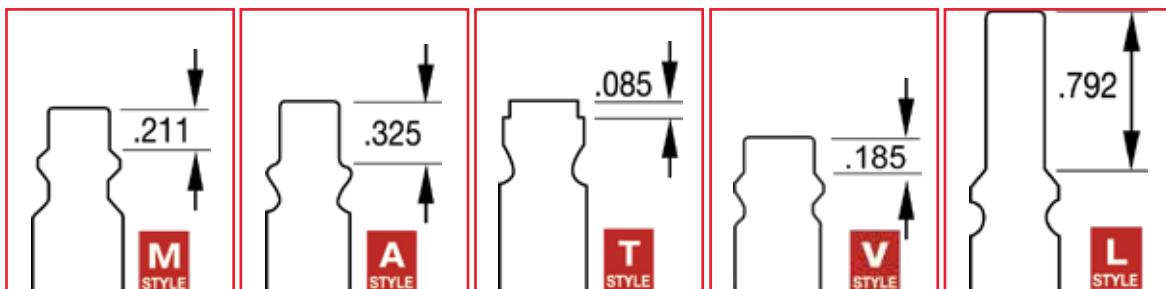

Push cut hose onto hose barb. Locks hose in place. Only for use with Push-on & Lock hose on page 36

RE-CAP

Recap plugs screw directly onto tire valves to allow for direct coupler connection and faster pressurization

STRAIGHT THRU PRESSURE WASHER COUPLERS & PLUGS

Application: high pressure washers & industrial carpet cleaning

- Warning: Straight thru couplers are not to be used in hydraulic applications
- Straight thru couplers are brass with stainless steel balls and spring
- 1/4" couplers - 6 ball bearing connection
- 3/8" couplers - 8 ball bearing connection
- Straight thru plugs are case hardened steel, plated to resist rust
- Compatible with other major manufacturers of straight thru couplers

TWIST-LOCK UNIVERSAL COUPLERS

- Warning: Twist lock couplers are not for steam or hydraulic applications
- Commonly used with jack hammer hoses
- Twist lock couplers are made from malleable iron
- Commonly referred to as "Crowfoot", "Claw" type or "Chicago" couplers
- Milton® twist lock couplers come complete with safety clip and lanyard
- Maximum working pressure: 150 PSI
- Maximum temperature: 160°F
- 1860 series Universal/Chicago style coupler 1/4" to 1" couplings can be used with each other. 1 1/4", 1 1/2" and 2" cannot be used with the smaller sizes
- Application: Construction, highway maintenance, mobile compressors, mining, agriculture

EPDM RUBBER AIR HOSE

1628-1 1633
1630 1634
1631 1635
1632 1636

Deluxe heavy duty EPDM rubber is designed for tough service station and shop applications. Kink resistant and flexible in extreme temperatures, resists abrasion, weathering and ozone. Assembled with brass fittings, bulk hose comes without fittings in either a dispensing box or handy reel. Individually boxed. Limited oil resistance

- Maximum working pressure: 250 PSI
- Burst pressure: 1000 PSI
- Working temperature: -40°F to 190°F (-40°C to 87°C)
- Material: EPDM rubber tube & cover spiral synthetic yarn reinforcement
- Color: red

PVC AIR HOSE

1642
1643
1644
1645

Lighter in weight than standard air hose. Use with compressed air, water and/or mild chemicals. Resistant to oil, gasoline, abrasion and ozone. Assembled with brass fittings (excluding 1642-500BK bulk hose)

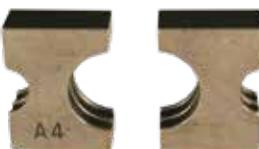

- Maximum working pressure: 250 PSI
- Working temperature: -10°F to 158°F (-23°C to 70°C)
- Material: thermoplastic PVC blue cover, PVC tube
- Spiral synthetic yarn reinforcement
- Color: blue

HOSE FERRULE CRIMPING TOOL & DIE

1626

1626-1

This tool makes professional quality hose assembly fast and easy. Crimps ferrules on hose ranging from 1/4" single braid to 3/8" two braid hose. Made of high strength ductile iron casting has 5 hardened steel ribbed dies ready for instant use. Can be bench-mounted or used as a portable tool at the job site

PUSH-ON & LOCK ON AIR HOSE

1627-100 1629-100
1627-250 1629-250
1627-500BK 1629-500BK

Made of strong, flexible Nitrile with spiral synthetic yarn reinforcement. Resists oil, gasoline, abrasion and ozone. Highly resistant to petroleum based hydraulic oils. No clamps or ferrules needed, just cut hose to desired length and push on fitting. Ideal for automotive paint shop, construction, manufacturing and petrochemical industries. Use with compressed air, water and petroleum based solvents. Fittings are not included with bulk push and lock hose

- Maximum working pressure: 250 PSI
- Burst pressure: 1000 PSI
- Working temperature: -20°F to 210°F (-29°C to 100°C)
- Color: black

INDUSTRIAL GRADE AUTO-RETRACTING DUAL-ARM HOSE REELS

- Extra heavy duty 18 gauge powder coated steel for extra durability.
- Super-strong upgraded base
- Industrial grade spring mechanism
- Adjustable guide arms
- Premium, ultra light, flexible EPDM rubber hose for industrial applications
- Hose flexibility temperature range: -50°F to 190°F (-45°C to 88°C)
- Oil, UV and ozone resistant hose
- Wall, ceiling and floor mountable
- Includes reducer bushing for added user flexibility

**3 YEAR
LIMITED
WARRANTY**

140° Swivel Industrial Hose Reel Base

- Can only be used in conjunction with Industrial Grade Hose Reels
- Heavy-Duty, 18-gauge steel construction
- Mounts between hose reel and mounting surface
- Allows hose reel to freely move side to side with 140° range of motion, reducing side load stress on rollers

Part No.	Description
2770-SWIV	140° Swivel Hose Reel Base

AEROBLADE™

AEROBLADE™ 24" Blow Tool

- 90° airflow blow tool focuses air output where it's needed
- Long 24" extended nozzle for hard-to-reach areas
- Great for cleaning radiators, condensers and filters
- Works well for agriculture, construction, automotive, industrial, stationary power, and other industries that require a powerful, multi-port nozzle to clean machinery and heavy-duty vehicles
- Focused high-pressure output of 24 CFM - **5x more flow** as similar products
- Industrial-grade aluminum tubing and heavy-duty, red anodized die-cast body makes this blow tool ideal for the toughest applications

Retail Part No.	Per Card	Max Inlet Pressure	CFM @ 100 PSI	Air Inlet	Nozzle Length	Body Material	OSHA Compliant
158-AB24	1	150 PSI	24	1/4" NPT	24"	Zinc Alloy	No

ADJUSTABLE ALUMINUM POCKET BLO-GUNS

- Easy grip two finger control to adjust from full volume air flow to complete shut off
- Knurled grip for secure handling even with oily or greasy fingers
- Always keep one handy with included shirt pocket clip

Bulk Part No.	Retail Part No.	Per Card	Connection	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Body Material	OSHA Compliant

SAFETY BUTTON BLO-GUN

107

- OSHA compliant when dead ended (static pressure)
- Compact, hand-held unit can be used anywhere with compressed air

Boxed Part No.	Retail Part No.	Per Card	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
107	s-107	1	150 PSI	11.4	1/4" NPT	5/16"-24	Zinc	YES

LEVER BLO-GUNS**Compact Lever Blo-Gun**

148

Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
148BK	s-148	1	150 PSI	1/4" NPT	1/8"-27	Zinc	YES (with Venturi Tip Only)

Safety Lever Blo-Gun

120

- OSHA compliant when dead ended (static pressure)
- For use with extensions and other 1/8" NPS attachments
- Extra large hang-up hook for easy storage

Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
120BK	s-120	1	150 PSI	10.6	1/4" NPT	1/8"-27	Zinc	YES

LEVER BLO-GUNS (cont)

Extended Safety Lever Blo-Guns

- OSHA compliant - Four safety by-pass holes allow air to escape if end is blocked
- By-pass holes do not interfere with normal air flow
- Discharges same air volume as full-flow blo-guns, while maintaining nozzle pressure
- #133 & #134 bent to an angle to clean out blind holes and offer convenient use on long reach applications

Boxed Part No.	Max Inlet Pressure	Nozzle Length	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material
131	150 PSI	4" Straight	5.5	1/4" NPT	1/2"-27	Zinc Alloy
133		10" Angled				
134		15" Angled	4.5			

Classified by UL to OSHA standards 29CFR1910.95 and 29CFR1910.242(b)

Volume Safety Lever Blo-Gun

132

- Special Venturi holes in extension tube greatly increase air volume while maintaining OSHA required nozzle pressure
- Venturi holes allow air to escape if extension end is blocked

Boxed Part No.	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
132	150 PSI	18.0	1/4" NPT	1/2"-27	Zinc Alloy	YES

Classified by UL to OSHA standards 29CFR1910.95 and 29CFR1910.242(b)

Super-Volume Safety Lever Blo-Gun

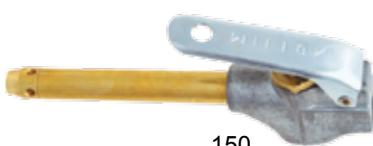

149

- Special Venturi holes in extension tube greatly increase air volume while maintaining OSHA required nozzle pressure
- Venturi holes allow air to escape if extension end is blocked
- Aluminum nozzle extension

Boxed Part No.	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
149	150 PSI	23.6	1/4" NPT	1/2"-27	Zinc Alloy	YES

Full-Flow Safety Lever Blo-Gun

150

- OSHA compliant when dead ended (static pressure)
- Full flow control

Boxed Part No.	Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
150	150BK	s-150	1	150 PSI	10.0	1/4" NPT	7/16"-27	Zinc	YES

LEVER BLO-GUNS (cont)

Control Valve

151

- Lever control 2-way valve for use on air, fluid & vacuum lines
- Perfect for tire changing machines
- Stainless steel spring, synthetic washer
- Max temperature: 200°F

Boxed Part No.	Bulk Part No.	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Air Outlet	Body Material	OSHA Compliant
151	151BK	150 PSI	24.5	1/4" NPT	1/4" NPT	Zinc Alloy	No

Rubber Tip Lever Blo-Guns

153

s-154

- Rubber tip blo-guns are perfect to use where leak proof connection is required when blowing out fluid lines

- Non-marring rubber tip protects from damaging molds or painted surfaces

Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Nozzle Angle	Body Material	OSHA Compliant
153BK	s-153	1	150 PSI	11.4	1/4" NPT	1/8"-27	Straight	Zinc	No
	s-154	1					45° Angle		

Extended Reach Lever Blo-Guns

158

159

- Multi-function blo-gun comes with both a Venturi nozzle and rubber tip nozzle
- OSHA compliant when using Venturi tip
- Extension is bent to access hard to reach areas such as motors, machinery, transmissions, combines, and hidden areas

Bulk Part No.	Retail Part No.	Per Card	Extension Length	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant
158BK	158	1	2'	150 PSI	Venturi Tip - 10.5	1/4" NPT	7/16"-27	Zinc	YES (with Venturi Tip Only)
159BK	159	1			Rubber Tip - 11.6				

SIPHON BLO-GUNS

Siphon Spray Lever Blo-Gun & Kit

s-156

157

For Use
with
Liquids

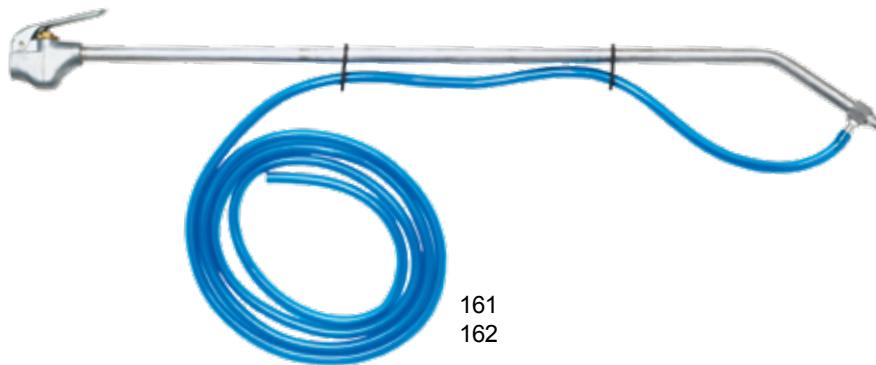

Boxed Part No.	Retail Part No.	Per Card	Max Inlet Pressure	SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	OSHA Compliant	8' of Tubing

PISTOL GRIP BLO-GUNS

Die Cast Pistol Grip Blo-Gun

- Pistol style multi-use blo-gun
- Accepts Milton® #122 (6") and #123 (10") extensions (see page 54) and other 1/8" NPS attachments
- OSHA compliant with use of included Venturi tip
- Integrated hang hook for ease of storage

160

Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	Product Specs				OSHA Compliant
				SCFM @ 100 PSI	Air Inlet	Nozzle Thread	Body Material	
160BK	s-160	1	150 PSI	10.0	1/4" NPT	1/8"-27	Chrome Plated Zinc (with Safety Tip Only)	YES

PISTOL GRIP BLO-GUNS (cont)

TURBO PISTOL GRIP BLO-GUNS

- Meets OSHA standard 1910.242(B)
- Aluminum body is lightweight and durable
- Maximum flow for easy clean-up and blow off of even the heaviest debris
- Simple trigger-controlled air flow

Turbo Pistol Grip Blo-Gun

- Includes adjustable nozzle and integrated hang hole
- Nozzle thread: 1/2"-27

Retail Part No.	Per Card	Max Inlet Pressure	Product Specs			
			SCFM @ 125 PSI	Air Inlet	Body Material	OSHA Compliant
s-181	1	230 PSI	42.0	3/8" NPT	Aluminum	YES

Turbo Extended Reach Pistol Grip Blo-Gun

- Includes adjustable nozzle and integrated hang hole
- Nozzle thread: 1/2"-27

Retail Part No.	Per Card	Max Inlet Pressure	Product Specs			
			SCFM @ 125 PSI	Air Inlet	Body Material	Nozzle Length
s-182	1	230 PSI	40.0	3/8" NPT	Aluminum	10"

3-pc Turbo Blo-Gun Nozzle Kit

Adjustable High-volume Fan spray

- For use with s-181 and s-182 turbo blo-guns
- Thread size: 1/2"-27

Part No.	s-183
Qty	Description
1	Adjustable Nozzle
1	High-Volume Nozzle

PISTOL GRIP BLO-GUNS (cont)

**Pro Series Pistol Grip Blo-Gun Kit
w/ KWIK-CHANGE® Universal Tip System**

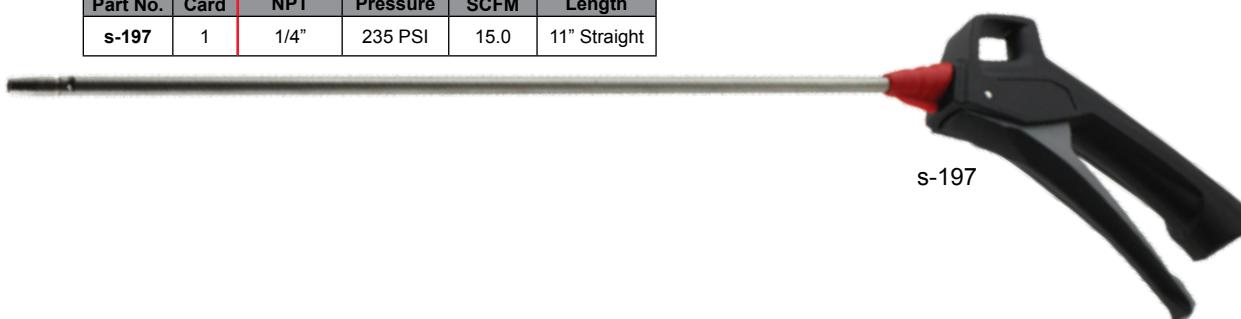

- PRO SERIES pistol grip blo-gun kit comes complete with our KWIK-CHANGE® Universal Tip System. This system connects any 1/8" NPS or 6mm blo-gun tip accessory to your blo-gun using our universal adapter
- Kit includes (1) #s-168ADP adapter, (1) #s-168RUB rubber tip and (1) #s-168VEN Venturi safety tip
- Heavy-duty, light weight design for ease of use
- OSHA compliant safety tip
- Dual material comfort grip w/ integrated hang loop
- Stainless steel nozzle

Retail Part No.	Per Card	NPT	Max Pressure	SCFM	Nozzle Length
s-194KIT	1	1/4"	235 PSI	15.0	5" Angled

**Pro Series Extended Reach Pistol Grip Blo-Gun**

- PRO SERIES extended reach pistol grip blo-gun is compatible with the #s-168 KWIK-CHANGE® Universal Tip System (not included, see pg 56)
- Heavy-duty, light weight design for ease of use
- OSHA compliant safety tip
- Dual material comfort grip w/ integrated hang loop
- Stainless steel 11" extended reach nozzle

Retail Part No.	Per Card	NPT	Max Pressure	SCFM	Nozzle Length
s-197	1	1/4"	235 PSI	15.0	11" Straight

PISTOL GRIP BLO-GUNS (cont)

Pistol Grip Blo-Gun Kit w/ KWIK-CHANGE® Universal Tip System

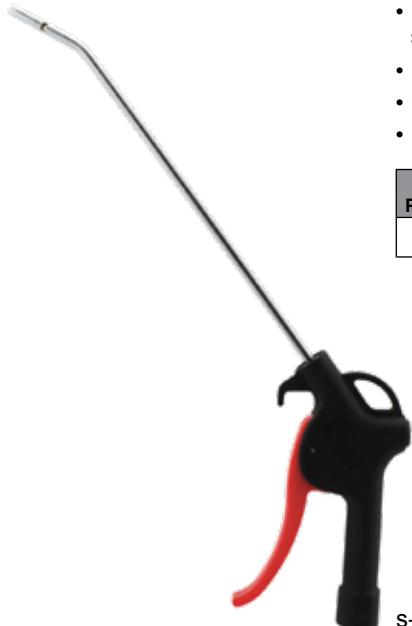

- Pistol grip blo-gun kit comes complete with our KWIK-CHANGE® Universal Tip System. This system connects any 1/8" NPS or 6mm blo-gun tip accessory to your blo-gun using our universal adapter
- Kit includes (1) #s-168ADP adapter, (1) #s-168RUB rubber tip and (1) #s-168VEN Venturi safety tip
- Lightweight design for ease of use
- OSHA compliant safety tip
- Molded comfort grip w/ integrated hang hook and loop

Retail Part No.	Per Card	NPT	Max Pressure	SCFM	Nozzle Length
s-174KIT	1	1/4"	90 PSI	16.5	4" Angled

Extended Reach Pistol Grip Blo-Gun

- 10" extended reach pistol grip blo-gun is compatible with the #s-168 KWIK-CHANGE® Universal Tip System (not included, pg 56)
- Lightweight design for ease of use
- OSHA compliant safety tip
- Molded comfort grip w/ integrated hang hook and loop

Retail Part No.	Per Card	NPT	Max Pressure	SCFM	Nozzle Length
s-167	1	1/4"	90 PSI	16.5	10" Angled

11" Extended Reach Pistol Grip Blo-Gun

- Bent 11" nozzle allows direct access to hard to reach places
- Non-marring plastic tip, and integrated hang hook for storage

Retail Part No.	Per Card	Max Inlet Pressure	Product Specs				
			SCFM @ 100 PSI	Air Inlet	Body Material	Nozzle Length	OSHA Compliant
s-177	1	125 PSI	11.0	1/4" NPT	Nylon	11"	No

PISTOL GRIP BLO-GUNS (cont)

Pistol Grip Blo-Gun

s-163

- Simple, functional, economical
- 4" angled nozzle
- Integrated hang hook and loop

Retail Part No.	Per Card	NPT
s-163	1	1/4"

Rubber Tip Blo-Gun

s-164

- 4 1/2" angled nozzle
- Non-marring rubber tip
- Brass insert inlet
- Integrated hang hook and loop
- Contoured comfort grip

Retail Part No.	Per Card	NPT
s-164	1	1/4"

BLO-GUN ACCESSORIES

Brass Blo-Gun Extensions

122

123

- Fits MILTON® blo-gun models #120, #160, or any other 6mm or 1/8" NPS nozzle blo-gun using the #s-168ADP KWIK-CHANGE® accessory adapter

Bulk Part No.	Nozzle Thread	Extension Length
122	1/8"-27	6"
123		10"

Rubber Tip Nozzle

152

- Replacement tip for #153, #154, #158 and #159 blo-guns
- For use where leak-proof connection is required when blowing out fluid lines
- O-ring seals create an air-tight connection
- A must where metal tip could mar delicate finish in molds or paints

Boxed Part No.	Bulk Part No.	Retail Part No.	Per Card	Max Inlet Pressure	Nozzle Thread	Product Specs Body Material	OSHA Compliant
152	152BK	s-152	1	150 PSI	1/8" - 27	Nitrile Rubber	No

BLO-GUN ACCESSORIES (cont)

Siphon Spray Blo-Gun Nozzle

- O-ring seal creates air-tight connection
- Connects blo-gun to siphon tubing
- Dual thread design permits use on all blo-guns with 7/16"-27 and 1/8" NPS

Boxed Part No.	Nozzle Thread	Product Specs	
		Body Material	OSHA Compliant
155	7/16"-27 and 1/8" NPS	Aluminum	No

For Use with Liquids

Blo-Gun Silencer

- Fits all 6mm blo-gun nozzles
- Reduces decibel (db) levels up to 15% - meets OSHA compliancy when dead headed (static pressure)
- Soft non-marring silencer tip prevents damage to work surface

Retail Part No.	Per Card	Nozzle Diameter
s-160SIL	1	6mm

Blo-Gun Deflector Shield

- Polycarbonate deflector shield reduces accidental blow back
- Fits any blo-gun with 6mm diameter nozzle
- Set screw secures deflector shield to nozzle

Retail Part No.	Per Card	Nozzle Diameter
s-160CHIP	1	6mm

X5 AIR MULTIPLIER™ Blo-Gun Nozzle

- Fits ANY 6mm or 1/8" NPS screw-on blo-gun nozzle
- Multiplies CFM output by drawing in outside air

Retail Part No.	Per Card	NPS	Material
s-160X5A	1	1/8" NPS or 6mm	Aluminum
s-160X5P	1	6mm	Plastic

FILLER FAUCETS & WATER NOZZLES

- Easy operation and smooth flow due to long flexible rubber spout with lever control
- Heavy duty, ruggedly built with stainless steel springs
- Operating pressure (standard municipal (city) water pressure): 30-35 PSI
- Nitrile rubber spout
- Spout length: 4"
- Water nozzles - bend the nozzle for water flow, release nozzle and water stops

Filter/Regulator & Lubrication Systems... A simple guide

MICRO FILTERS

What are they? Where are they installed? Why would you spend the \$ to buy them?

First off, air leaving a compressor is hot, dirty and wet ... All elements that can damage and WILL shorten the life of expensive equipment and tools. That is why it is essential to protect your investments. Let's talk FILTERS first- Water vapor is the MORTAL enemy within a pneumatic system. The airline filter cleans this compressed air in two important stages:

First Stage - Air entering the filter is directed downward and with the resulting vortex action, liquids and particles are forced to the bowl wall and then extracted.

Second Stage - Air flows inward through the filter element where additional contaminants (as small as 4 microns) are removed with little pressure loss.

REGULATORS

PRESSURE REGULATOR component. These reduce as well as control the air pressure in compressed air systems....maintaining an optimal and constant output pressure no matter the input pressure variations. Some of the applications include air tools, blow guns and aerosol lubrication systems.

Why is this important?

- 1) Allows for precise downstream pressure control.
- 2) Built-In safety piston diaphragm assembly automatically vents excess air in the event the downstream pressure exceeds the desired regulator setting.

This prevents excessive pressure from reaching your tools. Excessive pressure causes tools and seals to overwork which can cause over-speeding of the tools' internal mechanisms. Both will decrease the life of your tools.

LUBRICATORS

LUBRICATION element. Truly a key factor in ensuring consistent operation of the tools. It adds a set quantity of oil into the compressed air system reducing moving component friction. How? Pressurized air is introduced and guided through the body where it turns into a smooth aerosol providing the needed lubrication to the working tools. This is critical to air tool life extension.

Additional Value-Add FRL Options

PIGGYBACK FILTER/REGULATOR SYSTEMS

All in one. Modular design provides extra space while reducing the overall weight load and saving time.

COALESCING FILTER SYSTEMS

Designed for applications that require air free of oil, water and foreign particles. It is best to locate these as close as possible to the actual tool. This is recommended for precision tools and actuators.

DESICCANT DRYER SYSTEMS

Primarily for more heavy duty operations where any amount of moisture may cause an issue, or operations where extremely dry air is necessary.

More commonly found in a wide range of industrial and commercial facilities.

Desiccant dryers are placed after both Micro Filters and Coalescing Filters, in order to allow the desiccant pellets to absorb effectively.

Note - These cannot be used with a lubricating system. Perfect for spray painting applications, or applications where small amounts of moisture may cause issues.

FRL Fun Facts

Air Compressor Compatibility: Big or small, our FRL systems will work with whatever pressure your air compressor provides.

Component Size

Mini - To be used closer to machinery or tool/application

Standard - For traditional use in home garage, small workshop or DIY application.

Heavy Duty - High flow system that is placed closer to compressor... for larger shop applications

SCFM - Standard Cubic Feet Per Minute

Regarding your FRL selection, SCFM only matters when it comes to the application. The SCFM rating of your air compressor is only the speed at which air enters a storage tank. Most pneumatic tools use air much faster than most air compressors can produce it.

EXAMPLE:

- Actual air tool usage is 4 to 5 times the "average SCFM rating" because you aren't using a tool all the time. However, to get the most out of the tools, it's best to have the air system capability CFM higher than the tools you plan to use. For example a ½" impact wrench can use as much as 35 SCFM, so make sure all the components upstream of that tool flow an amount of air greater than the tool. 2x if you plan to run two tools.
- 140 CFM (Auto shop, large workshop or an area that utilizes multiple locations)
- 247 CFM (Auto shop, large workshop or an area that utilizes multiple locations)

Applications

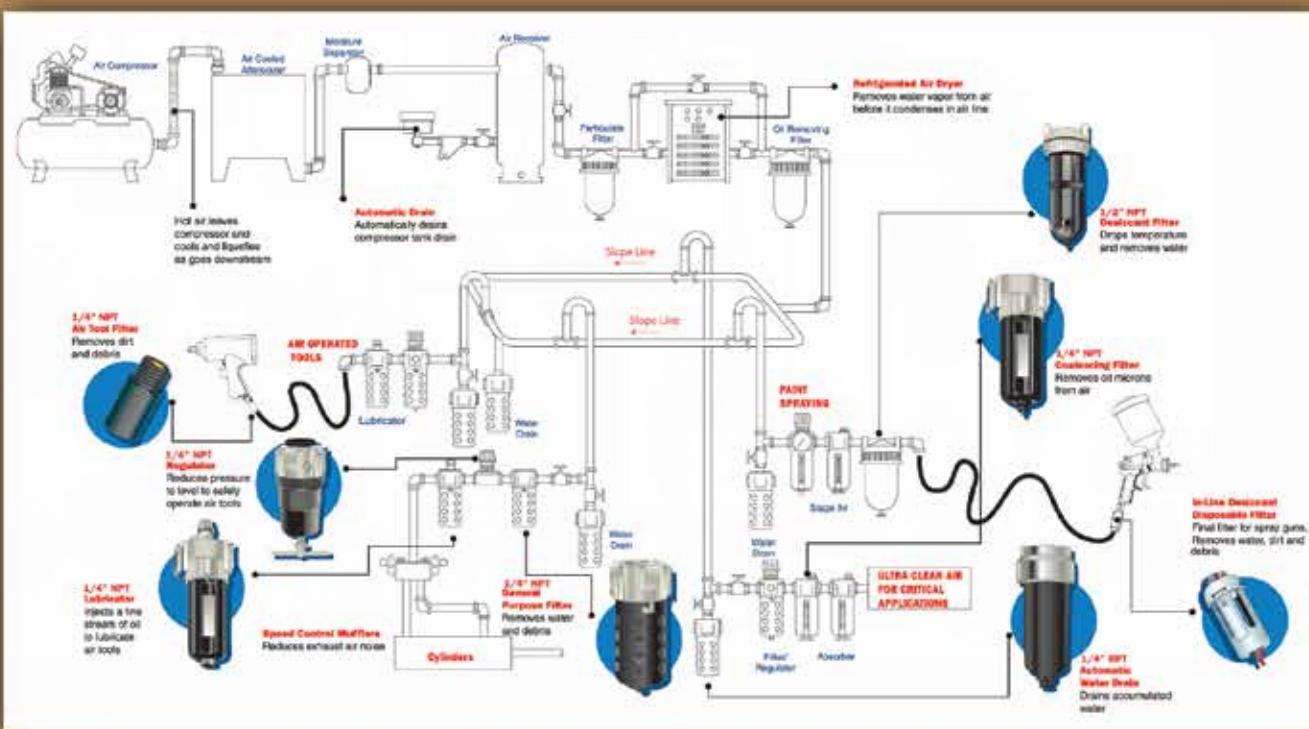

- Filter** - Critical for every application to ensure the elimination of water and particulates from your airline, machinery and tools
- Pressure Regulator** - The pressure regulator provides uniform controlled pressure to the system and ultimately the tools. The pressure in the air compressor tank rises and falls with usage and pump cycling. The air pressure regulator isolates the system from this and delivers air at a consistent pressure.
- Lubricator** - In-line lubrication takes the human element out of lubricating air tools. The tool is automatically lubricated to ensure long life from the tool. Lubricated air lines and hoses should be segregated to prevent cross contamination. General use air lines, for inflation, cleaning or painting should never have in-line lubrication.

TECH TIPS

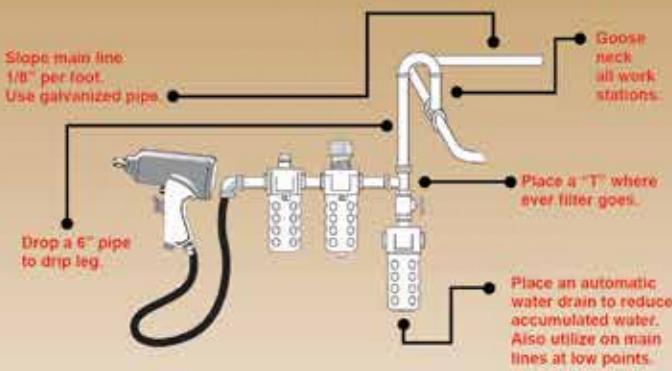

Building An Efficient Air System

Compressed air powered equipment and machinery are critical elements in the productivity, efficiency, and economy of today's industry and quality air is the essential element. Water and dirt cause more problems in compressed air lines than anything else. High speed pneumatic production lines operate efficiently because of air dryers and filters that remove moisture and impurities from the air, which results in eliminating downtime. Regulators and lubricators can be added to control and lubricate downstream equipment. A good air system is the key to saving time, money and to operating at maximum efficiency.

5 Important Steps to an Air System Set-Up

- 1** Main line filter and regulator should be placed at least 20 feet from the compressor. The air will cool down, allowing much of the water vapor to condense naturally for removal by filtration.
- 2** Main line piping should slope down from point of origin by 1/8" per foot. Any water in the line will flow down to the lowest point for draining.
- 3** All line drops (work stations) should be taken from the top of the main line. This prevents water from flowing into branch lines.
- 4** Galvanized pipe is recommended when building an air system.
- 5** Follow illustration to the right when building a work station drop.

MICRO FILTERS

- All filters supplied with pre-assembled automatic overnight drains
- 3 stage baffle system for exceptional moisture removal
- 40 micron bronze sintered elements allow less pressure drop, longer cleaning intervals, and are cleanable
- Light weight aluminum die-cast housing
- Micro filters remove harmful oil-water condensate, pipe scale, dirt and rust from compressed air systems
- Install micro filters upstream from regulators to protect against valve and diaphragm failure
- Micro filters are used as pre-filters to coalescing filters to insure high efficiency and long element life in applications such as spray painting, instrumentation and pharmaceuticals

Mini Filters

1144M
1144-2

Ideal for use in compact low air flow applications such as small pneumatic equipment, miniature valving and instruments

Part No.	1144-2	1144M	s-1144
NPT	1/8"		1/4"
Bowl Type	Metal Bowl		Poly Bowl
Bowl Capacity		1 oz	
Maximum Air Pressure	250 PSI		150 PSI
Maximum Air Flow	27 SCFM		
Operating Temp Range	40°F to 160°F	40°F to 120°F	
Included Filter	20 Micron Bronze Sintered		
Replacement Filters	See Below		
Sight Glass	No		N/A
Drain Type	Manual Petcock		Overnight

PRECISION REGULATORS

- Fully adjustable pressure
- Prevents overdriving tools
- Dial pressure gage and mounting brackets sold separately

Mini Regulators

- Low Pressure Regulators - Ideal for air flow applications that call for a compact unit where precise regulation is required
- Heavy Duty Regulators - Ideal for air flow applications that call for a compact unit, such as small pneumatic equipment, miniature valves and instrumentation
- Gage not included, but available as an accessory (see page 48 for gages)

Part No.	s-1146	1145-2	1145BK/s-1145
NPT	1/4"	1/8"	1/4"
Type	Low Pressure		Heavy Duty
Relieving Model	3-60 PSI		5-125 PSI
Maximum Pressure	250 PSI		
Operating Temps	40°F to 120°F		
Maximum Air Flow	25 SCFM		
Body Material	Zinc	Glass Filled Nylon	
Dial Gage	1/8" Center Mount Port (Sold Separately)		
Mounting Bracket	1160 (sold separately, pg 66)		

Part No.	Description
1145-1	Mini Regulator Repair Kit for 1145-2 and s-1146

Standard Regulators

The Milton® heavy duty and mid-size RELIEVING TYPE regulators offer stable down stream air pressure over a wide range of air flows with accurate control, fast response and minimal pressure drop. Offset 1/4" gage ports can also serve as two 1/4" supply lines, allowing up to three regulated full flow out ports. Gage not included, but available as an accessory

- Inlet pressure: 250 PSI
- Operating temperature: 40°F to 120°F
- Aluminum die-cast body
- Buna-N diaphragm and O rings
- Balanced piston, molded rubber seat
- Gage port: 1/4" NPT

Part No.	1113	1114	1115
NPT	1/4"	3/8"	1/2"
Type	Standard		
Relieving Model	5-125 PSI

INTERNAL FLOAT DRAIN

- For self-contained automatic discharge of water and contaminants from compressed air line
- Fits all sizes of Milton® filters, except for mini filters
- To use, replace where overnight drain is positioned

Part No.	Description
1168	Internal Float Drain for All Filters

PRECISION LUBRICATORS

Ideal for the customer who wants trouble-free protection and tamper proof reliability. Drip style allows precise setting and once adjusted, the adjusting knob can be removed to prevent tampering. Perfect for lubrication of air motors, tools, valves or where low air flow is encountered or where extremely fine adjustments are necessary.

- Sight glass dome on drip type allows observation for instant drip rate adjustment
- Tamper proof
- Lubricator may be filled without shutting down line pressure
- Oil supply tube check valve guarantees INSTANT START-UP LUBRICATION
- Low pressure drip at full air flow
- Oil delivered at an air flow as low as 2 SCFM
- Safety bowl guards or metal bowls
- All lubricators are drip type except the 1" which is a wick type

Mini Lubricators

s-1150

1150-1
1150M

A visible drip type lubricator with an external adjustment screw. Unit is designed for low air flow applications where space is a consideration. Requires approximately 1 CFM of air flow to deliver oil. Bypass system allows full air flow with minimum pressure drop. Assures proper air/oil mixture over full operating range.

DESICCANT DRYER SYSTEMS**1/2" Compact Desiccant Dryers**

Delivers extremely dry compressed air as low as -30°F dew point without using electricity or refrigerant. Easy to monitor, when color changes in the sight glass from dark blue to pink, then it is time to change or dry the desiccant. To dry desiccant, remove from unit, bake at 275°F for 3 hours. To prolong the life of the unit, a 40 micron pre-filter, and .03 coalescing filter should precede dryer. Initial supply of desiccant is included

COMPRESSOR OIL

High Performance Compressor Oil

1002-32

1002

- Provides exceptional wear, oxidation, and corrosion protection
- No-detergent formula minimizes foaming and separates from water easily
- For use in all oil-lubricated reciprocating air compressors
- Prevents formation of sludge and carbon deposits
- Works in cold down to -15°F (-26°C)

High Performance Conventional	
Part No.	Size (oz)
1002-32	32 (Qt)
1002	128 (Gal)

Premium Full Synthetic Compressor Oil

1002-32S

1002S

- All the performance of conventional compressor oil, plus...
- Even greater wear, oxidation, and corrosion protection
 - Maximum prevention of sludge and carbon deposit formation
 - Extreme all season low temperature performance down to -36°F (-38°C)

Premium Full Synthetic

AIR TOOL OIL**High Performance Conventional Air Tool Oil**

1001-32

1001

- Lubricates & protects air tools
- Improves performance & extends tool life
- Specially formulated for use in air tools & lubricators
- Reduces corrosion and rust
- Prevents formation of sludge deposits
- No-synthetic, anti-foaming formula
- Works in cold down to -25°F (-32°C)

High Performance Conventional	
Part No.	Size (oz)
1001-4	4
1001-16	16 (Pint)
1001-32	32 (Qt)
1001	128 (Gal)

Eco-Friendly High Performance Air Tool Oil

1001-4B

1001-16B

All the performance of conventional air tool oil, plus...

- Drastically reduces inhalation hazard compared to petroleum-based lubricants when air tools exhaust into your breathable space
- Eco-friendly, vegetable-based formula
- Works in cold down to -20°F (-29°C)

Eco-Friendly High Performance	
Part No.	Size (oz)
1001-4B	4
1001-16B	16 (Pint)

AIR TOOL CLEANER

1003-4

- Simply add to air tool inlet, allow 5 minutes to penetrate, run tool to remove excess cleaner, then re-lubricate
- Improves air tool performance
- Won't harm internal components and seals
- Makes old tools run like new again

Air Tool Cleaner	
Part No.	Size (oz)
1003-4	4

A-B-C Dimensions				
For Piggyback F/R Trios, Desiccant				
A = Diameter of unit				
B = Distance between center of port to top of unit				
C = Distance between center of port to bottom of unit				
B + C = Total height				

FRL MAXIMUM SCFM (STANDARD CUBIC FEET PER MINUTE) CHART

Charts below indicate maximum SCFM that FRLs can deliver and still provide maximum tool efficiency. Although ratings can be exceeded, the resulting increase in pressure drop may cause poor tool performance. Select an FRL that meets your SCFM requirements.

AIR TOOL SCFM CONSUMPTION CHART

This chart is a reference only to estimate air consumption for typical air tools when operated with compressed air system or air line system

SCFM	Air Tool Description
4 to 7	Wire & terminal assembly tools
8 to 13	1/4" capacity air drills
8 to 13	1/4" square drive impact wrenches & nut runners
8 to 13	Air screwdrivers to 1" dia (16 ft/lbs)
8 to 13	Small automotive orbital sanders
9 to 14	Impact tools (3/8" square drive)
10 to 13	High speed small air die grinders
13 to 15	Foundry casting scalers
14 to 17	Impact wrenches (1/2" square drive)
14 to 29	Foundry sand tampers
15 to 20	Reciprocating files and reciprocating saws
19 to 20	Impact tools (5/8" square drive)
21 to 23	Air screwdrivers (to 23 ft/lbs)
22 to 34	Impact tools (3/4" square drive)
23 to 35	Foundry casting cleaners
25 to 27	Standard back fill tampers
24 to 30	Horizontal 2" small air grinders
27 to 32	Foundry casting chippers
34 to 60	Impact tools (1" square drive)
36 to 39	Medium cup brush wheel grinders (7" wheel) 1 HP
35 to 40	Disc sanders (7") 1 HP
39 to 42	Medium duty (4" wheel) horizontal grinders
48 to 65	Heavy duty (6" wheel) horizontal grinders
60 to 65	Large cup brush wheel vertical grinder (7" wheel) 2 HP

F-R-L APPLICATION CHART

For peak performance and maximum service life use this chart to match the correct Milton® filter, regulator or lubricator with the size of the air compressor

MODULAR F-R-L ACCESSORIES

Modular Connector Insert

s-1163-3

- One size works with all NPT ports
- Modular design allows for ease of component connection and replacement
- Easily connects all standard Milton® FRL components (will not work with ExelAir™ FRL components)

Part No.	Port Size
s-1163-3	One Size Fits All

OSHA 3-Way Lockout Valves

s-1163-6

- Exhausts downstream pressure when closed
- Safety gate can be locked closed to prevent accidental air flow

Part No.	Port Size
s-1163-4	1/4"
s-1163-5	3/8"
s-1163-6	1/2"

Modular Pipe Ports

s-1163-9

- For inlet and outlet ports
- Easily connect threaded connections to FRL components

Part No.	Port Size
s-1163-8	1/4"
s-1163-9	3/8"
s-1163-10	1/2"
s-1163-11	3/4"

Modular Air Diverters

s-1163-13

s-1163-2

Inboard Diverters

Branches filtered air to other locations, by bypassing lubricator (especially for paint applications)

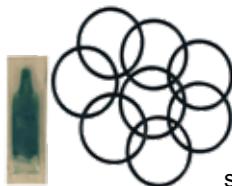

Part No.	Port Size
s-1163-12	1/4"
s-1163-13	3/8"

Outboard Diverter

Attaches to outlet port and diverts filtered air to other outlets

Part No.	Port Size
s-1163-2	1/4"

Modular Replacement O-Rings

s-1163-7

- Replace worn or damaged rings in diverters, connector inserts, pipe ports and OSHA lockout valves
- Includes grease packet (will not work with ExelAir™ FRL components)

Part No.	Port Size
s-1163-7	One Size Fits All

AIR COMPRESSOR ACCESSORIES

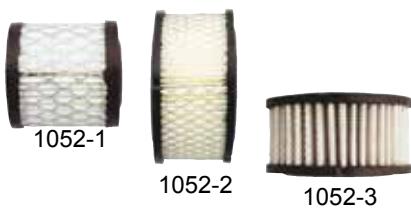

Compressor Filter Housings

1051-2
1051-3

- Made from high-impact, chemical resistant plastic
- Engineered to function with no vibration noise
- Top has a ribbed steel reinforcing plate, base is welded steel with protective epoxy coating
- Housing only, filter sold separately

Part No.	NPT	Feature
1051-2	3/4"	3 Tube Silencer
1051-3	1"	5 Tube Silencer

**Compressor Tank Check Valves**

1091
1091-1
1091-2

1092-1
1092-2

- Used in compressor tanks to prevent air volume and pressure from escaping back into compressor heads while the compressor is not operating
- Brass body with Teflon poppet
- 1/8" NPT side port for pressure switch application
- 3/4" valves include a built-in dash pot for improved poppet life
- Maximum working pressure: 450 PSI
- Maximum temperature: 400°F

Boxed Part No.	Retail Part No.	Per Card	Tank Bung Hole Size (Male)	Compressor Air Line Size	Air Line Type	SCFM
1091	s-1091	1	1/2"	3/8"	Tube Compression Male	20

1092-2			3/4"	3/4"		30

Load Genies

A load genie is a combination un-loader and check valve. Unloads discharge manifold in either vertical or horizontal position of any compressor when compressor cycles and flow stops. Efficient, quiet, economical and eliminates tubing/fittings of conventional pressure switch un-loader

- Maximum working pressure: 250 PSI
- Maximum recommended compressor speed: 400 RPM
- Maximum recommended temp: 450°F

Boxed Part No.	Retail Part No.	Per Card	Inlet	Outlet
1097-6	s-1097-6	1	3/8" OD Compression	1/4" NPT Male
1097-8	s-1097-8	1	1/2" OD Compression	3/8" NPT Male
1098-4			1/4" NPT Female	1/4" NPT Male
1098-6			3/8" NPT Female	3/8" NPT Male

Compressor Pressure Switches

- Combination terminals can be used with quick connects or standard screw terminals
- Auto-off disconnect lever and rotating unloader valve for applications requiring these modifications
- Four 1/4" NPT female port manifold complete with plugs
- UL listed, CSA certified
- Furnas universal pressure switches are suitable to replace pressure switches on compressors up to:

Part No.	Max Pressure Range
s-1060	95-125 PSI
s-1062	140-175 PSI

- 2 HP @ 120V 1-phase
- 3 HP @ 240V 1-phase
- 5 HP @ 240V 3-phase

NOTE: Compressor switches are not adjustable

AIR COMPRESSOR ACCESSORIES (cont)

Electronic Compressor Tank Drains

- Attaches to air compressors to automatically drain water from tanks to deliver dry air to air tools and pneumatic equipment
- Two 2-way direct-acting valves with manual test switch
- Separate adjustments for interval and duration
- Includes Y-strainer to trap large debris and sludge

Part No.	1139-1	1139-2
NPT	1/4"	1/2"
Max Working Pressure	230 PSI	
Manual Override	YES	
Operating Temps	40°F to 140°F	
Power Cord	6.5 Feet	

Adjustable cycle time: 0.5-4.5 minutes
Adjustable drain time: 0.5-10 seconds

Part No.	1139-3
NPT	1/4"
Max Working Pressure	200 PSI
Manual Override	YES
Operating Temps	40°F to 140°F
Power Cord	6 Feet

AIR SYSTEM ACCESSORIES

Automatic Condensate Drains

- Continuously drains accumulated water and oil from drain lines, receiver tanks, condensate drop-legs and filters
- Equipped with top-threaded port to receive drop-leg air lines
- Protective stainless steel screen with umbrella baffle

Length: 6 1/2" x width: 2 3/4"

Weight: 1 lb

Boxed Part No.	Retail Part No.	Per Card	NPT	Bowl Type	Max Air Pressure	Operating Temp	Drain Type
1180-1			1/4"				
1180-2	s-1180-2	1	1/2"	Metal Bowl	175 PSI	40°F to 140°F	Automatic Float

ASME Safety Valves

- Manufactured to ASME standards and certified by the National Board of Boiler and Pressure Vessel Inspectors
- Bubble tight to 10% of set pop-off pressure
- Interchangeable with all other ASME valves of same size and pressure
- Valve resets after pressure drops 50%
- Overall length: 2"

Boxed Part No.	Retail Part No.	Per Card	Male NPT	Pop-off Pressure	Air Flow
1090-70	s-1090-70	1		70 PSI	70 SCFM
1090-125	s-1090-125	1		125 PSI	120 SCFM
1090-150	s-1090-150	1	1/4"	150 PSI	140 SCFM
1090-200	s-1090-200	1		200 PSI	170 SCFM

Non-Coded Safety Relief Valves

- Valves are constructed of the same materials as our ASME safety valves, but are not national board certified and cannot be used on applications requiring ASME components
- Valves are equipped with a lift ring for instant relief and are staked at the factory at the preset pop-off pressure
- Valve resets after pressure drops 50%

Boxed Part No.	Female x Female (NPT)	Pop-off Pressure	Length
1095-75-9		75 PSI	1 9/16"
1095-125	1/4"	125 PSI	
1095-150		150 PSI	1 5/8"

WARNING: These valves are not to be used on compressors with a capacity over 15 SCFM or 3 HP or 10 gallon storage tank

AIR SYSTEM ACCESSORIES (cont)**Full Port Brass Ball Valves**

1094-4
1094-6
1094-8
1094-12
1094-16

- High capacity ball valves are designed for use with compressed air, water or oil to isolate segments of the system without disrupting service to the rest of the system
- All brass body with plated steel ball, Teflon seals, plated 1/4 turn handles
- Maximum working pressure (air/water/oil): 400 PSI
- Maximum working pressure -steam: 150 PSI
- Temperature: - 20°F to 350°F

Boxed Part No.	Retail Part No.	Per Card	Female x Female (NPT)	Body Length	Max Pressure @ 210°F
1094-4	s-1094-4	1	1/4" x 1/4"		280 PSI

- Complete operating safety. 40 micron, sintered bronze sleeve is held securely and protected via integrated shroud
- Provides unlimited capability of controlling air flow at safe and reduced sound levels on exhaust ports of air valves
- Linear adjustable to the speed of an operating cylinder and air tool. Can be increased or decreased with the adjusting screw, then locked in placed via lock nut
- Operating Pressure: 35° to 300°F

PUSH-TO-CONNECT NYLON TUBE FITTINGS

- Easy push-in/one touch mechanism - no gluing!
- Allow for maximum air flow and faster connection than standard compression fittings
- T and elbow fittings pivot 360° for installation ease
- For use with "PUVEX", nylon, polyurethane or low and high density polyethylene tubing
- Push to connect fitting with 5/16" tube OD also fits 8 mm metric tube OD

Material	Max. Temperature at Installation	Max. Working Pressure	Seals

DIGITAL PISTOL GRIP INFLATOR GAGE

s-568

SUPER COMFORTABLE ERGONOMIC GRIP

- 360° swivel design for easy viewing
- Backlit digital displays in PSI, kPa, Bar and kg/cm² measurements
- Meets ANSI/ASME B40.1 standards
- Automatic shut-off after 15 seconds
- "Half pull deflate - Full pull inflate" design
- Durable rubber boot and batteries included
- Accuracy: +/- 0.5 PSI
- Resolution: 0.1 PSI

- Excellent non-slip poly coated body provides exceptional grip
- 2-sides of nylon indicator bar in PSI, 2 sides in kPa
- 10-160 PSI (2 lb increments) / 80-1100 kPa (20 kPa increments)
- Calibrated in three ranges before leaving factory
- Hang loop included

Retail Part No.	Per Card	Chuck Style	Overall Length	Construction Coating
976BLK	1	Standard Dual Head	12 3/4"	Brass w/ Black Poly Coating
986BLK	1	Dual Head Straight Foot	13"	

SERVICE GAGES

(ring not included)

Field Re-Calibratable Service Gages

Exclusive Quick Click™ system provides dial-in accuracy

- Provide accurate, long life, trouble-free performance
- Nickel plated brass tubular body and 2-sided aluminum indicator bars
- 2 sides of indicator bar in PSI, or kPa/Bar
- Calibrated in three ranges before leaving the factory
- Hang loop included
- s-986CBNT/s-986CBNTKB - 10° bend in neck for ease of access

LEVER GREASE GUN

s-3100

- Variable stroke - easier to pump grease in tight areas with shorter strokes
- Heavy duty gage lever handle with comfortable molded non-slip rubber grip
- For use with 14 oz grease cartridges, bulk fill and filler pump
- Includes one 6" bent steel extension and coupler
- Grease not included

Retail Part No.	Per Card	Max Pressure	Extension Length	Grease Cartridges	Bulk Fill	Filter Pump
s-3100	1	1,000 PSI	6" Angled	14 oz	YES	YES

PISTOL GREASE GUN

s-3101

- Adjustable stroke for use both as a high-volume and high-pressure grease gun
- For use with 14 oz grease cartridges, bulk fill and filler pump
- Includes one 18" flexible hose extension and coupler
- Grease not included

Retail Part No.	Per Card	Max Pressure	Extension Length	Grease Cartridges	Bulk Fill	Filter Pump
s-3101	1	7,000 PSI	18" Flexible	14 oz	YES	YES

MINI PISTOL GREASE GUN

s-3102

- Dual front and top discharge ports for accessing grease fittings located almost anywhere
- One-hand operation
- For use with 3 oz grease cartridge
- Includes one 4" straight steel extension and coupler
- Grease not included

Retail Part No.	Per Card	Max Pressure	Extension Length	Grease Cartridges	Bulk Fill	Filter Pump
