Panel coverage: 8.3 sq. ft.

Product Information and Application Use

Fast Trak™ 0.5 is an overpour installation method for remodel and retrofit applications. The preformed knobbed panels are designed for installing 5/16" crosslinked polyethylene (PEX) tubing for radiant floor heating and cooling systems. Fast Trak 0.5 panels feature an adhesive backing for adhering to the slab or subfloor.

✓ Description	Part Number	Length	Width	Height	Weight
Fast Trak 0.5	A5090313	44.1"	28.3"	0.48"	1.0 lb.

Installation

Fast Trak 0.5 panels are designed for overpour applications. To install the panels, first apply Fast Trak Edge Strips (A5091000) along the walls to prevent overpour from seeping under the panels and to protect the surrounding structure from moisture damage and expansion forces. Remove the adhesive backing to adhere the Fast Trak panels directly on the slab or subfloor and snap the PEX tubing between the knobs. After connecting PEX tubing to the manifold and pressure testing the system, install the overpour according to manufacturer's recommendations or local code. For further information, see the Fast Trak Installation Guide.
