

Jackel

18 in. Septic Tank Riser Cover

Installation Guide

Model # SFRC18G

TOOLS REQUIRED:

- 3/16" Drill
- #3 Square Driver

INSTALLATION:

1. The 18 in. Septic Tank Riser Cover will fit most 18" installed risers. Test fit the 18 in. Septic Tank Riser Cover to make sure it is correct for your riser.
2. Clean the sealing surface of your riser.
3. Remove the hardware pack containing the four square-drive screws from the back of the 18 in. Septic Tank Riser Cover.
4. Place the 18 in. Septic Tank Riser Cover on your riser. Make sure the rubber seal is making a seal with the top of your riser.
5. Using the four screw holes in the cover as a guide, drill four 3/16" holes through your riser.
6. Some risers may require the use of holes other than the molded screw holes into the 18 in. Septic Tank Riser Cover. For these risers, use the two additional drill points molded on the top of the cover.
7. Install the provided screws with a #3 square driver.
8. For access to your riser just remove the screws and cover, then reinstall as above.
