

Commercial Roof Hydrants

Model RHY1-MS & RHY2-MS

The Woodford Freezeless Roof Hydrant system is designed to facilitate installing a secure water source, on commercial roof surfaces. The Y2 hydrant drains with a hose attached. Both hydrants require a drain line from the valve body.

Either hydrant can be used for cleaning condenser coils, windows or any other job where a roof water source is required.

Mild Climate Model RHMC-MS

The Woodford, RHMC-MS Roof Hydrant is intended to provide water on commercial building roofs, in non-freezing mild climate areas, for window washing, cleaning of condenser coils, cooling towers, green roofs and other types of roof top equipment. The RHMC is backflow protected with a field testable ASCE 1052 dual check backflow preventer.

The RHMC-MS with Mounting System allows for installation flexibility. It is not necessary to install hydrant when hydrant support is mounted to the roof. The hydrant support utilizes a 3" diameter opening that allows the hydrant to be installed or easily removed at a later time. All necessary mounting hardware for proper installation on a commercial roof is supplied, including a 2 degree shim for pitch adjustment.

ROOF HYDRANT	PRICE
RHMC-MS Complete	404.75
RH-MS	240.75
RHMC	164.00

Sanitary Model SRH-MS

No Drain Line Required!

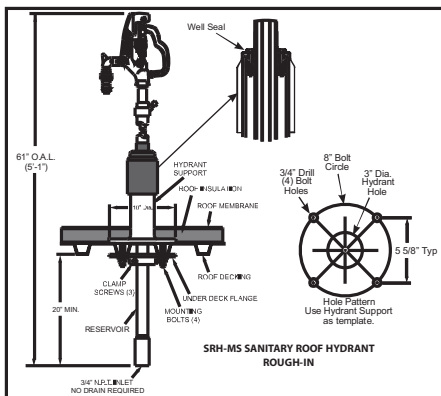

ASCE 1057

This hydrant does not require removal of vacuum breaker or use of a diverter to protect from freezing.

The Woodford SRH Freezeless Roof Hydrant is designed to facilitate installing a secure sanitary hydrant on commercial roof surfaces. With hose removed, a venturi action forces water to drain up and out through the backflow preventer. This product can be used for cleaning condenser coils, windows or any other job where a roof water source is required.

ROOF HYDRANT	PRICE
SRH-MS Complete	715.90
RH-MS	240.75
SRH	475.15
