Model PWICE2

Light Commercial Ice Maker Filtration Systems

PURE WATER

Maximum Flow Rate: 3 gpm (11 lpm)

The Model PWICE2 has been engineered to address and correct multiple common water related problems both efficiently and economically in light commercial applications for ice machines.

Applications

- Ice Machines

Features

- Reduces lime scale build-up in ice machines
- Reduces maintenance—lower maintenance costs
- Better tasting ice and drinks
- Easy to install
- Simple filter replacement
- In/Out valves allow for easy filter service
- Gauges and flush kit included

System Specifications

Maximum Pressure: 125psi/8.6 bar
 Maximum Temperature: 100°F/38°C
 Inlet/Outlet Connections: 1/2" FPT
 Maximum Flow Rate: 3 GPM

Filter Cartridge Life Span

Filter cartridges should be changed at 10,000 gallons, 15psi over all system pressure drop at normal flow rate, or 6 months. Whichever comes first.

Please note: Cartridge capacities are estimates and may be less depending on incoming water quality. Cartridges should be changed at least every 6 months.

Replacement Filters

MODEL NO.	FREQUENCY	DESCRIPTION
PWFPKICE2	6 Months	10" Sediment filter
		20" Carbon Block filter
		10" Polyphosphate filter

Note: Water conditions may require more frequent cartridge replacement

Watts product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact Watts Technical Service. Watts reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on Watts products previously or subsequently sold.

PWICE2

PWICE2 Maximum Flow Rate: 3 gpm

Note: Allow 3" of clearance at bottom of system for removal of filter bowls for filter cartridge replacement

Note: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
