INSTALLATION INSTRUCTIONS

TRUAIRE® RETROFIT TUFFBOX Rough Frame Installation Using TuffBox Register Box

1
Locate collar removal slots. If using smallest collar size, collar removal is unnecessary, skip to step 5.

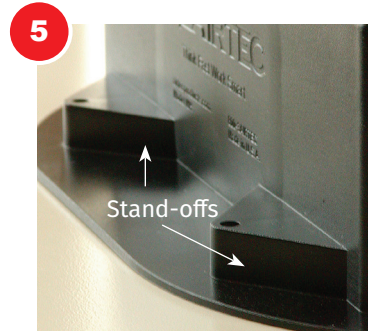

2
Place flat screwdriver head into the appropriate slot to remove unneeded collar(s).

3
Twist screwdriver to initiate separation of unneeded collar section(s).

4
Grasp unneeded collar section(s) behind separation slot and pull firmly.

5
Stand-offs are provided along one side of the flange of the box to accommodate the added depth of furring or strapping typically used below the joists.

6
If furring is used, attach box to the joist by screwing through stand-off openings provided in the flange. If furring is not being used, screws can be secured anywhere through the flange or the sidewall.

INSTRUCTIONS D'INSTALLATION

REGISTRE DE RATRAPAGE TRUAIRE® TUFFBOXFABRIQUÉ

Installation sur le bâti d'attente à l'aide de la boîte de registre TuffBox

1 Localisez les fentes de retrait du collier. Si vous utilisez la plus petite taille de collier, le retrait du collier n'est pas nécessaire, passez à l'étape 5.

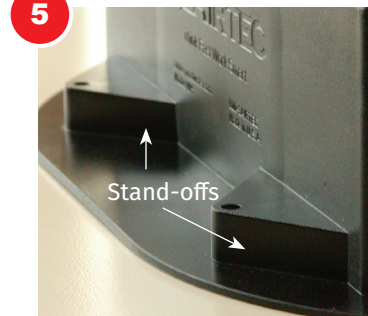

2 Placez la tête plate du tournevis dans la fente appropriée pour retirer le(s) collier(s) inutile(s).

3 Tournez le tournevis pour initier la séparation des sections de collier inutiles.

4 Saisissez la (les) section(s) de collier inutile(s) derrière la fente de séparation et tirez fermement.

5 Des entretoises sont fournies le long d'un côté de la bride de la boîte pour s'adapter à la profondeur supplémentaire de fourrure ou de cerclage généralement utilisée sous les solives.

6 Si des fourrures sont utilisées, fixez la boîte à la solive en vissant à travers les ouvertures de dégagement prévues dans la bride. Si la fourrure n'est pas utilisée, les vis peuvent être fixées n'importe où à travers la bride ou la paroi latérale.
