Our graphics and printing department are happy to turn your needs into reality, just give us a call!

2016 marking flag pricing will remain the same as last year as we are finally starting to see some relief on some of our raw material costs. Please visit our website at www.blackburnflag.com for the most current and up-to-date products and pricing throughout the year.

Flexible Post Installation

Retrofitting U-channel Posts

The TriView is used to convert old u-channel posts into high visibility cable route markers. Fits overall u-channel posts up to, and including, the standard 2 pound per foot post.

- Remove existing broken or faded warning sign.
- Straighten u-channel post, if necessary.
- Slide TriView over the u-channel post.
- Fasten TriView to u-channel post with the TriView Fastener or bolts.

The TriView fits snugly on most 2 lb. u-channel posts. If vandalism is a concern use a cable tie to secure the TriView to the u-channel.

TriView fasteners. One hit with a hammer locks the TriView onto a 1.12 lb. u-channel post.

New Installation With U-Channel Posts

- Drive u-channel 18"-24" into ground.
- Slide TriView over the u-channel post.
- Fasten TriView to u-channel post with the TriView Fastener or bolts.

TriView fasteners. One hit with a hammer locks the TriView onto a 1.12 lb. u-channel post.

Direct Bury

The Rhino TriView can also be buried, eliminating the need for a u-channel post.

- Hole 18" deep.
- Fold out TriGrip anchor bars.
- Insert TriView into hole so that burial depth mark is at ground level.
- Fill in hole with dirt. Straighten as necessary frequently tamping the soil.

Soil Anchor

Simply drive the TriView Soil Anchor into the ground with our TriView Soil Anchor Driver. The TriView slides into the anchor and locks in place.
