Notes

Measure your actual product for rough-in details.

Install this product according to the installation instructions.

The hot water supply should be 70% of the capacity of the bath or greater. Installations will vary.

Provide one grounded electrical outlet within 24" (610 mm) of each component.

If installing a rim-mount faucet, make sure there is no interference with drain overflow before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.
