

C-134/234 Series Freezeless Wall Hydrant

Original Heavy Duty Style

PRIER C-134 provides a year round source of water in areas that are subject to freezing temperatures. The hydrant valve is connected to the supply piping in the heated portion of the structure, eliminating the possibility of freezing. Ordering the C-234 gives you the same style hydrant but with a vandal proof extended lockshield and operating key.

The PRIER C-134 is the original freezeless hydrant that is made in the same heavy pattern fashion that made it famous. It is available from stock in lengths from close coupled to 24". Longer sizes are available upon request.

C-234 Loose Key Design

- Residential
- Freezeless
- Metal Handle
- Satin Nickel Plated

***For stems manufactured before 2013, see C-134 Series retired style spec sheet at PRIER.com. PRIER universal stems are replacement stems for any size from close coupled to 14." The P-231-11US Universal Stem requires cutting the rod to proper length and soldering the brass stem end to the rod as directed in instructions.*
