General Information:

Save up to 28% on your heating bill with the SMART-BASE™ electronic programmable thermostat, designed specifically for Cadet "F" Series electric baseboards. Digital temperature sensing provides a precise 2° comfort range, ensuring constant comfort. 5-1-1 programming allows you to create a heating schedule specific to your needs, for weekdays, Saturday, and Sunday. Convenient push button controls make this thermostat easy to program. The SMART-BASE™ Electronic thermostat can be installed on either end of standard Cadet 208/240 volt baseboards and is available only in double (4 wire) pole. Setpoint range: 41°F to 86°F (5°C to 30°C).

Architectural Information:

The SMART-BASE™ electronic thermostat shall be UL listed. Designed to be an integral part of the Cadet "F" series baseboard. The control shall be capable of switching up to 12.6 amps, of a resistive load, at 240 or 208 VAC. No minimum load requirement. Control designed to meet power surges normally found in homes. Separate single pole double throw switch included in control for separation of branch circuit from control and heater. Control shall be digital with an LCD display. After programming, LCD display will show the actual room temperature, current time of day, day of week, mode, and current status of heater. Programming of microprocessor accomplished through the use of the three buttons on the control faceplate. Control shall have "Auto Mode" consisting of 5-1-1 programming, four events for Monday through Friday and four events each for Saturday and Sunday. Control shall have a "Manual Mode" for continuous 24-hour control of a single temperature set point. No batteries are required, as the program will be maintained in memory for approximately ten years without power. Only the time and day are required to be re-entered after a power outage.
