

TECHNICAL DATA

Curved Shower Rods

211 SERIES

MATERIALS:

Tubing is 1" Oval x .028 (22 gauge) Type 304 stainless steel. Spring pins are solid brass. Brackets and Flanges are zinc die cast.

INSTALLATION:

Mount wall brackets using supplied fasteners, recommended location is 3" back from edge of tub or shower unit. Note the markings on brackets for stationary and adjustable attachment. Depress pins on stationary end of rod and clip into bracket. Repeat step for adjustable rod end. Slide flanges over brackets. Wood blocking is preferable behind all wall surfaces. If wood blocking is not available, use anchors or plugs provided with screws.

SPECIFICATION:

Curved shower rod shall be model _____ (fill in model number) by Liberty Hardware Manufacturing Corporation.
