S-DGAS 65 Series SITE SIZABLE STAINLESS STEEL

- S-DGAS 6536 - 36" Complete Kit
- S-DGAS 6548 - 48" Complete Kit
- S-DGAS 6560 - 60" Complete Kit
- S-DGAS 6572 - 72" Complete Kit
- S-DGAS 6596 - 96" Complete Kit

Features

- Modify length and outlet location on site
- Indoor or outdoor use
- Stainless steel channel
- 16 gauge, 304L stainless steel perforated grate
- Works with 2" clamp down floor with 2" throat/strainer size *(not included)*
- Compatible with: PVC Liner, Rubber Liner (Chloraloy ®), Hot Mop, Lead Pan, Copper Pan, or Fiberglass
- Flow rate - 9 gpm per outlet
 - Flow rate measured at outlet only. Measurement does not account for water in channel or sheeting on shower floor.
 - Additional outlets can be added and combined into a larger waste line to increase flow rates

Installation

Care & Maintenance

S-DGAS 65 stainless steel linear drain top grates are made of 304L stainless steel. This material is non-porous, hygienic, rust-free and extremely durable. Bar Keepers Friend® and Soft Scrub® are commonly available products that can be used to protect and clean your Satin Stainless drain cover. For stains that have been left for an excessive amount of time, stronger cleaning agents such as Compound 302® may be needed. For Polished Stainless and other finishes we recommend a mild soap and a soft cloth for cleaning. DO NOT use any abrasive cleaners, scrub pads or allow household cleaning agents, such as bleach, to sit on the drain cover for a long period of time. Stainless steel does not rust. External factors, such as contamination from other highly ferrous metals, built up road salt, sea salt, or chlorine may have caused "surface" rust which can be removed using Barkeepers Friend®, Soft Scrub® with Bleach, or Compound 302®. Always follow the directions on the bottle. Follow proper maintenance procedures to prevent excessive surface rust. In areas of frequent exposure to salt, chlorine, and other chemical compounds, maintenance of the stainless grates should be performed at least 2-3 times per year.

ADDITIONAL INFORMATION

Threshold Installation

For threshold installs, we recommend the drain run exactly wall-to-wall to block any water from leaving the shower or wet area. We do not recommend thinner or tile-in type drains for threshold installations due to the lack of channel width needed to sufficiently catch the water.

Site Sizable models that are NOT recommended for Threshold Installation include:

S-AG 38, S-DG 38, S-TIFAS 65, S-TIF 65, S-TIFAS 99

Against a Wall Installation

The (S) Site Sizeable and Fixed (FX) Series require a traditional clamping drain body for PVC Liner, Chloroloy, Lead Pan, Copper, Fiberglass, and Hot Mop type waterproofing. The diameter of the clamp down drain body creates a challenge for flush against the wall installations.

To properly achieve against the wall installations, it is recommended to build out the back wall with a double layer of wall board.

Wall to Wall Installation

One way to ensure proper drainage is to install the linear drain from wall-to-wall. The Site Sizeable (S) Series is a flexible solution which allows for "site sizing" the length of the drain by cutting the grate and channel to the exact finished wall-to-wall dimension. Infinity Drain's FX, FF, & FT series can be custom fabricated for the exact desired length and outlet location.

Outlets

Site sizable products can be used in both indoor and outdoor applications. For indoor installations, we recommend one outlet for every 60" of drain. Our 72", 80", and 96" kits come standard with two outlet assemblies. Site Sizeable (S) Series can add additional outlet components to the kit. Outdoor installations: Outlet frequency is dependent on drain application and geographic location. Please contact us with questions regarding your specific installation.

Infinity Drain's Site Sizable (S) linear drains can be joined together to create infinite lengths for outdoor and indoor applications. We offer threaded and non-threaded outlets, 90° angle joiners, straight joiners, and custom fabrication.

Optional Components

TNAS-2	2" Long Stainless Steel Rescue Nipple
TNAS-3	3" Long Stainless Steel Rescue Nipple
TNAS-4	4" Long Stainless Steel Rescue Nipple
TNRN-P	PVC Threaded Extension Nipple
UCP 2	Universal 2" Clamping Plate
UCP 42	Universal Reducing Plate (Adapts 4" or 3" existing throat size to 2")

Add Clamp Down Drain

CDA 22	Clamp Down Drain ABS
CDI 22	Clamp Down Drain Cast Iron
CDP 22	Clamp Down Drain PVC

Available components for longer lengths

DA 6536	36" Stainless Steel Grate	SE 65	2" Stainless Steel End Section
DA 6548	48" Stainless Steel Grate	GJS 65	Stainless Steel Joiner Strip
DA 6560	60" Stainless Steel Grate	SLA 65	Stainless Steel 90° Angle Joiner
SC 6548	48" Stainless Open Ended Channel	HS 2	2" Hair Strainer
SC 6596	96" Stainless Open Ended Channel	LF 65	8" Stainless Steel Outlet Section
LC 6528	28" Stainless Closed Channel	TNAS	Stainless Steel Threaded Nipple
LC 6540	40" Stainless Closed Channel	CT 36	36" Channel Trim
LC 6552	52" Stainless Closed Channel	CT 48	48" Channel Trim
LC 6564	64" Stainless Closed Channel	CT 60	60" Channel Trim
LC 6588	88" Stainless Closed Channel	CT 72	72" Channel Trim
		CT 96	96" Channel Trim
