

CADDY[®]

Fire Sprinkler Hanging & Bracing Products

Innovative Hanging & Bracing Fire Protection Solutions

ERICO[®]

Innovative Products From a Trusted Leader

To help ensure the availability and operation of safety systems after an earthquake event, many building and industry codes now include requirements for the design and installation of seismic sway bracing for non-structural components, such as fire sprinkler, mechanical, electrical and plumbing systems. The innovative line of CADDY® Bracing Systems was developed to help keep fire sprinkler systems intact after a seismic event and to minimize water damage resulting from leaks or ruptures.

CADDY Bracing Systems provide contractors with high-quality, engineered solutions, which include rigid bracing, cable bracing and rod stiffeners.

Features:

- Quick and easy installation
- Lower total installed cost
- OSHPD® Pre-Approved
- Meets NFPA® 13
- cULus® Listed
- FM® Approved

CADDY® Bracing System Software

CADDY® Bracing Systems software for fire protection simplifies the selection and engineering calculations associated with CADDY bracing products. The software supports various editions of NFPA® 13, as well as various editions of the IBC® and other building codes. It also generates submittal documents for engineering companies or the Authorities Having Jurisdiction (AHJ).

Features:

- Web-based version incorporates customer feedback from the highly successful CADDY® Bracing Systems Calculator
- Users can create and save brace designs for multiple projects
- Create, edit and copy brace designs for multiple zones of influence
- Choose rigid or cable bracing depending on code and listing conditions
- Use for sway brace design and branch line restraint design
- Includes ability to design bracing to FM® Loss Prevention Datasheet 2-8 for Earthquake Protection for Water-Based Fire Protection Systems
- Checks for net vertical seismic load when required
- Provides a real-time visual image and drawing for the specific brace configuration
- Generates NFPA 13 and FM DS 2-8 calculation sheets
- Produces project or brace bill of materials

115 Standard Duty Loop Hanger

The 115 Standard Duty Loop Hanger, part of the CADDY® line of fasteners and supports from ERICO, is ideal for suspending stationary, non-insulated pipe lines, including CPVC pipes, in fire sprinkler systems. A knurled insert nut helps simplify vertical adjustments and flared edges on the base (1/2" to 2" sizes) help protect pipes from coming into contact with any sharp edges of the hanger.

Features

- Flared edges help prevent any sharp surfaces from coming into contact with the pipe (1/2" to 2" sizes)
- Retained insert nut helps ensure the loop hanger and insert nut stay together
- Recommended for the suspension of stationary non-insulated pipe lines
- Manufactured to use the minimum rod size permitted by NFPA® for fire sprinkler piping
- Conforms with Federal Specification WW-H-171 (Type 10), Manufacturers Standardization Society (MSS) SP-58 and SP-69 (Type 10)

Specifications

512 CADDY® EZ RISER for Close Quarters

Features

- Innovative design eliminates loose hardware, simplifying installation
- Serrated flange-head bolts eliminate need for wrenches on both bolt and nut
- Short ears allow for use in spaces where full-sized risers do not fit
- Conforms with Federal Specification WW-H-171 (Type 8), Manufacturers Standardization Society (MSS) SP-58 and SP-69 (Type 8)

510 CADDY® EZ RISER

Features

- Recommended for suspending vertical steel pipe risers
- Slotted holes make assembly easy, eliminating loose hardware
- Serrated flange-head bolts eliminate need for wrenches on both bolt and nut
- Conforms with Federal Specification WW-H-171 (Type 8), Manufacturers Standardization Society (MSS) SP-58 and SP-69 (Type 8)

Clamp is fitted for steel pipe and should be installed below a coupling or shear lug, with bolts torqued to recommended value. Slotted holes and bolts for pipe sizes up to 12" only.

455 Malleable Split Ring Hanger

Features

- Recommended for the suspension of stationary non-insulated pipe lines
- Allows for piping runs close to ceiling or walls
- Conforms with Federal Specification WW-H-171 (Type 25), Manufacturers Standardization Society (MSS) SP-58 and SP-69 (Type 12)

3TW Fastener for SOSR Series

Features

- Backing nut for use with SOSR on composite wood joist installations

Specifications

Material: Steel

Finish: CADDY® ARMOUR

Part Number	Screw Diameter Sc	Height H	Length L	Width W
3TW	#10	7/16"	1 1/2"	1 1/4"

Easy Snap Grommet for Factory Punched Holes

Features

- Snap grommet into a factory punched hole of any shape
- Provides anti-rattle protection
- Provides 360° protection of conduit, plumbing and fire sprinkler plumbing in metal studs

Specifications

Material: Polyethylene

Part Number	Copper Tube Size	EMT Conduit Size	Rigid Conduit/Pipe Size
ESGFP	1" Max	1/2", 3/4", 1"	1/2", 3/4", 1"

Snap-On Nail Plate

Features

- Protects electrical and mechanical installation through studs
- For wood and metal studs
- Press-on installation
- No tools required
- Breakable tabs permit multiple plates to be ganged together
- Holes on legs and surface of plate are provided to secure with nail or screw

7230800PL	8"	2 1/2"	6 11/16"	12 3/8" – 16 7/8"

Gussets furnished on 8" and larger.
Install in accordance with applicable code.

724 Adjustable Pipe Support Assembly with U-Bolt

Features

- Supports horizontal pipe from stanchions where vertical adjustment is needed
- Conforms with Federal Specification WW-H-171 (Type 38, 39), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 37, 38)

Specifications

Material: Steel

Finish: Plain

Part Number	Pipe Size	Rod Size RS	A	B

Install in accordance with applicable code.

CADDY® ROD LOCK

CADDY® ROD LOCK
Beam Clamp
Page 39

CADDY® ROD LOCK
Anchor Screw
Page 40

SN Series Nut
Page 41

CADDY® ROD LOCK Beam Clamp

Features

- Easy "push-to-install" design allows installers to simply push the threaded rod through the mounting hole, instantly locking it into position
- Works with slightly damaged threads and minor burrs on the threaded rod
- Reduces installation time up to 60%

Specifications

Material: Cast iron
Finish: Electro-galvanized

Part Number	Rod Size RS	Flange Thickness FT	Height H	Length L	Width W	A	Static Load F
CRLB37EG	3/8"	1/8" – 7/16"	1 3/16"	2.06"	1"	0.98"	500 lb

For use on plain and electro zinc plated hardware only.

Recognizing that torque wrenches are generally not used or available on many job sites, the setscrew should be tightened so it contacts the I-beam and then an additional 1/2 turn added.

CADDY® ROD LOCK Anchor Screw

Features

- For use with concrete and solid brick
- Works with slightly damaged threads and minor burrs on the threaded rod
- Reduces installation time up to 35%

Specifications

Material: Steel
Finish: Electro-galvanized

Part Number	Rod Size RS	A	B	C	Drill Bit Size	Drill Hole Depth	Static Load F
CRLA37EG	3/8"	2 7/8"	1 1/4"	7/8"	5/16"	2"	660 lb

For use on plain and electro zinc plated hardware only.
Tested in 3000 psi (20.67 Mpa) concrete.

CADDY® ROD LOCK

SN Series Nut

Features

- Allows side mounting of nut to threaded rod
- Reduces the need for threading compared to standard nuts and washers
- Ideal for retrofit projects, such as trapeze installations
- Works with slightly damaged threads and minor burrs on the threaded rod
- Reduces installation time up to 50%

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	A	B	Static Load F
SN25	1/4"	3/4"	7/8"	500 lb
SN37	3/8"	3/4"	7/8"	1,350 lb
SN50	1/2"	3/4"	7/8"	2,250 lb

For use on plain and electro zinc plated hardware only.

300C8708EG	7/8"	8"	2"
300C8714EG	7/8"	14"	2"

Field bend and use jam nut over hanger rod to secure.
Add 2" to width of flange to determine minimum length strap required.

34SL Retrofit Retainer Strap

Features

- Retrofit retainer strap for beam clamps

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	A	B
034SL0600EG	3/8"	6"	1 3/8"
034SL0800EG	3/8"	8"	1 3/8"
034SL1000EG	3/8"	10"	1 3/8"
034SL1200EG	3/8"	12"	1 3/8"
034SL1400EG	3/8"	14"	1 3/8"

Field bend and use jam nut over hanger rod to secure.
Add 2" to width of flange to determine minimum length strap required.

PH Multi-Purpose Purlin Clamp

Features

- Attaches to bottom of purlins and beams to support threaded rod

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	Flange Thickness FT	B	Torque TQ	Static Load 1 F1	Static Load 2 F2	Nut Included
PH4	1/4"	1/4" Max	3/4" Min	30 in lb	200 lb	160 lb	No
PH6	3/8"	1/4" Max	3/4" Min	30 in lb	200 lb	160 lb	No
PH6FP	3/8"	1/4" Max	3/4" Min	30 in lb	200 lb	-	Yes

A jam nut is required for fire protection applications.

Refer to Static Load 1 when attaching to C and Z purlins. Refer to Static Load 2 when attaching to a flat flange.

Recognizing that torque wrenches are generally not used or available on many job sites, the setscrew should be tightened so it contacts the I-beam and then an additional 1/4 to 1/2 turn added.

PHSW Multi-Purpose Purlin Clamp with Swivel

Features

- Attachment to bottom of purlins and beams to support threaded rod
- Swivel feature option for attachment to purlins under sloped roofs

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	Flange Thickness FT	B	Torque TQ	Static Load 1 F1	Static Load 2 F2	Nut Included
PHSW4	1/4"	1/4" Max	3/4" Min	30 in lb	200 lb	160 lb	No
PHSW6	3/8"	1/4" Max	3/4" Min	30 in lb	200 lb	160 lb	No
PHSW6FP	3/8"	1/4" Max	3/4" Min	30 in lb	200 lb	-	Yes

A jam nut is required for fire protection applications.

Refer to Static Load 1 when attaching to C and Z purlins. Refer to Static Load 2 when attaching to a flat flange.

Recognizing that torque wrenches are generally not used or available on many job sites, the setscrew should be tightened so it contacts the I-beam and then an additional 1/4 to 1/2 turn added.

315 Malleable Iron Purlin Clamp

Features

- Attaches to lower flange of metal beams or purlins
- Supports 45° flanges up to 2" long, and 90° flanges up to 1-1/2" high

Specifications

Material: Cast iron

Part Number	Rod Size RS	Flange Thickness FT	A	B	Screw Diameter Sc	Torque TQ	Pipe Size	Static Load F
Finish: Electro-galvanized								
3150037EG	3/8"	1" Max	2"	1 1/2"	3/8"	5 ft lb	4" Max	400 lb
Finish: Plain								
3150037PL	3/8"	1" Max	2"	1 1/2"	3/8"	5 ft lb	4" Max	400 lb

Setscrew must be tightened and torqued onto the sloped side of the I-beam.

Install in accordance with applicable code.

Recognizing that torque wrenches are generally not used or available on many job sites, the setscrew should be tightened so it contacts the I-beam and then an additional 1/4 to 1/2 turn added.

547/548 C-Clamp

Features

- For use on steel beams and purlins

Specifications

Material: Steel

Finish: Plain

Part Number	Rod Size RS	A	B	Screw Diameter Sc	Screw Length L	Torque TQ	Static Load F	Listings Approvals
5470037PL	3/8"	1"	1 5/16"	3/8"	1 3/4"	5 ft lb	250 lb	cUL, UL, FM
5480050PL	1/2"	1 1/8"	1 1/4"	1/2"	1 3/4"	11 ft lb	250 lb	FM

Setscrew must be tightened and torqued onto the sloped side of the I-beam.

Recognizing that torque wrenches are generally not used or available on many job sites, the setscrew should be tightened so it contacts the I-beam and then an additional 1/4 to 1/2 turn added.

325 Steel Side Beam Attachment

Features

- Fastens to the wall or the side of a joist to support hanger rod
- Conforms with Federal Specification WW-H-171 (Type 35), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 34)

Specifications

Material: Steel

Part Number	Rod Size RS	Hole Size HS	Hole Type	A	Static Load 1 F1	Static Load 2 F2
Finish: Electro-galvanized						
3250037EG	3/8"	7/16"	Plain	1 5/32"	650 lb	1,150 lb

3250100PL	1"	1 1/16"	Plain	2 1/2"	900 lb	3,700 lb

Refer to Static Load 1 when used with lag screw. Refer to Static Load 2 with bolt to steel.

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.

Install in accordance with applicable code.

327 Malleable Iron Side Beam Attachment

Features

- Pre-threaded structural attachment fastened to wall or the side of a joist to support hanger rod where two #43 Wood Drive Screws are necessary for proper support

Specifications

Material: Steel

Part Number	Rod Size RS	A	B	Screw Diameter Sc	Static Load F
Finish: Electro-galvanized					
3270037EG	3/8"	2 3/8"	15/16"	#14	250 lb
3270050EG	1/2"	2 3/4"	1 5/16"	#16	480 lb
Finish: Plain					
3270037PL	3/8"	2 3/8"	15/16"	#14	250 lb
3270050PL	1/2"	2 3/4"	1 5/16"	#16	480 lb

Load rating dependent on wood structure strength.

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.

326 Universal Steel Side Beam Attachment

Features

- Fastens to the wall or the side of a joist to support hanger rod
- Either 3/8" or 1/2" fasteners can be used to reduce inventories
- Conforms with Federal Specification WW-H-171 (Type 35), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 34)

Specifications

Material: Steel

Part Number	Hole Size 1 HS1	Hole Size 2 HS2	Hole Size 3 HS3	A	Static Load 1 F1	Static Load 2 F2
Finish: Electro-galvanized

Install in accordance with applicable code.

328 Threaded Steel Side Beam Attachment

Features

- Fastens to wall or the side of a joist to support hanger rod
- Pre-threaded
- Conforms with Federal Specification WW-H-171 (Type 35), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 34)

Specifications

Material: Steel

Part Number	Rod Size RS	Hole Size 1 HS1	Hole Size 2 HS2	A	B	C	Static Load 1 F1	Static Load 2 F2
Finish: Electro-galvanized								
3280037EG	3/8"	17/32"	13/32"	2 9/16"	1"	1 1/4"	560 lb	620 lb
Finish: Plain								
3280037PL	3/8"	17/32"	13/32"	2 9/16"	1"	1 1/4"	560 lb	620 lb
3280050PL	1/2"	17/32"	13/32"	2 9/16"	1"	1 1/4"	560 lb	620 lb

Refer to Static Load 1 when used with lag screw. Refer to Static Load 2 with bolt to steel.
Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.
Install in accordance with applicable code.

37 Steel Eye Socket Rod Hanger

Features

- Joins hanger rod to a structure

Specifications

Material: Steel

Finish: Pre-galvanized

Part Number	Rod Size RS	Pipe Size	Hole Size 1 HS1	Hole Size 2 HS2	Height H	Width W	Static Load F
0370037EG	3/8"	3/4" – 4"	1/2"	1/4"	2 1/4"	1 1/8"	250 lb
0370050EG	1/2"	2 1/2" – 6"	11/16"	-	2 3/4"	1 1/2"	760 lb

Load rating dependent on wood structure strength.

38 Offset Steel Eye Socket Rod Hanger

Features

- Structural attachment used to join hanger rod to a structure
- Provides full vertical rod adjustment

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	Pipe Size	Hole Size 1 HS1	Hole Size 2 HS2	Height H	Width W	C	D	Static Load F
0380037EG	3/8"	4" Max	1/2"	1/4"	3 1/4"	1 1/8"	1 3/16"	3/4"	250 lb

Load rating dependent on wood structure strength.

For 3/8" rod through 2" pipe, use two Model #43 Wood Drive Screws. For 3/8" rod through 4" pipe, use one Model #42 1/2" x 3" Lag Screw.

365 Steel Wall or Ceiling Plate

Features

- Structural attachment to support hanger rod from a ceiling or a wall

Specifications

Material: Steel

Part Number	Rod Size RS	Hole Size HS	A	B	Pipe Size	Static Load F
Finish: Electro-galvanized						
3650037EG	3/8"	5/16"	5/16"	2 1/4"	2" Max	100 lb
Finish: Copper electro plated						
3650037CP	3/8"	5/16"	5/16"	2 1/4"	2" Max	100 lb
Finish: Plain						
3650037PL	3/8"	5/16"	5/16"	2 1/4"	2" Max	100 lb

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.

365M Malleable Iron Wall or Ceiling Plate

Features

- Structural attachment to support hanger rod from a ceiling or a wall

Specifications

Material: Cast iron

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.

352 Standard Duty Welded Wall Bracket

Features

- Wall attachment to support or suspend static piping
- Conforms with Federal Specification WW-H-171 (Type 32), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 32)

Specifications

Material: Steel

Finish: Plain

Part Number	Height H	Width W	A	B	C	D	E	Hole Size HS	Static Load F

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.
Install in accordance with applicable code.

353 Heavy Duty Welded Wall Bracket

Features

- Wall attachment to support or suspend static piping
- Conforms with Federal Specification WW-H-171 (Type 33), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 33)

Specifications

Material: Steel

Finish: Plain

Part Number	Height H	Width W	A	B	C	D	E	Hole Size HS	Static Load F

3530400PL	36"	5"	33 1/4"	1 1/2"	1 1/2"	30"	1"	1 1/16"	3,000 lb

Follow fastener manufacturer's recommended shear and pull-out strength when fastening to the structure. Fastener not included.
Install in accordance with applicable code.

370A Single Concrete Insert Plate and Rod

Features

- Used to support hanger rod from metal deck-poured concrete ceiling
- For use when adjustment for concrete thickness is needed

Specifications

Material: Steel

Finish: Plain

Part Number	Rod Size RS	A	B	C	Static Load F
370A0037PL	3/8"	8"	1 1/4"	10"	240 lb
370A0050PL	1/2"	8"	1 1/4"	10"	240 lb
370A0062PL	5/8"	8"	1 1/4"	10"	610 lb

Threaded rod supplied with an Electro Zinc Plated finish.

Maximum load ratings are dependent on many factors, which include, but are not limited to: type of concrete, depth of slab, location of anchor in slab, and depth of anchor in slab. Consult a professional engineer regarding anchor positioning.

355 Concrete Insert Plate

Features

- Structural attachment in all grades of concrete
- Knockout keeps interior empty during pour
- Allows for horizontal rod adjustment up to 1-1/4"
- 355N Nut required for UL Listing and FM Approval
- Conforms with Federal Specification WW-H-171 (Type 19), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 18)

Specifications

Material: Steel
Finish: Plain

Part Number	Rod Size RS	A	B	C	Pipe Size	Static Load F
3550000PL	3/8", 1/2", 5/8", 3/4", 7/8"	1 5/8"	3 9/16"	3"	10" Max	1,200 lb

Rod should be threaded through the nut until it tightens against the top of the insert.

For installation, place knockout side down on concrete form and nail in place. Wire 12" piece of #4 reinforcing rod on both sides. After concrete pour, knockout can be removed with a screwdriver.

Install in accordance with applicable code.

355N Nut for 355 Series

Features

- Insert nut for model 355 Concrete Insert
- Conforms with Federal Specification WW-H-171 (Type 19), Manufacturers Standardization Society ANSI®/MSS-SP-58 (Type 18)

Specifications

Material: Steel

Part Number	Rod Size RS	A	Pipe Size	Static Load F

355N0087PL	7/8"	1 1/4"	10" Max	1,200 lb

Reduced support spacing is required.
Install in accordance with applicable code.

Rigid Bracing System

The CADDY® line of innovative rigid bracing products was designed to provide superior performance and meet the highest seismic load requirements. The products have been designed with the end user in mind and provide contractors with labor-saving features to promote quick and easy installation. The system of products supports lateral and longitudinal bracing and offers a wide range of structural and pipe attachments.

Features:

- Patent-pending lateral braces eliminate need for multiple trips up and down ladders
- Adjustable design can be used with different brace pipe sizes, providing flexibility on the jobsite and reducing contractor inventory
- Snap-off bolt heads help make installation and inspection quick and easy
- Single wrench size installs all products
- For use with brace pipe lengths up to 19' - 8" (6m)
- cULus® Listed
- FM® Approved
- OSHPD® Pre-Approved (OPA-2629-10) to the 2010 California Building Code

Bar Joist Attachment

Features

- Can be installed on bar joists or I-beams
- Thumb spring retainer allows for ease of positioning
- Snap-off bolt head helps enable easy installation and inspection of seismic sway braces
- No assembly required
- No loose parts
- Meets NFPA®-13 requirements for seismic sway bracing

Mount to structure using holes indicated in HS1.

Universal Structural Attachment

Features

- Universal design allows one product to attach directly to concrete, wood, bar joist or I-beam adapters
- Snap-off bolt head helps enable easy installation and inspection of seismic sway braces
- Use for both lateral and longitudinal sway brace applications
- Works with 1" through 2" brace pipes and 1/4" angle iron braces to reduce inventory
- Center bolt does not require tightening
- Meets NFPA®-13 requirements for seismic sway bracing

Quick Grip Jr. Lateral Sway Brace

Features

- Easy two-step installation eliminates extra trips between structure and service pipe
- Works with 1" and 1 1/4" (25 mm and 32 mm) brace pipes to reduce inventory
- Snap-off bolt head helps enable easy installation and inspection of seismic sway braces
- Meets NFPA®-13 requirements for seismic sway bracing

Quick Grip Lateral Sway Brace

The Quick Grip Lateral Brace, part of the CADDY® line of fire sprinkler bracing systems from ERICO, is designed to help simplify installations when bracing service pipe for seismic or other catastrophic events. It features an innovative design for quick attachment of brace pipe to service pipe saving time and money.

Features

- Easy two-step installation eliminates extra trips between structure and service pipe
- Works with 1" and 1 1/4" (25 mm and 32 mm) brace pipes to reduce inventory
- Yellow tips provide a visual indicator that the bolts have been properly torqued
- Easy installation with an impact wrench from the bottom side of the clamp
- Meets NFPA®-13 requirements for seismic sway bracing

Now There's a Faster, Easier Way to Restrain Branch Lines in a Fire Sprinkler System

The New CADDY® Branch Line Restraint System

- Complete restraint system includes structure and pipe attachments
- Works with 3/8" and 1/2" rod
- Quick and easy installation
- Meets NFPA® 13
- cULus Listed and FM® Approved
- OSHPD pre-approved

Wide Range of Structural Attachments:

Pipe Attachment:

Another Innovative Hanging & Bracing Fire Protection Solution From ERICO.

FM is a registered certification mark of FM Approvals LLC, LTD.
NFPA is a registered trademark of the National Fire Protection Association.

**Save time on your next installation
with the Branch Line Restraint System.
See page 93 for full details.**

ERICO®

Cable Bracing System

CADDY® cable bracing is an ideal alternative to rigid bracing for fire sprinkler systems when brace lengths greater than 19'- 8" (6m) are required or when confined/crowded spaces make rigid systems difficult to install. The system includes pre-stretched steel cable, attachment fittings, crimping sleeves and related tools. The system can also be used to brace electrical, mechanical and plumbing systems.

Features:

- Color-coated cable conforms to NFPA® 13 requirements and makes it highly visible and easier to identify cable sizes
- UL® Listed
- OSHPD® Pre-Approved (OPA-0619)
- Made in the USA

Cable Spool

Features

- Cut to length as needed
- Pre-stretched restraint cable

Specifications

Material: Steel

Finish: Pre-galvanized, Painted

Part Number	Brace Size	Diameter	Cable Length	UL Listed Load	Color
CSB12CBL	#12	3/32"	250'	613 lb	Red
CSB18CBL	#18	1/8"	250'	1,133 lb	White
CSB36CBL	#36	3/16"	250'	2,800 lb	Blue
CSB48CBL	#48	1/4"	250'	4,667 lb	Yellow

Cable is powder coated.

Crimping Sleeve

Features

- Creates secure loop ends
- Crimp with swaging tools

Specifications

Material: Copper

Finish: Electro-galvanized

Part Number	Brace Size
CSB12SLVB	#12
CSB18SLVB	#18
CSB36SLVB	#36
CSB48SLVB	#48

Two side-by-side crimps required on #12 and #18 cable. Three side-by-side crimps required on #36 and #48 cable. Check crimp with gauge (not included).

Stake Eye Kit

Features

- Attaches to steel, wood or concrete structures
- Two-way bracing kit with crimp sleeves and stake eyes
- Swaged-on stake eye, pre-bent to 45 degrees

Branch Line Restraint System

Traditional methods for installing branch line restraints in fire sprinkler systems are cumbersome and time-consuming. Contractors often cut (and re-cut) threaded rod to precise measurements to restrain the sprinkler pipe with a loop hanger and surge restraint. Traditional methods also commonly require five or more parts per restraint.

To avoid these labor-intensive methods, ERICO has streamlined the process and developed the Branch Line Restraint System, part of the CADDY® line of hanging and bracing solutions for the fire protection market. Ideal for restraining 1" (25 mm) through 2" (50 mm) branch lines, this innovative system is significantly faster and easier to install than current methods. It attaches directly to steel bar joists, I-beams or purlins, as well as concrete and wood structures. The hardware is installed with only one tool, a 5/16" (8 mm) socket drill driver, which provides significant labor savings and convenience. It features a simple, two-step installation process, allowing a time savings of up to 80% compared to other methods.

Unlike most solutions that only accept 3/8" (M10) threaded rod, the versatile Branch Line Restraint System features a swivel attachment that can be rotated to accept 3/8" or 1/2" (M10 or M12) threaded rod. This allows greater restraint distances from the pipe to structure with 1/2" (M12) threaded rod.

The system meets the requirements of NFPA® 13, making it ideal for new construction applications. The total system is cULus® Listed and FM® Approved, and has been pre-approved by the state of California (OSHPD OPA-2629-10).

Branch Line Restraint Pipe Attachment

Features

- Accepts 3/8" or 1/2" (M10 or M12) threaded rod
- Quick grip clamp simplifies measuring and cutting of threaded rod
- Works with rough-cut threaded rod and eliminates pipe-side deburring
- Can be installed with threaded rod above or below the service pipe
- Shear-off head helps ensure correct torque and simplifies inspection

EM-HEX Rod Coupler

Specifications

Material: Steel
Finish: Electro-galvanized

Part Number	Rod Size RS	Length L	Static Load F
0250025EG	1/4"	7/8"	240 lb
0250037EG	3/8"	1 3/4"	610 lb
0250050EG	1/2"	1 3/4"	1,130 lb
0250062EG	5/8"	2 1/8"	1,810 lb
0250075EG	3/4"	2 1/4"	2,710 lb
0250087EG	7/8"	2 1/2"	3,770 lb

25R Hex Rod Reducer

Features

- Threaded rod reducing coupling

Specifications

Material: Steel
Finish: Electro-galvanized

Part Number	Rod Size 1 RS1	Rod Size 2 RS2	Length L	Pipe Size	Static Load F
025R3725EG	3/8"	1/4"	1"	3/8" Max	240 lb
025R5037EG	1/2"	3/8"	1 1/4"	2" Max	610 lb
025R6250EG	5/8"	1/2"	1 1/4"	3 1/2" Max	1,130 lb

Never use smaller rod sizes than the minimum rod sizes defined by applicable code.

42 Hex Head Lag Screw

Features

- For use with wood structures

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Screw Diameter Sc	Screw Length L
0422515EG	1/4"	1 1/2"
0422520EG	1/4"	2"
0423710EG	3/8"	1"
0423715EG	3/8"	1 1/2"
0423720EG	3/8"	2"
0423725EG	3/8"	2 1/2"
0423730EG	3/8"	3"
0423740EG	3/8"	4"
0425015EG	1/2"	1 1/2"
0425020EG	1/2"	2"
0425025EG	1/2"	2 1/2"
0425030EG	1/2"	3"
0425040EG	1/2"	4"

43 Wood Drive Screw

Features

- Light duty fastener for mounting various structural attachments onto wood

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Screw Diameter Sc	Screw Length L
0431402EG	#14	2"
0431602EG	#16	2"

Install only in shear, never use under pull-out configuration.

80 Tie Bolt

Features

- Recommended for securing the connection of steel pipe to ductile pipe
- Threaded rod passes through eye and is retained with a Heavy Duty Hex Nut
- May be used for either vertical or horizontal installations

Specifications

Material: Steel

Part Number	Diameter	Screw Diameter Sc	Screw Length L
080750450PL	13/16"	3/4"	4 1/2"

Conforms to NFPA® pamphlet #2, 4"-12" pipe size.

Drop-In Anchor

Features

- Internal thread provides easy removal and serviceability
- Installs flush or below the base surface

Specifications

Material: Steel
Finish: Plain

Part Number	Hole Size HS	Length L	Diameter
CA0025EG	1/4"	1"	3/8"
CA0037EG	3/8"	1 9/16"	1/2"
CA0050EG	1/2"	2"	5/8"

Flanged Drop-in Anchor

Features

- Internal thread provides easy removal and serviceability
- Installs flush for standard embedment

Specifications

Material: Steel
Finish: Plain

Part Number	Hole Size HS	Length L	Diameter
LA0025EG	1/4"	1"	3/8"
LA0037EG	3/8"	1 9/16"	1/2"
LA0050EG	1/2"	2"	5/8"

Spike Anchor

Features

- Use in concrete with threaded rod
- Vibration resistant
- Pre-expanded anchor design allows for easy installation
- Mushroom and flat head spike anchors are tamper-proof
- Removable forming spike can be used for temporary installations
- Pipe spike is an easy to install alternative to direct fastening

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	Drill Bit Size	Drill Hole Depth
RAWL3758	3/8"	1/4"	1 1/4"

Wedge Expansion Anchor Bolt

Features

- ICC approved for use in cracked and uncracked concrete
- Includes nut and washer
- Meets NFPA® 13 - 2010 as pre-qualified for seismic applications

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Screw Diameter Sc	Length 1 L1	Length 2 L2	Drill Bit Size	Torque TQ

HangerMate® Vertical Mount Screw for Steel

Features

- Convenient design allows fast and easy installation
- Eliminates the need for labor-intensive operations, such as pre-punching or drilling of steel components
- Only one driver needed for all anchor sizes
- Tapped head permits in-line mounting of threaded rod systems

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size RS	Flange Thickness FT	Screw Diameter Sc	Screw Length L
HMZG160	1/4"	0.06" – 1/4"	1/4"	1"

HangerMate® Vertical Mount Screw for Steel with Lock Nut

Features

- Convenient design allows fast and easy installation
- Eliminates the need for labor-intensive operations, such as pre-punching or drilling of steel components
- Only one driver needed for all anchor sizes
- Tapped head permits in-line mounting of threaded rod systems

Specifications

Material: Steel

Finish: Electro-galvanized

Nut Included: Yes

Part Number	Rod Size RS	Flange Thickness FT	Screw Diameter Sc	Screw Length L
HMZG471	3/8"	0.06" – 1/4"	1/4"	1"

HangerMate® Horizontal Mount Screw for Steel

Features

- Convenient design allows fast and easy installation
- Eliminates the need for labor-intensive operations, such as pre-punching or drilling of steel components
- Only one driver needed for all anchor sizes
- Cross-drilled and tapped head permits horizontal mounting of threaded rod systems

Specifications

Material: Steel

Finish: Electro-galvanized

HMZH476	3/8"	0.06" – 1/4"	1/4"	1"

HangerMate® Vertical Mount Screw for Wood

Features

- Convenient design allows fast and easy installation
- Only one driver needed for all anchor sizes
- Tapped head permits in-line mounting of threaded rod systems

Specifications

Material: Steel
Finish: Electro-galvanized

Part Number	Rod Size	Screw Diameter	Screw Length
HMZG315	1/4"	5/16"	2 1/4"
HMZG650	3/8"	5/16"	2 1/4"

HangerMate® Horizontal Mount Screw for Wood

Features

- Convenient design allows fast and easy installation
- Only one driver needed for all anchor sizes
- Cross-drilled and tapped head permits horizontal mounting of threaded rod systems

Specifications

Material: Steel
Finish: Electro-galvanized

Part Number	Rod Size	Screw Diameter	Screw Length
HMZH665	3/8"	5/16"	2 1/4"

HangerMate® Vertical Mount Screw for Concrete

Features

- End-drilled and tapped for attaching threaded components to concrete
- Solid, one piece cold formed part; head cannot spin off or unscrew from body
- Tapered threads allow for easy starting in pre-drilled hole

Specifications

Material: Steel

Finish: Electro-galvanized

Part Number	Rod Size	Screw Diameter	Screw Length	Ultimate Static Load
HMZG365	1/4"	5/16"	2 1/4"	2,188 lb
HMZG730	3/8"	5/16"	2 1/4"	2,188 lb

Tested in 3650 psi concrete.

Appropriate safety factors should be applied for design purposes.

HangerMate® SDS Drill Bit for Hammer Drills

Features

- Engineered for accurate drilling in concrete applications
- Hex collar allows attachment of drive sleeve

Specifications

Material: Steel

Part Number	Drill Bit Size
HMZE350	1/4"
HMZE380	3/8"

HangerMate® Drill Bit Adaptor

Features

- Hex collar allows drive sleeve to be used with tanged drill bit

Specifications

Material: Steel

Part Number
HMZE240

HangerMate® Tanged Drill Bit for Hammer Drills

Features

- Engineered for accurate drilling in concrete applications
- For use with HangerMate® drill bit adaptor

Specifications

Material: Steel

Part Number	Drill Bit Size
HMZE340	1/4"

HangerMate® Hex Drive Socket

Features

- Installs anchors quickly and easily
- Automatically disengages when anchor is seated

Specifications

Material: Steel

Part Number
HMZE215

HangerMate® Drive Sleeve

Features

- Installs anchors quickly and easily
- Automatically disengages when anchor is seated
- Easily slips over drill bit adaptor and drill bits
- Allows installation of anchors without removing the drill bit

Specifications

Material: Steel

Part Number
HMZE220

MATERIAL USED

CAST IRON:

Grey Cast Iron, ANSI®/ASTM® A 48-76, Class #20

MALLEABLE IRON:

ANSI/ASTM A 47-77, Grade Number 32510

SPRING STEEL:

High Carbon Steel, tempered.

STAINLESS STEEL:

(S4) ANSI Type 304 Stainless Steel: (S6) ANSI Type 316, ASTM A240

STEEL:

- M1020 Merchant Bar Quality, ANSI/ASTM A 36
- Prime Quality, Low Carbon, Hot Rolled Sheet, (may be Pickled and Oiled) ANSI/ASTM A 569
- Commercial Quality, Low Carbon, Cold Rolled, ANSI/ASTM A 366

INSTALLATION

1. All pipe supports, hangers, intermediate components and structural attachments must **ONLY** be used to support pipe, tubing or conduit as stated herein and are **NEVER** to be used for any other purpose.
2. All pipe supports and hangers are designed **ONLY** for **STATIONARY** piping unless otherwise noted.
3. All supports, hangers, clamps and accessories shown to use two nuts on the hanger rod or a jam nut must have nuts tightened securely to assure proper performance.

COATINGS

Zinc Electroplate, Electrogalvanized (EG)

ANSI/ASTM B633

This corrosion protective coating is applied after the fabrication of steel or malleable iron parts and uses an electrolytic plating process that deposits zinc up to 0.5 mils. A second passivation coating of chromate is then applied for additional protection.

Zinc electroplate products are recommended for indoor and mildly corrosive applications.

Pre-galvanized Zinc (PG)

ANSI/ASTM A 525 and 526

Pregalvanized zinc is produced by continuously rolling steel coils or sheets through molten zinc at the mills. The coils or sheets are slit to size and fabricated by forming, shearing or punching to produce the finished product. During fabrication cut edges are not generally zinc coated; however, the zinc near the uncoated metal becomes a sacrificial anode to protect the bare areas.

Pregalvanized zinc products are generally recommended for indoor use on mildly corrosive environments.

Hot Dip Galvanized Zinc (HDG)

ASTM A123

After a product has finished its fabrication process, it is dipped into a bath of molten zinc. The zinc completely coats all edges and surfaces. Zinc thickness is controlled by the time the part is immersed in the molten zinc bath.

Hot dip galvanized zinc products are recommended for indoor, outdoor and mildly corrosive environments.

IMPORTANT: For more detailed information on a specific product, application or application environment, please contact ERICO Engineering.

CADDY® ARMOUR

The CADDY® ARMOUR coating system features bi-metallic corrosion protection with an inorganic basecoat for sacrificial protection and an organic topcoat for barrier protection. The ERICO standard for CADDY ARMOUR includes at least 1,000 hours resistance against red rust when tested per the ASTM B117, DIN 50021, or ISO/R 1456 salt spray tests.

The CADDY ARMOUR manufacturing line is optimized to control heat energy, thereby minimizing fossil fuel use. Our energy-efficient coating process minimizes waste by reusing coatings in the process, rather than by burning off excess coatings, into the air. The entire coating process has been designed with a waste minimization approach, which allows the reuse of water and process streams.

CADDY® ARMOUR is RoHS compliant.

*Note : Spring steel fasteners are for indoor use in non-corrosive environments. Mild steel fasteners can be used outdoors in humid or mildly corrosive environments. Not to be used in certain areas such as over indoor pools, etc.

HANGER SPACING

Pipe Hanger Spacing			
Nominal Dimensions		Max span between supports	
in	mm	ft	m
1	25	12	3.7
1 1/4	32	12	3.7
1 1/2	40	15	4.6
2	50	15	4.6
2 1/2	65	15	4.6
3	80	15	4.6
4	100	15	4.6
5	125	15	4.6
6	150	15	4.6
8	200	15	4.6
10	350	15	4.6
12	300	15	4.6

All piping systems require that the support system accommodate the weight of the pipe, joint connections, fluid, and other system components.

In general, the requirements of NFPA® 13 govern sprinkler system design

Spacing by NFPA 13 Sprinkler Systems (Steel Pipe except Threaded Lightwall)

WARNING

ERICO products shall be installed and used only as indicated in ERICO's product instruction sheets and training materials. Instruction sheets are available at www.erico.com and from your ERICO customer service representative. Improper installation, misuse, misapplication or other failure to completely follow ERICO's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death.

WARRANTY

ERICO products are warranted to be free from defects in material and workmanship at the time of shipment. NO OTHER WARRANTY, WHETHER EXPRESS OR IMPLIED (INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), SHALL EXIST IN CONNECTION WITH THE SALE OR USE OF ANY ERICO PRODUCTS. Claims for errors, shortages, defects or nonconformities ascertainable upon inspection must be made in writing within 5 days after Buyer's receipt of products. All other claims must be made in writing to ERICO within 6 months from the date of shipment or transport. Products claimed to be nonconforming or defective must, upon ERICO's prior written approval in accordance with its standard terms and procedures governing returns, promptly be returned to ERICO for inspection. Claims not made as provided above and within the applicable time period will be barred. ERICO shall in no event be responsible if the products have not been stored or used in accordance with its specifications and recommended procedures. ERICO will, at its option, either repair or replace nonconforming or defective products for which it is responsible or return the purchase price to the Buyer. THE FOREGOING STATES BUYER'S EXCLUSIVE REMEDY FOR ANY BREACH OF ERICO WARRANTY AND FOR ANY CLAIM, WHETHER SOUNDING IN CONTRACT, TORT OR NEGLIGENCE, FOR LOSS OR INJURY CAUSED BY THE SALE OR USE OF ANY PRODUCT.

LIMITATION OF LIABILITY

ERICO excludes all liability except such liability that is directly attributable to the willful or gross negligence of ERICO's employees. Should ERICO be held liable its liability shall in no event exceed the total purchase price under the contract. ERICO SHALL IN NO EVENT BE RESPONSIBLE FOR ANY LOSS OF BUSINESS OR PROFITS, DOWNTIME OR DELAY, LABOR, REPAIR OR MATERIAL COSTS OR ANY SIMILAR OR DISSIMILAR CONSEQUENTIAL LOSS OR DAMAGE INCURRED BY BUYER.
