LOW-LEAD COMPLIANT WATER HAMMER ARRESTORS

FNW water hammer arrestors are engineered devices that provide maintenance-free continuous protection against water hammer. Water hammer is a hydraulic shock wave generated within a water distribution system due to a sudden stop in water flow. If allowed to exist for any length of time, water hammer can cause pipes to rattle, is capable of bursting pipes or can damage other components within the system. When installed properly, there is an unobstructed shock path to the arrestor that is absorbed by a piston-driven and isolated cushion of air.

FEATURES

- Lead-free certified
- Max Static (Working) Pressure: 150 psi
- Max Spike Pressure: 350 psi
- Temperature: 33°F to 180°F (0.6°C to 82°C)
- End Connection: NPT (X10P), CxC (X11P)
- For commercial and residential systems
- Suitable for potable water applications
- Designed for vertical or horizontal installation (not to be installed in the inverted position)
