MALE X FEMALE LARGE-PORT BALL VALVE

T-900 M x F and T-900 M x F-T

Durable forged brass construction

Space-saving male-by-female end connections are ideal for confined piping installations

T-handle equipped models can be used as gauge-cock isolation valves, without the gauge face obstruction associated with a lever-handle equipped valve

Bottom-loaded blowout-proof stem is a maintenance-free, dual O-ring seal design, eliminating the need to tighten a packing nut

Improved 3M Dyneon® TFM PTFE seats and thrust washers provide enhanced sealing and isolation between the body and ball-stem-handle rotating assembly

Available in sizes 1/8" to 1" equipped with a lever handle or T-handle

Working Pressure, Non-Shock (PSI)

Cold working pressure (CWP): 1/8" to 3/4": 600
1": 500

Saturated steam (WSP): 150 psi
