# KOHLER® Toilets Service Parts

## Tips for Finding the Right Part

### Know if Your Toilet Is a One-Piece or Two-Piece Toilet

One-piece toilets integrate tank and bowl into a seamless design.

Two-piece toilets feature the traditional design of a separate tank and bowl.

### Determine Your Toilet's Flushing Technology

All KOHLER flushing technologies are described, along with their common replacement parts, on pages 4–11. To determine your toilet's flushing technology, look inside the tank and compare your flushing mechanisms with those pictured in this catalog.

### Look for Model and Service Information

Many toilets have service information on the underside of the tank lid.

The toilet tank number is imprinted on the inside back of the tank.

For toilet and tank K-number reference, see index on pages 12–13.

### Find Your Toilet in the Matrix

If you do not find the part you need pictured on pages 4–11, use the information you have gathered to find your toilet in the corresponding section of the matrix. The replacement part numbers for the float/fill valve, flush valve, tank gasket and flush ball/flapper are listed for each toilet. To view all the service parts for your toilet, visit [KOHLER.com/ServiceParts](http://KOHLER.com/ServiceParts) for the expanded service parts pages.

## Power Lite® One-Piece Toilets

**POWER LITE®**  
KOHLER®

If you have a Power Lite toilet, there will be an electrical cord extending from the toilet to a power outlet.

Power Lite toilets have specific replacement parts for each model.

See pages 54–55 for parts related to Power Lite toilets.

For detailed parts listings, see pages 54–55.

---

## Pressure Lite® One- and Two-Piece Toilets

**PRESSURE LITE®**  
KOHLER®

If you have a Pressure Lite toilet, you will see a holding vessel within the tank.

Pressure Lite toilets have specific replacement parts for each model.

See pages 58–59 for parts related to Pressure Lite toilets.

For detailed parts listings, see pages 58–59.

# Canister (Single-Flush) Toilets

CLASS SIX<sup>®</sup>  
KOHLER.

CLASS FIVE<sup>®</sup>  
KOHLER.

If you have a single-flush canister toilet, you will see a cylinder-shaped flush valve inside the tank instead of a flapper. The seal in the canister works similar to a flapper. **If your toilet is leaking water into the bowl, the seal needs to be replaced, not the canister.**

**AquaPiston<sup>®</sup>**  
The AquaPiston canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.

# Canister (Dual-Flush) Toilets

DUAL FLUSH  
KOHLER.

If you have a dual-flush toilet, you will see a two-button actuator on the top or a two-part trip lever on the side rather than a standard trip lever. You will see a cylinder-shaped flush valve inside the tank instead of a flapper. The seal in the canister works similar to a flapper. **If your toilet is leaking water into the bowl, the seal needs to be replaced, not the canister.**
