

MC195T

TIMER CONTROLLER

for use with Rinnai Tankless Water Heaters

Rinnai's new timer controller features all of the functions of our standard digital controller with a new timer function and more stylish design. The new timer function can limit the hot water recirculation period to only the time when it is needed the most, such as morning and night. This saves energy while ensuring maximum comfort and saves water.

The MC195T can only be used with the Rinnai Ultra and Luxury Series Tankless Water Heaters that feature Circ-Logic™. And now you can offer your customers the benefits of timer-based recirculation with any pump.

MC195T

TIMER CONTROLLER

**for use with Rinnai
Tankless Water Heaters**

Dual program timer control for optimum recirculation efficiency and comfort

- Allows users to shut off pump during periods of inactivity
- Attractive modern design with LED display
- For use with Rinnai's Circ-Logic-equipped water heaters (Ultra and Luxury series)
- Preheat function allows users to manually activate recirculation mode
- Dual program feature allows for weekday and weekend programs
- Precise digital temperature control ensures comfort and safety
