S2150
ASSEMBLY & INSTALLATION GUIDE
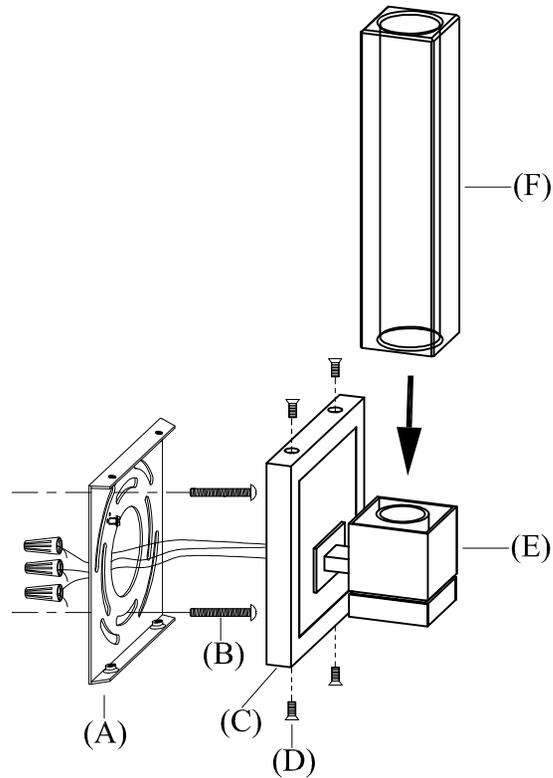

1. Attach the ground (green) wire to the ground wire from the wall outlet box (usually green or copper in color), and fasten together with a plastic wire connector. Tightly wrap the wire connector with electrical tape so the end of the connector is sealed. IT IS IMPERATIVE THAT THE OUTLET BOX IN YOUR HOME BE PROPERLY GROUNDED.

2. Connect the neutral (white) fixture wire coming from the lamp fixture base to the neutral (usually white) outlet wire. Fasten both wires together with a plastic wire connector and tightly wrap the wire connector with electrical tape.

3. Repeat the procedure with the hot (black) wires. Always make sure that no wire strands are left outside the connectors. DO NOT REVERSE THE HOT AND NEUTRAL CONNECTIONS OR SAFETY WILL BE COMPROMISED. Remove the mounting plate (A) from fixture base (C) by removing the base screws (D).

4. Affix the mounting plate (A) to wall outlet box and secure with mounting screws (B).

5. Gently push fixture base (C) to affixed mounting plate (A) and secure with base screws (D).

6. Insert light bulb into socket.

7. Attach glass shade (F) to shade holder (E).
