

## Notice Boil Water

Effective immediately we have instituted a boil water order for your building. All water used for drinking, ice cubes, washing of foods and any other consumption should be boiled until further notice. This order has been issued due to the possibility of unsafe water in the system that serves your building.

To assure the water is safe for consumption water must be brought to a full rolling boil for a minimum of five minutes. Once the water has been boiled for at least five minutes it can be set aside and stored for future use in either the refrigerator or at room temperature in a sealed container.

We will notify you when the Boil Water order has been removed.

If you have questions you may contact us at the number below.
