

# 3-STAGE UNDER-COUNTER DRINKING WATER FILTER

## 3 STAGES FOR BETTER TASTING WATER

- OFFERS HIGH QUALITY DRINKING WATER
- REDUCES CHLORINE AND CHLORAMINE TASTE/ODOR
- FAST AND EASY INSTALLATION
- WASTES NO WATER AND OFFERS 1,500 GALLONS OF FILTERED WATER WITH ON-DEMAND FILTRATION.

### Compact Drinking Water Filter

The Enviro 3-Stage Drinking Filter features 3 stages of filtration: 25 Micron Prefilter, and 2 Catalytic GAC Carbon filters in a compact, easy to maintain manifold.

### Green By Design®

The Enviro 3-Stage Drinking Filter uses the latest in system design and filtration technology to filter taste and odor issues from your water without wasting water down the drain, leaving you with cleaner, fresher, healthier water. The Enviro Drinking Filter has a smaller footprint and uses significantly fewer resources in the manufacturing process than the typical 3-stage systems. Smaller packaging and a lighter shipping weight further reduce impact on the environment.

### Easy to Maintain

Yearly maintenance is quick and easy. Simply remove the cover and replace the cartridge - no complicated plumbing connections, no tools required.

### Made In The U.S.A.

The Enviro 3-Stage Drinking Filter is designed, manufactured and assembled by skilled labor in the USA using quality components .

### Beneficial Minerals Kept

The Enviro 3-Stage Drinking Water Filter offers a carbon filter inside that retains essential minerals (calcium & magnesium) to your drinking and cooking water which are removed from RO systems and Ultra Filtration systems.

## PRODUCT SPECIFICATIONS

System Capacity	1,500 Gallons
Replacement Interval	6-12 Months
Temperature	4°C - 38°C (40°F - 100°F)
Pressure	275kPa - 552kPa (40-80 psi)
System Dimensions	12.5" W x 15" H x 4.5" D

Each 3-Stage Under-Counter Drinking Water Filter comes with your choice of a Chrome, Brushed Nickel or Oil Rubbed Bronze faucet.
