Welcome to H-B Instrument

With over a century of experience, H-B Instrument is a world class leader in the manufacturing of temperature, density, time and weather instruments. Triple accredited/registered, this ISO/IEC 17025:2005, ISO 14001:2004, ISO 9001:2008 organization adheres to all applicable standards established by ACS, ANSI/SAMA, API, ASTM, CSA, DAKKS, IPTS 90, IRS, NEC, NEMA, NIST, ILAC, A2LA, ISO/IEC, RoHS, WEEE, and CE.

H-B's ISO/IEC 17025:2005 accredited calibration services offer A2LA accreditation covering the scope of liquid in glass, electronic and bi-metal thermometers, proof, specific gravity, baume heavy and light and American Petroleum Institute Scale hydrometers, timers and stopwatches. For details visit www.hbinstrument.com/services.php.

Committed to the environment, H-B Instrument was an early advocate of non-mercury thermometry and offers an exclusive line of "green" laboratory grade thermometers. Each USA made **Enviro-Safe**[®] and **Easy-Read**[®] thermometer is EnviroKleen[™] certified environmentally safe and features non-toxic, non-hazardous, biodegradable **Enviro-Safe**[®] liquid and recyclable packaging. **Double-Safe**[™] PFA coated and **FRIO-Temp**[®] verification thermometers also feature non-toxic, non-hazardous, biodegradable **Enviro-Safe**[®] liquid and recyclable packaging. H-B also offers a mercury exchange program to aid in the elimination of mercury in the workplace and classroom.

In 2012 H-B Instrument entered a new era joining the Bel-Art Products family with the commitment to bring our expertise in instrumentation and calibration services to a wider market of end users and supporting our network of distributors in 64 countries with innovative programs and products. For more information on the H-B Instrument product line please visit the company web site www.hbinstrument.com.

ISO/IEC 17025:2005 Accredited Calibration Services

When Accuracy Counts, Our Expertise is at Your Service!

- A2LA accreditation in accordance with ISO/IEC 17025:2005 covering the scope of liquid in glass, electronic and bi-metallic thermometers, proof, specific gravity, baume heavy and light and American Petroleum Institute Scale hydrometers, timers and stopwatches
- Test procedures of NBS Monograph 150 and 174 and ISO 17025 as guidelines
- Quality standards meeting ISO 9001:2008 and ISO/IEC 17025:2005 through A2LA, ANSI/NCSL Z540-1 criteria
- Individual calibration to NIST and DAkkS standards

Reports & Statements of Accuracy/ Traceability are not the same

A Statement of Accuracy/Traceability accompanies most instruments and states that the instrument was tested against a reference standard and was found to have accuracy within the specification for that type of instrument - it meets conformance standards.

A Calibration Report, specifies corrections at specific points. Calibration of an instrument involves checking the instrument under magnification for any defects - cracks, impurities, etc that may impair the functionality of the instrument. Your instrument will be compared to NIST and DAkkS certified standards at the specified test points in accordance with the aforementioned test procedures and methods. A signed Calibration Report will be issued showing the results of the test meeting the quality and record keeping requirements for ISO/IEC 17025, ISO 9000 and ANSI/NCSL Z540.

Thermometers/Hydrometers May Need To Be Recalibrated; Does Yours?

There are several reasons why a thermometer/hydrometer may need to be recalibrated: ISO 9000, quality control and other regulations may require annual Calibration Reports. These reports with corrections enable calibration or validation of other instruments.

In general laboratory use, we recommend calibration of thermometers at one year intervals. NIST further recommends six month intervals for thermometers used as standards. Other factors to consider in determining calibration intervals include calibration history, measurement assurance data, data for the population of similar equipment, and statistical analysis methods.

NIST Publication GMP-11, Good Measurement Practice for Assignment and Adjustment of Calibration Intervals for Laboratory Standards, establishes calibration intervals for standards and instrumentation used in measurement processes. NIST guidance documents are available on their website.

3 Simple Steps Toward Calibration

1. CALL H-B Instrument at 610-489-5500 or EMAIL info@hbinstrument.com to place your calibration order. A Service Request (SR) number, pricing and expected delivery date (averaging 5 business days) will be provided.
2. SEND your instrument/s to H-B Instrument. Our team of experts will inspect and calibrate your instrument against NIST and DAkkS certified standards and corrections will be recorded.
3. RECEIVE your instrument and Calibration Report. The calibration data will be stored in our database for future reference.

**VALUE ADDED

An annual reminder will be sent for recertification 11 months after initial certification.

ISO/IEC 17025:2005 Accredited Calibration Services

When Accuracy Counts, Over a Century of Experience is at Your Service!

All calibrated instruments are provided with a Calibration Report from our exclusive triple accredited/registered manufacturing and calibration facility - ISO/IEC 17025:2005 through A2LA; ISO 9001:2008 and ISO 14001:2004. Each instrument is individually calibrated against National Institute of Standards and Technology (NIST) standards at specific temperature points. The report identifies corrections to one-tenth the smallest division. Each instrument is individually serialized to easily match the instrument and the report. Test procedures of NBS Monograph 150, 174 and ISO 17025 serve as guidelines for calibration.

Thermometers and Hydrometers are calibrated NIST standards.

Date of calibration (MM/DD/YYYY).

Unique report number allows easy access to information.

General product description.

Calibration Due Date

NIST standard reading of calibration points.

Actual test results for your instrument.

Indicates the expanded uncertainty and confidence level.

H-B Instrument® Thermometer Calibration Report

Traceable to NIST

Triple Accredited/Registered:
ISO 9001:2008 Registered Manufacturer
ISO 14001:2004 Registered Manufacturer
ISO/IEC 17025:2005 Accredited Laboratory

The instrument described below has been examined and tested in the H-B Instrument® Calibration Laboratory using controlled constant temperature equipment and standard thermometers traceable to NIST in accordance with our calibration procedure LAB-20 which is based in part on NBS Monograph 150, ASTM Method E-77, NIST SP 1088, and the International Temperature Scale ITS-90. Calibration is traceable to NIST. For a discussion of accuracy obtainable with such thermometers, see NIST SP 250-23. The results stated relate only to the instrument bearing the serial number identified.

This instrument is in good working order and is suitable for calibration. The capillary of the thermometer has been examined under magnification and no discernible capillary irregularities were noted. Strains in the glass revealed by examination under a polarized lens, if any, were judged to be minimal and of no detriment to the function of the instrument.

02/09/2016

Report No. 358224
Serial No. 3114390
Part No.
Distributor Bel-Art Products
Manufacturer H-B Instrument
Item Thermometer, Total Immersion
Range -10/225°C, 1°Div., Organic Liquid
Tolerance ±2°C, ± 2.5°C above 110°C, ± 3°C above 200°C

N.I.S.T. Standard	Instrument Tested	Correction (ITS-90)*	Standard Serial No.	Traceability	Expanded Uncertainty (k=2)	Emer. Stem** Temperature
1.0°C	2.3°C	-1.3	1285-028-415	CAL150501	± 0.145	°
100.0°C	102.0°C	-2.0	1285-028-415	CAL150501	± 0.145	°
200.0°C	197.0°C	3.0	1285-028-415	CAL150501	± 0.151	°

Ambient Air Temperature: 23°C Relative Humidity: 48%

* Observed instrument readings should be increased by positive numbers or reduced by negative numbers indicated by a minus (-) sign.
** Emergent Stem Temperature relates to PARTIAL IMMERSION thermometers ONLY.

The reported uncertainty represents an expanded uncertainty expressed at approximately the 95% confidence level using a coverage factor of k=2. The uncertainty of measurement is an important factor to consider when evaluating this instrument for conformance to tolerance standards.

Liquid - In - Glass Thermometers

Thermometer Guide

H-B thermometers product lines offer a variety of liquid types to choose from.

Easy-Read® Certified, Lab Grade and Pocket Thermometers

- USA made
- Black EnviroKleen™ certified environmentally friendly **Enviro-Safe®** liquid and recyclable SafetyPak® packaging
- High contrasting black liquid against yellow back glass makes this thermometer the easiest to read liquid-in-glass thermometer on the market
- Individually serialized
- Statement of Accuracy indicating accuracy traceable to NIST and DAkKS
- Tested, calibrated and certified (where applicable) in our triple accredited/registered ISO 17025:2005 laboratory

Enviro-Safe® Certified, Lab Grade, Pocket and select special application type Thermometers

- USA made
- Green EnviroKleen™ certified environmentally friendly **Enviro-Safe®** liquid and recyclable SafetyPak® packaging
- White back lead free glass
- Individually serialized
- Statement of Accuracy indicating accuracy traceable to NIST and DAkKS
- Tested, calibrated and certified (where applicable) in our triple accredited/registered ISO 17025:2005 laboratory

Double-Safe™ Lab Grade Thermometers

- USA made
- Black EnviroKleen™ certified environmentally friendly **Enviro-Safe®** liquid and recyclable SafetyPak® packaging
- High contrasting black liquid against yellow back glass makes this thermometer the easiest to read liquid-in-glass thermometer on the market
- PFA safety coating makes this thermometer safe - thermometer liquid and glass will remain contained within the PFA coating if the thermometer is broken
- Individually serialized
- Statement of Accuracy indicating accuracy traceable to NIST and DAkKS
- Tested and calibrated in our triple accredited/registered ISO 17025:2005 -laboratory

DURAC® Plus™ Lab Grade, Pocket and select special application type Thermometers

- Blue organic liquid and recyclable SafetyPak® packaging
- White back glass
- Individually serialized
- Statement of Accuracy indicating accuracy traceable to NIST
- Tested, calibrated and certified (where applicable) in our triple accredited/registered ISO 17025:2005 laboratory

DURAC® Economical Grade and select special application type Thermometers

- Red organic liquid
- White back glass
- Economical grade

Our instruments cover most applications for liquid-in-glass thermometers. Call our tech specialists at 800-4-Test-Lab (483-7852) USA and Canada or 1-610-489-5500 or email us at info@hbinstrument.com for help choosing the correct product for your application. Custom thermometers can be made to your specifications.

Calibrated Liquid-In-Glass Thermometers

When precision counts! Accurate to the requirements of ANSI/SAMA Z236.1-1983, ASTM, NIST, DAKKS and/or equivalent standards.

Easy-Read® and **Enviro-Safe®** Thermometers feature a detailed Calibration Report stating corrections to one-tenth of the smallest division and individual serial number. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAKKS. Individually packaged in a recyclable heavy duty storage box.

DURAC® Plus™ thermometers features a Calibration Report stating corrections to one-tenth of the smallest division and individual serial number. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Individually packaged.

Ideal for use in chemical laboratories, universities, scientific institutions, food and beverage processing, petrochemical laboratories, pharmaceutical industry, medical industry, manufacturers, dairies, breweries and distilleries.

Calibrated Precision Liquid-In-Glass Verification Thermometers, PFA Safety Coated

To verify sample temperatures in Freezers, Refrigerators, Incubators and Ovens with traceability to NIST, DAkS and most standards through ILAC.

Each item features PFA fluoropolymer safety coating, a detailed Calibration Report stating corrections to one-tenth of the smallest division and individual serial number. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkS. Individually packaged. Made in USA.

Precision Liquid-In-Glass Thermometers

Each thermometer is individually serialized and includes a Statement of Accuracy indicating accuracy traceable to NIST*. Accurate to the requirements of ANSI/SAMA Z236.1-1983, ASTM, NIST, DAkS and/or equivalent standards. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Individually packaged in Safety-Pak™ packaging to prevent breakage. Ideal for use in chemical laboratories, universities, scientific institutions, food and beverage processing, petrochemical laboratories, pharmaceutical industry, medical industry, manufacturers, dairies, breweries and distilleries.

*Enviro-Safe® high precision thermometers are also traceable to DAkS and include a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy.

Verification Thermometers

To verify sample temperatures in Freezers, Refrigerators, Incubators and Ovens with traceability to NIST, DAkKs and most standards through ILAC.

Each item features individual serial numbers and a Statement of Accuracy indicating accuracy traceable to NIST*. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST.

***FRIO-Temp**® Thermometers feature PFA flouropolymmer safety coating and a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy indicating accuracy traceable to NIST and DAkKs.

Ideal for chemical industry, petrochemistry, pharmaceutical, medical, cosmetic, producers of chemicals, university, dairies, breweries, distillers, beer cellars, refrigeration house, hot houses, scientific institutes, blood banks, refrigeration/freezer/incubator/oven equipment producers and producers of laboratory equipment.

** Easy-Read® style, Enviro-Safe® liquid fill dyed black on yellow back glass

PFA Safety Coated Liquid-In-Glass Thermometers

Added safety and protection from breakage!

In the event of breakage, the PFA fluoropolymer safety coating keeps the liquid and glass encapsulated.

Double-Safe™ Thermometers feature a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy indicating accuracy traceable to NIST and DAkkS. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkkS.

DURAC® Plus™ thermometers feature a Statement of Accuracy indicating accuracy traceable to NIST. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST.

Ideal for use in chemical laboratories, universities, scientific institutions, food and beverage processing, petrochemical laboratories, pharmaceutical industry, medical industry, manufacturers, dairies, breweries and distilleries.

DURAC® Plus™ ASTM Like Thermometers - White Back

ASTM Like thermometers are safer to use than their mercury counterparts. These thermometers are individually serialized and approximate ASTM requirements. Ideal for use in quality control laboratories or where ISO 9000 standards are in place. Individually packaged.

* With 5 point calibration. Each thermometer includes a detailed laminated Report of Calibration and is packaged in a recyclable deluxe storage box.

General Purpose Liquid-In-Glass Thermometers

Easy-Read[®], **Enviro-Safe**[®] and **DURAC**[®] Plus[™] thermometers are individually serialized and includes a Statement of Accuracy indicating accuracy traceable to NIST*. Accurate to the requirements of ANSI/SAMA Z236.1-1983, ASTM, NIST, DAKS and/or equivalent standards. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Individually packaged in Safety-Pak[™] packaging to prevent breakage. Ideal for use in chemical laboratories, universities, scientific institutions, food and beverage processing, petrochemical laboratories, pharmaceutical industry, medical industry, manufacturers, dairies, breweries and distilleries.

***Easy-Read**[®] and **Enviro-Safe**[®] precision thermometers are also traceable to DAKS and include a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy. **DURAC**[®] Thermometers are not traceable to NIST.

Armored Liquid-In-Glass Thermometers

Each partial immersion thermometer is organic liquid filled against white back glass, individually serialized and comes with a Statement of Accuracy indicating accuracy traceable to NIST. All thermometers are tested and calibrated in H-B's exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Armored thermometers meet or exceed the requirements for physical dimensions and accuracy of ANSI/SAMA Z236.1-1983, where ranges are specified. Each thermometer features an open protective nickel plated brass armor which protects the thermometer from accidental breakage during use and storage. Lower section surrounding the bulb features small openings for circulation. Fitted with screw cap and ring top. Individually packaged.

Pocket Liquid-In-Glass Thermometers

When Convenience and Portability Count!

Each thermometer features 160mm (6.3") length, is total immersion and a Statement of Accuracy indicating accuracy traceable to NIST*. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Individually packaged in Safety-Pak™ packaging to prevent breakage. Ideal for field studies, waste water treatment and any "on-the-go" applications.

***Easy-Read®** and **Enviro-Safe®** pocket thermometers are also traceable to DAKS and include a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy.

Dry Block/Incubator Thermometers

Enviro-Safe® Dry Block/Incubator Thermometers

Each USA made **Enviro-Safe®** thermometer is EnviroKleen™ certified environmentally friendly and features 100% non-toxic, non-hazardous, biodegradable **Enviro-Safe®** liquid and recyclable Safety-Pak™ packaging. **Enviro-Safe®** thermometers have the same accuracy as similar mercury thermometers, but without the hazards. Each item features individual serial numbers and a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy indicating accuracy traceable to NIST and DAkks*. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkks. Individually packaged in recyclable packaging.

*Each **Enviro-Safe®** Calibrated thermometer is individually calibrated to NIST and DAkks standards at specific temperature points and supplied with a detailed, laminated Calibration Report stating corrections to one-tenth of the smallest division. Individually serialized and packaged in a recyclable deluxe storage box with a non-roll fitting. Calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkks.

DURAC® Plus™ Calibrated dry block thermometers are designed for use in all standard heating blocks and water baths. Each item is calibrated to NIST standards at specific temperature points. Thermometers include a detailed Calibration Report stating corrections to one-tenth of the smallest division and individual serial number. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST. Individually packaged in a recyclable heavy duty storage box.

DURAC® Dry Block/Incubator Thermometers

Individually serialized and designed for use in all standard heating blocks and water baths. Individually packaged in recyclable packaging.

H-B Catalog Nos. 31840C, 6/1110 and 6/1160 feature a micro-centrifuge tube on the bulb.

Wall Thermometers

Enviro-Safe® Wall Thermometers

Each USA made **Enviro-Safe®** thermometer is EnviroKleen™ certified environmentally friendly and features 100% non-toxic, non-hazardous, biodegradable **Enviro-Safe®** liquid. **Enviro-Safe®** liquid has the same accuracy as similar mercury thermometers, but without the hazards. Each thermometer is mounted against a wood base with keyhole slot for hanging.

DURAC® Wall Thermometers

Economical yet strong and durable. Thermometer is mounted to a molded plastic case that protects the bulb.

Galileo Thermometers

Galileo Galilei discovered when a liquid's temperature increases, it's density decreases. His findings inspired these unusual and interesting thermometers with colorful spheres which rise and fall to indicate temperature. Galileo thermometers are crafted of glass and individually calibrated to achieve an accuracy of 1°C (2°F). The tag on the lowest sphere in the top group indicates the current temperature. Individually packaged.

Refrigerator/Freezer Electronic Thermometers

H-B Catalog No. 3826 features dual display measuring refrigerator and freezer temperatures simultaneously, maximum/minimum temperature memory, high/low alarm with alarm duration counter, low battery indicator, 2-30mm (1.2 in) waterproof cables, flip out stand with magnetic back and two AAA batteries.

H-B Catalog No. 3804 features a single display with the ability to switch between room and refrigerator/freezer temperatures, maximum/minimum temperature memory, high/low alarm, 1-30mm (1.2 in) waterproof cable, magnetic back and one LR44 battery.

H-B Catalog Nos. 3826 and 3804 are also supplied with multi-language (English, French, German, Italian, Portuguese and Spanish) instructions and Statement of Traceability indicating accuracy traceable to NIST and DAkkS. Each item is tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkkS.

Maximum/Minimum Electronic Thermometers

H-B Catalog No. 3817 displays the current, maximum and minimum temperatures simultaneously with the ability to switch between indoor and outdoor temperature displays and features a high/low alarm, low battery indicator, 30mm (1.2 in) probe with 3 meter (9.8 ft) cable, mounting keyhole and multi-language (English, French, German, Italian, Portuguese and Spanish) instructions and Statement of Traceability indicating accuracy traceable to NIST and DAkKS. Items are CE marked and RoHS compliant. Tested and calibrated in our exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkKS. Individually packaged.

All other maximum/minimum thermometers display the current temperature and register the maximum and minimum temperatures attained since the last reset.

Maximum/Minimum thermometers are for use in high moisture or wet environments including green houses, sample prep areas and water treatment facilities.

Bi-Metallic Dial Thermometers

H-B manufactures two levels (threaded and unthreaded) of bi-metallic dial thermometers for obtaining immersion temperatures of gases and liquids. All these thermometers come:

- 1% accuracy
- equipped with an external adjustment nut for thermometer recalibration
- furnished with a Statement of Test and Calibration
- feature a stainless steel case and stem

To ensure correct temperature reading, thermometer stem must be immersed at least 50mm (2") in liquids and 100mm (4") in gases.

Bi-Metallic Dial Thermometers

Minimum immersion is 50mm (2") in liquids or 100mm (4") in gases. External adjustment nut allows for simple field calibration. Thermometers feature polycarbonate lens and probe cover with pocket clip*. Each thermometer features accuracy to 1%, stainless steel case and stem* and is individually packaged with a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Test and Calibration.

44mm (1.7") and 50mm (2") dial sizes feature a beaker clip with built in adjustment tool in place of the probe cover with pocket clip.

Bi-Metallic Dial Thermometers

Thermometers feature a 1/2" NPT threaded connection* and polycarbonate lens**. External adjustment allows for simple field calibration. For correct temperature reading, stem must be immersed at least 50mm (2") in liquids and 100mm in gases (4"). Each thermometer features accuracy to 1%, stainless steel case and stem and is individually packaged with a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Test and Calibration.

** H-B Catalog Nos. 9/5200 and 9/5030 feature a glass lens.

DURAC® Maximum/Minimum Thermometer, Bi-Metallic

Maximum/minimum thermometers display the current temperature and register the maximum and minimum temperatures attained since the last reset.

Maximum/Minimum thermometers are for use in high moisture or wet environments including green houses, sample prep areas and water treatment facilities.

Weather Instruments

H-B has designed many options for the collection of weather information. Each precision instrument, from weather station to instrument shelter, barometer to hygrometer, and sling psychrometer to rain gauge is manufactured to meet an array of weather data collection needs.

Weather Stations

Weather stations feature a 433MHz RF remote sensor* (each weather station features one internal sensor and can link up to 3 remote sensors, 1 is included), dual scale thermometer with indoor/outdoor readings, 0.1 resolution, clock with snooze alarm, calendar with day of week, CE mark and RoHS compliance. Each item is individually packaged with multi-language (English, French, German, Italian, Portuguese and Spanish) instructions.

H-B Catalog No. 701 is the European version of H-B Catalog No. 695.

* H-B Catalog No. 92 features a 1.8 meter wired sensor instead of an RF sensor.

Rain Gauge

Precision all plastic rain gauge features three piece cylindrical construction with inner and outer removable cylinders to collect rain and rain overflow. Inner cylinder features built in 100mm diameter funnel with dual scale mm and inch markings. Durable plastic construction withstands the elements and nesting ability makes it easy to use and simple to store. Complete with rainfall chart.

Instrument Shelter

Provides tamper free storage of thermometers and other temperature and weather instruments. Sturdy 19mm wood construction resists the elements and the sloped roof promotes precipitation run off. Interior mounting blocks prevent hanging instruments from touching the back wall. Hinged door and louvered front and sides. Supplied with lock and two keys. Individually packaged in a recyclable box. Made in the USA.

Clocks, Timers and Stopwatches

As a leading resource, H-B Instrument provides laboratories, businesses, and industries with precision time-keeping devices including a variety of clocks, timers and stopwatches.

DURAC® Clocks

- A variety of styles
- Multi-language instructions (English, French, German, Italian, Portuguese, and Spanish)
- CE marked and RoHS compliant

DURAC® Timers and Stopwatches

- CE marked and RoHS compliant
- Multi-language instructions (English, French, German, Italian, Portuguese, and Spanish)
- All Electronic Timers now features a Certificate of Calibration and individual serial number
- Electronic timers are tested and calibrated in H-B's exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory (Cert #2448.01), against equipment whose calibration is traceable to NIST

Multi-Function Clocks

Calendar feature* and 0.1 resolution, CE mark and RoHS compliance. Each item is individually packaged with multi-language (English, French, German, Italian, Portuguese and Spanish) instructions.

*H-B Catalog Nos. 237, 244 and 238 do not have calendar feature.

H-B Catalog No. 244 is for North America. H-B Catalog No. 237 is for Europe (contact us for a list of compatible countries).

H-B DURAC® Alcohol Proof Precision Hydrometers; Traceable to NIST

These precision fabricated hydrometers provide scales from 0 to 200% with 0.1% divisions. Used during distilling and rectifying to measure % alcohol in various spirits, they are 368mm (14.6") long, and made of lead free ballast and glass. Each is individually serialized and has a temperature standardization of 60°F (15°C).

DURAC® Alcohol Proof Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Alcohol proof hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures.

H-B DURAC® Alcohol Proof – Ethyl Alcohol Hydrometers; Traceable to NIST

Used to determine proof of ethyl alcohol spirits, these hydrometers are available in various ranges from 0 to 206%. At 300mm (12") long, these alcohol proof hydrometers are made of lead free ballast and glass. Made according to the Bureau of Internal Revenue, U.S. Treasury Department, the tolerances listed for these hydrometers are those outlined in Circular 555 of the National Bureau of Standards, Testing of Hydrometers. Each is individually serialized and has a temperature standardization of 60°F (15°C).

DURAC® Alcohol Proof Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. H-B DURAC® API ASTM Hydrometers with Individual Calibration Report; Traceable to NIST

Choose from a wide range of individually calibrated models measuring the relative density (specific gravity) of oil and petroleum related products in various ranges from -1° to 91°API in accordance with the American Petroleum Institute (API) and the American Society of Testing Materials (ASTM) E100 standards.

Made of lead free ballast and glass, these 330mm (13") long plain form hydrometers are calibrated traceable to NIST standards at three points and are supplied with a detailed calibration report stating corrections to one-tenth of the smallest division.

They are individually serialized and conform to the accuracy requirements of ASTM hydrometers.

Temperature standardization is 60°F/60°C.

These ASTM Hydrometers are calibrated and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. Each hydrometer is packaged in a recyclable, deluxe storage box. Made in the U.S.A.

Note: ASTM calibrated hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

H-B DURAC® API Plain Form Hydrometers; Traceable to NIST

Measure the relative density (specific gravity) of oil and petroleum related products in various ranges from -1° to 90°API in accordance with American Petroleum Institute (API) standards. Each hydrometer is 166mm (6.6") long, made of lead free ballast and glass, individually serialized, and has a temperature standardization of 60°F (15°C).

DURAC® Plain Form Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Plain form hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures.

H-B DURAC® Safety API Combined Form Thermo-Hydrometers; Traceable to NIST

These hydrometers, with a convenient, built-in, mercury-free thermometer, come in a wide range of models measuring the relative density (specific gravity) of oil and petroleum related products in various ranges from -1° to 101°API in accordance with American Petroleum Institute (API) standards. Made of lead free ballast and glass, these combined form thermo-hydrometers are 381mm (15") long and contain an enclosed thermometer with a temperature scale of 0/150°F and blue spirit organic liquid fill. They are individually serialized and conform to the accuracy requirements for ASTM thermo-hydrometers. Temperature standardization is 60°F (15°C).

DURAC® Safety Combined Form Thermo-Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Combined form thermo-hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures. Built-in thermometers should be used as a general reference only. For temperature critical applications, a calibrated standard thermometer is recommended.

H-B DURAC® Baume Plastic Plain Form Hydrometers; Traceable to NIST

Safety and Quality Protection in One Instrument!

Made from optical quality polycarbonate material, these plain form hydrometers are durable and shatterproof making them ideal in situations where rough handling or contamination could be an issue, such as in the food or beverage industries.

Available in models measuring Baume of syrups and liquids heavier than water in various ranges from 0 to 31°, these 255mm (10") long plain form hydrometers contain lead free ballast. Easy to read black scale on yellow back helps avoid eye fatigue. Each is individually serialized and has a temperature standardization of 60°F (15°C).

DURAC® Polycarbonate Hydrometers are made and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST. Made in USA.

Note: Polycarbonate hydrometers are not recommended for use with petroleum-based liquids or other corrosives that would potentially affect the plastic material. They should be stored in a clean, dry, safe place and should not be subjected to extreme temperatures.

H-B DURAC® Brix Sugar Scale Plastic Hydrometers; Traceable to NIST

Made from optical quality polycarbonate material, these plain form hydrometers are durable and shatterproof making them ideal in situations where rough handling or contamination could be an issue, such as in the food or beverage industries.

Available in two models measuring sugar from 0° to 35° or 15° to 50°Brix, these hydrometers measure % sucrose by weight. Easy to read black scale on yellow back helps avoid eye fatigue. Each is 300mm (12") long, contains lead free ballast, is individually serialized, and has a temperature standardization of 20°C.

DURAC® Polycarbonate Hydrometers are made and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. H-B DURAC® Salt Brine Plastic Plain Form Hydrometers; Traceable to NIST

Made from optical quality polycarbonate material, these plain form hydrometers are durable and shatterproof, and perfect for field work where breakage could be a concern. They are used for measuring sodium chloride saturation of salt brines in various industries including food, fishing, and transportation. At 300mm (12") long, they contain lead free ballast and are available in models to measure various levels of salt content from 0% to 100%. Easy to read black scale on yellow back helps avoid eye fatigue. Each is individually serialized and has a temperature standardization of 60°F (15°C).

DURAC® Polycarbonate Hydrometers are made and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST. Made in USA.

Note: Polycarbonate hydrometers are not recommended for use with petroleum-based liquids or other corrosives that would potentially affect the plastic material. They should be stored in a clean, dry, safe place and should not be subjected to extreme temperatures.

H-B DURAC® Specific Gravity / Relative Density (g/cm³) Plastic Plain Form Hydrometers; Traceable to NIST

Shatterproof Polycarbonate Prevents Contamination

Made from optical quality polycarbonate material, these plain form hydrometers are durable and shatterproof making them ideal in situations where rough handling or contamination could be an issue, such as in the food or beverage industries.

Available in models measuring specific gravity / relative density (g/cm³) of a variety of liquids in various ranges from 1.0 to 1.620, they have an easy to read black scale on yellow back to help avoid eye fatigue. At 300mm (12") long, each hydrometer contains lead free ballast, is individually serialized, and has temperature standardization of 60°F (15°C).

DURAC® Polycarbonate Hydrometers are made and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. H-B DURAC® ASTM Precision Specific Gravity Hydrometers with Individual Calibration Report; Traceable to NIST

Available in a variety of individually calibrated models measuring specific gravity of petroleum products and heavy liquids in various ranges from 0.650 to 1.500, with 0.0005 divisions in accordance with the American Society of Testing Materials (ASTM) E100 standards. Specific gravity hydrometers are the most widely used hydrometer in industries such as food and beverage, chemistry, pharmacology, transportation, refrigeration and more.

Made of lead free ballast and glass, these 330mm (13") long plain form hydrometers are calibrated traceable to NIST standards at three specific gravity points and are supplied with a detailed calibration report stating corrections to one-tenth of the smallest division. They are individually serialized and conform to the accuracy requirements of ASTM hydrometers. Temperature standardization is 60°F/60°F.

These ASTM Hydrometers are calibrated and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged in a recyclable deluxe storage box. Made in the USA.

Note: ASTM calibrated hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

H-B DURAC® Specific Gravity ASTM Hydrometers; Traceable to NIST

Available in a variety of models measuring specific gravity of heavy and light liquids in various ranges from 0.650 to 2.000 in accordance with the American Society of Testing Materials (ASTM) E100 standards. Specific gravity hydrometers are the most widely used hydrometer, common in industries such as food and beverage, chemistry, pharmacology, transportation, refrigeration and more.

Made of lead free ballast and glass, these plain form hydrometers conform to the accuracy requirements of ASTM hydrometers as listed. Each is individually serialized and has a temperature standardization of 60°F/60°F.

ASTM Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility.

They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish)

Statement of Accuracy indicating accuracy traceable to NIST.

Note: ASTM hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

H-B DURAC® Specific Gravity / Relative Density (g/cm³) Precision Hydrometers; Traceable to NIST

Specific gravity hydrometers are the most widely used hydrometer, common in industries such as food and beverage, chemistry, pharmacology, transportation, refrigeration and more. Available in a wide range of models measuring specific gravity / relative density (g/cm³) of a variety of liquids in various ranges from 0.600 to 0.920, with 0.0005 divisions.

Made of lead free ballast and glass, these 325mm (12.8") long plain form hydrometers are individually serialized.

Temperature standardization is 60°F (15°C).

DURAC® Precision Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Precision hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

H-B DURAC® Specific Gravity / Relative Density (g/cm³) Hydrometer Set with EnviroSafe Thermometer; Traceable to NIST

This Hydrometer Set consists of eight DURAC® Specific Gravity / Relative Density (g/cm³) Plain Form Hydrometers for measuring specific gravity of heavy and light liquids in various ranges from 0.700 to 2.000. It also includes one Enviro-Safe® Total Immersion Thermometer to reference liquid temperature for accurate hydrometer readings.

Commonly used in industries such as food and beverage, chemistry, pharmacology, transportation, refrigeration and more, these 300mm (12") long hydrometers are made with lead free ballast and glass, are individually serialized, and have a temperature standardization of 60°F (15°C). The 300mm (12") long Enviro-Safe® total immersion thermometer is made of lead free glass, contains green EnviroKleen™ certified, environmentally friendly liquid fill, and is individually serialized. Packaged in a deluxe storage case, this set includes a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

DURAC® Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA. Enviro-Safe® Thermometers are made and hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 9001:2008, ISO/IEC 14001:2004, ISO/IEC 17025:2005 facility and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA. They are located in our ISO 14001:2004 Environmental Management System registered facility.

Note: Plain form hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures. This set contains hydrometers Catalog No. B61801-4500, B61801-4600, B61801-4700, B61801-7200, B61801-7300, B61801-7400, B61801-7500, B61801-7600, and thermometer Catalog No. B60506-0300.

H-B DURAC® Safety Specific Gravity / Relative Density (g/cm³) Combined Form Thermo-Hydrometers; Traceable to NIST

Made of lead free ballast and glass, these combined form thermo-hydrometers are 381mm (15") long and offer the additional convenience of an enclosed thermometer with a temperature scale of 0/150°F and mercury-free blue spirit organic liquid fill. They are individually serialized and conform to the accuracy requirements for ASTM thermo-hydrometers.

Specific gravity hydrometers are the most widely used hydrometer in industries such as food and beverage, chemistry, pharmacology, transportation, refrigeration and more. Choose from a wide range of models measuring specific gravity / relative density (g/cm³) of a variety of liquids in various ranges from 0.600 to 2.000. Temperature standardization is 60°F (15°C).

DURAC® Safety Combined Form Thermo-Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Combined form hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures. Enclosed thermometers should be used as a general reference only. For temperature critical applications, a calibrated standard thermometer is recommended.

H-B DURAC® Specific Gravity / Relative Density (g/cm³) & Baume Plain Form Hydrometers; Traceable to NIST

Used in the chemistry, pharmacology, food and beverage, and starch industries to name a few, these dual scale hydrometers measure specific gravity / relative density (g/cm³) of liquids lighter and heavier than water in various ranges from 0.700 to 2.00, and Baume in various ranges from 10° to 72°, or choose the Universal model to span all ranges. Made of lead free ballast and glass, these plain form hydrometers are individually serialized and have a temperature standardization of 60°F (15°C).

DURAC® Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Plain form hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

H-B DURAC® Battery Hydrometer with Siphon Set; Traceable to NIST

This hydrometer is used to determine the specific gravity / relative density (g/cm³) of battery acid in the range of 1.150 to 1.300. Made of lead free ballast and glass, this 165mm (6.5") long hydrometer comes with a siphon set to collect battery acid for an accurate reading. Rubber parts are made of nitrile, a synthetic rubber that is more chemical resistant and more durable than conventional rubber. Each is individually serialized and has a temperature standardization of 77°F.

DURAC® Battery Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST. Made in USA.

Note: Battery hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures.

H-B DURAC® Calcium Chloride Salometers; Traceable to NIST

Used in various industries including food, fishing, and transportation. Choose from two models, one measuring percent saturation of CaCl₂ in the range of 0 to 120%, and the other model measuring specific gravity / relative density (g/cm³) from 1.000 to 1.280. Made of lead free ballast and glass, these salometers are 300mm (12") long. Each is individually serialized and has a temperature standardization of 60°F (15°C).

DURAC® Calcium Chloride Salometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Calcium Chloride Salometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures.

H-B DURAC® Draft Survey Hydrometer; Traceable to NIST

Popular in the fishing and shipping industries to find the Apparent Density of sea/fresh water, these measurements help determine the amount of cargo that can be loaded onto bulk carrying cargo vessels. Made of lead free ballast and glass, this instrument is 330mm (13") long. Each is individually serialized and has a temperature standardization of 15°C.

DURAC® Draft Survey Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

H-B DURAC® Soil Analysis ASTM Hydrometers; Traceable to NIST

These hydrometers are used to determine the specific gravity of soil in the range of 0.995 to 1.038, or -5 to 60 g/L (using a weight by volume scale). Made of lead free ballast and glass, these 280mm (11") long hydrometers conform to the accuracy requirements of ASTM hydrometers. Each is individually serialized and has a temperature standardization of 68°F/68°F.

DURAC® Soil Analysis ASTM Hydrometers are hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC /MRA and located in our ISO 14001:2004 Environmental Management System registered facility. They are packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Soil analysis hydrometers should be stored in a clean, dry, safe place, and should not be subjected to extreme temperatures.

H-B DURAC® Urine Squibb Hydrometer; Traceable to NIST

This hydrometer has the required size and scale to determine the specific gravity / relative density (g/cm^3) of urine samples in ranges from 1.000 to 1.060. Made of lead free glass and lead free ballast and glass, this 130mm (5") hydrometer is individually serialized and has a temperature standardization of 60°F (15°C).

This DURAC® Hydrometer is hand inspected by our U.S. quality team in our exclusive triple accredited/registered ISO/IEC 17025:2005 and A2LA Accredited Calibration Laboratory; internationally recognized and accepted by the signatory economies of the ILAC/ MRA and located in our ISO 14001:2004 Environmental Management System registered facility. It is packaged with a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy indicating accuracy traceable to NIST.

Note: Hydrometers should be stored in a clean, dry, safe place. They should not be subjected to extreme temperatures.

Hydrometer Racks

Safe Storage for Glass Hydrometers

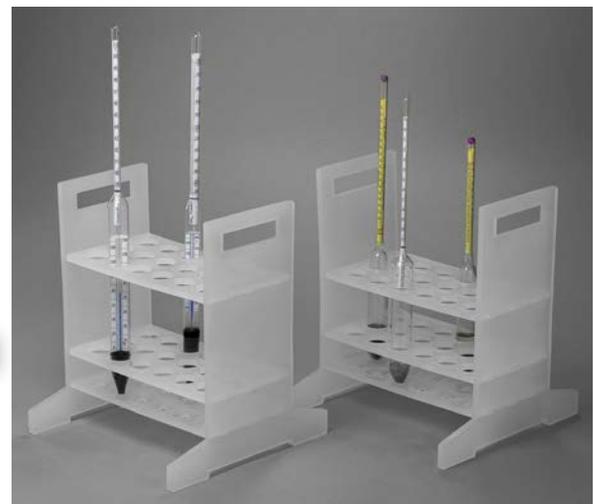

Protect fragile glass hydrometers by storing them in this 18-place polypropylene rack.

The middle and top plates have 25mm (1") diameter holes. The bottom plate is 44mm (1 $\frac{3}{4}$ ") high and has wells tapering from 25mm to 9mm (1 to $\frac{3}{8}$ ") to hold the hydrometer bulb. The base is 21 x 21.6cm (8 $\frac{1}{4}$ x 8 $\frac{1}{2}$ ") for tip-proof stability.

Overall height: 25.1cm (9 $\frac{7}{8}$ ") with handles. Steam autoclavable at 121°C (250°F). 6 per case.
