ULTRALITE® LIGHTWEIGHT CONCRETE EQUIPMENT PADS

3" UltraLite® Pads

A true concrete equipment pad at the weight of plastic (about 2.5 lbs. per square foot). UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating. This fiber allows the pad to flex instead of cracking or breaking. The textured surface prevents the condensing unit or portable generator from sliding, and allows water drainage, while the engineered expanded polystyrene (EPS) core prevents warping and provides a solid bottom to resist settling. Unaffected by soil conditions, ultraviolet (UV) light, temperature extremes, and other weather conditions.

UltraLite® Earthquake Code Compliant Pads

Required nearly exclusively in Southern California, the UltraLite® pad is available for compliance with strict attachment provisions detailed in earthquake prone local building codes. UltraLite® earthquake code compliant pads are only available for sale in regions where local codes mandate installation of pads with these particular characteristics. Currently these locales include most of Southern California, portions of Washington, and portions of Oregon.

E LITE® PLASTIC EQUIPMENT PADS

E Lite's rugged design provides uniform and generous ribbing for optimum, self-leveling ground support without inserts. The result is a pad that is lightweight, but not too light. A subtle texture prevents unit slide and presents a classic appearance, which is enhanced by rounded edges and a concrete gray color. Each pad is molded with a size label and a symbol representing content of recycled material.

2" E Lite® Pads

The 2" thick E Lite® pad is the choice for plastic pads. Codes have moved toward requiring 3" pads, check local codes for your requirements.

CLADLITE® LIGHTWEIGHT CONCRETE EQUIPMENT PADS

Concrete surface and superior performance at 20% the weight of conventional concrete pads. The cladding provides superior resistance to sun, moisture and freeze-thaw conditions; the engineered expanded polystyrene (EPS) core is virtually impervious to water, soil conditions, fungus and bacteria. Large CladLite® pads are further strengthened by continuous steel reinforcement throughout the cladding. CladLite® is code approved for installation throughout the U.S.

THE HURRICANE PAD™ CONCRETE EQUIPMENT PADS

The Hurricane Pad™

Designed specifically for the hurricane prone regions of Florida and the Gulf Coast, The Hurricane Pad™ meets stringent local code requirements for wind resistance. Heavier than a normal concrete pad, this 4" pad provides sufficient weight to meet code. The Hurricane Pad meets the Florida Building Code Notice and can withstand winds up to 150 MPH. For certain taller equipment, The Hurricane T Class Pad™ is needed. Due to their extra weight, standard freight terms only apply for shipments to Florida. All other shipments are shipped FOB Conyers, GA.

The Hurricane T-Class Pad™

The Hurricane T Class Pad™ is even heavier than The Hurricane Pad™ and is designed to meet the higher wind loads of taller equipment. The taller the piece of equipment mounted to the pad, the greater the wind load on the pad. These heavier 4" pads provide sufficient weight to meet code for these taller condensing units. The Hurricane T-Class Pad meets the Florida Building Code Notice and can withstand winds up to 175 MPH. Due to their extra weight, standard freight terms for The Hurricane T Class Pad™ only apply for shipments to Florida. All other shipments are shipped FOB Conyers, GA.

ECOPAD™ BLACK PLASTIC EQUIPMENT PADS

An injection molded equipment pad created from 100% recycled materials to minimize environmental impact. It does not require any additional equipment for moving and handling. EcoPad™ is resistant to impact, ultra-violet degradation and weathering (virtually impervious to climatic variations), and will not crack, flake, or warp. Drillable to permit installation of refrigerant and electrical lines under and through the pad and to allow equipment to easily secure to the pad.

HEAT PUMP PAD™

Heat Pump Pad™

Provides an effective base for heat pump equipment installed in snowy climates. Rather than a combination of a typical 2" (or 3") equipment pad and 6" heat pump risers, the Heat Pump Pad™ provides a full 8" of elevation in a simple square footprint. The star pattern of the integral risers allows for installation of equipment with different size footprints up to 36" x 36". Also included are eight anti vibration pads uniquely designed to fit into the guide slots on the top of the integral risers. The base is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode. Nestable for efficient shipping, transportation, and warehousing. Injection molded from concrete gray, recycled polypropylene material, the Heat Pump Pad™ is environmentally friendly and designed to last longer than the equipment it supports. US Patent Number 7,891,635, and other patent(s) pending.

ANTI-VIBRATION PADS

E.V.A. Anti-Vibration Pad

The latest generation in vibration dampening technology. The most effective vibration dampening pad available on the market. The EVA Pad was tested against other pads at four different vibration settings. In the most severe vibration extremes, the EVA Pad outperforms cork and rubber by a margin of greater than 3:1! This is due to the special composite foam center which is much more structurally sound than cork. It is not affected by oils or chemicals that can break down cork and is much more effective at vibration dampening than solid rubber. All this at a very competitive price. Designed to withstand 50 psi.

Iso-Cube Economy Anti-Vibration Pad

Natural rubber pads, designed to reduce vibration and noise emanating from refrigeration and air conditioning equipment. The circular design in each pad offers a suction cup effect, which eliminates the need to bolt the pads down. A standard 18" (46cm) pad is divided into eighty-one 2" (5cm) segments, each of which may be cut or torn to provide smaller pads. These 50 durometer pads will withstand a load of 180 psi with greater resiliency.

PURE-BEAM™ ULTRAVIOLET LIGHT

Pure-Beam™ Ultraviolet Light

Pure Beam™ ultraviolet light is designed for HVAC air disinfection and surface irradiation. The 17 watt UV C lamp is a powerful tool for improved indoor air quality. Installs in the HVAC system or ductwork on either the return or supply air side of the furnace or air handler. DiversiTech's Pure Beam™ ultraviolet light provides a healthier environment in your home, thanks to the germicidal qualities of the UV light spectrum present in the Pure Beam™ light. Ultraviolet light deactivates the DNA of dust mites, bacteria, viruses and other pathogens and destroys their ability to multiply and cause disease. Placement of a Pure Beam™ light in an airstream or near a drain pan can help to decrease the air contamination of any home. Exposure to Pure Beam™ significantly reduces air contamination caused by fungus, mold, and viruses and can cleanse surfaces overcome by mold and slime. Overall size is 14 in. L x 2 in. W x 2 in. H for easy placement. Includes the UV lamp, a UL listed ceramic base, and mounting bracket.

VENT TERMINATION KITS

Concentric Vents

Concentric vents make it easier to have a two pipe installation for high efficiency furnaces. These vents simplify installation and only require one hole through the wall or roof where the pipes terminate. Without using these vents, the installation would require cutting two holes through the home, one for each pipe. These vents save time and money by reducing the amount of work required. Available in 2", 3" or 4" intake vent sizes.

CONDENSATE DRAIN LINE ALARM

Universal Alarm

A universal low voltage alarm that can indicate possible system trouble. Use with the Wet Switch®, SOS, Condensate Cop, CP 22 (all types) and all float switches on 24VAC control circuits. If an alarm condition exists, the homeowner can turn the alarm off with a "silence" button until service is obtained, however a red trouble LED will remain lit. Also features: easy 2 wire connection, label to print contractor information, and low current draw. Actuates at greater than 18V to prevent any false alarms due to low voltage. Includes 2 wire nuts, a sheet metal screw, and double sided tape for convenient installation options. Also includes instructions for wiring normally open switch systems (for the CP 22 or other condensate pumps).

Condensate Drain Pans

When a mini split system operates in heat pump mode, the outdoor coil becomes the evaporator coil. Typically, condensation generates from the evaporator coil. In certain installations, the condenser coil may be mounted overhead on brackets affixed to a wall. In these overhead applications, dripping condensation may be a nuisance. Condensate drain pans bolt onto the condenser mounting brackets, and the drain line can be plumbed to a nearby drain location. Furnished complete with all mounting hardware and drain pan outlet, condensate drain pans are available in either plastic or powder coated steel.

Gorilla Tube® Clear Vinyl Tubing

Applications include: air conditioning and refrigeration condensate drains, condensate pump discharge lines, and humidifier overflows.

Several sizes from 1/4" to 1" diameter. Non-toxic clear vinyl chloride.

Select Gorilla Tube® over standard clear vinyl tube because:

- Extra rigid design resists crimping and kinking due to durometer value of 80 (Shore A) and thicker wall
- Maximum service temperature 140°F (60°C)
- Better performance in cold weather climates.

How to sell DEVCO® products

DEVCO® merchandising displays are an easy and attractive way to showcase a variety of DEVCO® products in your store. Offered in three different versions, each display rack includes everything you need to create extra sales for your business.

Easy to Display

DEVCO® provides turnkey merchandising solutions for wholesale distribution. Attractive, easy to set-up merchandising displays provide a great way to highlight DEVCO® products and make it easy for customers to find what they need. The point of sale display merchandises the products, enabling the distributor to add additional sales.

The products merchandised on the carousel are impulse buy items. The items are packed so they cost the contractor only a few dollars, and most are less than \$10 each.

Easy to Profit

DEVCO® displays provide a typical distributor branch with easy add-on sales that build profits. Each display can generate significant sales and margins for the store while providing contractors with the parts they need to finish the job. These self-service displays are a great way to increase revenue with minimal effort.

The Perfect Plan

Each DEVCO® Merchandising display comes with a complete plan-o-gram to make merchandising it simple and fast. And there are three different versions available so you can choose the display that's right for your business and customers.

And when you purchase the DEVCO® products to fill it up, the merchandising rack is **loaned free of charge.**

Flag Female Compressor Terminals

Also known as hermetic header terminals, these non-insulated terminals are designed with a larger distance between the "rolls" to allow for the rod in hermetic header applications. The increased distance allows the rod to slip in between them. Parts 6258 and 6259 are notched for bending. The notches are cut between the slip-on portion and the conductor barrel and enable the back of the slip-on portion to be folded against the conductor barrel after the wire connection is made. This terminal features insulation grip.

Evergreen® CM ECM Motors

The Evergreen CM is made with the same field-proven, high-efficiency ECM technology that has been used for more than 20 years in new HVAC equipment. It features flexible control methods to help the installer balance airflow in HVAC systems such as VAV (Variable Air Volume) boxes and Packaged HVAC systems. The Evergreen CM is designed as a direct replacement for OEM (Original Equipment Manufacturer) Genteq model X13 (Constant Torque ECM) or as a field replacement for existing PSC (Permanent Split Capacitor) motors.

Evergreen® EM ECM Motors

The Evergreen EM was designed to replace direct-drive blower motors in residential and light commercial indoor furnaces, air handlers and package systems that were designed with a standard ECM motor, such as X13 or equivalent competitor model. It can also be used to retrofit PSC motors in commercial building series VAV boxes and packaged heat pump systems. It is NOT intended to replace premium ECM constant airflow products, such as EON, 2.3, 3.0 and 2.5.

HARD START KITS

Torque Plus—Hard Start Kits

Totally solid state, our DST 5 is just right for all permanent split capacitor (PSC) compressors from 1/2 to 10 H.P. It can be used on units that operate on 120 through 288 Volts. The DST 6 offers a larger capacitor for severely hard to start compressors. The DST 6 can be used on all PSC single phase compressors from 1 1/2 to 10 H.P. A unique combination of relay and safety timer. The capacitor is automatically disconnected in 0.5 seconds if the compressor fails to start.

DiversiTech Hard Start Kits

DiversiTech hard start kits reduce contractor call backs by boosting the starting capacitor for a compressor. This prevents home brownouts and improves homeowner satisfaction with your service. DiversiTech's hard start kits feature a potential relay that disconnects the start capacitor from the circuit at exactly the moment it is no longer needed to boost the compressor. This results in a precision compressor start even under hard starting conditions. Replaces the Kickstart KS-1 and the 5-n-1 kit.

Eaton Definite Purpose Contactors - One and Two Pole

These are single- and two-pole, Type C25 contactors feature a compact, efficient design with a low VA coil and straight-through wiring. Its housing design effectively limits dust and other contaminants from magnet structure—reduces or eliminates noise. They are UL recognized/CSA certified, ampere rated devices are well suited for use in heating/air conditioning, refrigeration, data processing and food service applications.

TIME DELAYS

Adjustable Delay on Break Timer

Adjusts from 6 seconds to 8 minutes. Spin-proof knob. Works with 24, 120 or 240 VAC control circuits. Supports up to 1.0 Amps. Two wire hookup for easy installation. Solid state with quick disconnect terminals. Mounts with one self-tapping screw. Conformal coated circuitry protects against moisture and shock. UR recognized for USA and Canada. Works with anticipator type thermostats.

HOW IT WORKS: Immediately upon application of power, the Delay on Break timer enables circuit operation. Once power is interrupted, the circuit opens for the time set on the dial. After the time period elapses, the circuit closes, allowing the protected motor or compressor to start. For typical HVAC applications, the operation of the timer is transparent and will go unnoticed.

Adjustable Delay on Make Timer

Ideal for random starting of multiple units. Adjusts from 6 seconds to 8 minutes. Spin proof knob. Works with 24, 120 or 240 VAC control circuits. Supports up to 1.0 Amps. Two wire hookup for easy installation. Solid state with quick-disconnect terminals. Mounts with one self-tapping screw. Conformal coated circuitry protects against moisture and shock. UR recognized for US and Canada. Works with anticipator type thermostats.

HOW IT WORKS: These timers delay circuit closure upon application of power. Only after the set time period elapses and power remains ON will the circuit close, allowing the protected motor or compressor to start. For typical HVAC installations, timers are adjusted to random times to prevent power circuit overloads, thus are often called random start timers.

MONITORS

Digital Three Phase Line Voltage Monitor

Offers continuous protection against voltage anomalies which can damage compressors, motors and other sensitive electrically operated devices.

PROTECTION: Loss of Phase, Phase Reversal, Voltage Imbalance, Low Voltage, High Voltage

DISPLAY: Large custom LCD display indicates all operating conditions at a glance. Three large sets of digits provide easy system troubleshooting.

VOLTMETER: Three independent voltmeters read both line and contactor load (backside) voltages.

MONITORED VOLTAGE: 160 to 600 Volts 50-60 Hz.

POWER SUPPLY: Power for the WPC-500 is automatically derived from any active phase. System operation is not dependent on the control voltage or a specific phase for power.

CONTROL VOLTAGE: 19-277 VAC. Anticipator load is provided for operation with 24 volt electronic and mechanical thermostats.

OPERATING VOLTAGE SET POINT: 175 to 650 VAC. Digitally adjustable in one volt increments.

VOLTAGE TRIP POINT: Adjustable in 1% increments between 6% and 18% of selected operating voltage. Restart voltage set point (hysteresis) fixed at cutout voltage + 3%.

VOLTAGE SYMMETRY: Adjustable imbalance trip point from 2% to 25% of selected operating voltage.

RESPONSE TIMES:

Phase Loss/Reversal: 100 mS max.

Imbalance: Adjustable Response Timer

Over or Under Voltage: Adjustable Response Timer
LOCKOUT DELAY TIMER: Fully adjustable 0 to 720 Seconds (0 to 12 minutes). Digital display shows re-remaining time and user set points.

SEQUENTIAL START TIMER: 0 to 30 seconds in one second increments.

RESPONSE TIMER: 0.1 to 20 Seconds. Digital display shows remaining time and user set points.

MEMORY: Up to 25 past fault conditions are stored for later retrieval and analysis. The faults may be displayed or cleared by the front panel buttons.

Digital Single Phase Line Voltage Monitor

Automatic voltage monitor and control system. Continuously measures incoming line voltage, allowing detection of any voltage outside the tolerances that you set. If these limits are exceeded, the response timer begins counting. You may also set response time – a short time for a quick response or a long time to avoid nuisance tripping. If the voltage remains outside the tolerance after the time has elapsed, the DSP-1 will turn off its output relay and protect your device. While output is off, an additional delay timer activates to avoid rapid restarts.

FEATURES:

Digital voltmeter displays instantaneous line voltage;

Automatic voltage tester adjusts from 90 to 300 volts;

Adjustable response timer (0.1 to 10 sec.) prevents nuisance tripping;

Adjustable delay timer (1 to 720 sec.) prevents rapid restarts;

Digital display makes for easy viewing and operation

SPECIFICATIONS:

Voltmeter: 70 to 325 Volts

Voltage Set Point: 90 to 300 Volts

Tolerance Limits: 6 to 18%

Response Timer: 0.1 to 10 seconds

Delay Timer: 1 to 720 seconds

Output Relay: 10 Amps, 250 VAC resistive, single-pole/double-throw

Control Input: 18 to 250 VAC with anticipator load for 24 volt thermostats

Replacement Compressor Leads

Extreme heat within compressors typically causes failure of wiring insulation. This can cause corrosion to the inner strands of copper within the wire used for compressor hook up. This reduces the power flow to the compressor causing the unit to overheat and can prevent the compressor from starting. A MINIMUM of 12in. of wire must be removed. The DiversiTech Replacement Compressor Leads are ideal for replacing this corroded wiring. 24in. leads also available for replacing wire all the way to the contactor and capacitor.

Manual Reset Fire Stat

This bi metal switch is used as a manual reset. When temperature condition is met, the device opens. The manual reset can only be reset after proper cool down of the switch. The HMR 130 is a popular fire stat in ducted air distribution systems. Should temperatures in the duct exceed 130 degree F, the switch opens, shutting down the whole system so no fire or smoke can be spread by the fan.

FIN TOOLS

Multi-Head Fin-Tool

Conveniently straightens and cleans condenser and evaporator fins. Each nylon head slides into the master handle and tightens in place. Heads are designed to fit units with fin spacing of 4–24 fins per inch. Each head is engraved with its own size and is color coded for fast identification. Heads are angled so that when inserted in the handle, the hand is a safe distance from the sharp fins. Heads may also be reversed in the handle so that combing with an upward stroke (recommended method) may be done easily with proper leverage. The master handle rests comfortably in a man size grip, is rigid and long-lasting.

MONITORS

007 Control Checker

A lifetime tool for monitoring and checking safety controls and operating controls. One unit for all voltages 24-460 VAC or DC without switching dials or meters. Compact, 4 oz, reliable. Saves troubleshooting. For normally closed controls, 007 connects in parallel with safety control. When the safety control opens in response to a problem in the system, 007 red LED turns on and remains on until reset manually. With intermittent problem, the LED remains on indicating the control is open. For operating controls, 007 verifies the status of all types indicating if there is power to the holding coil, the NC contact is open or closed, the thermostat contacts are open or closed, there is power to the contactor or starting holding coil, the overloads are open or closed, or there is a bad connection either on control or power side. NOTE: May use with lockout relays. Features battery check and reset switch. Includes 9-volt battery. 007 may be used over and over.

Tattle-Tale Control Monitor

Identifies open controls in seconds. A single use monitoring device for determining which safety control has opened in response to a malfunction. Saves wasted hours tracing a safety control shutdown, even if intermittent. A quick, inexpensive way to visually spot where the problem is. Simply install in parallel with each safety control. When a control opens, the red indicator flag pops up. You will know immediately which area of the system is experiencing problems. Disposable, safe, simple to use, and pocket sized. Monitors safety controls, fuses, overload relays, motor protectors, freeze controls, limit controls, safety switches, fusible links, or steam control. CAUTION: Not to be used with lockout relays, use TC-007.

SpeediChannel™ System Installation

Step 1

Attach the SpeediChannel™ base to the wall about every 15 inches with screws suitable for the wall construction (siding, stucco, brick, etc.). Screw through the center of the molded rail. Slide the connecting piece (elbow, union, tee, etc.) under the SpeediChannel™ before attaching the end of the channel to the wall. When cutting lengths of SpeediChannel™, allow 1/8" gap between the end of the SpeediChannel™ and the stop inside the fitting to allow for thermal expansion.

Step 4

Attach the SpeediChannel™ to the base.

Step 2

Attach one SpeediClip™ with cable tie about every 20 inches along the inside sliding rail.

Step 5

Attach the fitting covers with the screws provided.

Step 3

Install the line set, drain line, and wires inside the SpeediChannel™. Test the equipment installation prior to tightening the cable ties. Tighten the cable ties snug, but not so tight they damage the tubing insulation or kink the drain line. Trim excess length from the cable tie.

Step 6

When complete, paint the SpeediChannel™ to match surface of installation (if desired). Follow painting specifications as published.

Wall Penetration

Wall sleeves and penetration covers are used to transition from the SpeediChannel™ system to a through wall penetration. The wall sleeve creates a neat hole through the wall, and the line set is covered by the wall cover. DiversiTech's wall covers are designed to allow for easy installation - even after the line set has been installed. A unique hooking and fastening arrangement allows for quick and easy installation. Each wall cover is individually packed, and is furnished complete with stainless steel screws to attach the wall cover to the base. Three screws (supplied by others) are needed to fasten the wall cover to whatever type of wall construction the system is being installed on.

ROOF INLETS

Roof Inlets

"Roof entrance" adapters for linesets are the ultimate solution for a professional flat roof installation. Manufactured from UV weather resistant plastics or painted aluminum, the Roof Inlet combines a series of features:

- The Roof Inlet body part is equipped with a slope avoiding possible damage to the insulation and preventing kinks into the copper tubes.
- The Roof Inlet base holes allow a steady fixation (depending on the roof surface type and composition).
- The Roof Inlet cap is firmly fixed to the body with stainless steel bolts.

Wall Penetration

Wall sleeves and penetration covers are used to transition from the EasyGuard™ system to a through wall penetration. The wall sleeve creates a neat hole through the wall, and the line set is covered by the wall cover. DiversiTech's wall covers are designed to allow for easy installation - even after the line set has been installed. A unique hooking and fastening arrangement allows for quick and easy installation. Each wall cover is individually packed, and is furnished complete with stainless steel screws to attach the wall cover to the base. Three screws (supplied by others) are needed to fasten the wall cover to whatever type of wall construction the system is being installed on.

COIL CLEANERS

Triple-D® Universal Coil Cleaner

Triple-D® is the ultimate universal coil cleaner that can be used on condensers, evaporators, microchannels, roof-top units, and mini-split applications. The triple active synergistic highly effective solution is formulated to remove a broad range of soils while degreasing and deodorizing. It is ideal for cleaning most metals including aluminum and copper while extending equipment life and diminishing the potential for refrigerant leaks. Using 75% less than comparable products, it reduces the amount of solution needed to clean. Triple-D® is biodegradable, NSF approved and available in seven different packaging configurations.

Eco-Coil™ Environmentally Friendly Coil Cleaner

Eco-Coil™ is an environmentally friendly no rinse non-corrosive cleaner ideal for evaporator and condenser coils, electronic and permanent filters, fan blades, grilles, mini-split and microchannel applications. Eco-coil quickly cleans away dirt, dust, and deposits while deodorizing with no harmful risks to animal, aquatic or plant life. Tested to provide the highest level of performance, Eco-Coil not only reduces the number of products required to clean but also has different water mixture ratios to maximize solution usage. Furthermore, it brightens, biodegradable, NSF approved, and meets the EPA's Design for the Environment Alternative Program as a "green" product.

Pro-Brown™

Pro-Brown™ is a heavy duty alkaline cleaner that pulls out deeply embedded dirt removing greasy soils and oxidation while brightening and cleaning coils. Ideal for air-cooled condensers and mini-splits thanks to its dual action foaming capabilities. It is biodegradable and NSF approved.

PRO-BROWN-5	Pro-Brown™ Foaming Coil Cleaner – 5 gallon pail	EA	1
PRO-BROWN-AER	Pro-Brown™ – 19 oz. Aerosol	EA	6

Conventional foaming acid and non-acid coil cleaners attack and chemically react with the aluminum coil components. This reaction is exhibited by a foaming action. The attack/reaction dissolves the aluminum, destroying the heat-transfer ability of the coil and creating the potential for refrigerant leaks.

Pro-Blue™

Pro-Blue™ is a heavy foaming alkaline-based solution designed for condensers and mini-splits that penetrates dirt and grease removing deposits resulting in clean and brightened coils. Pro-Blue is biodegradable, NSF approved, and available in numerous packaging configurations.

Pro-Red Plus™

Pro-Red Plus™ is a fast acting cleaning solution for condensers, microchannels, and mini-splits that foams and lifts away stubborn deposits including tarnish and corrosion. Its non-acid formula is as effective as conventional acid cleaners without the use of hydrofluoric acid. The vigorous foaming action eliminates the need for prolonged soaking, steam cleaning or scrubbing coils and without emitting corrosive fumes or rusting ferrous metals. Pro-Red Plus™ is biodegradable, NSF approved, and available in a number of convenient packaging solutions.

ACCESSORIES

Coil Guard™

Ideally used in coastal areas, where salt air accelerates rust and decay. Highly recommended for use in all geographical areas to prolong the life of a unit. When applied properly, Coil Guard™ dries quickly and immediately resists salt spray, acids, and soap solutions. Weather will not blacken it. Coil Guard™ has high dielectric properties and has no effect on heat transfer. Our blue tinted product is used to ensure complete coverage of coating.

LEAK SEALANTS

Flex Inject® Sealant Advanced & Total

Flex Inject® Sealant Advanced is the fastest, most effective proven way to permanently seal and prevent minor air conditioning and refrigeration (AC/R) leaks. With no tools or gauges required, the Flex Inject® Sealant Advanced works by travelling through the system with the oil and refrigerant fixing leaks immediately (up to 300 microns). Flex Inject® Sealant Advanced works with all compressors, heat pumps, condensers, and other system components and it will not plug up manifold gauges, metering devices, thermostatic expansion valves (TXVs), pistons or cause cap tube blockages. It meets the ASHRAE ARI 700 refrigerant standard and is compatible with any refrigerant including R-410A with no pump downs or recoveries required. Flex Inject® Sealant Advanced is suitable for use in aluminum and copper coils and is microchannel friendly. Flex Inject® Sealant Total has all the benefits of Advanced and includes UV dye.

REFRIGERATION OILS

Pro-Lube™ Mineral Oil

Specialty Chemical mineral oil (by Calumet) is a superior mineral naphthenic refrigeration oil designed to meet the operating requirements of modern residential and commercial air conditioning and refrigeration compressors. These oils have a low pour point, low wax floc temperature and are chemically and thermally stable in the presence of refrigerants. OEM approved by Copeland, Carlyle, Trane, and other major compressor manufacturers. Always follow compressor manufacturer's oil viscosity recommendations. Mineral oil is specially recommended for lubrication of compressors containing ammonia, R-11, 12, 13, 22, 113, 114, 123, 500 and 502 refrigerants in residential, industrial and commercial service. DO NOT USE WITH HFC REFRIGERANTS SUCH AS R-134A.

LINE PIERCING VALVES AND TOOLS

Quick-Tap

Features a valve core in the 1/4" male port. Simply pierce the line and back seat the needle. Flow starts when depressor type charging hose is connected. Flow shuts off automatically when hose is removed. If valve core is not desired, it may be removed. Connect hose, pierce line and back seat needle. This method offers full unrestricted flow. Valve core can be removed or changed at any time without loss of refrigerant if needle is front seated.

MAC—The Ultimate in Line Piercing Valves

Install valve. Connect charging hose. Service. That's all there is to it! MAC features uniport: 1 connection for piercing and servicing. Sealed with refrigerant resistant "O" rings. Needle automatically back seats after servicing, leaving line free of restriction. Connect to tubing with 2 socket-head screws. (Hex wrench is included with each valve.) Needle depressor is inserted into head of needle. Wing cap is turned down easily by hand until line is pierced. Wing cap is removed and system may be serviced with any charging hose with built-in depressor. When hose is removed, spring loaded needle back-seats forming a leak proof seal. Needle depressor is discarded and wing cap forms extra precautionary seal.

CUSHION CLAMPS

Cushion Clamps

An industry standard universal clamp that mounts to standard strut. Steel with electro-dichromate finish to resist corrosion. The lock nut has a nylon insert for a positive lock. The polymeric grommet withstands temperatures from -25°C to 125°C and resists the effects of most oils, chemicals, and industrial cleaning compounds.

Liquid Line Driers

High moisture and acid capacity. Maximum filtration capacity. Exceptional compatibility with new polyester oils. Compatible with all existing and new refrigerants and blends including 134a, 401A/B, 402A/B, 404A, 407A/B/C, 410A, 502, 507A. Spring loaded, molecular sieve XH-9 dessiccant. Solid copper sweat fittings. Powder paint exterior coating surpasses 500 hour ASTM salt spray test and resists corrosion. Eliminates concern of additive stripping.

Suction Line Driers

The solid-core clean-up dryer was developed for use in a system suction line. The compact design incorporates a large outside diameter shell, which results in a shorter lay-in length, and a larger core, which provides a greater filtration area for maximum operating efficiency. The core material has controlled porosity which effectively removes and holds a maximum amount of contaminants with a minimum of pressure drop. It collects and holds inorganic acids and other harmful contaminants from a motor burnout. This binding process protects the core from acid decomposition. Access valves on both the inlet and outlet sides make it easy to measure pressure accurately. Occasionally, enough contaminant matter may collect in the filter core to cause a slight pressure drop. The access valves on the SLD make it easy to determine if a pressure drop exists and to measure the amount of the drop. The original DSLD, solid core, XH-9 molecular sieve dessiccant suction line filter dryer. High acid capacity. Low pressure drop – exceptionally high flow rates. Designed for system clean-up. 500 hours salt spray protection. Shortest system cut-out lengths allow installation in tight areas. Two access valves simplify pressure drop measurement. Flare or solid copper sweat fittings.

Universal Spun Copper Driers

Manufactured with the latest generation molecular sieves compatible with more than 20 different types of refrigerants, including R-134A. They can be used in all hermetic and open refrigeration systems using CFC, HCFC and HFC gases and mixes such as commercial and domestic refrigerators, freezers and air conditioners ranging from 1/8 to 2.0 HP. Hermetically sealed with extended ends.

Bi Flow Driers

The "DBF" Series is designed specifically for heat pump or reverse cycle application. External check valves are not required since they are incorporated within the filter dryer shell. The core design filters out contaminant particles down to 25 microns. 100% copper sweat or nickel plated flare fittings. Desiccant core provides reliable and effective, removal of solid contaminants, acid and moisture. Provides three times the filtration as the standard bi-flow. Core is cushioned in fiber gaskets to protect core and to insure trouble-free performance. Powder paint exterior coating surpasses 500 hour ASTM salt spray test and resists corrosion.

Sight Glasses

Sight Glass and Moisture Indicator provides a quick visual diagnosis of refrigerant and moisture levels within a system. The sight glass indicates if the system has the proper refrigerant level, a restricted dryer or excessive pressure-drop. The moisture indicator recognizes moisture within the system. Provides early warning that a potential failure exists resulting in corrosion, chemical damage, restricted flow, or even compressor failure. Etch-resistant glass with a simple color comparison provides easy viewing and quick diagnostics. Flare models feature forged brass body and fittings for corrosion resistance. Sweat models feature copper fittings to permit solder installation without disassembly. Leak-proof design is compact and short in length to easily fit within a unit and provide accuracy in performance.

REFRIGERANT CHARGING

Insta-Charge

Faster, safer and more economical method for charging LIQUID refrigerant through the low pressure side of an air conditioning or refrigeration system, without damaging the compressor. Insta-Charge's unique internal restrictor reduces liquid flow to a level below the capacity of the compressor. Converts liquid refrigerant to a saturated vapor for fast entry. Insta-Charge connects directly to the refrigerant can or cylinder valve. Adds liquid tracing dye faster. Eliminates heating of refrigerant cylinder. Made of light weight aluminum. Sold at a fraction of the cost of other fast charging devices.

REFRIGERANT TUBING

DiversiTech Line Sets

DiversiTech Line Sets are individually packaged in sturdy corrugated cardboard, designed and tested for individual parcel shipment.

Line Sets are designed for air conditioning and refrigeration systems. The copper tube is refrigeration grade tubing to ASTM B280. The suction line is pre-insulated with Armaflex AP pipe insulation. This insulation is a black flexible elastomeric thermal insulation. The expanded closed-cell structure makes it an efficient insulation. It is manufactured without the use of CFC's, HFC's or HCFC's. AP Armaflex contains Microban® antimicrobial product protection for added defense against mold on the insulation. DiversiTech Min-Split Line Sets are similar to Standard

Line Sets but come with additional insulation on the liquid line and flared line ends. Copper tubing complies with ASTM B280 for Seamless Copper Tube for ACR.

AP Armaflex insulation meets ASTM C534, Type I – Tubular Grade 1, ASTM E84, NFPA 255, UL723, CAN/ULC S102, UL94 5V-5A, V-0 (E55798), NFPA 90A/90B, UL181, ASTM G21/C1338, ASTM G22, ASTM D1056 2B1, MIL-P-15280J form T, MIL-C-3133C grade SB E3, MEA 96-85-M, and City of LA RR7642.

LineSet Box™

The NEW LINESET BOX™ is a rough-in box for new construction line set protection for all types of HVAC installations. The architecturally pleasing and professional looking LINESET BOX is easy to install and provides superior protection of refrigerant line sets and condensate drain lines. Provides a clean termination point for new construction projects and reserves the bay for the HVAC system installation. The LINESET BOX also protects the lineset from damage during construction. It helps to eliminate damage such as kinks that can drastically increase HVAC installation time.

DiversiTech Tear-Resistant Line Sets

Designed for air conditioning and refrigeration systems, the new DiversiTech Tear-Resistant Line sets include a durable flexible polymeric jacket that minimizes insulation damage and easily conforms to bends. Simplifying installation and saving technician time, an expanded closed-cell structure and unique formation resists moisture vapor intrusion and UV damage. No field-applied coating or jacket translates to more installs in a day. Refrigeration grade copper tubing conforms to ATSM B280. These new Tear-Resistant Standard Line Sets are available in a wide range of sizes and lengths to serve all standard application requirements.

REFRIGERANT TUBING cont'd

White Pipe™

White Pipe™ pre-insulated refrigerant line is ideal for a variety of installation jobs and works for every air conditioning application including ductless mini-split, heat pump and centralized air ducted units. Available in a variety of sizes and lengths.

Flexible Refrigerant Line

Flexible Refrigerant Line, with installed flare nut, allows a kink-free connection from the mini-split wall unit to the lineset for easier and faster installation.

REFRIGERANT LABELS

DiversiTech Refrigerant ID Labels

Refrigerant labels are designed for proper identification of refrigerant in a recovery cylinder. These 3" x 4" self-adhesive vinyl refrigeration labels use a high-tack acrylic adhesive and UV cured screen printing. Each label indicates the type of refrigerant (eg. R-438A), the chemical name (eg. pentafluoroethane) and the UN No. (eg. UN3163).

- Color coded
- Large and easy to read refrigerant identification
- Durable UV cured screen printed

REFRIGERANT RECOVERY PRODUCTS

Refrigerant Recovery Cylinders

DOT Classified for recovery, recycling, service and reclaim. Liquid and vapor valves ("Y" valve or separate valve configurations) are installed in all cylinders. Painted yellow/gray per ARI guidelines. Float switches have 3-pin Brad Harrison connectors.

CATALOG NO.	DESCRIPTION	DOT CLASS	3/4" NPT PLUG	FLOAT SWITCH	WATER CAP.	TARE WT.	UOM	ORDER MULTIPLE
02033	30 lb.	4BA400	YES	NO	26.2 lbs.	17 lbs.	EA	1
02053	50 lb.	4BA400	YES	NO	47.7 lbs.	28 lbs.	EA	1
02100	100 lb.	4BW400	NO	NO	123 lbs.	48 lbs.	EA	1
02255	250 lb.	4BW260	YES	NO	239 lbs.	85 lbs.	EA	1

Caution: Never overfill cylinders. Maximum refrigerant capacity is limited to 80% of the water capacity of the cylinder in lbs. (see table above). DOT requires cylinders to be retested every five years. Some recovery equipment uses weight scales to cut off refrigerant fill at 80% of capacity. Be sure cylinder tare weight is correct for this type of equipment.

DOT Classification Example: 4BA400: 400 psi working pressure; 800 psi test pressure (double the working pressure); 1,600 psi minimum burst pressure (double the test pressure). Pressure relief/safety valve is set to release at between 75-100% of the test pressure. For example, in the 4BA400 tanks which have a 800 psi test pressure, the relief valve opens at between 600 psi and 800 psi.

TUBING INSULATION

Tubing Insulation

Highest quality tubing insulation by Armacell. AC Accoflex® tubing insulation is a flexible rubber product from the inventors of elastomeric foam insulation. It is designed exclusively for HVAC, with a tough surface and excellent resistance to ultraviolet damage, condensation and mold.

TUBING INSULATION cont'd

Self-Sealing Split Tubing Insulation

The Tubolit® semi-slit tubing insulation is made of 100% non-particulating polyethylene foam pipe insulation. Its closed-cell structure won't wick moisture and helps prevent the absorption of condensation that could cause mold to develop over time. It is pre-slit with a factory applied pressure sensitive adhesive to both seam surfaces and has a release liner for easy installation. Available in 3/8", 1/2", 3/4" and 1" wall thickness options with inner diameters from 3/8" to 3-1/8".

DiversiTech's ULTRALITE®, CLADLITE®, and E LITE® Limited Lifetime Warranty

To the original owner of the ULTRALITE®, CLADLITE®, or E LITE® equipment base, DiversiTech warrants the base to be free of defects in materials and workmanship for the life of the equipment under which it is installed so long as the installing homeowner lives there. All defective merchandise must be returned to the factory, transportation prepaid, and if the same is found to be defective, it will be repaired or replaced free of charge, F.O.B. factory. This warranty does not cover replacement labor cost, or any cost claim incident to the defect, replacement, or reinstallation, nor field repair expenses. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation of exclusion may not apply to you.

Exclusions and Limitations

DiversiTech's ULTRALITE®, CLADLITE®, and E LITE® equipment pads are designed and manufactured to be used as bases for light, ground supported equipment such as air conditioning condensers, swimming pool filters and heat pumps. Use of ULTRALITE®, CLADLITE®, and E LITE® pads for purposes other than those listed above or improper installation of ULTRALITE®, CLADLITE®, and E LITE® pads may result in pad failure. DiversiTech Corporation disclaims any liability due to such misuse or improper installation. If you have questions concerning the proper installation or use of DiversiTech's ULTRALITE®, CLADLITE®, and E LITE® equipment pads, you should contact our Customer Service Department at (800)995-2222.
