Residential Filter Program

Trion strives to continue offering our loyal and potential customers a complete line of indoor air quality solutions. The leader in IAQ, Trion is now offering new, additional filter choices to fit your needs in a one-stop-shop vendor option that saves shelf space, freight costs, and ordering time. With distributors cutting back on the amount of vendors carried, you can add the filter program to the many other IAQ products Trion proudly offers. Here, you will find Trion's residential partner filter program with quality products ranging from pleated, polyester, and fiberglass disposable filters. Contact our sales department at 800-884-0002 or customerservice@trioniaq.com for additional information on a complete line of commercial & industrial options.

The new disposable program will offer more durability in the field for demanding applications, while offering environmentally friendly construction that is required by most customers. The disposables are economical air filters designed for residential, light-to-medium duty air filtration applications. Available with either Fiberglass or Polyester media, the Trion residential disposable filters utilize a one-piece moisture-resistant craft board frame for strength and ease of installation. The interlocking miter corner provides extra strength and durability. No extra metal support is needed making the disposables environmentally friendly.

The new pleated program, includes the Multi-Pleat XL8, a medium efficiency extended surface pleated panel filter, engineered to provide higher initial efficiencies and better overall performance than standard fiberglass and polyester filters.

The Multi-Pleat XL8 carries a MERV 8 fractional efficiency rating in accordance with ASHRAE Test Standard 52.2. The filter will also provide an Initial Dust Spot Efficiency of 39%, and an Average Dust Spot Efficiency of 35-45% in accordance with ASHRAE Test Standard 52.1.

The MERV 8 efficiency ratings provided by the Multi-Pleat XL8 make the filter an excellent upgrade from disposable filters which were designed to protect your HVAC equipment only. Today, Trion's line of MERV 8 pleated filters are designed to improve your overall indoor air quality by removing smaller contaminants which can lead to increased allergies, viruses, and other particles that you do not want inside your home.

About Trion

Since 1947, Trion has provided quality products for the commercial, industrial, and residential markets, which are engineered specifically to provide a clean, safe, and comfortable indoor air environment. Dependable performance, superior product quality, and excellent customer service are essential to our long-term success. Trion has developed a level of technical expertise that allows us to create innovative products and cost effective solutions to serve our customers' air cleaning problems worldwide. Our products can be found in homes, offices, factories, clubs, hospitals, and sea vessels, just to name a few.

Trion IAQ is a division of Air System Components, Inc., a subsidiary of Air Distribution Technologies, Inc. a leading global manufacturer of air distribution and ventilation solutions. It is our goal is to provide environmentally sound solutions for all our customers. For more information, visit www.trioniaq.com.

Our Quality Policy

Our Quality Policy: Air System Components, Inc. is committed to providing products and services that meet or exceed customer requirements. This shall be accomplished through continuous review and improvement of the quality process.

Multi-Pleat XL8™

MERV 8 Extended Surface Pleated Panel Filters with Mechanical Media

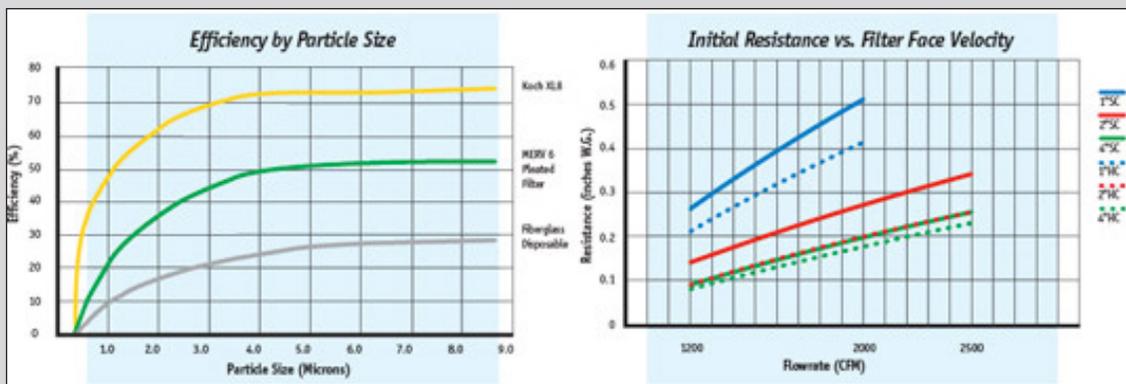

New Design and Improved Performance

- Upgrade from standard pleated filters
 - MERV 8 and MERV-A 8 performance ratings
 - Mechanical MERV 8 media is not reliant on electrostatic charge for efficiency
 - Low resistance to airflow
 - High Dust Holding Capacity
 - Sturdy double-wall frame design
 - Moisture resistant beverage board frame
 - Standard and High Capacity models
 - Available in 1", 2", and 4" depths
 - Special sizes available
- (contact sales department at 800-884-0002)

Green Solutions for Healthy Air

Multi-Pleat XL8 Mechanical MERV 8 Extended Surface Pleated Panel Filters

The Koch Multi-Pleat XL8 is a medium efficiency extended surface pleated panel filter, engineered to provide higher initial efficiencies and overall superior performance than standard pleated filters.

The Multi-Pleat XL8 carries a MERV 8 and MERV-A 8 performance rating in accordance with ASHRAE Test Standard 52.2-2007.

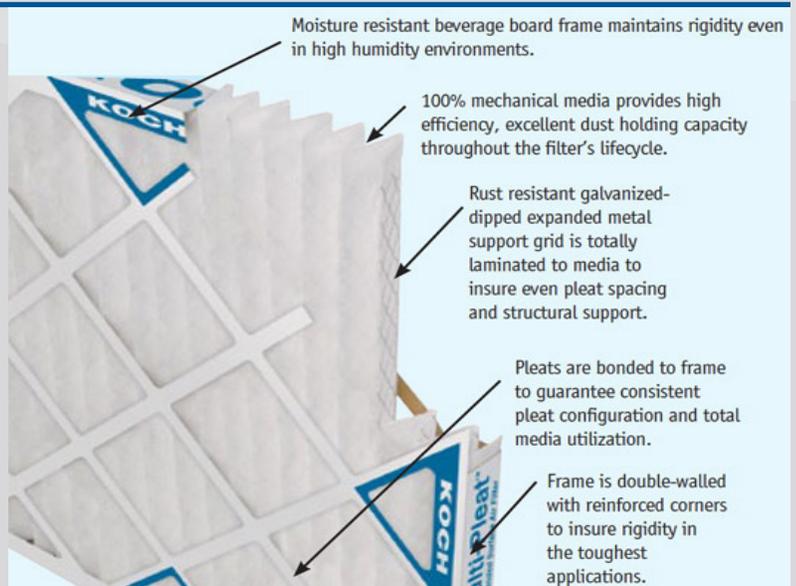

The MERV 8 and MERV-A 8 performance rating provided by the Multi-Pleat XL8 make the filter an excellent upgrade from disposable filters and standard MERV 6 and 7 rated pleated filters. The Multi-Pleat XL8 is the best selection in applications such as hospitals, laboratories, pharmaceutical plants, commercial office buildings, and in any system in which a higher degree of indoor air quality is required.

Multi-Pleat XL8 Construction

The Multi-Pleat XL8 media is produced with an optimal blend of highly specialized fibers, developed by Koch Filter Corporation specifically for use in extended surface air filters.

Developed to deliver a “one of a kind” performance, this specialized media operates on mechanical filtration principles which provide high efficiency, low pressure drop and high dust holding capacity.

The Koch Multi-Pleat XL8 maintains a MERV 8 performance rating before and after conditioning steps when tested in accordance to ASHRAE Test Standard 52.2-2007 and 52.2-2007 Appendix J.

Two Media Area Capacity Levels

The Multi-Pleat XL8 is an extremely versatile line of pleated panel filters which can be used in a wide variety of filtration systems worldwide. In order to meet the different requirements found in these applications, Koch offers the XL8 Series in two media area capacity levels.

Standard Capacity

Standard Capacity XL8-SC filters provide a combination of efficiency, economy, and excellent overall performance. Standard Capacity XL8 filters are an excellent choice in applications where filter change schedules are based on preventive maintenance schedules.

High Capacity (contact sales dept)

High Capacity - 30% more media. High Capacity XL8-HC filters are similar in construction to the Standard Capacity but have the added advantage of approximately 30% more media. The additional media results in extended filter life, making the XL8-HC the ideal filter for use in filtration systems where filter change schedules are predicated on recommended final pressure drop readings.

Special Size Filter Order Requirements

1. Minimum order quantity per size is 12 filters.
2. 1/2" C&I filters are available, please contact factory for pricing
3. Maximum size of single filter is 24.375"x35". All sizes exceeding the single filter size, contact factory for details.
4. The smallest dimension on any side is 9.75". For sizes less than 9.75" on one side, please contact factory.
5. Packaging of made to order filters is at factory discretion.
6. All special size filters are constructed +0, -1/8". If exact size is needed, please note when ordering.
7. Please enter written orders for all special made-to-order filters to ensure accuracy.

Polyester & Fiberglass

Residential Disposable Panels are economical air filters designed for light-to-medium duty air filtration applications.

Features:

- Durable construction for all types of industrial and commercial applications
- Progressive density glass or poly filter media
- Heavy-duty frame and corners for added strength and durability
- Environmentally friendly
- Easy to install
- Special sizes available (contact sales at 800-884-0002)

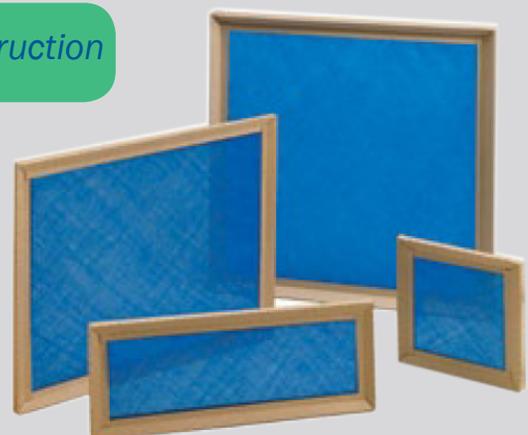

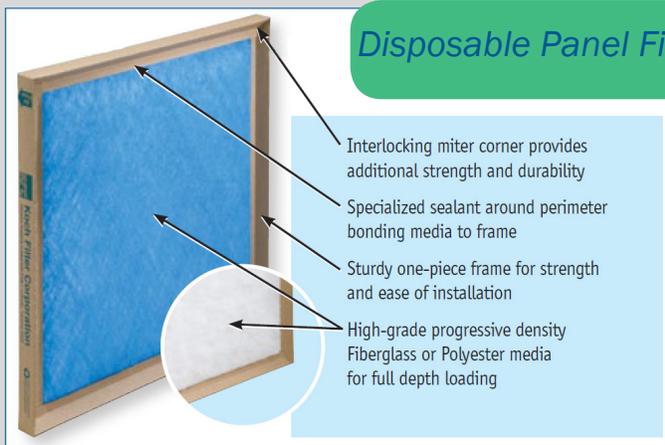

Trion Disposables are constructed for high performance and durability

Fiberglass Media – Standard C&I Disposables are constructed with high grade progressively dense glass fibers. The air entry side is composed of open coarse fibers, while the air exit side is made up of tighter fibers. This dual density media configuration allows for proper depth loading and full utilization of the filter media. Each fiber is coated with a non-migrating adhesive to enhance filter performance.

Polyester Media – Disposables are also available with polyester filter media, a dual-layered high performance media for applications where synthetic filter media is specified.

Sturdy One-Piece Frame – The Disposable filters utilize a one-piece moisture-resistant craft board frame for strength and ease of installation. The interlocking miter corner of the filter provides extra strength and durability. No extra metal support is needed making the filter more environmentally friendly.

Specialized Sealant – A thermoplastic sealant is used to bond the filter media to the frame on both the upstream and downstream sides of the filter. This bond eliminates any air bypass and helps provide rigidity to the filter.

Disposable Panel Filters are available in special sizes (contact Trion at 800-884-0002).

Green Solutions for Healthy Air

Shipping Damage / Shortage Claims Policy

Each shipment from Trion is carefully inspected and packed; it is delivered to the transportation carrier in good condition. All shipments should be inspected upon receipt for completeness and damage. Under no circumstances should merchandise be returned to Trion without a Material Return Authorization. Except in special cases with prior written authorization, equipment is sold F.O.B. Factory, Louisville, KY. The purchaser assumes the risk of loss or damage from the time of delivery to the carrier and is responsible for filing claims with the carrier. Claims for loss or damage must not be deducted from our invoice, nor payment of the invoice withheld awaiting adjustment. In special instances where the terms of sale are F.O.B. destination, Trion owns the merchandise in transit and will file any claims with the transportation carrier. If the merchandise is damaged or if the carrier fails to deliver the entire shipment as shown on the shipping papers, the Bill of Lading shall be marked by the authorized receiver with a description of the damage or shortage, signed by the carrier's agent and forwarded to Trion's Customer Service department. On Trion product purchased from or shipped by a distributor, any questions relating to shortage, damage or loss must be referred to the distributor from whom the product was purchased.

Material Return Policy

1. To return merchandise to Trion, a Material Return Authorization (MRA) must be obtained from Customer Service. Requests for MRAs can be made by telephone, fax or mail. Unauthorized returns will be refused.
2. To receive an MRA, Customer Service will need pertinent information, including complete customer identification, reason for return, part number, description, quantity, date code, and serial number of the merchandise to be returned.
3. Returns must be packed carefully and the MRA number marked clearly on the outside of the shipping container. Returns should be shipped, freight prepaid, to Trion. Special ordered equipment cannot be returned to Trion for credit.
4. Returns must be received at Trion within 30 days of MRA issuance. The MRA will be canceled for merchandise not received within 30 days and a new MRA must be requested.
5. In-warranty replacements will be shipped from Trion freight prepaid. If the returned merchandise performs to its design and manufacturing specifications, Trion will charge \$50.00 per hour for testing, with a minimum charge of \$100.00 and return the goods freight collect.
6. Returned product which is out of warranty or performs to its design and manufacturing specifications will not be credited.
7. If material is returned to Trion for a repair cost estimate, Customer Service will provide estimated repair charges upon receipt of the material. If Customer Service is not notified of the desired disposition within 60 days, the material will be returned freight collect.
8. All new, non-defective merchandise returned for credit is subject to a restocking charge. Restocking charges may vary based on the condition of the goods when received.

A Material Safety Data Sheet (MSDS) covering the collected contaminant must accompany all used equipment being returned to Trion, for evaluation or repair.

Small Package Freight and Order Policy

Policy 07-0148
February 3, 2011

Small Package Freight Policy

Definitions:

1. FedEx Shipment – Any small package that can be shipped via FedEx carrier and not a truckload, LTL or larger shipment. Generally less than 150 lbs. weight. This is our preferred carrier of choice.
2. UPS Shipment – Any small package that can be shipped via UPS carrier and not a truckload, LTL or larger shipment. Generally less than 150 lbs. weight. UPS is not a Trion/ASC, Inc. preferred carrier. Shipments are not made via UPS unless specially instructed by the purchase order and the customer supplies their account number for billing.

Small Package Shipments:

1. Trion IAQ, thru our parent company ASC, Inc., has special discounted rates with FedEx for all small packages shipped from the Sanford, NC facility.
2. Trion IAQ Standard policy is that all small package shipments will be shipped via FedEx, as our preferred carrier of choice, and will be billed to the purchaser when applicable.
3. No shipments will be made using UPS unless the customer specifically requests this service and provides their account number for the billing. This will allow the customer to obtain their best rates by using their carrier and their account number.
4. All orders received that indicate to ship “Best Way, Prepaid and Charge” will be shipped via FedEx and the customer will be billed at the FedEx rate.
5. Any order received that indicates to ship via “UPS” must have the customer UPS account number annotated on the order. If no account number is provided, Customer Service will hold the order and contact the customer to obtain their UPS account information or permission to ship via FedEx.
6. Any deviation from this policy must be addressed by the Customer Service Manager or appropriate National Sales Manager for resolution.
