WALKER CLOSET PRIMER

www.pppinc.net

Simple Installation.

All Plumbing Connections Provided

Manufactured from Brass and Plastic Tubing

Simple Retro-fit to Existing Installations.

Provides a Fresh Water Prime Each Time the Toilet is Flushed.

The Walker Closet Primer is manufactured from brass parts with all parts provided for simple installation. This trap priming device provides approximately 2 ozs of fresh water per flush. The Walker Closet Primer is designed to prime one floor drain trap at a distance not to exceed twenty (20) feet from point of installation. It is recommended that a 5/8" OD copper make-up water line is run between the primer and the floor drain trap.
