Pop Top™ Flange

Finally, a simple solution for the knockout problem!

Plastic Oddities is pleased to introduce the final solution to the problems of the closet flange knockout. Our exclusive patented design eliminates broken bits of plastic falling into the sewer pipe, jagged edges left inside the flange ring, and other common problems associated with the standard knockout cap. Our Pop-Top™ Series closet flange incorporated the convenience of the peel back top into the body of a closet flange. Simply lift the tab and peel back the metal top.

This design will eliminate the need for hammers, pliers, and other bulky tools normally used to break out the test caps. Saves time and money! The Pop-Top™ flange - just another new design from the "Original" innovators of the plumbing industry.
