

SLOAN[®]

FLUSHOMETERS

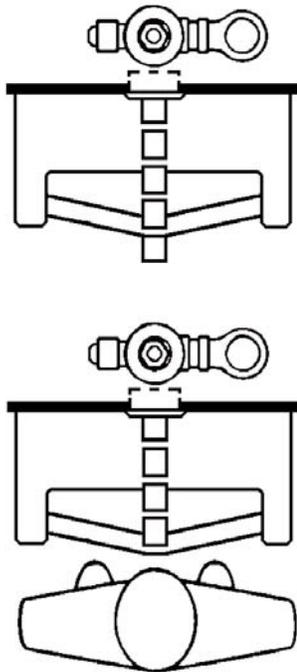

Maintenance Guide

• SENSOR OPERATED VALVES

OPTIMA[®] Flushometers

The Sloan OPTIMA automatic electronic Flushometer relies on an infrared sensor to detect a user and activate a flushing cycle. No physical contact with the Flushometer surface is necessary, assuring sanitary protection. OPTIMA Flushometers are ADA-compliant devices and are available in both Royal[®] and Regal[®] Flushometer models. These hardwire Flushometers require the use of 24 VAC Stepdown Transformers.

The Flushometer is triggered by means of a self-adaptive infrared sensor. A flashing red indicator light identifies the presence of a target. After a detected user moves out of the effective range of the sensor, a signal is sent to the Flushometer Solenoid and, after appropriate arming and/or flush delays, the flush cycle is initiated. When a unit is used intermittently, the Sentinel Flush feature ensures a cleansing cycle at least once in any 24-hour period.

NOTE: Sensor location and positioning is critical. Failure to properly position the electrical box to the recommended plumbing rough-in dimensions will result in improper installation and may impair product performance. All tradesmen (plumbers, electricians, tile setters, etc.) involved in the installation of this product must coordinate their work efforts to ensure proper product installation. Improper installation may nullify the manufacturer's warranty.

OPTIMA Components:

EL-1500 Series Sensor

- Self-adaptive Sensor
- Flashing Red Light Indicator
- Replaceable Sensor Window
- Two-wire connection system

Solenoid

- Non-Hold-Open Integral Solenoid Operator

Transformer

24 VAC Stepdown Transformer

- EL-154 for 120 VAC Electrical Supply (50/60 Hz)
- EL-342 for 220/240 VAC Electrical Supply (50/60 Hz)

Override Button

- Courtesy Flush
(available only on Water Closet installations)

Cover Plates

- Override Button Sensor Cover Plate
(Exposed and Concealed Water Closet installations)
- Solenoid Cover Plate
(Exposed Water Closet and Urinal installations)
- Urinal Sensor Cover Plate
(Concealed Urinal installations)

Wall Box Option

- Stainless Steel or Polished Brass Surface Finish
- Concealed installation
- Vandal Resistant

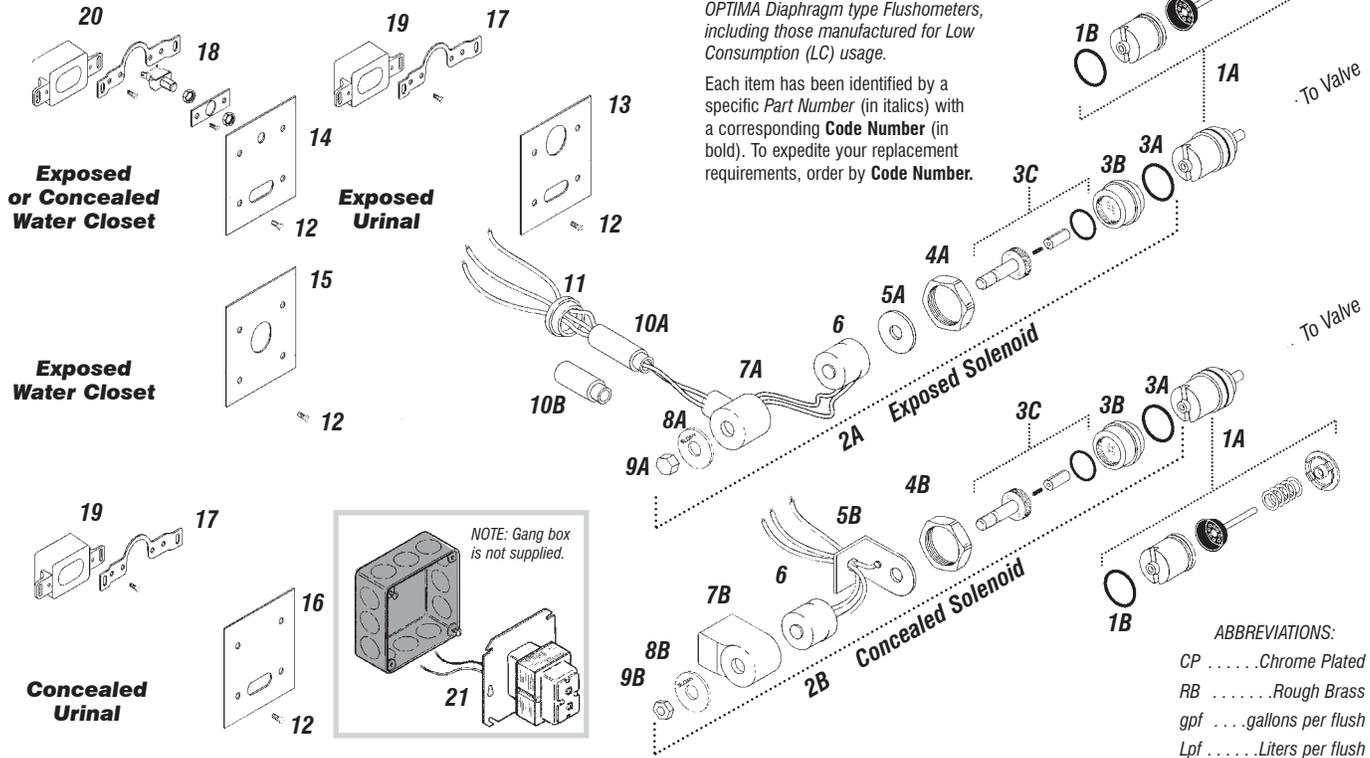

LIMITED WARRANTY

Sloan Valve Company warrants its Flushometer Products to be made of first class materials, free from defects of material or workmanship under normal use and to perform the service for which they are intended in a thoroughly reliable and efficient manner when properly installed and serviced, for a period of three years (one year for special finishes) from date of purchase. During this period, Sloan Valve Company will, at its option, repair or replace any part or parts which prove to be thus defective if returned to Sloan Valve Company, at customer's cost, and this shall be the sole remedy available under this warranty. No claims will be allowed for labor, transportation or other incidental costs. This warranty extends only to persons or organizations who purchase Sloan Valve Company's products directly from Sloan Valve Company for purpose of resale.

THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. IN NO EVENT IS SLOAN VALVE COMPANY RESPONSIBLE FOR ANY CONSEQUENTIAL DAMAGES OF ANY MEASURE WHATSOEVER.

The Repair Kits and Parts listed on these pages are designed to service all Sloan OPTIMA Diaphragm type Flushometers, including those manufactured for Low Consumption (LC) usage.

Each item has been identified by a specific Part Number (in italics) with a corresponding Code Number (in bold). To expedite your replacement requirements, order by Code Number.

Solenoid/Sensor Parts and Assemblies List

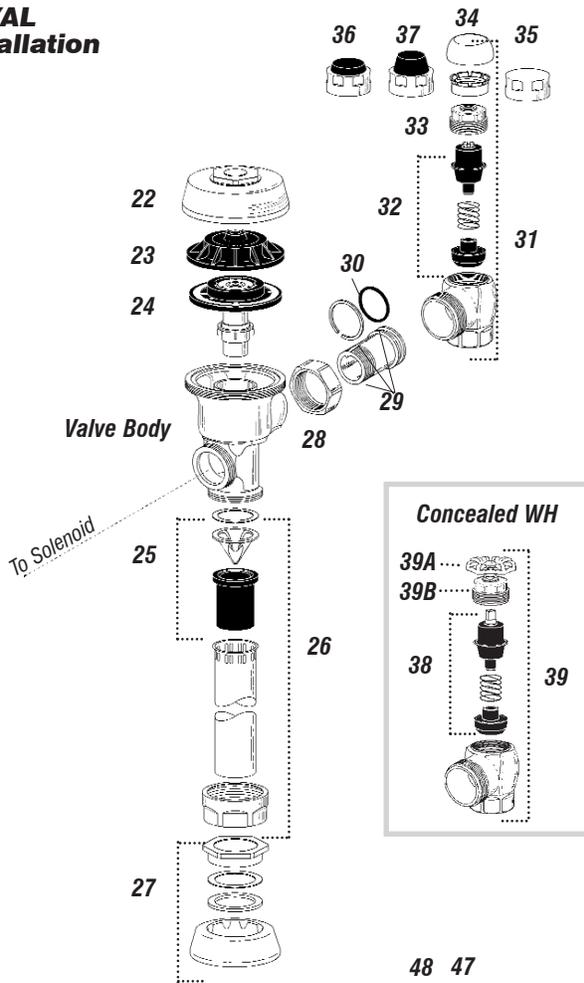

Code Number	Part Number	Description
1A	3305043 EL-128-A	Actuator Cartridge Assembly Repair Kit <i>Includes Spring, EL-110 O-Ring, Plunger Guide, Solenoid Valve Seat, Valve Piston Assembly, and DO-22 O-Ring.</i>
1B	0305135 EL-110	O-Ring
2A	0305329 EL-124-2	CP 24 VAC Solenoid Assembly (exposed installation) <i>Includes A-6 CP Handle Coupling (0301082), EL-165-2 24 VAC Coil (0305118), EL-101 CP Nut for Solenoid (0305125), EL-102-2 Face Plate for 24 VAC Solenoid (0305127), EL-104 CP Adapter for Solenoid (0305132), EL-162 CP Solenoid Housing (0305164), EL-163-A Solenoid Shaft Assembly (0305165), EL-164 Solenoid Flux Plate (0305166), and DO-22 O-Ring (0337086).</i>
2B	0305331 EL-138-2	RB 24 VAC Solenoid Assembly (concealed installation) <i>Includes A-6 RB Handle Coupling (0301082PO), EL-165-2 24 VAC Coil (0305118), EL-102-2 Face Plate for 24 VAC Solenoid (0305127), EL-104 CP Solenoid Adapter (0305132), EL-163-A Solenoid Shaft Assembly (0305165), EL-166 Housing Nut for Solenoid (0305167), EL-137 Solenoid Flux Plate (0305332), and EL-136 Solenoid Housing (0305336).</i>
3A	0337086 DO-22	O-Ring
3B	0305132 EL-104	CP Adapter for Solenoid
3C	0305165 EL-163-A	Solenoid Shaft Assembly <i>Includes Gasket, Plunger, Plunger Spring, and Solenoid Shaft.</i>
4A	0301082 A-6	CP Handle Coupling (exposed installation)
4B	0301083 A-6	RB Handle Coupling (concealed installation)
5A	0305166 EL-164	Solenoid Flux Plate (exposed installation)
5B	0305332 EL-137	Solenoid Flux Plate (concealed installation)
6	0305118 EL-165-2	24 VAC Coil
7A	0305164 EL-162	CP Solenoid Housing (exposed installation)
7B	0305336 EL-136	CP Solenoid Housing (concealed installation)
8A	0305127 EL-102-2	Face Plate for 24 VAC Solenoid (exposed installation)
8B	0305333 EL-102-4	Face Plate for 24 VAC Solenoid (concealed installation)
9A	0305125 EL-101	CP Nut for Solenoid (exposed installation)
9B	0305167 EL-166	Housing Nut for Solenoid (concealed installation)
10A	0305145 EL-123-A	CP Nipple Assembly (exposed installation)
10B	0305337 EL-226	CP Extension Nipple Adapter

NOTE: When the distance between Center Line of valve to finished wall is greater than 3" (76 mm) use the EL-226 Extension Nipple Adapter. These Adapters can be coupled as needed.

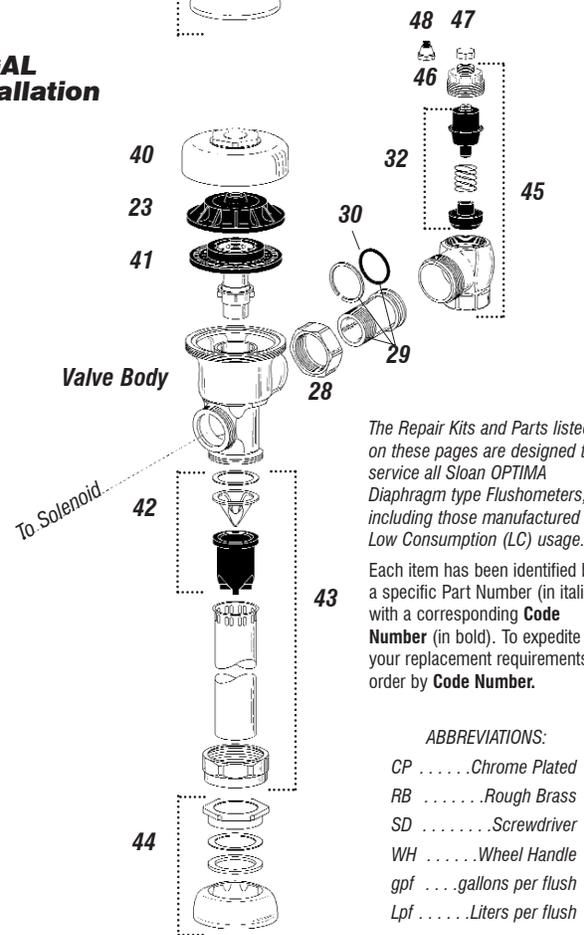

Solenoid/Sensor Kits List

Code Number	Part Number	Description
—	3305045 EL-124-2A	CP 24 VAC Solenoid Assembly for exposed applications <i>Includes EL-124-2 CP 24 VAC solenoid assembly (0305131) and EL-128-A actuator cartridge assembly repair kit (3305043).</i>
—	3305154 EL-1001-A	Closest Flushometer Electronic Accessories Kit with Override <i>Includes four EL-152 screws (0305152), EL-170 5/64" hex wrench (0305170), EL-201 CP plate for 2-gang electrical box (0305219), EL-202 mounting plate (0305220), two EL-204 screws (0305221), EL-203 override switch (0305234), EL-168-A yoke assembly (0305323), EL-1500-L closet sensor replacement kit (0305923), an OPTIMA sticker and sensor Installation Instructions.</i>
—	3305170 EL-1005-A	Exposed Urinal Flushometer Electronic Accessories Kit <i>Includes EL-151 CP plate for 2-gang electrical box (0305151), four EL-152 screws (0305152), EL-153 yoke (0305153), EL-170 5/64" hex wrench (0305170), two EL-177 screws (0305177), EL-178 washer (0305178), EL-1500 urinal sensor replacement kit (0305922), an OPTIMA sticker and sensor Installation Instructions.</i>
—	3305172 EL-1007-A	Concealed Urinal Flushometer Electronic Accessories Kit <i>Includes four EL-152 screws (0305152), EL-153 yoke (0305153), EL-161 CP plate for 2-gang electrical box (0305161), EL-170 5/64" hex wrench (0305170), two EL-177 screws (0305177), EL-178 washer (0305178), EL-1500 urinal sensor replacement kit (0305922), an OPTIMA sticker and sensor Installation Instructions.</i>

ROYAL Installation

REGAL Installation

The Repair Kits and Parts listed on these pages are designed to service all Sloan OPTIMA Diaphragm type Flushometers, including those manufactured for Low Consumption (LC) usage.

Each item has been identified by a specific Part Number (in italics) with a corresponding **Code Number** (in bold). To expedite your replacement requirements, order by **Code Number**.

Regal ESS item 41- Inside Parts Kits Assembly

****NOTE:** All Regal inside part items are supplied in packages of 12.

Wall Box Kits

Closet Models

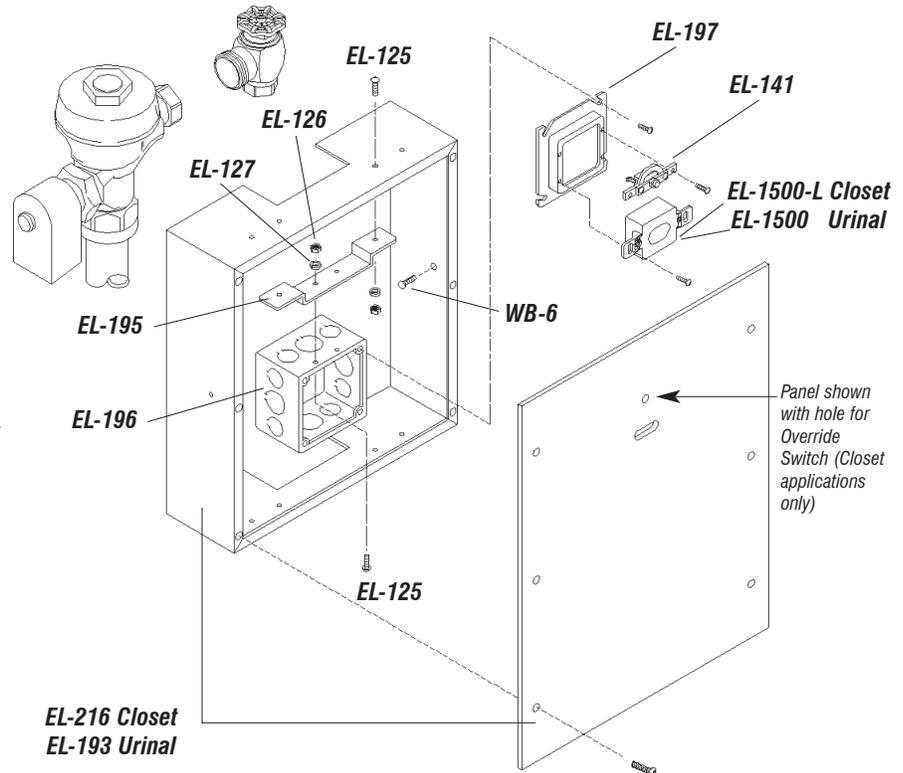

- **3305180** EL-192-A Closet Wall Box Kit - Stainless Steel
Includes four EL-125 Mounting Screws, four EL-126 Hex Nuts, four EL-127 Lock Washers, EL-195 Mounting Bracket, EL-196 Electrical Box, EL-197 Electrical Box Cover, EL-141-A Override Switch Subassembly, EL-216 Wall Box 13" x 17" (330 mm x 432 mm) with 14.5" x 18.5" (368 mm x 470 mm) Stainless Steel Wall Box Cover with hole for override switch, EL-318 Spanner Bit, EL-1500-L Closet Sensor Replacement Kit, and four WB-6 Screws.

- **3305179** EL-192-A Closet Wall Box Kit - Polished Brass
Includes the same components as **3305180** listed above except unit is furnished with Polished Brass 14.5" x 18.5" (368 mm x 470 mm) Wall Box Cover (instead of Stainless Steel).

Urinal Models

- **3305178** EL-191-A Urinal Wall Box Kit - Stainless Steel
Includes four EL-125 Mounting Screws, four EL-126 Hex Nuts, four EL-127 Lock Washers, EL-193 Wall Box 13" x 17" (330 mm x 432 mm) with 14.5" x 18.5" (368 mm x 470 mm) Stainless Steel Wall Box Cover, EL-195 Mounting Bracket, EL-196 Electrical Box, EL-197 Electrical Box Cover, EL-318 Spanner Bit, EL-1500 Urinal Sensor Replacement Kit, and four WB-6 Screws.

- **3305177** EL-191-A Urinal Wall Box Kit - Polished Brass
Includes the same components as **3305178** listed above except unit is furnished with Polished Brass 14.5" x 18.5" (368 mm x 470 mm) Wall Box Cover (instead of Stainless Steel).

Sensor Replacement

NOTE: The EL-1500 Series OPTIMA Sensor (a two-wire unit) replaces the older EL-150 Series Sensors (either three-wire or four-wire units). Refer to the Wiring History shown below.

IMPORTANT

- Be certain to disconnect the 24 VAC power supply either at the transformer or the fuse box. Failure to disable the power supply can result in damage to the EL-1500 Series Sensor.
- The Solenoid Operator must be removed from the Valve on exposed urinal installations. Do not damage the O-ring seal on the operator assembly.

- 1 Remove the Cover Plate (for Wall Box Installation, remove Cover Panel) and old Sensor from the wall installation. Use a 5/64" hex wrench to remove the Cover Plate Screws (or #8 drilled spanner head screwdriver EL-318 to remove the vandal-resistant screws from the Wall Box Cover Panel.)

Figure 1A

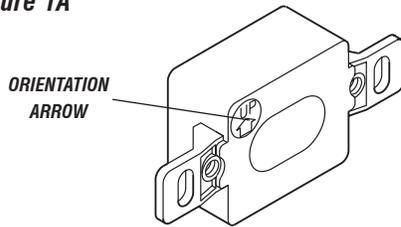

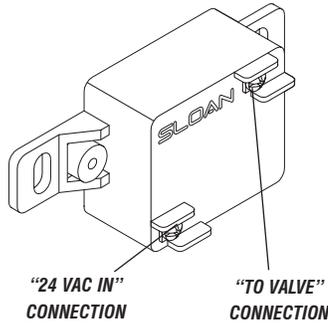

Figure 1B

- 2 Connect one 24 VAC lead to the Sensor Terminal labeled "24 VAC IN" (see Figure 1B).
 - On an old three-wire EL-150 series Sensor, this wire was connected to the BLACK Sensor lead.
 - On an old four-wire EL-150 series Sensor, this wire was connected to the BROWN Sensor lead.
- 3 Connect one Solenoid Lead to the Sensor Terminal labeled "TO VALVE" (see Figure 1B).
 - On an old three-wire or four-wire EL-150 Series Sensor, this wire was connected to the RED Sensor Lead.
- 4 Connect the remaining 24 VAC lead to the remaining Solenoid Lead.
 - On an old three-wire EL-150 Series Sensor, these wires were connected to the WHITE Sensor Leads.
 - On an old four-wire EL-150 Series Sensor, these wires were connected to the YELLOW and BLUE (or in very early models, the inner BROWN) Sensor Leads.
- 5 On Water Closet installations only, connect the Override Button (shown as the Override Switch in Wiring Diagram) parallel to the EL-1500-L Sensor.
- 6 Reinstall the Sensor with the Orientation Arrow on the Lens side of the Sensor pointing UP (see Figure 1A). Replace the Cover Plate (or Wall Box Panel) and tighten the Cover Plate (or Wall Box Panel) Screws.
- 7 Reconnect the 24 VAC power supply at the transformer or the fuse box.

WIRING DIAGRAM

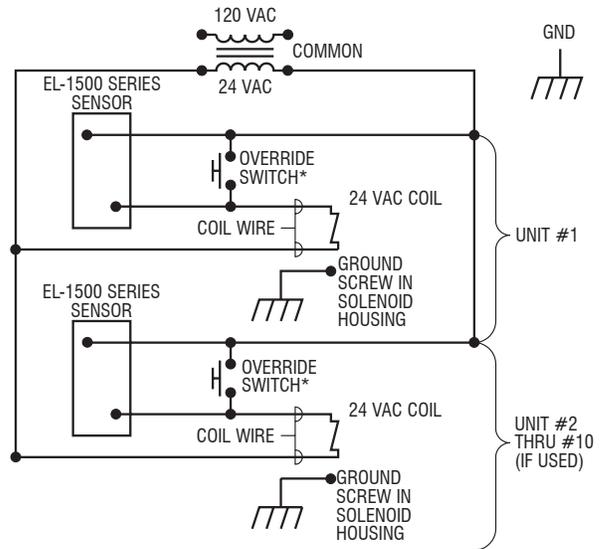

Figure 2

* OVERRIDE SWITCH USED WITH WATER CLOSETS ONLY

NOTE: A MAXIMUM OF TEN (10) SENSOR FLUSHOMETER UNITS CAN OPERATE FROM ONE (1) SLOAN EL-154 TRANSFORMER. CLASS 2 UL LISTED, 48 VA (MIN.) AT 24 VAC, PLATE MOUNTED.

Start-Up Mode

NOTE: It is important that only permanent targets are present at this time.

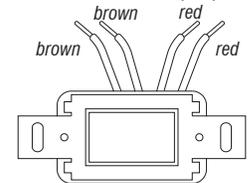

The self-adaptive sensor automatically adjusts to the surrounding environment when the 24 volt supply is activated. No manual adjustment is required. The start-up cycle completes in approximately five (5) minutes. A continuous red light visible in the Sensor Window indicates the Start-up Mode. If the red light flashes, the Sensor detects a target. Unless this target is a permanent fixture in the Sensor's environment (i.e., a wall or stall door), it must be removed from the view of the Sensor. If a target is permanent, the Sensor will adapt itself around this target. In this case, the Start-Up Mode may take up to 10 (ten) minutes. When the Start-Up cycle is complete, the red light will no longer be visible in the Sensor Window.

NOTE: If the 24 volt power supply is ever interrupted for longer than fifteen (15) seconds, the start-up mode begins automatically when power is restored.

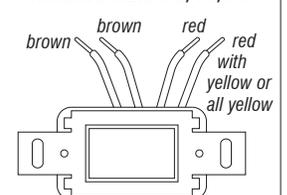

Incorrect wiring or a short in the 24 volt power supply will initiate a warning signal in the Sensor Window. The visible light flashes a continuous "S-O-S" signal: three (3) slow, three (3) fast, and three (3) slow flashes.

EL-150 Wiring History for 4-wire and 3-wire sensors

Release date 08/11/83

Release date 02/02/87

Release date 12/12/90

Troubleshooting Guide

NOTE: Upon detection of the user, the red indicator light flashes **slowly** for a period of eight seconds. When the user leaves the detection range, the indicator light flashes **rapidly** and the Sensor initiates the flush sequence. Then the indicator light **stops** flashing and the valve flushes. (On water closet models, the valve will flush after a three-second delay).

1. PROBLEM: Valve does not function (red light does not flash when user steps in front of sensor).

CAUSE: No power is being supplied to sensor.

SOLUTION: Ensure that the main power is turned "ON". Check transformer, leads and connections. Repair or replace as necessary.

CAUSE: EL-1500/EL-1500-L Sensor is not operating.

SOLUTION: Replace EL-1500/EL-1500-L Sensor.

2. PROBLEM: Valve does not function (red light flashes when user steps in front of Sensor).

INDICATOR: The red light stops flashing when user steps away and the valve makes a "clicking" sound but does NOT flush.

CAUSE: No water is being supplied to the valve.

SOLUTION: Make certain that water supply is turned "ON" and the Control Stop is open.

CAUSE: EL-128-A cartridge is fouled or jammed.

SOLUTION: Turn electronic power to valve "OFF" (failure to do so could result in damage to the solenoid coil). Remove the solenoid operator from the valve and remove the EL-128-A cartridge. Clean and/or repair as necessary.

INDICATOR: The red light stops flashing when user steps away but the valve does NOT make a "clicking" sound and does NOT flush.

CAUSE: EL-163-A solenoid shaft assembly is fouled or jammed.

SOLUTION: Turn electronic power to valve "OFF" (failure to do so could result in damage to the solenoid coil). Remove EL-101 or EL-166 nut from the solenoid operator. Remove the coil from the solenoid operator. Use a spanner wrench or pliers to remove the EL-163-A solenoid shaft assembly from valve. Clean and/or replace as necessary. Be sure to replace plunger spring when reassembling Solenoid Shaft Assembly.

INDICATOR: The red light flashes three (3) short flashes, three (3) long flashes then three (3) short flashes ("S-O-S") and continues to repeat this cycle even when user steps out of the sensor's detection range.

CAUSE: EL-1500/EL-1500-L Sensor wiring connections are incorrect.

SOLUTION: Rewire Sensor to valve. One solenoid lead connects to the "TO VALVE" connection on Sensor. One transformer lead connects to the "24 VAC IN" connection on Sensor. Second solenoid lead and second transformer lead connect together.

CAUSE: Wiring to Sensor is ground shorted.

SOLUTION: Find short in wiring circuit and correct.

CAUSE: EL-162-2 solenoid coil is burnt out or coil is not connected to solenoid plunger shaft.

SOLUTION: Reinstall or replace coil as necessary.

3. PROBLEM: Volume of water is insufficient to adequately siphon fixture.

CAUSE: Control Stop is not open wide enough.

SOLUTION: Adjust control stop for desired water delivery.

CAUSE: Low Consumption unit is installed on Water Saver or Conventional fixture.

SOLUTION: Replace Diaphragm component parts of valve with kit that corresponds to appropriate flush volume of fixture.

CAUSE: Inadequate water volume or pressure available from supply.

SOLUTION: Increase pressure or supply (flow rate) to the valve. Consult factory for assistance.

4. PROBLEM: Length of flush is too long (long flushing) or valve fails to shut off.

CAUSE: Water Saver valve is installed on Low Consumption fixture.

SOLUTION: Replace Diaphragm component parts of valve with kit that corresponds to appropriate flush volume of fixture.

CAUSE: Relief valve in diaphragm is not seated properly or bypass hole in diaphragm is clogged.

SOLUTION: Disassemble inside Diaphragm component parts and wash parts thoroughly. Replace worn parts if necessary.

5. PROBLEM: Water splashes from fixture.

CAUSE: Supply flow rate is more than necessary.

SOLUTION: Adjust Control Stop to meet flow rate required for proper cleansing of the fixture.

CAUSE: Closet valve is installed on urinal fixture.

SOLUTION: Replace closet Diaphragm component parts with proper urinal kit (Inside Diaphragm Assembly or Inside Parts Kit)

Care and Cleaning Instructions

DO NOT USE abrasive or chemical cleaners to clean Flushometers that may dull the luster and attack the chrome or special decorative finishes. Use ONLY soap and water, then wipe dry with a clean towel or cloth.

When cleaning the bathroom tile, protect the Flushometer from any splattering of cleaner. Acids and cleaning fluids can discolor or remove chrome plating.
