MCR SAFETY

We protect people from workplace hazards.

We are committed to bringing our customers products that work as hard as they do. Workers who wear our gear refuse to be out-performed and so do we. This is the essence of MCR Safety's commitment to our products and customers. People who work hard know that MCR Safety gear delivers.

MCR Safety has more than thirty-eight years of experience as a leader in the field of personal protective equipment (PPE). MCR Safety globally manufactures and distributes safety gear marketed as MCR Safety, Memphis Glove, Crews, and River City. Our assortment of offerings includes gloves, glasses, and garments. Our products are made from the highest quality materials available to ensure maximum safety, comfort, and style.

MCR Safety is committed to be the supplier of choice for gloves, glasses, and garments. We strive to be an employer who not only values employees for their contributions but challenges them to be passionate about what they do at work, home and in the community. We want our suppliers and business partners to regard MCR Safety as their most respected and trusted customer.

**JUST TRY
TO OUTWORK US**

Strategies that guide us **BITE**

- B – Build a recognizable and trusted **BRAND**
- I – **INNOVATE** products and processes
- T – Continually equip and strengthen our **TEAM**
- E – Continually develop and **ENGAGE** end users for our distributors

Principles we live by **CARE**

- C – **Commitment** – Focus on the goal and make it a reality!
- A – **Accountability** – Take ownership...if it's your responsibility, the buck stops with you!
- R – **Relentless** – Never give up! If it was easy, anyone could do it!
- E – **Empowerment** – Step up and take charge!

WHO WE ARE

We are MCR Safety.
Just try to outwork us.

HV100 ForceFlex™ Hi-Vis

Sizes: M-XXXL

Kevlar® reinforced palm pads provide a rough texture to improve abrasion and grip in wet or oily conditions. Clarino® synthetic leather palm with breathable fourchettes and mesh fabric back combine for personal fit and comfort. EVA foam padding in Kevlar® reinforced palm pads aid impact resistance. Additional features include extra tacky fingertips, TPR (Thermoplastic Rubber) exoskeleton, Reflexite® micro-prismatic retro-reflective material, plus a neoprene slip-on cuff with dual side flex panels and continuous pull aid ease in donning and doffing.

- Industry applications include rigging, pipe fitting, oil field maintenance, heavy construction, demolition, manufacturing, mining, fabrication

Proudly developed with the oil industry to achieve maximum protection, durability, grip, and dexterity in dry, wet or oily conditions.

HV300 ForceFlex™ Hi-Vis

Sizes: M-XXL

Features an ergonomically designed synthetic palm with a rough grip pad to enhance grip in dry applications. Additional features include breathable fourchettes and high visibility yellow mesh fabric on the palm and back, extra tacky fingertips, TPR (Thermoplastic Rubber) exoskeleton, a micro-terry cloth perspiration wipe on back of thumb, and an adjustable wrist closure with red nylon pull tab.

- Industry applications include any with low-light environments or where operations are conducted before or after day-light hours.

Targeted industries include airport, emergency response, law enforcement, lawn and tree service, mining, road construction, railroad, sanitation workers, and municipal utilities.

HV200 ForceFlex™ Insulated Hi-Vis

Sizes: M-XXL

All the features of the HV100 plus a water/wind resistant inner breathable bladder and 3M® Thinsulate® lining. The extended fleece snow guard cuff provides warmth along with an internal heat pocket that will accommodate a HotHands® hand warmer which provides up to 10 hours of added warmth. Rated to temperatures as low as -20° F.

FORCEFLEX® Multi-Purpose

FEATURES / Multi-layer construction / Injection Molding TPR Padding on back of hand / Synthetic leather / Adjustable wrist closures / Insulated styles available

B100 ForceFlex™

Sizes: M-XXL

Features an ergonomically designed Clarino® synthetic palm with a rough grip pad to enhance grip in dry applications. Additional features include breathable fourchettes and mesh fabric on the palm and back, extra tacky fingertips, TPR (Thermoplastic Rubber) exoskeleton, a micro-terry cloth perspiration wipe on back of thumb, and an adjustable wrist closure with red nylon pull tab.

• Industry applications include construction, equipment operation, fabrication, forestry, landscaping, maintenance, manufacturing, material handling, plumbing, railroad

All ForceFlex® styles are washable in cold water and air dry.

Y200 ForceFlex™

Sizes: M-XXL

Ergonomically designed Clarino® synthetic palm pad to increase comfort and durability. Additional features include breathable fourchettes and mesh fabric on the palm and back, extra tacky fingertips, TPR (Thermoplastic Rubber) exoskeleton, a micro-terry cloth perspiration wipe on back of thumb, and an adjustable wrist closure with red nylon pull tab.

Y300 ForceFlex™

Sizes: M-XXL

All the features of the Y200, plus a durable neoprene slip-on cuff with dual side flex panels and continuous pull to aid in ease in donning and doffing.

FORCEFLEX® Cut Protection

NEW

DN100 ForceFlex™

Sizes: M-XL

A 13-Gauge stretch Dyneema® seamless knit shell is dipped in polyurethane and covered with TPR exoskeleton pads for 360 degrees of protection. CE 4343, CPPT 2.

- Industry applications include Auto Repair, Construction, landscaping, power tools, assembly, equipment handling.

KV200 ForceFlex™

Sizes: L-XXL

Features a full sock Kevlar® lining for enhanced cut protection. A high visibility yellow Clarino® leather palm and high visibility yellow injection molded TPR (Thermoplastic Rubber) exoskeleton strategically covers the back of hand and fingers provide for full dorsal metacarpal protection and assure high visibility. Additional features include reinforced finger tips for added abrasion resistance and durability, ergonomically designed PU coated leather reinforced palm for maximum grip in oily or wet conditions, mesh fabric backing for improved breathability, and an adjustable wrist closure with pull tab for easy donning. Cut Protection Performance Test (CPPT) Level 3.

- Industry applications include rigging, pipe fitting, oil field maintenance, heavy construction, demolition, manufacturing, mining, and fabrication.

NEW

KV100 ForceFlex™

Sizes: M-XL

A 13-Gauge stretch KEVLAR® seamless knit shell is dipped in nitrile and covered with TPR exoskeleton pads for 360 degrees of protection. CE 3221, CPPT 2.

NEW

CPPT 3

DuPont™
KEVLAR®

FORCEFLEX® Impact Protection

ZB100 ForceFlex™ Zoombang®

Sizes: M-XXL

MCR Safety has exclusive distribution of the patented Zoombang® technology for industrial hand protection. Our first introduction is the Force Flex with Zoombang® technology in the palm that increases comfort while providing unparalleled protection from impact. Thermoplastic Rubber (TPR) material provides comprehensive protection for the knuckle and back of the hand. Pull cord to ease donning, breathable mesh fabric back, synthetic leather palm, and micro terry cloth perspiration band are additional features.

T100 ForceFlex™

Sizes: M-XXL

An anti-vibration polymer pad strategically located on the interior that minimizes impact and vibration. Clarino® synthetic leather palm base material with breathable and expandable fourchettes and a mesh fabric back combine to provide extra fit and comfort. Additional features include ergonomically designed rough textured palm, TPR (Thermoplastic Rubber) exoskeleton, durable neoprene slip-on cuff with dual side flex panels, and continuous pull for ease in donning and doffing.

- Industry applications include construction, heavy equipment operation, metal fabricating, and applications requiring protection from excessive vibration or stress to the hands.

ZB200 ForceFlex™ Zoombang®

Sizes: M-XXL

Zoombang® polymer is strategically located on back of the hand for unparalleled impact protection. Clarino® synthetic leather palm base material with breathable and expandable fourchettes and a mesh fabric back combine to provide extra fit and comfort. Additional features include reinforced finger tips, ergonomically designed rough textured palm, an adjustable wrist closure with pull cord, and breathable mesh fabric back.

All ForceFlex styles are washable in cold water and air dry.

and Fingertips.

MCR Safety ITC Lab

MCR Safety's Innovations Technology Center (ITC) provides ANSI/ISEA safety standards testing data on gloves, glasses, and garments. Our lab serves as an important component of our quality control and product inspections by providing data to assure compliance with product specifications.

The ITC lab has grown in popularity for its ability to provide competitive analysis and quantitative endorsement of our product quality. We encourage our distributors to take advantage of this resource by sending us competitor safety gear for testing. We will provide test results and recommended equivalent products.

HIGH VELOCITY IMPACT

HIGH VELOCITY IMPACT

ANSI Z87+

A crowd favorite is the high impact eyewear testing equipment. The test captures your attention while substantiating the impact levels of our glasses and face shields. Frames must be capable of resisting impact at a velocity of 150 fps.

EN388

CUT

TEAR / TENSILE

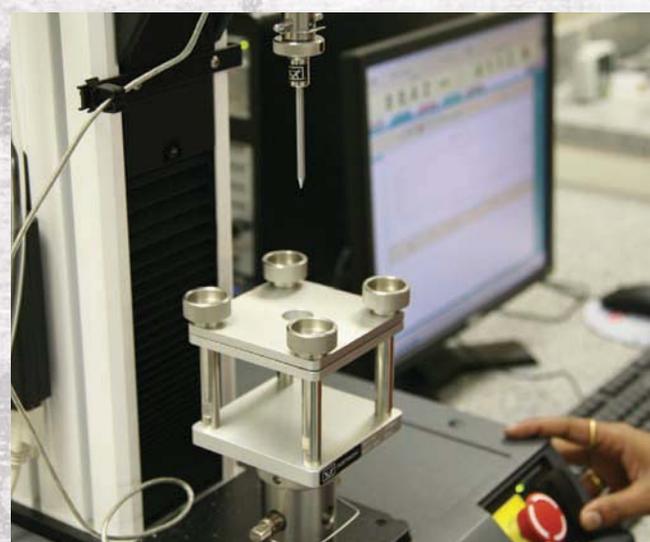

Instron-Tensometer
BS EN 388 (CE)
Tear Resistance - the force necessary to tear specimen half way along its length.
Tensile - measures the force required to pull material to the point where it breaks.

TEAR / TENSILE

PUNCTURE

Instron-Tensometer
BS EN 388 (CE)
Puncture - the force exerted by a steel stylus to puncture a test specimen held by a retaining device.

PUNCTURE

CUT TEST METHODS

MCR Safety is a licensed provider of DSM™ Dyneema® and DuPont™ Kevlar®, and one of two exclusive Alycore® sources in the US. This catalog introduces Alycore® which is one of the most cut and puncture resistant materials available. Our Alycore® gloves offer greater dexterity and sense of touch than previously available due to the high degree of flexibility.

Cut protection is one of our industry's fastest growing product groups. To capitalize on today's technology and innovation, you need to understand our industry's test methods. Each test method has unique processes and testing equipment. Therefore, it is difficult to make comparisons with each of these test methods and results (scores).

The International Safety Equipment Association (ISEA) in conjunction with the American National Standards Institute (ANSI) have created test protocol known as ASTM F1790 standard, then revised and updated as ASTM F1790-97 and ASTM F1790-05. Differences in the 1997 and 2005 revisions are noted in the table below.

Criteria		Performance Guide for EN 388: Mechanical Hazards					
	Performance Level	0	1	2	3	4	5
A	Abrasion Resistance (Cycles)	< 100	100+	500+	2000+	8000+	N/A
C	Blade Cut Resistance (Index)	< 1.2	1.2+	2.5+	5.0+	10.0+	20.0+
T	Tear Resistance (Newtons)	< 10	10+	25+	50+	75+	N/A
P	Puncture Resistance (Newtons)	< 20	20+	60+	100+	150+	N/A

The European Standard EN388 includes four physical tests required for gloves. Our catalog and industry identifies this testing information with CE and a four digit number. Each number represents an individual test for abrasion, cut, tear, and puncture. The cut test uses a circular blade under a fixed load, moves back and forth until cut through is achieved. Consider the acronym ACT-P as a convenient reference to remembering the four physical tests.

CPPT - ANSI/ISEA 105 Classification for Cut Resistance Level Weight

Performance Level	Weight (grams) needed to cut through material 25mm (1.0 in.) of blade travel – ASTM F1790-97 20mm (0.8 in.) of blade travel – ASTM F1790-05
0	< 200
1	≥ 200
2	≥ 500
3	≥ 1000
4	≥ 1500
5	≥ 3500

The Cut Protection Performance Test (CPPT) utilizes a straight razor blade and calculates a gram weight necessary to cut through test material. There are three types of testing equipment (CPP, TDM, and Couptest tester) used to support the CPPT and CE standards. This is another reason it is difficult to make any comparisons between test scores. MCR Safety utilizes a TDM tester in our Innovations Technology Center (ITC). Our ITC provides testing data for gloves, glasses, and garments for internal evaluations. Independent testing labs are required for CE and CPPT scores.

See table on page 33 for DuPont's standard which incorporates gram weight performances in the scale and reinforces by including on product labels.

ALYCORE™ Cut Protection

Alycore™ is one of the most cut and puncture resistant materials available. Our Alycore™ gloves offer maximum dexterity and sense of touch due to the high degree of flexibility and patent pending construction. All Alycore™ styles provide cut performance levels which exceeds CPPT and CE level 5 ratings. We offer different cut and puncture protection zones from just the palm to complete 360 degree coverage.

Alycore™

The Highest Levels of Cut, Needle Stick and Puncture Protection.

Our literature identifies the protection zones for each style with Alycore™ material. Our Memphis Multitask ML300A glove meets modified ASTM F2878-10 standard for needle stick protection.

Characteristics of MCR Safety Alycore™ offerings include:

- Exceeds ANSI/ISEA and CE cut level 5 test rating
- Our needle stick offering meets ASTM F2878-10 standard
- Label that endorses "Exceeds Cut Level 5" and specific protection zone
- ID tag for personalizing
- Launderable – machine wash, line dry

DUPONT™ KEVLAR® Cut Protection

DuPont™ is championing the use of ASTM and International Standard Organization (ISO) cut protection standards. The chart below includes gram weight ranges to endorse suitable levels of cut performance. Note testing can be performed on CPP or TDM testers.

New labeling guide for DuPont™ Kevlar® fiber tied to ASTM and ISO standards

Finished glove cut performance		Brand Name
CPP machine (g)*	TDM machine (g)**	
500-999	500-949	Made with Kevlar® 500
1000-1499	950-1399	Made with Kevlar® 1000
1500-2199	1400-2099	Made with Kevlar® 1500
2200-2999	2100-2799	Made with Kevlar® 2200
3000-3999	2800-3699	Made with Kevlar® 3000
4000-4999	3700-4599	Made with Kevlar® 4000
5000+	4600+	Made with Kevlar® 5000

*Use ASTM 1790-97 method

**Use 1790-05 or ISO 13997 method. For reinforced materials (steel, glass, and other), false cuts and high variability in cut readings may be an issue; use of insulating material may be required. If used, note material and type. Suitable insulation can be obtained by using double-sided tape (PolyKen Tyco 2" x 36 yards, which is the same material used in ASTM 1790-97) or by leaving the copper-strip backing in place (RGI part #2147 3/8" wide copper strip).

STEELCORE® II / SURVIVOR™ Cut Protection

Steelcore II / Survivor -

Two strands of stainless steel wrapped with a soft knit yarn for a comfortable fit. PVC coating is also available on one or two sides. This product is cut resistant, not cut-proof or puncture-proof. It is not recommended to use with serrated or moving blades. Sleeves available in 12, 18, 21 inch lengths.

Features: cut resistant, complies with FDA regulations for food contact, reversible patterns, launderable.

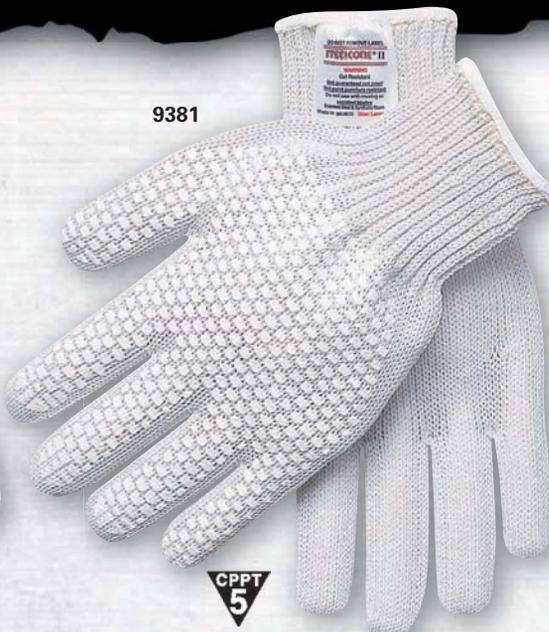

Applications: Food processing, canning operations, glass handling or metal fabricating.

LENS COLOR DESCRIPTIONS

All of our glasses pass the **ANSI Z87+** standard for coverage, impact protection and optical clarity. We sell internationally and many of our styles meet the **EN166** (Europe), **CSA Z94.3** (Canada) and **AS/NZS 1337.1** (Australia and New Zealand).

Lens tints are not merely decorative, but enhance a worker's vision under various lighting conditions. Following are different lens options, their applications and percentage of **visible light transmission (VLT)**. Please remember that these are general definitions only. Consult your safety director to insure the proper application.

Duramass® AF4 Anti-fog Coating: Exclusive **Duramass®** scratch resistant coating with Anti-Fog provides excellent fog prevention in high humidity environments where sudden shifts in temperature occur.

-  **Clear:** Provides excellent optics for general applications where impact protection is required. 85% VLT.
-  **Light Gray:** Serves the same purpose as gray lens, yet allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 62% VLT
-  **Gray:** For outdoor applications where light and glare can cause eye strain and fatigue. 12% VLT.
-  **Amber:** Blocks the blue portion of the visible light spectrum, creating maximum contrast enhancement, particularly in low light. 85% VLT.
-  **Orange:** Excellent for indoor and low light areas as well as cloudy or hazy days.Blocks out blue and green light portion. 57% VLT.
-  **Fire, Blue Diamond, Emerald, Rainbow, Blue, Silver, Banana Mirror and Copper:** For outdoor use where sunlight and glare cause eye strain and fatigue. 'Mirror' coating reflects light, reducing the amount of light that passes through the lens. 9% VLT.
-  **Brown:** Outdoor applications where sunlight and glare cause eye strain and fatigue. Meets color traffic signal recognition requirements. 12% VLT.
-  **Indoor/Outdoor Clear Mirror:** Allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 55% VLT.
-  **Vermilion:** Enhances contrast while reducing all colors equally for optimum color recognition. Ideal for indoor inspection. 55% VLT.
-  **Light Blue:** Allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 70% VLT.
-  **Filter Shades:** Protects against ultra-violet and infrared radiation generated when working with molten metal, and in welding, cutting, soldering and brazing.
-  **Polarized:** For use outdoors to protect from excessive glare that can cause eye fatigue.

WELDING FILTER SHADE SECTION

OPERATION SHADE	RECOMMENDED FILTER SHADE
Torch Soldering	2
Torch Brazing	3
Light Cutting up to 1"*	3
Medium Cutting 1" to 6"*	5
Heavy Cutting more than 6"*	5
Gas Welding, light, up to 1/8"*	5
Gas Welding, medium, 1/8" to 1/2"*	5

*Indicates thickness of material to be cut

FORCEFLEX®

The most advanced performance glasses and goggles have arrived. Our 3rd generation ForceFlex® is now lighter, more comfortable, and even more flexible than before. This patented style surpasses military ballistic MIL-31013 test regiment for high velocity impact along with ANSI Z87+ standards. Radical styling combining soft materials on temple and nose pads enhance looks and comfort.

We rewrote the book on how a goggle should look, fit, perform and flex. The ForceFlex® soft shell goggle surpasses ANSI Z87+ standards. Its full TPR body forms a tight seal to protect from small particles, debris, liquids, and injury. ForceFlex is the new standard for light weight, low profile, comfortable goggles.

VEND PACK - VENDING GEAR

Gloves - Boxed B3

B5 Gloves - Hang Tags B7

C3

C5 Garments - Packaged C7

Vending Gear options are available for our gloves, glasses, and garments. Gloves are rolled, boxed, poly-bagged, and also available with hang tags. Glasses are poly-bagged or boxed. Garments are individually packaged. Glove styles with "VP" incorporated into the style number are individually rolled and shrink-wrapped. Our Product Listing and Price Lists do reflect "pair" and "each" unit of measure which are potentially vending machine ready.

How to Measure:

For Chest / Bust Size - Measure just under the arms and across the broadest part of the chest area. Hold tape firm and level.

Waist - Measure around waist, over shirt (not over pants) at the height you normally wear pants.

GENERAL PURPOSE SAFETY VESTS

General Purpose Class Protection Work Conditions
 General purpose vests do not meet the requirements for performance level classification by ANSI standards. GP Vest are to be used for occupational activities where Class 1 protection is not necessary. GP vests are designed to give the wearer additional visual conspicuity beyond that of normal attire.

General Purpose Class Industry Applications:

- Yard maintenance workers
- Crowd control
- Warehouse workers
- Construction
- Parking lot attendants

MCR Safety recommends the use of Value Series Class 2 vests for any Class 1 requirement.

V041 One Size 18" x 27"

Reflective Stripes,
Zipper Front Closure.
Fluorescent Orange

Many of today's environments require the quick identification of individuals coordinating or involved with site activities. Although incident command vests were initially designed for responders to disasters or hazardous situations, they are used in a wide variety of applications. These vests are used to help quickly identify the person or persons responsible for a particular area.

ICV204 Cotton/Polyester vest with hook and loop tab front closure and elastic side straps. 1" white vinyl reflective stripes. Front and back slot to insert interchangeable title information.

- ICV203** Blue One Size: 21"x48"
- ICV204** Red One Size: 21"x48"
- ICV207** Black One Size: 21"x48"
- ICV208** Green One Size: 21"x48"

BYR100 Sizes: 7-18
17 inch over the shoe, 100% waterproof boot is constructed of flexible rubber material. Features an adjustable top strap with buckle for better fit. Inside cotton liner allows for ease in putting on and taking off. Cleated ripple soles provide additional grip and slip resistance. Excellent for moderate chemical resistance, construction and concrete work and general wet applications. Color: Yellow with Black outsole 6 pairs / case

PBS120 Sizes: 6-14
14 inch over the sock, 100% waterproof boot is constructed of heavy duty flexible PVC for comfort and excellent abrasion resistance. Steel toe meets F2413-05 requirements, offers protection against impact and falling objects. Features cleated sole for excellent grip and slip resistance, polyester liner and kick off lug for ease in putting on and taking off. Insoles made of foam EVA for comfort. Color: Black with Black outsole 6 pairs / case
PBP120 - Same as PBS120 with Plain Toe.
