Emerald CX[®]

13-Gauge Cut-Resistant Nylon/Steel
Composite String Knit with Goat-Grain Palms

#S13KBGLP

These gloves have to be tried to be believed when it comes to how comfortable and effective they are. They provide amazing abrasion and cut resistance for such a light dexterous glove. Glove body is a fine 13-gauge knit featuring black nylon and stainless-steel, spun together in a way that makes the steel content imperceptible to the wearer.

Goat-grain palms are the perfect leather for this style because of its incredible strength-to-weight ratio. Soft, thin, and tear-resistant, they do not impede functioning and feature an extra strip along the thumb crotch (highest wear-area on any glove) for added durability. Palms are attached to shell using cut-resistant Kevlar[®] thread for greater seam integrity.
