KOHLER® Toilets Service Parts

Finding the right service part for your toilet repair can seem like a daunting task. To simplify the process, this catalog will help you identify your toilet and which parts you need to complete the repair. When you choose KOHLER genuine parts, you can be sure your toilet will continue to deliver exceptional performance.

Tips to Finding the Right Part

Determine Your Toilet's Flushing Technology

All KOHLER flushing technologies are described, along with their common replacement parts, on pages 4-10. To determine your toilet's flushing technology, look inside the tank and compare your flushing technology with those pictured in this catalog.

Check if Your Toilet Is a One-Piece or Two-Piece Toilet

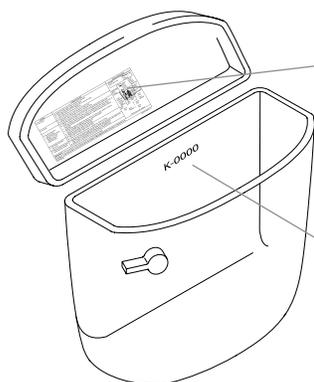

One-piece toilets integrate tank and bowl into a seamless design

Two-piece toilets feature the traditional design of a separate tank and bowl

Look for Model and Parts Numbers

If you have a toilet manufactured after 1990, various service part numbers are listed on the underside of the lid. The toilet tank number is imprinted on the inside back of the tank.

Part numbers are imprinted on the underside of the tank lid. Toilets manufactured prior to 1990 do not have part number labels on the underside of the lid.

The toilet number is imprinted on the inside back of the tank.

Find Your Toilet in the Matrix

If you do not find the part you need pictured on pages 4-10, use the information you have gathered to find your toilet in the corresponding section of the matrix. The replacement part numbers for the float/fill valve, flush valve, tank gasket and flush ball/flapper are listed for each toilet. To view all the service parts for your toilet, visit KOHLER.com/serviceparts for the expanded service parts pages.

Canister (Single-Flush) Toilets

CLASS SIX[®]
KOHLER[®]

CLASS FIVE[®]
KOHLER[®]

If you have a single-flush canister toilet, you will not see a flapper in the tank but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal. ***If your toilet is leaking water into the bowl, the seal needs to be replaced, not the flush valve.***

Part numbers are imprinted on the underside of the tank lid.

Toilet number is imprinted on the inside back of tank.
