HTA JET

NOTE: Use ABS/PVC cement to bond jet to air line and discharge plumbing.

SWIVEL ASSEMBLY DETAIL

To replace the Swivel Assembly and Venturi Handle:

Remove 3 screws securing clamping ring and gasket from jet body.

Pull swivel ring B (see detail) away from swivel to expose retaining screw A.

Remove screw A from swivel. Turn Venturi C counterclockwise until it is unscrewed and free from the swivel.

Install new swivel assembly, securing it with clamping ring, gasket and 3 screws. Screws are properly

tightened when the swivel assembly can still be manually moved from side to side, but tight enough to allow the Venturi handle to be turned to adjust

water without turning the swivel. To install the handle, align the two portions of the swivel assembly with the notches on the handle and snap it on.

NOTE: When installed, the handle is permanently in place; attempting to

remove it will damage the snap-on feature of the handle.

NOTE: Transformer cannot be ordered individually. P/N 7701000 must be ordered.

BATHS

VENT/DRAIN ASSEMBLIES

NOTE: From inside of bath, insert drain tube, Item 4, into grommet, Item 5. From outside of bath, pull drain tube until flared end of tube is seated in grommet. To ensure maximum drainage, cut drain tube to proper length. To install compression fittings in plumbing, drill 5/16" diameter thru hole and tap for 1/8 NPT.

ITEM	P/N	DESCRIPTION	QTY
1	3044000	Compression Fitting, 90 Ell, .25"	1
