General Bath & Shower

Illustrated Parts Manual

Introduction

This manual contains parts information for Jacuzzi Luxury Bath & Shower product lines.

Parts Table

Item #	Description	Current P/N	Previous P/N	Qty.

Item

The *item # column* provides digits that match call outs on the related illustration.

Description

The *description column* provides a detail name of each part from the illustration. Where applicable, information such as colors, dimensions, or other details is provided.

Current P/N

The *current part number (P/N)* column provides current JLB part numbers for each item.

Previous P/N

The *previous part number column* provides old JLB part numbers that are no longer in use on current production models. The previous part numbers are provided to help identify obsolete items that may still be in the field. Where possible, notes are provided to clarify the difference between old and new parts.

Qty.

The *qty. column* shows how many of a particular part are used in an assembly.

When Ordering Parts

Keep the following items in mind when ordering JLB parts.

1. Please furnish
2. Provide the following information
 - a. Part number
 - b. Quantity of part needed
 - c. Description of part
 - d. Color, graphic, and other details needed for order entry items
3. Fax to 866.426.0983 or 909.247.2550

Suggested Service Truck Tools

The Jacuzzi Luxury Bath Technical Support recommends carrying the following tools on every service truck. These are the minimum tools required to perform accurate, safe service calls.

Safety Glasses		Digital Camera	
Multimeter		Amp Meter (Clamp On Style)	
Heat Gun		AC Outlet Line Splitter (To Check Amps on Heater Motor And Blower)	
Socket Set		Box End Wrenches	
Cordless Drill		Screwdriver Drill Bits	
Precision Screwdrivers		Screwdriver Set	
Channellocks (Large And Medium)		Vice Grips

Normally Open

Normally Closed

The diagram illustrates the assembly of a manual valve. It features a green cylindrical body with a black handle on the left and a white L-shaped pipe fitting on the right. The handle has a grey circular base and a black gear-like outer ring. The pipe fitting has a square flange with four mounting holes and a central threaded port. Two exploded views are shown: 'Normally Open' and 'Normally Closed'. In the 'Normally Open' view, the handle is positioned horizontally, and the internal valve stem is extended. In the 'Normally Closed' view, the handle is rotated 90 degrees clockwise, and the internal valve stem is retracted. Dashed lines indicate the alignment of the handle with the pipe fitting. A large number '1' is positioned between the two views.

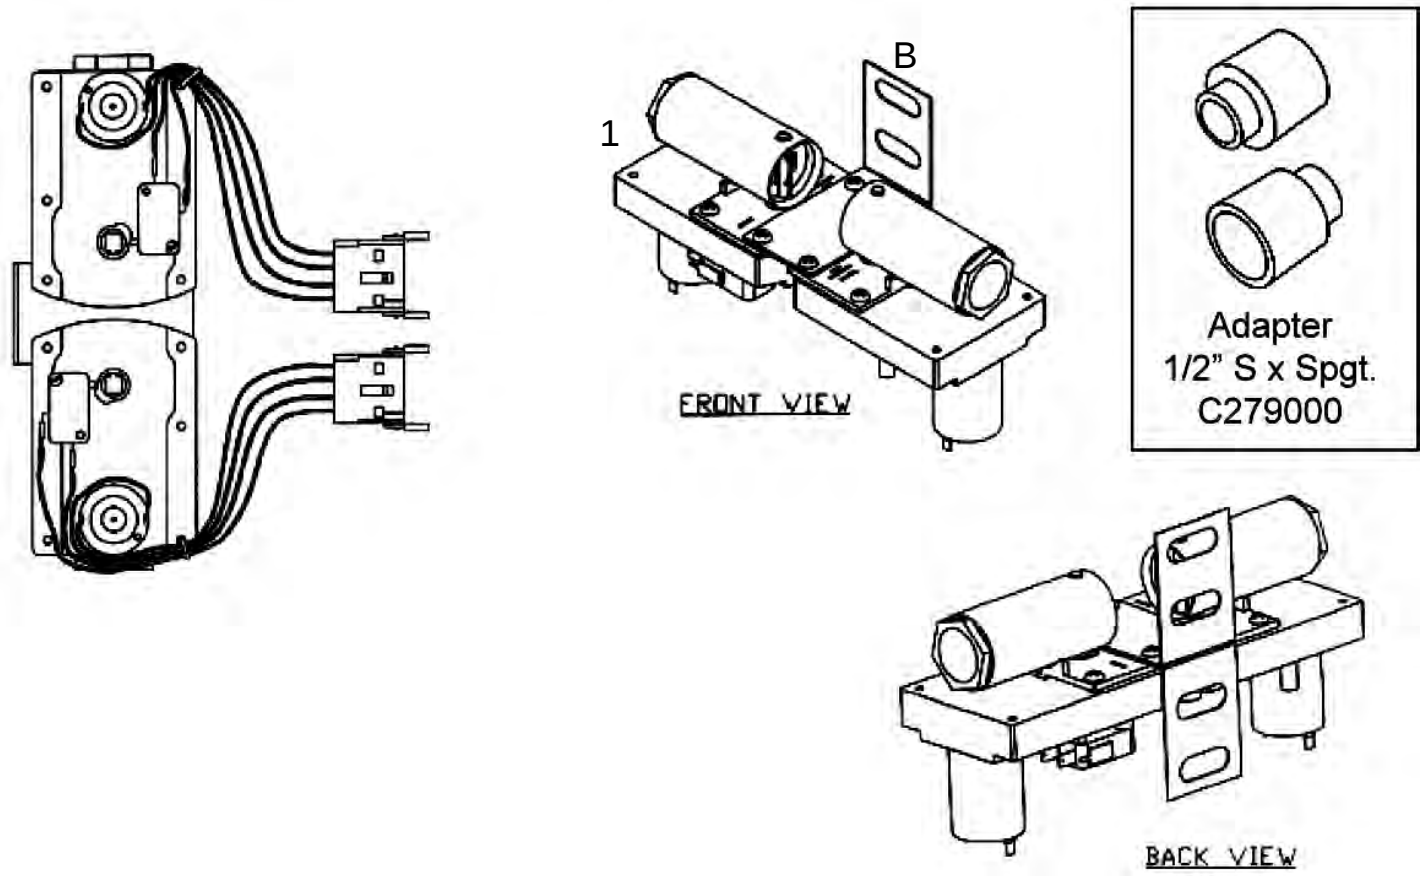

Coupler
(1/2" S x S)
0647000

The image displays two exploded views of a pump assembly. The left view, labeled 'FRONT VIEW', shows the pump housing, impeller, and a circular flange with a central shaft. The right view, labeled 'BACK VIEW', shows the pump housing, impeller, and a circular flange with a central shaft. The pump housing is green, the impeller is grey, and the flange is grey. The impeller has a central shaft and a circular flange. The pump housing has a central shaft and a circular flange. The pump housing has a central shaft and a circular flange.

Note:

1. This kit includes a new complete cylinder with o-rings. 1 kit is required for each valve assembly. Specify Revision A or B at time of order.

Electronic

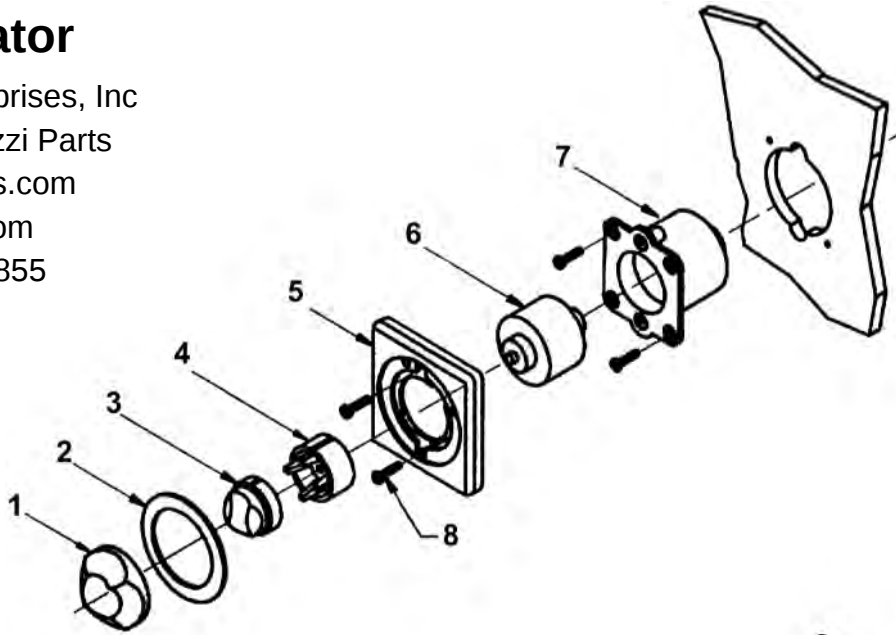

Item #	Description	Current P/N	Previous P/N	Qty.

8	Nut (HTA)	1645000	-	1
9	Complete HTA Jet Assembly (Items 1-6)	4870XXX*	-	1

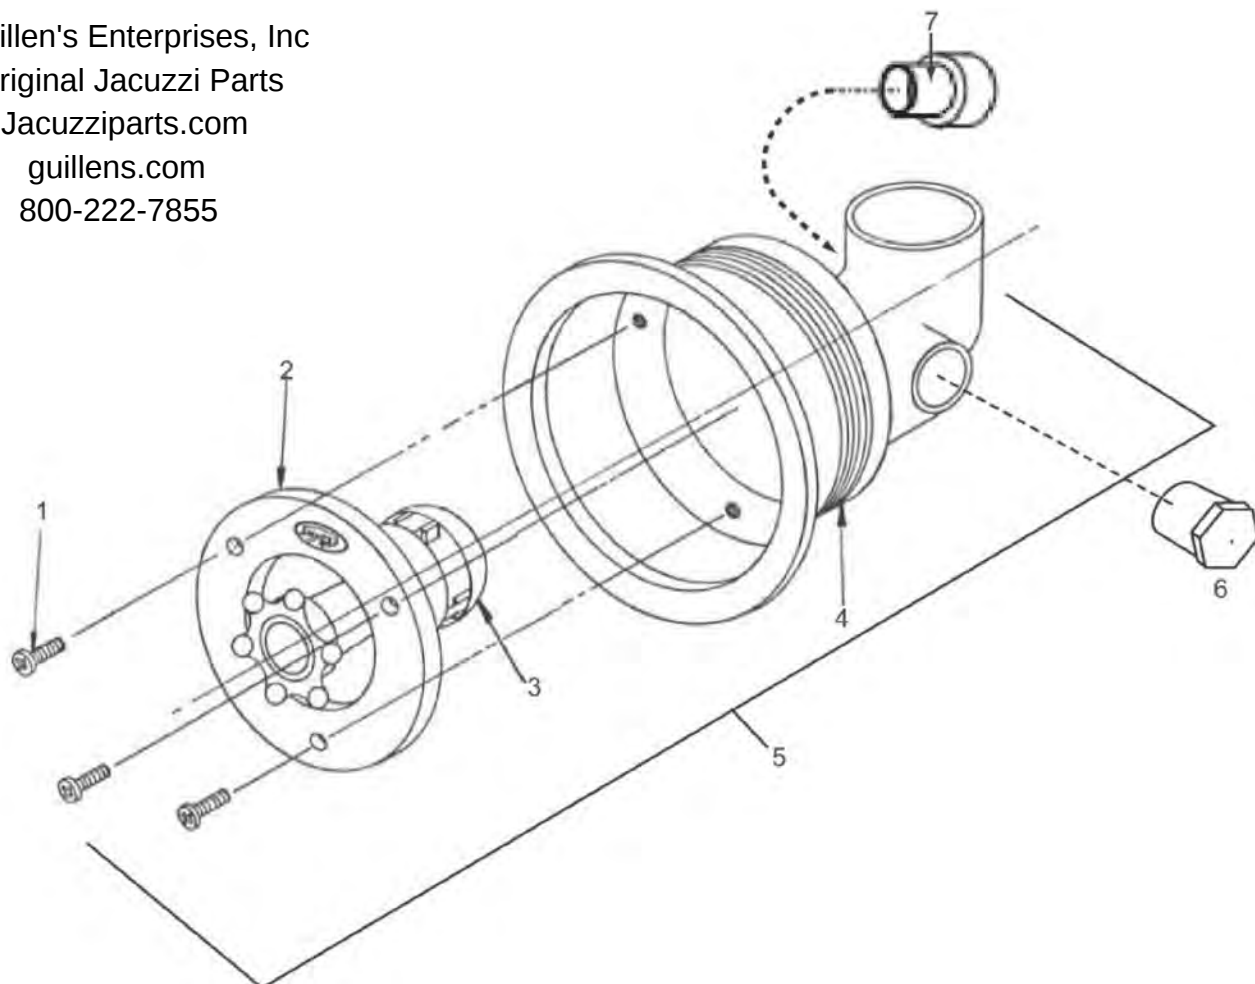

*XXX = Color Options: 914 = Almond, 917 = Black, 940 = White, 969 = Oyster

Note:

1: To replace the Swivel Assembly and Venturi Handle (Items A-C Above): Remove 3 screws securing clamping ring and gasket from jet body. Pull swivel ring B (See Detail) away from swivel to expose retaining screw A. Remove screw A from swivel. Turn venturi C counterclockwise until it is unscrewed and free from the swivel. Install new swivel assembly, securing it with clamping ring, gasket and 3 screws. Screws are properly tightened when the swivel assembly can still be manually moved from side to side, but are tight enough to allow the Venturi handle to be turned to adjust water without turning the swivel. To install handle, align the two portions of the swivel assembly with the notches on the handle and snap it on. When installed, the handle is permanently in place. Any attempt to remove the handle will damage the snap-on feature of the handle.

GW92000

120V Ozone J-Box
(High Speed)
Replaces Older EK53000 J-Box (Page 68)

GW92000 Tech Wiring Note:

The GW92000 J-Box is a modified version of the EK53000 J-Box (page 68). The purpose is to change ozone operation from low speed pump to high speed pump. To configure: Connect 2 RED wires together and 3 BLACK wires together in EK53000 J-Box as shown above. Then change J-Box door label to GW92000 after testing for proper Ozone operation.
