

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated

Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Energy Management Systems (EMS), which are a computerized system, part of or integrated with the Building Automation System which controls portions of the Integrated Microprocessor-Controlled HVAC Equipment.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Installed], Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these
4. Integrated BAS/EMS/Integrate

Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems. 5. Testing . /s/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment;

Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs
its, dishwashers, and water heaters hot water tanks, garbage disposal

3. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are not:
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management S,

hese contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video ken systems, television, cable, T-Line, general broadband, etc.)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controled HAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are aso subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Instledl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Mer
products by the authorized user. 4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
howers, water fountains, water heaters hot water tanks
showers, water fountains, water heaters hot water tanks, garbage disposal units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
Factory Installed/Factory-Provided micro-processor--controlled included/controlled)/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommunications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,
B. Audio-Video equipment or systems (e.g. smart boards, proiectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays, etc.).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following.
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controled HAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are aso subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Inctledl) Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy
products by the authorized user. 4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated plafforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment; Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
howers water fountains water resters include the assembly, installatio
showers, water fountains, water heaters hot water tanks, garbage disposal units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator,
Factory Installed/Factory-Provided micro-processor--controlled included/controlled)/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose IT, Telecommunications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,
B. Audio-Video equipment or systems (e.g. smart boards, proiectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays, etc.).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 10 ocation in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Contsil
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Inctledl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipmont these sy etc.) to communicate
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa

Factory Installed/Factory-Pro handiers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays, etc.).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Contor
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Instledl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209, b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
showers, water fountains, water heaters hot water tanks, garbage disposa
. Wers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
Factory Installed/Factory-Provided micro-processor--controlled included $/$ cer remote $1 / O$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209, b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Inter

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted InAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( HAP ), and/or other similar device, which utilize certain pres (e.g. BACNet, LonTalk, Modbus, platforms/systems.
5. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor-controlled included/(controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Guio Pideo

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fire A etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned ind systems integration, mainten of Integrated Microprocessor-Based HVAC Equipment
he scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device clading, but not limited to, a router, gateway, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemention in shainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms video video conferencing equipment Theatre Screens/Displays, etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Inctled] Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Inctled] Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ntrolled HVAC Equipment using a devicincluding, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs . wers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays, etc.).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Ind Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( platforms/systems.
5. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenacce of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctledl. Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( 1 ), and/or other similar device, which utilize certain pres (e.g. BACNet, LonTalk, Modbus, platforms/systems.
5. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Gudio Video equi,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controiled HAC Equipment in a building or faciinty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegroted Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, reme I/O modules, etc. which are Factory-Morded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra products by the authorized user.
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instalation, systems integration, or maintenace of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs owers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Tecommumicaions, Nerw Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istlledl, Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned dion, systems integration, or mainten

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Moded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Finarm Interface Pan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video equent or systems (e.g. smart boards projectors, studio broadcasting, conference rooms video video conferencing equipment Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mout HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Par other simlar device, which tilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration mainten Inte of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interf etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
cration, mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Inegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panet (M), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, or mainten tice of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio Video ecommicaions, Nerwors or systems (e.g sabing, (e.g. phone, px,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Morded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fi. mm Interface . platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemention Con, systems

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (1), and/or other sim 1 platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommumicaios, Nerwing Cabis,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Mord Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device icluding, but not limited to, a router, gateway, FreAlarm Interface Pane( (IAP), and/or other similar device, which utilize certain. platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or mainterance and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installan, systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, elc. to be purchased from these contracts for any other purposes, including, but not imited to
B. Audio-Video equent or systems (e.g. smart boards projectors, studio broadcasting, conference rooms video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cectv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, platforms/systems.
2. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device including, but not limited to, a route, gatew, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal systems in mainter of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose Iudio-Video equectoms or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device lading, but not limited to, a router, gateway, arm Interface Pan (, and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installaion, systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, el. to be purchased from these contracts for any other paposes, including, but not imited to
A. General Purpose In, Telecomsicatios, Norking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-MIted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Iarm Interface Pane and orther similar device, which uilize ceran platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installaion, systems integration, or maintena e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conrract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, el. to be purchased rom these contracts for any other purposes, including, but not imited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [Istledl. Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ntrolled HVAC Equipment using a device icluding, but not limited to, a router, gateway, FireAlarm Interface Panel (FAP), and/or other similar device, which utilize certain platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controm $/$ I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens $D$ Displays, etc)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Moed HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ntrolled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (h), and/or other similar device, which utilize certa platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens $D$ Displays, etc)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted [InCtled] Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ntrolled HVAC Equipment using a device wuding, but not limited to, a router, gateway, FireAlarm Interface Panel (HAP), and/or other similar device, which utilize certa platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena ce of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controm I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms video video conferencing equipment, Theatre Screens $D$ Displays, etc)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, ec. to be purchased rom these contracts for any other purposes, including, but not imited to
A. General Purpose Iudio-Video elocom (

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (HAP), and/or other simiar device, which platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, mainten in Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Inc Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, A.Alarm Interface Pane ( 1 ), andor other similar device, which uilize certain ion (e.g. BACNe, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from hese contracts for any other purposes, including, but not imited to:

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Inc Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, $\quad$, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned ind systems ingration, or mainten ere Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purposin, Kecomm eas (e smart

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l o c a t i o n ~ i n ~ t h e ~ e v e n t ~ o f ~ a ~ f i r e ~ o r ~ e m e r g e n c y . ~}$

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
Energy Man Microprocesser-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, reme I/Q modules, etc. which are Factory Moled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, $\quad$ Interface Pane ( 1 , and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementionern, systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mor Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenace of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, et. to be purchased rom these contracts for any other purposes, including, but not imited to
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mor Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, , Alarm Interface Pand , an/or other similar device, which tilize cera platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenace of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased rom these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommunicaions,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FiNlarm Interface Pa, andor other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Tecommumicaions, Nersorg Cablig,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Inc Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FAAP), and/or other similar device, which utilize certain platforms/systems.
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal m, systems integration, or mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-MIted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane( 1 , and/or other similar device, which utilize certa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenare of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpss Adio-Video equent or systems ( $e . g$. smart boards projectors, studio broadcasting conference rooms, video vide conferencing equipment, Theatre Screens $D$ Displays, etc)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain pro platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instalation, systems ingration, mainten ef Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Colted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane ( (A), and/or other similar device, which utilize certain platforms/systems.
5. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipmen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& tiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from hese contracts for any other purposes, including, but not imited to:
A. General Purpose I, Telecommicaions, Nersiong Caling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (A), and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howe, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommumicaions, Nerworg Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solety used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FAAlarm Interface Pan ( andor other similar device, which utilize certan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installion, systems ingration, or mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other simiar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemention.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs owers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In, Telecommumicaions, Nerwiong Cal

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
 platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howe, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose in,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istlled], Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Par ather similar device, whic tilize certail platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemenion systems regration, or maintenate of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, $\quad$ Interface ${ }^{\text {en }}$ platforms/systems.
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementio.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommicaions, Nerwis Cabing, hior Optics (e.g. phone, px,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Inegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-MIted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pa (1), and/or other similar device, which utilize certais platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforement.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Energy Mar Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-MIted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemention.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommumicaions, Nerwis Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted Inc Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal 2 , systems ingration, or mainten ere of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommumicaions, Nerw Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gatewas, interface platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor-controlled included/(controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video equir,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gatewar interface platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ef Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose In, Telecommumica.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gatew platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose Iudio-Video eeliecommumicaios, Nors systems (eg. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicat fire or heath and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device icluding, but not limited to, a router, gate platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose Iudio-Video er or systems (e.g. smart boards projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Inegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, reme modules, etc, which are Factory-MIted HVAC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
2. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemeniond ind systems ingration, or mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Finhrm Interface $P$. an other simiar device, which certal platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemeni.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose I, Telecommumicaions, Nerw Cable (e.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fir Al etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, mainten Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor-controlled included/(controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-MIted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC E Euwipent instllation systems integration or maine
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installaion, systems intgration, or mainten ere of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, elc. to be purchased from these contracts for any other purposes, including, but not imited to
A. Aueral Purpose Iideo Telecommicaa.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ntrolled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose In, Telecommunicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs ,
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Audio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens $D$ Displays, etc)

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Moud HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena ee of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommicaions, Nerworking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicat fire or heath and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane ( (APP), and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena ce of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommunications, Networking Cabing, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istlledl. Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, F $\quad$ Interface Pa. platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemeni. mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. Aueral Purpose Io

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HNAC Equipment in a building or faciily. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (andor other similo device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned sion, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio-Video elecommicaion, Nerw

A physical security and facility system includes an emergency telephone system or pbx system expressly and solety used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Nicroprocessor-Controlled HVAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istlled], Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel(1), ador other simiar device, which utilize certain platforms/systems.
5. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal aion, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs . wers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose M, Telecommumications, Ne.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Par ( ather sin dise, which platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the afore.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane(1) , and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemen.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any oner purposes, including, but not imited to
A. General Purpose ${ }^{\text {B. }}$, Telecommio-Video equipment or systems (e.g. smart boards, projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane( 1 , and/or other similiar device, which iize certa, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instal

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mout HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
I. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pa. ar or platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemeni.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, 1 m Interface Par other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video

A physical security and faciitity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s) 'location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, H. m Interface Pa3 ( 1 ), andor other similar device, which ilize certa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjuncion with the contractor providing the aforemention

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Nicroprocessor-Controlled HAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
Energy Mana Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (\%), and/or other similar device, which utilize certainer platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemenio. n, systems integration, ormaintenare of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. Audio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pas other sin device, whic platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
mainten Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Moded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, mainten te of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio-Video

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, $m$ Interface ${ }^{\text {P }}$, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ef Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose I, Telecommumicaion, Ners

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (MAP), and/or other simlar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instalation, systems integration, or maintenace of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. General Purpose I, Yeceommumicaions,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mout HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integr.
products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Tecommumicaion, Nerworg Caing, (e.g. phone, px, a.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
B. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain pocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istlledl, Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane ( platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenane of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose I, Telecommumicaions,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( NAP ), and/or other simlar device, which utilize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemeni.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FiAarm Interface Pane( (I), and/or other similar device, which utilize certain pr platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemention systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Inegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Moded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a devic wang, but not limited to, a router, gaten arm Interface Pa, and or similar device, which uilize certa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installaion, systems integration, or mainten efe of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommunicaions,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, $\quad$ Interface $\quad$, ather similar device, whize certain platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ration, of mainten Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' 'ocation in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installan, systems integration, or mainten e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose Iudio-Video elecommicaios, Nerw

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireA arm Interface Paid (IAhor other simlar device, which iilize certan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemen.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In, (e.g. phone, px,

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device including, but not limited to, a router, gateway, interface platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or faciity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, interface Pand andor other similar device, which utilize certan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. Audio-Video Purs .

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device ceng, but not limited to, a router, gateway, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintena

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased rom these contracts for any other puppses, including, but not imited to
B. Audio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solety to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose Iudio-Video elecommica.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l o c a t i o n ~ i n ~ t h e ~ e v e n t ~ o f ~ a ~ f i r e ~ o r ~ e m e r g e n c y . ~}$

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Inergy Mas Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Colled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
2. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to a router, gateway Fit etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementionedidion, systems ingration, or mainten of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose In,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, 1 Interface $P$, andor other similar device, which utiize certa platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose Iudio-Video erwent or systems (e.g. smart boards projectors, studio broadcasting, conference reoms video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely us
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel ( 1 , and/or other similar device, whichilize certan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' 'location in the event of a fire or emergency.

The scope of this contract includes the following：
1．Building Automation System（BAS）which is a computerized system，operating on certain communications protocols（e．g．BACNet，LonTalk，Modbus，etc．）which manages，controls，and is integrated with the Integrated Microprocessor－Controlled HVAC Equipment in a building or facility．Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems．
． Provided Microprocessor－Controlled，requiring technical skill to program，integrate，and products by the authorized user．
．Integrated BAS／EMS／Integrated Microprocessor－Controlled HVAC Equipment shall means that the fire alarm system，cetv system，or access control system is integrated to the BAS／EMS／Integrated Microprocessor Controlled HVAC Equipment using a devicher but not limited to，a route，gate platforms／systems．
．Testing and Balancing of HVAC Systems shall be when an independent vendor，which：
a）Is certified by either the Associated Air Balance Council Bureau－AABC，Los Angeles，Cal． 90026 or by National Environmental Balancing Bureau－NEBB，Arlington，Va． 22209 ，
b）Is an approved subcontractor to a contractor providing Integrated Microprocessor－Controlled HVAC Equipment installation，systems integration，or maintenance：and
b）Is an approved subcontractor to a contractor providing Integrated Microprocessor－Controlled HVAC Equipment，installation，systems integration，or maintenance；and
c）As part of the and in conjunction with the contractor providing the aforementioned 11 ，systems ingration，or mainten ef Integrated Microprocessor－Based HVAC Equipment

The scope of this contract does not include：
1．Plumbing systems This contract does not include the assembly，installation and repair of pipes，fittings，and fixtures of sewer／waste，water，and drainage systems and plumbing fixtures，such as sinks，commodes，bathtubs， howers，water fountains，water heaters hot water tanks，garbage disposa
units，dishwashers，and water softeners．The repair and maintenance of plumbing by replacing washers in leaky faucets，mending burst pipes，and opening clogged drains is not allowed．
A．Factory Installed／Factory－Provided micro－processor－－controlled included／controlled），or
B．Which are not integrated with the Building Automation Systems or Energy Management Systems，
Cable（coaxial \＆fiber optic），wire，conduit，steel boxes，hangers，etc．must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts． The contract does not allow for cable（coaxial \＆fiber optic），wire，conduit，steel boxes，hangers，etc．to be purchased from these contracts for any other purposes，including，but not limited to：
A．Audio－Video Purs In，Telecommicaions，Nerworkig Cals，
A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used：
A．To communicate fire or health and safety emergencies directly and solely to law enforcement organizations，or
B．To identify an individual（s）＇location in the event of a fire or emergency．

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor ontrolled HVAC Equipment using a device including, but not limited to, a router, gateway, interface platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
e) As part of the and in conjunction with the contractor providing the aforementioned distalicn, systems ingration, or mainten ef Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely use
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instalkion, systems ingraion, or mainten ere of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howe, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommicaions, Nerwing Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installaicn, systems integration, or mainten ere of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, elc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose In, Telecommumicaions, Neworking Cabing, hideo equer op (e.g. phone, prs,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicat fire or heath and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device Lding, but not limited to, a route, gate platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned install 10 , systems integration, or mainten

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber opic), wire, conduit, steel boxes, hangers, et. to be purchased from these contracts for any other puposes, including, but not imited to
A. General Purpose In, Telecommumicaions, Nerworking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicat fire or heath and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Morled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gatewa, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned instalkion, systems intgration, or mainten ere of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs .
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The conract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to:
A. General Purpose .

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Molled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain pres platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforemec ind systems integration, or mainten of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. General Purpssid, (e.g. phone, pis,

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, ha larm Interface Pan (ry), andor other similar device, which utilize certan platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance; and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned distal aion, systems integration, or maintenasce of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpos A, Kecommicaios, Ne.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Energy Mas Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Controlled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
2. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to a router, gateway, Fi etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
B. Audio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely
B. To identify an individual(s)' $\mathbf{l}$ location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are aso subcategories of Building Automation Systems.
. Interrat Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote IO modules, etc. which are Factory-Miled HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy Ster to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (MA), andor other similar device, which uilize certain in (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenace of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to:
A. General Purpose ${ }^{\text {B. }}$ Audio-Video equent or systems (e.g. smart boards projectors, studio broadcasting, conference rooms, video video conferencing equipment, Theatre Screens/Displays etc).

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used;
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (MAP), and/or other similar device, which utilize certain prococls (e.g. BACNet, LonTalk, Modbus, platforms/systems.
. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment installation, systems integration, or maintenance: and
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
2. Chillers, Rooftop Units, boilers, air handers, fan coil, unit wentilator, heat pump, remote I/O modules, etc. which are not
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Audio-Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
4. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ration, intenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integr
products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
4. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ratio inten ef integrated Microprocessor-Based HVAC Equipment Ceans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
wwers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
3. Chillers, Rooftop Units, boilers, air handers, fan coil wit

Factory Installed/Factory-Provided micro-processor--controlled includedp, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energ/controlled), or

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
he contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
General Purpose I, Telecommumications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single parm or integrated
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

A of the and in conjunction with the contractor providing the aforemen..

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/coremote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Sys

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocesor-Controled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, intenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
期

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
2. Itegrated Microprocessor-Controlled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote עO modules, etc. which are Factory-Mours Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
.

A physical security and faciity system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Nicroprocessor-Controlled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
2. It arrated Microprocessor-Controlled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Haders, fan coil, unit ventilator, heat pump remote I/O modules, etc. which are Factory-Mouted IV Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
products by the authorized user.
products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocesso Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Nicroprocessor-Controlled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
2. It arrated Microprocessor-Controlled HVAC Equipment such Chillers, Rooftop Units, Boilers, Air Haders, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IVC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
3. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
4. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
atio

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
㲘

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To commumicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
2. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
e of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I,, Telecommumications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Hicroprocessor-Controlled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
2. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
3. Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
gration, intenance of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other simlar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus,

Testing and Balan
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Upon request of the contracting agency or their representative, this line
item will oot be invoiced unless there is a field alteration deemed necessary changes ane to be be priced from this statie contract at or or below the "not to exceed" NYS Net Pricing/Total Hourly Rate" and must be approved by the owner. Any unused funds will not be billed. Field alteration requests are to be documented and provided at time of invoicing. Any field alteration
amount exceeding this will require additional approval and funding by the
owner and another price quote from Trane. This line item cannot be used
when Trane/its subcontractors provide all design services (professional
architectural/engineering including, but not limited
preparing/certitying/stamping of plans and specifications, code compliance,

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controled HVAC Equipment in a building or faciiity. Buiding Management Systems and Bur Aing Contron Systems are also subcategories of Buiding Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctedl Factory
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipmen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Genim Purpsse 1 , Telecommumications, Networking Cabing, Hber Opics (e.g. phone, pbx, digital centrex, digital key systems, television, cabre, Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated

3. Integrated Microprocessor-Controlled HVAC Eq思

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
cration, , Ininte Int Integrated Microprocesor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpse 1 , Telecommumicaions, Networking Cabing, Hber Opics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, -Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated

 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
inte Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpsse 1 , Telecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated hicroprocessor-Controled HAC Equipment in a builing or faciry. Builng Management Systems and Buidng Contro Sytems ace alo subcategories of Buiding Automation Systems.

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy the to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipmen
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

1. Plumberg thys contract does not include:
howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rork, Piping, etc. shall not be obtained on these contracts.

Factory Installed/Factory-Provided micro-processor--controlled included $/$. remote I/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated croprocessor-Controled HVAC Equipment in a building or faciity. Building Management Systems and Builing Control Sys are also subcategories of Buil ding Automation Systems
3. Integrated Microprocesor-Controled HVAC Eqionerized system,

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ainte Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/cores
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpss I, Telecommumicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated hicroprocessor-Controled HAC Equipment in a billing or faciry. Builng Management Systems and Bilung Conro Systems ace alo subcategories of Builing Automation Systems.

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ration,

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Genim Purse 1 , Telecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controled HVAC Equipment using a device including, but not limited to a ret Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

It Interat Microprot -Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Genen Purpe

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated hicroprocessor-Controled HVAC Equipment in a building or faciiity. Building Management Systems and Builing Control Sytems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlld HVAC Eqjes

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy Ster to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to, a reter Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
inte

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Gend ind

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility, Building Management Systems and Buiding Control Systems are also subcategories of Building Automation Systems iicroprocessor-Controled HVAC Equipment in a building or facility. Building Management Systems and Building Controf Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctledl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fire Alarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpors, Telecommumicaions, Networking Cabling, hier optics (e.g. phone, pbx, digitar centrex, digital key systems, television, cable, A-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated hicroprocessor-Controled HVAC Equipment in a building or faciiity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctledl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpor, Telecommumicaions, Networking Cabing, Hber Opics (e.g. phone, pbx, digital centrex, digital key systems, television, cabie, Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or faciiity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted [Istalledl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Management System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Micropressor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purps, Telecommumicaions, Networking Cabing, Hber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cabie, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted IInC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and $\quad$ commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controd
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IIstedl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocls (eg. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and of Itegrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ \mathbf{O}$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommunications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility, Building Management Systems and Buiding Control Systems are also subcategories of Building Automation Systems hicroprocessor-Controled HVAC Equipment in a building or faciiity. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpent sues Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted Inctedl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
tegration, mainten of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated

3. Integrated Microprocessor-Controlled HVAC Equipment shas Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mourted Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor-controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Gudio Video

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted [Istalledl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility, Building Management Systems and Buiding Control Systems are also subcategories of Building Automation Systems icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctedl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utize certain procols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Gu. Pupore 1elecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility, Building Management Systems and Buiding Control Systems are also subcategories of Building Automation Systems icroprocessor-Controled HVAC Equipment in a building or faciilty. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctedl. Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain procols (e.g. BACNet LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1T, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. hicroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Controf Systems are also subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctedl Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Interrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Genera Purps in, Telecommumicaions, Networking Cabling, Hber Opics (e.g. phone, pbx, digital centrex, digital key systems, television, cabie, Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mounted IInC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment; tests and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
Thers. water fountains, water heaters hot water tanks, garbage dispos
showers, water fountains, water heaters hot water tanks, garbage disposal units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
3. Chillers Rooftop Units, boilers, shall not be obtained on these contract

Factory Installed/Factory-Provided micro-processor-controlled included $/$, remote I/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following：
Building Automation System（BAS）which is a computerized system，operating on certain communications protocols（e．g．BACNet，LonTalk，Modbus，etc．）which manages，controls，and is integrated with the Integrated Microprocessor－Controlled HVAC Equipment in a building or facility．Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems．
3．Integrated Microprocessor－Controlled HVAC Equipment such as Chillers，Rooftop Units，Boilers，Air Handlers，fan coil，unit ventilator，heat pump，remote I／O modules，etc．which are Factory－Mouted Inctedl Factory Provided Microprocessor－Controlled，requiring technical skill to program，integrate，and ． commission and which are integr
products by the authorized user．
Integrated BAS／EMS／Integrated Microprocessor－Controlled HVAC Equipment shall means that the fire alarm system，cetv system，or access control system is integrated to the BAS／EMS／Integrated Microprocessor Controlled HVAC Equipment using a device including，but not limited to，a router，gateway，FireAlarm Interface Panel（FIAP），and／or other similar device，which utize certain procols（eg．BACNet，LonTalk，Modbus， etc．）to communicate among these systems，and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms／systems．
a）Is certified by either the Associated Air Balance Council Bureau－AABC，Los Angeles，Cal． 90026 or by National Environmental Balancing Bureau－NEBB，Arlington，Va． 22209 ， b）Is an approved subcontractor to a contractor providing Integrated Microprocessor－Controlled HVAC Equipment，installation，systems integration，or maintenance；and of Integrated Microprocessor－Based HVAC Equipment；

The scope of this contract does not include：
1．Plumbing systems This contract does not include the assembly，installation and repair of pipes，fittings，and fixtures of sewer／waste，water，and drainage systems and plumbing fixtures，such as sinks，commodes，bathtubs， showers，water fountains，water heaters hot water tanks，garbage disposal
units，dishwashers，and water softeners．The repair and maintenance of plumbing by replacing washers in leaky faucets，mending burst pipes，and opening clogged drains is not allowed
3．Chillers，Rooftop Units，boilers，air handlers，fan coil，unit ventilator，he
A．Factory Installed／Factory－Provided micro－processor－－controlled included／controlled），or
B．Which are not integrated with the Building Automation Systems or Energy Management Systems，
Cable（coaxial \＆fiber optic），wire，conduit，steel boxes，hangers，etc．must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts．
The contract does not allow for cable（coaxial \＆fiber optic），wire，conduit，steel boxes，hangers，etc．to be purchased from these contracts for any other purposes，including，but not limited to
．．General Purpose IT，Telecommunications，Networking Cabling，Fiber Optics（e．g．phone，pbx，digital centrex，digital key systems，television，cable，T－Line，general broadband，

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A．To communicate fire or health and safety emergencies directly and solely to law enforcement organizations，or
B．To identify an individual（s）＇location in the event of a fire or emergency．

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mout HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utiize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ff Itegrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtub showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted Inctedl Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Manasem System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 , b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ff Itegrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor-controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
.. General Purpose IT, Telecommunications, Networking Cabing, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlied HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Buiding Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Eq里 Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain proiocos (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Gueral Purps in, Telecommicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Controled
. Inegrated Microprocessor-Controlled HVAC Eupment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (FAP), and/or other similar device, which utilize certain proochs (e.g. BACNe, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Generat Puros

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and

 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (FIAP), and/or other similar device, which utiiize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ O$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose 1 , Telecommicaions, Networking Cabing, hber optics (e.g. phone, pox, digial centrex, digital key systems, television, cable, , -Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to low enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Contro Systems are also subcategries of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Eqipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded INC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (HAP), and/or other similar device, which utiiize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controle I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Furpose 1 , Telecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled HAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcategries of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Eqioment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (MAP), and/or other similiar device, which utiize certain proiocis (e.g. BANet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/conternote /O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose IN, Telecommunicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FreAlaminerface Pane (hap), and/or other similiar device, which utiize certain proiocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ \mathbf{O}$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose 1 , Yelecomminicaions, Networking Cabing, A.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Contronled HAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcatgories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted IVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FreAlaminterface Pane (hap), and/or other similiar device, which utilize certain proiocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IN, Telecommunicaions, Networking Cabng,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Control Systems are also subcacegories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IVC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane ( AAP ), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ \mathbf{O}$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
he contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose 1 , Telecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlied HVAC Equipment in a building or faciiity. Building Management Systems and Building Contro Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equent such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Moudted InC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user. Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose 1 , Yelecommicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled
Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment.
 commission and which are integra
Troducts by the authorized user. Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
he contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose IN, Telecommunicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controlled HAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcatgories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment.
 commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Yelecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controlled HAC Equipment in a building or faciility. Building Management Systems and Building Control Systems are also subcatgories of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipme c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/conterote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. General Purpose I, Telecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. Hicroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Equipunt such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and $\quad$ Manage System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpose 1 , Telecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded IV Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (HAP), and/or other similiar device, which utiize certain proiocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purposen, Telecommumicaions, Networkng Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlied HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Eqionst such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FreAlan platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/contrond
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Equen
 commission and which are integra
Trodects by the authorized user. Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
Factory Installed/Factory-Provided micro-processor-controled ineat pump, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Yelecommications, Networking Cabing, for

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controled
. Inegrated Microprocessor-Controlled HVAC Eud Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FreAlary interface Pane (HAP), and/or other sisur device, which uize certain profochs (e.g. BAC Ne, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to a router gatewa. FireAlarm Interface Panel (FIAP), andor other Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpse 1 , Telecommicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated

3. Integrated Microprocessor-Controlled HVAC Equpent such Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to a ret Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

It Itegrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/contr
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpsse 1 , Telecommicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Bir Aug Conio Systems are a,
3. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted IVAC Equipment.

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controlle $/$ / $O$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Telecomminicaions, Networking Cabing, hber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Eroprocessor-Controled
. Integrated Microprocessor-Controlled HVAC Equinent sch as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mont HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integra
products by the authorized user.
4. Integrated BAS/ESS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipme c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
Factory Installed/Factory-Provided micro-processor-centiator, heat pump, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated croprocessor-Controiled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Espmperized Sy Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (FIAP), and/or other similar device, which utiize certain protocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) II certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated icroprocessor-Controled HAC Equipment in a building or faciiity. Buidng Management Systems and Bur Aug Contor Systems are abo subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpens as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipmen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpse

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (hap), and/or other similar device, which utiiize certain proochs (e.e. BACNe, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, CaI. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpse I, Telecommicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Contro Systems are also subcategries of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Eule Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controle $/$ /O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Furpose , Telecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled HAC Equipment in a building or faciinty. Building Management Systems and Bir Aug Contro Systems are also subcategories of Building Automation Systems.

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy the to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlary interface Pane (FAP), and/or other similar device, which utiiize certain proochs (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/$ /O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpsse 1 , Telecommications, Networking Cabing, hber optics (e.g. phone, phx, digial centrex, digital key systems, television, cable, 1 -Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded IVC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fire Alarm Interface Panel etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/conterote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Yelecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Eqipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Mouted HVAC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, HeAlary interface Pane (HAP), and/or other similiar device, which utiize certain proiocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Generat Purpse I, Tecommunicaions, Neworking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Control Systems are also subcacegories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded INC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (hap), and/or other similar device, which utiiize certain proochs (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. Generai Purpose 1 , Telecommicaions, Networking Cabing, fier optics (e.g. phone, pox, digial centrex, digital key systems, television, cable, A-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded INC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integra

- Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, Fire Alarm Interface Pane etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Yelecomminicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlied HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipentsch as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integr
products by the authorized user.
4. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain prods (egAC Bet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommumications, Networking Cabling, Fber Optics (e.g. phone, pbx, digial centrex, digital key systems, television, cabe, 1-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled HVAC Equipment in a boidng or faciinty. Builing Management Systems and
3. Itegrated Microprecsor-Controled HVAC Equ
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicat.
platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs Showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, condwit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Contro Systems are also subcategoines of Building Automation Systems.
2. Integrated Microprocessor-Controlled HVAC Eqipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IVC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Yelecomminications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. . BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and Building Contro Systems are also subcategries of Building Automation Systems.
. Integrated Microprocessor-Controlled HVAC Eqpuent such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IVC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane ( AAP ), and/or other similar device, which uiiize certain proochs (e.g. BACNe, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/contemote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems. icroprocessor-Controlied HVAC Equipment in a building or faciinty. Building Management Systems and Buiding Contron Systems are aso subcategories of Building Automation Systems
3. Integrated Microprocessor-Controlled HVAC Equpents Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted IVAC Equipment.

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utiiize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

It Itegrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controt
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To comunicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hicroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Equput such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted HVAC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlam Interface Pane (hap), and/or other similiar device, which uilize certain profocis (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ \mathbf{O}$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpore 1, Telecommications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Ecroprocessor-Controncd
. Integrated Microprocessor-Controlled HVAC Equipent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc, which are Factory-Monted HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integra

- products by the authorized Iser. Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pand etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controd
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
he contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Purpse I, Kecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated

3. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, mong these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authoriz

Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ff Itegrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purse A, Telecommicaions, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated Hroprocessor-Controled HVAC Equipment in a building or faciinty. Building Management Systems and Bir Aug Contro Systems are a,

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/cont
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose T , Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Eqionent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
 platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipmen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommincations, Networkng Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Controncd

 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similiar device, which utiize certain proiocos (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte $/$ /O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Telecommications, Networking Cabling,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Itegrated Microprocessor-Controlled HVAC Eqipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted HVAC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (HAP), and/or other similar device, which uilize certain profochs (e.g. BACNe, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/contemote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts. The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. Gurio

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated Hcroprocessor-Controled
3. Integrated Microprocessor-Controled HVAC Eqionet sued Syster,

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy Stem to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
ff Integrated Microprocessor-Based HVAC Equipment;

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/coreme $/ / O$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxia \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Gudi-Vide

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
. Itegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mouted IVAC Equipment.
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FrAlary platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/controte I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (cooxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Furpose 1 , Telecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Ecroprocessor-Controled
Enegrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded INC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integra
Troducts by the authorized Iser. Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor-controlled includedce, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited to
A. Genera Purpose 1 , Telecommumications, Networking Cabing, ,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocesso-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controled HVAC Equipment using a device including, but not limited to a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain prels (e \& BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
a) Is certified by either the Associated Air Balance Councii Bureau- AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arrington,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenacce of Integrated Microprocessor-Based HVAC Equipment;

Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
water fountains, water heaters hot water tanss, garbage disposa
showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. General Ductwork, Piping, etc. shall not be obtained on these contracts.
3. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are not:
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited the
B. General Purpse I, Tecommumicais, Nerworg (e.g. phone, px, a.

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)'
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
a) Is certified by either the Associated Air Balance Councii Bureau- AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arrington,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
) As part of the and in conjunction with the contractor providing the aforementioned installion, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment;
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
wers,
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
3. Chillers, Rooftop, Units, boilers, air handerstained on these contracts.

Factory Installed/Factory-Provided micro-processor--controlled includemp, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommumications, Networking Caing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)'
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Mond Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
a) Is certified by either the Associated Air Balance Councii Bureau- AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arrington,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenacce of Integrated Microprocessor-Based HVAC Equipment;
Cleans, tests, and blances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
owers, water fountains, water heaters include the assembly, installation
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
Chillers, Rooftop, Pipiting, etc. shall not be obtained on these contracts.
Factory Installed/Factory-Provided microf fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommumication,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monded HVAC Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FILP), and/or other similar device, which utilize certain prit etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
a) Is certified by either the Associated Air Balance Councii Bureau- AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arrington,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment;
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
ers, water fountains, water does not include the assembly, installation
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
3. Chillers, Rooftop Units, boilers, air handlers, fan coil, these contracts.

Factory Installed/Factory-Provided micro-processor--controlled includemp, remote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
B. General Purpse I, Telecommumicaios, Neworkig Caing, (e.g. phone, px, dige sex, a

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:

1. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated . croprocessor-Controiled HVAC Equipment in a building or faciinty. Building Management Systems and
2. Integrated Microprocessor-Controlled HVAC Equment such Chillers, Rooftop Units, Boilers, Air Handers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory - Mouded IV Equipment. Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , Sy Ster to allow the Building Automation System or Energy Management System to monitor the performance of these commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FeAlary interface Pane (hap), and/or other similar device, which inize certain proochs (e.e. BANet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/contremote I/O modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Telecommumications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Controled
. Inerg M Micro
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor
 platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/contemote $/ O$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose I, Telecommumications, Networking Cabing, Hber Optics (e.g. phone, pox, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Control

 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
. Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated
Microprocessor-Controlled HVAC Equipment in a building or facility, Building Management Systems and Buidding Control Systems are also subcategories of Building Automation Systems. icroprocessor-Controlied HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems,
3. Itegrated Microprocessons-Conded HVAC Equiputerized syster, Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipmen

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpse 1 , Telecommumicaions, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equpent such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory
 commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FreAlam Interface Pane (MAP), and/or other similar device, which uilize certain proiochs (e.g. BAC Ne, Lonfal, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

Integrated Microprocessor-Based HVAC Equipment

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs howers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he
. Factory Installed/Factory-Provided micro-processor--controlled included/controte $/ \mathbf{O}$ modules, etc. which are not:
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steet boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Telecommumications, Networking Cabing, fier optics (e.g. phone, pbx, digial centrex, digital key systems, television, cable, -Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to low enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and in integrated with the Integrated

3. Integrated Microprocessor-Controlled HVAC Eqje Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integr
products by the authorized user.
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
of Integrated Microprocessor-Based HVAC Equipment,

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/contr
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose 1 , Telecommicaions, Networking Cabing, Hber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cabs, -Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to low enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated

. Energy Managed Microsstems (EMS, ,
Provided Microprocessor-Controlled, requiring technical skill to progra, integrate, and
commission and which are integrated with the BuildingAutomation Systems or Energy Management System to allow the Building Automation System or Energy Management System to monitor the performance of these products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain proticoss (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipme c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provide micro-processor--controlled included $/$, remote $/ / O$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Gend Firpose 1 , Telecommanicaions, Networkng

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Eroprocessor-Contronled HAC Equipment in a building or faciilty. Building Management Systems aid
.
Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Pane (MAP), and/or other similar device, which iize certain procos (e.g. BACNe, Lo ak, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and ${ }^{\text {c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment; }}$ Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs, showers, water fountains, water heaters hot water tanks, garbage disposal
2. Chillers Roottop Units, boilers, air hadlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled include pump, remote $I / O$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. Genal Purpsi, Telecommunications, Networking Caing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Ecroprocessor-Contronled HAC Equipment in a building or facility. Building Management Systems and Builing Conr Sys,
Energy Man Microprocessor-Consolled HVAC Equm
Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FAP), and/or other similar device, which izize certain procos (e.g. BACNe, Lon/ak, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provid micro-processor--controlled included $/$, remote I/O modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Furpose T, Telecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used.
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Ecroprocessor-Controlled HAC Equpment in a building or faciity. Builing Management Systems and Builing Control Sy
.
Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and . commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipme Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included $/$, remote $I / O$ modules, etc. which are not
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommunications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communcate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated icroprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Buiding Control Sys ane aso subcategories of Building Automation Systems
3. Itegrated Microprocessor-Consoled HVAC

Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other similar device, which utilize certain protocols (e.g. BACNet, LonTalk, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipment, c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:

1. Plumbing systems This contract does not include the assembly, installation and repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs Showers, water fountains, water heaters hot water tanks, garbage disposa
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/conter
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
The contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not limited to
A. General Purpose IT, Telecommumications, Networking Cabling, Fiber Optics (e.g. phone, pbx, digital centrex, digital key systems, television, cable, T-Line, general broadband,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used:
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following
Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Hcroprocessor-Contronted HAC Equipment in a building or faciilty. Building Management Systems and Builang Coriro Sy,
.
Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integrated with the BuildingAutomation Systems or Energy Ma products by the authorized user.
Integrated BAS/EMS/IItegrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cctv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (MAP), and/or other similar device, which iize certain procos (e.g. BACNe, Lontak, Modbus, platforms/systems.
Testing and Balancing of HVAC Systems shall be when an independent vendor, which:
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and
c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenance of Integrated Microprocessor-Based HVAC Equipme c) As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or mainten
Cleans, tests, and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.

The scope of this contract does not include:
.
wers, water fountains, water heaters hot water tanks, garbage disposal repair of pipes, fittings, and fixtures of sewer/waste, water, and drainage systems and plumbing fixtures, such as sinks, commodes, bathtubs,
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
3. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, he

Factory Installed/Factory-Provided micro-processor--controlled included/con
B. Which are not integrated with the Building Automation Systems or Energy Management Systems,

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
he contract does not allow for cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. to be purchased from these contracts for any other purposes, including, but not imited
A. General Furpose 1 , Telecommunications, Networking Cabing,

A physical security and facility system includes an emergency telephone system or pbx system expressly and solely used
A. To communicate fire or health and safety emergencies directly and solely to law enforcement organizations, or
B. To identify an individual(s)' location in the event of a fire or emergency.

The scope of this contract includes the following:
. Building Automation System (BAS) which is a computerized system, operating on certain communications protocols (e.g. BACNet, LonTalk, Modbus, etc.) which manages, controls, and is integrated with the Integrated Microprocessor-Controlled HVAC Equipment in a building or facility. Building Management Systems and Building Control Systems are also subcategories of Building Automation Systems.
3. Integrated Microprocessor-Controlled HVAC Equipment such as Chillers, Rooftop Units, Boilers, Air Handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are Factory-Monted Provided Microprocessor-Controlled, requiring technical skill to program, integrate, and , commission and which are integr
products by the authorized user.
Integrated BAS/EMS/Integrated Microprocessor-Controlled HVAC Equipment shall means that the fire alarm system, cetv system, or access control system is integrated to the BAS/EMS/Integrated Microprocessor Controlled HVAC Equipment using a device including, but not limited to, a router, gateway, FireAlarm Interface Panel (FIAP), and/or other sid etc.) to communicate among these systems, and where the Building Automation System or fire alarm system allows for monitoring of all of these systems by the authorized user via a single platform or integrated
platforms/systems.
a) Is certified by either the Associated Air Balance Council Bureau - AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Arlington, Va. 22209 ,
a) Is certified by either the Associated Air Balance Councii Bureau- AABC, Los Angeles, Cal. 90026 or by National Environmental Balancing Bureau - NEBB, Aringgton,
b) Is an approved subcontractor to a contractor providing Integrated Microprocessor-Controlled HVAC Equipment, installation, systems integration, or maintenance; and

As part of the and in conjunction with the contractor providing the aforementioned installation, systems integration, or maintenate of Integrated Microprocessor-Based HVAC Equipment;
Cleans, tests and balances the Integrated Microprocessor-Controlled HVAC Equipment in accordance with Code Requirements.
The scope of this contract does not include:
thowers, water fountains, water heaters hot water tanss garbage dilation
showers, water fountains, water heaters hot water tanks, garbage disposal
units, dishwashers, and water softeners. The repair and maintenance of plumbing by replacing washers in leaky faucets, mending burst pipes, and opening clogged drains is not allowed.
2. General Ductwork, Piping, etc. shall not be obtained on these contracts.
3. Chillers, Rooftop Units, boilers, air handlers, fan coil, unit ventilator, heat pump, remote I/O modules, etc. which are not:
A. Factory Installed/Factory-Provided micro-processor--controlled included/controlled), or

Cable (coaxial \& fiber optic), wire, conduit, steel boxes, hangers, etc. must only be purchased from these contracts if used in conjunction with the physical security and facility system and solutions being purchased under these contracts.
