Data based on wet coil with entering air at 80 degF DB / 67 degF WB without air filter.

Mechanical Specifications

General

The multi-position coils are designed for cooling and heat pump applications. The coil uses 9/32" and 3/8" seamless aluminum tubing mechanically bonded to aluminum plate fin.

Refrigerant for the 4MXC is controlled with a factory installed piston refrigerant control. Refrigerant connections are brazed fittings.

The coil cabinet has a removable front and interior access panel for evaporator coil entering air surface cleaning.

Since Ingersoll Rand has a policy of continuous product and product data improvement, it reserves the right to change specifications and design without notice.
