SUBDRIVE & MONODRIVE QUICKPAK - FEATURES & APPLICATIONS

The SubDrive and MonoDrive QuickPAK is a popular system-solution package designed to simplify the installation of a constant pressure system. This all-in-one package comes available with an extended warranty for the pump, motor, and drive, and features durable enclosures for added security.

FEATURES

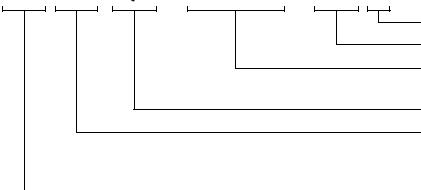

- Motor, pump, and drive all in one package
- Selection based on flow and total dynamic head
- NEMA 3R and NEMA 4 drive enclosures
- Excellent radio frequency interference shielding
- User-defined motor frequency range and underload off-time
- Pressure transducer input with system pressure display (NEMA 3R only excluding SD2W)
- Extended warranty available for QuickPAK components
- Soft-start feature prevents water hammer and increases motor life
- Works with small or large pressure tanks, including an existing tank
- FE Connect mobile app for advanced settings and monitoring (NEMA 3R only, excluding SD2W)
- Built-in diagnostic features and protection from potentially harmful conditions, including surge, underload, undervoltage, locked pump, open circuit, short circuit, overheated controller, and broken pipe
- Flow rates of 7–90 gpm for SubDrive QuickPAK and 5–25 gpm for MonoDrive QuickPAK and 2W QuickPAK
- Single-phase input power, with three-phase motor performance using 1.5–3 hp motors for SubDrive QuickPAK
- Single-phase motor performance using 0.5–2 hp motors for MonoDrive QuickPAK
- Single-phase motor performance using 0.5–1 hp motors for 2W QuickPAK

APPLICATIONS

- | | |
|--------------------------------|------------------------------|
| ■ Residential water systems | ■ Geothermal systems |
| ■ Landscape irrigation systems | ■ Constant pressure boosting |
| ■ Water treatment systems | |

MODEL NOMENCLATURE

XX SD QP - X.XHP - XX C

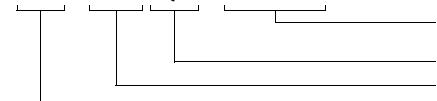

Connect Capability = C
Enclosure = 3R or N4
Motor Horsepower
0.5, 0.75, 1.0, 1.5, 2.0, 3.0 hp
QuickPAK
SD = SubDrive
3W = MonoDrive
2W = 2-Wire
Pump Flow

5, 7, 10, 15, 20, 25, 35, 60, 90 gpm

Example:

90SDQP-3.0HP-3RC = 90 gpm, SubDrive QuickPAK, 3 hp, 3R/N4 Enclosure, Connect Capability

XX - 2W QP - X.XHP

Motor Horsepower
0.5, 0.75, 1.0, hp
QuickPAK
2W = SubDrive 2W
Pump Flow
5, 7, 10, 15, 20, 25, 35, 60, 90 gpm

Example:

5-2WQP-0.5HP = 5gpm, SubDrive 2-Wire QuickPAK, 0.5 hp

NOTE: Running outside of 'Recommended Operating Range' for short periods of time is permissible. Actual maximum performance of the SubDrive QuickPAK system is power limited by the SubDrive unit. This limit is based on the maximum allowable AMP load of the submersible motor. The result is that in some installations an 80 Hz speed may not be attained.

NOTE: Running outside of 'Recommended Operating Range' for short periods of time is permissible. Actual maximum performance of the SubDrive QuickPAK system is power limited by the SubDrive unit. This limit is based on the maximum allowable AMP load of the submersible motor. The result is that in some installations an 80 Hz speed may not be attained.

NOTE: Running outside of 'Recommended Operating Range' for short periods of time is permissible. Actual maximum performance of the SubDrive QuickPAK system is power limited by the SubDrive unit. This limit is based on the maximum allowable AMP load of the submersible motor. The result is that in some installations an 80 Hz speed may not be attained.

INLINE PRESSURE BOOSTING - INLINE 400

FEATURES

- Utilizes proven Franklin Electric pump and motor to create the most trustworthy product on the market
- Simple flow-based controls mean you get the pressure every time you need it
- Protective cap comes standard for outdoor use (for vertical applications only)
- Whisper-quiet operation
- Installs vertically or horizontally
- 1-1/4" NPT inlet and outlet
- 115 V and 230 V models available
- Plug-in electrical cord connected unit
- Protective features: Over/Under voltage protection, dry run, and over temperature
- Product power rating: 1/3 hp, 0.246 kW
- Maximum Water Temperature: 120 °F/49 °C

APPLICATIONS

- City water pressure boosting
- Pressurize water from cistern tank
- Re-pressurizing after filtration
- Irrigation system boosting

ORDERING INFORMATION

Protective Cap

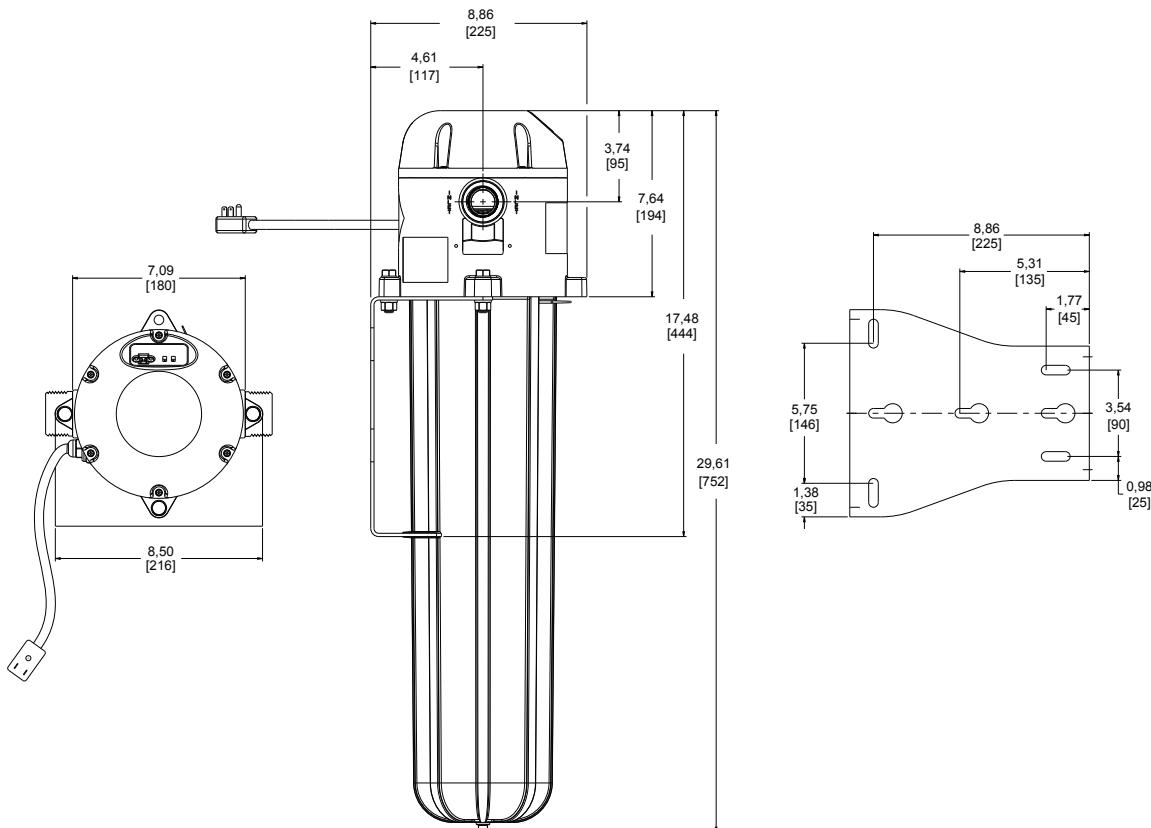

INLINE PRESSURE BOOSTING - INLINE 400

PERFORMANCE

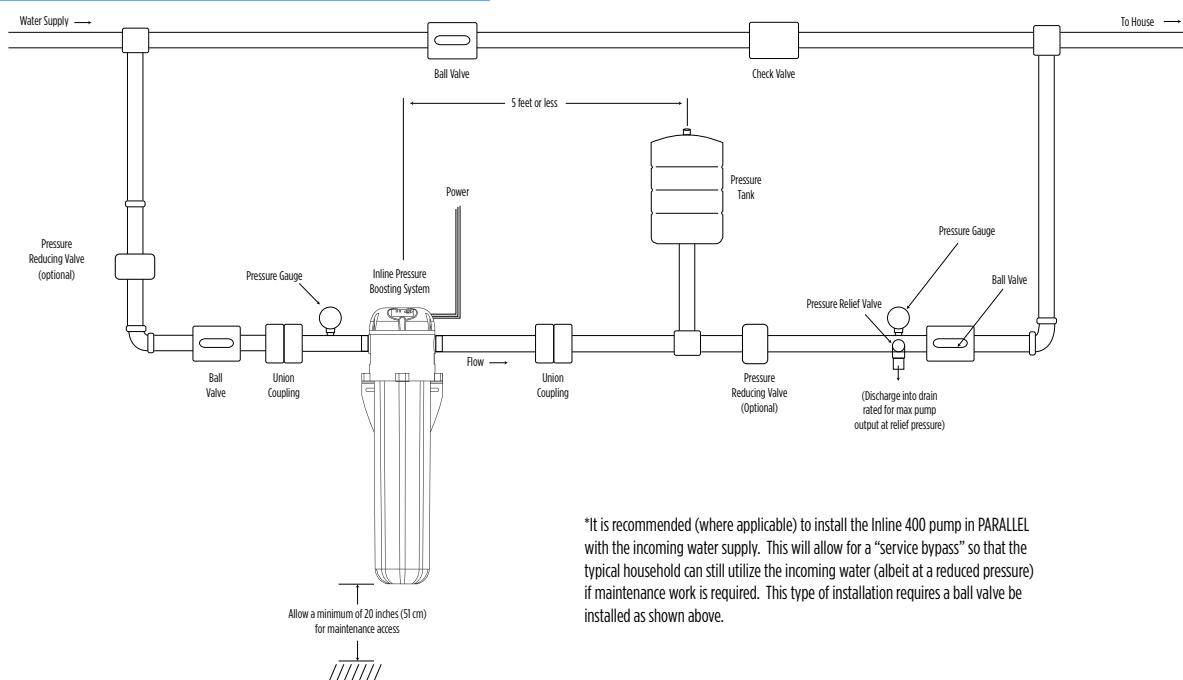

INLINE PRESSURE BOOSTING - INLINE 400

DIMENSIONS

TYPICAL INSTALLATION

*It is recommended (where applicable) to install the Inline 400 pump in PARALLEL with the incoming water supply. This will allow for a "service bypass" so that the typical household can still utilize the incoming water (albeit at a reduced pressure) if maintenance work is required. This type of installation requires a ball valve be installed as shown above.

INLINE CONSTANT PRESSURE - SUBDRIVE INLINE 1100

DESCRIPTION

- The SubDrive Inline 1100 provides constant pressure for both private wells and municipal/city water systems.

FEATURES

- Pump, motor, drive, and pressure switch in one box as a packaged system
- Small and compact design fits into small areas, even between floor joists
- Stainless steel construction for years of operation
- Simple and easy installation with step-by-step illustrated instructions
- Integrated motor design allows water to flow around it for quiet and cool operation
- NEMA 4 (IP56) electronics enclosure
- Multiple mounting configurations allow for the unit to be installed where you need it, whether horizontal, vertical, or even upside down
- Built-in system protections guard the Inline unit from many common failure modes including surge protection, voltage underload, locked pump, open circuit, short circuit, and overheated controller.
- Product power rating: 1.2 hp, 0.9 kW
- Shipping weight: 50 lbs, 22.7 kg

APPLICATIONS

- Boosted and constant water pressure from water storage/cistern systems
- Homes (in both private and municipal applications)
- General pressure boosting
- Sprinkler systems
- Farming and commercial wash down systems

Overpressure Switch & Cable Combo**	305707912		
Thermostat Kit	305707917		
		230	Single
		N/A	N/A

* Includes pump, motor, drive, pressure switch, and all cables.

** Overpressure switch is sold as an accessory and is not required for normal operation.

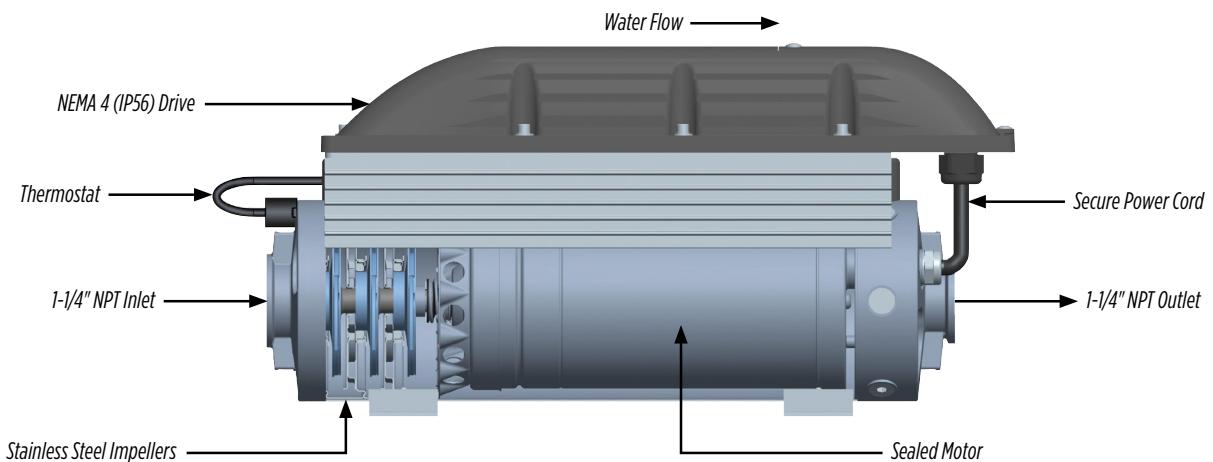

INLINE CONSTANT PRESSURE - SUBDRIVE INLINE 1100

PERFORMANCE

NOTE: Running outside of 'Recommended Operating Range' for short periods of time is permissible.

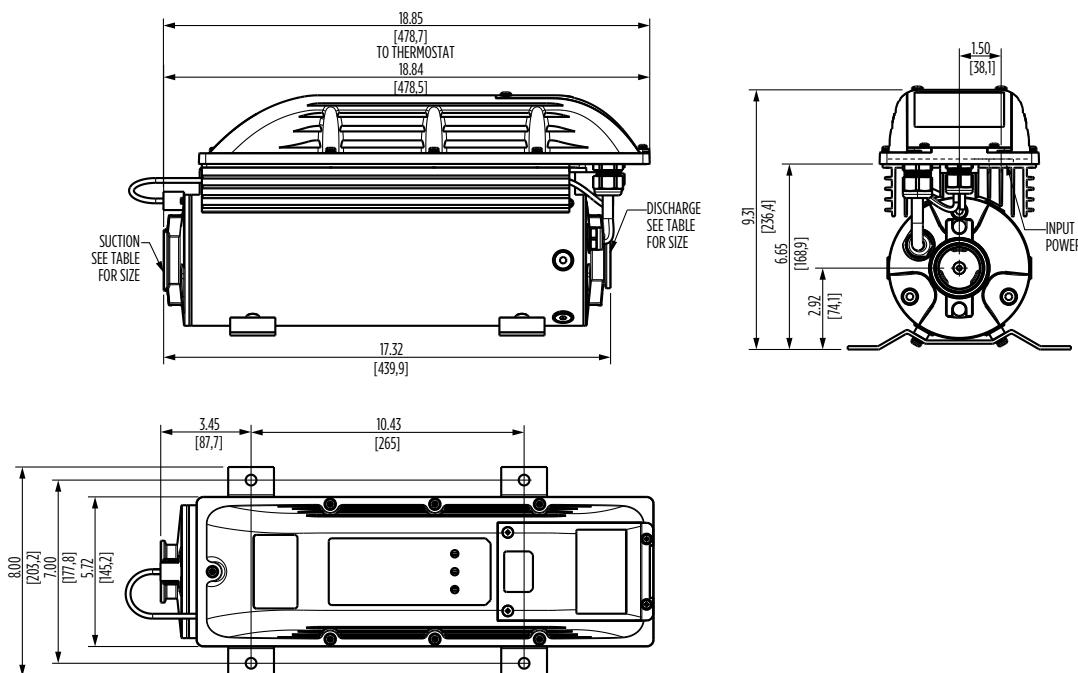

SYSTEM COMPONENTS

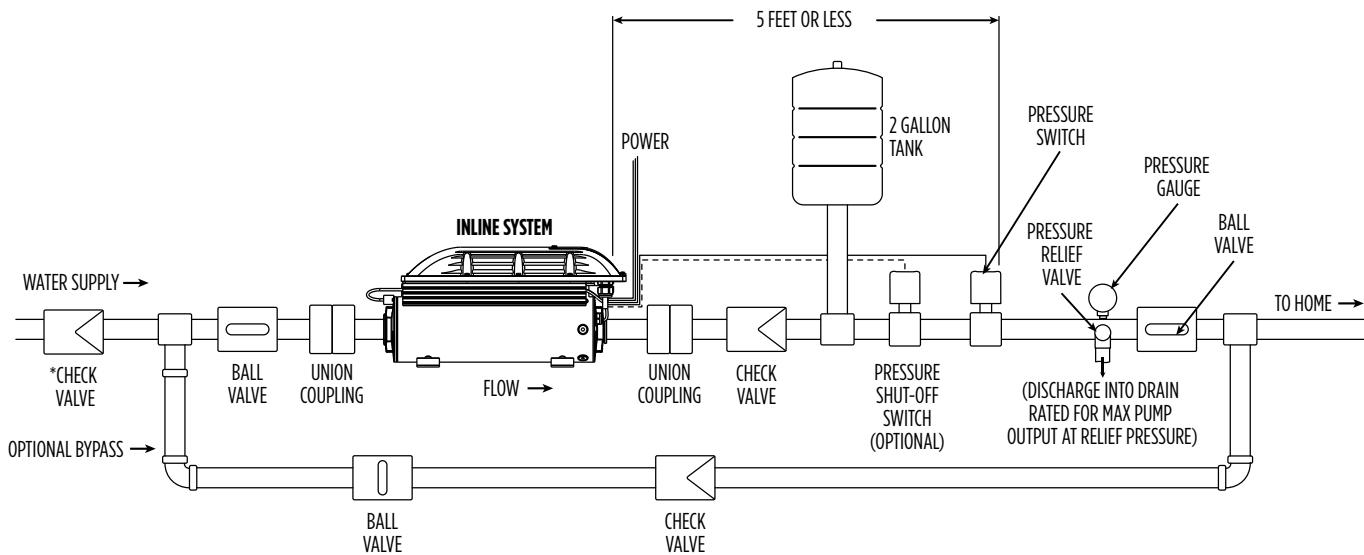

INLINE CONSTANT PRESSURE - SUBDRIVE INLINE 1100

DIMENSIONS

TYPICAL INSTALLATION

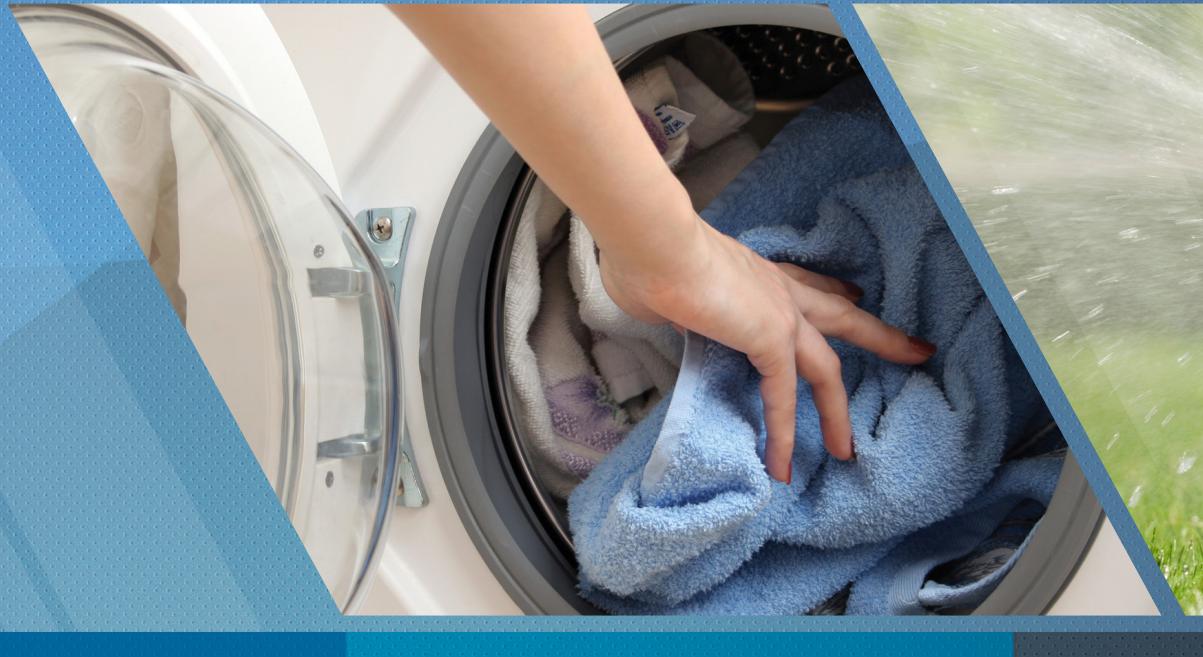

NOTE: These optional components are shown in a typical installation diagram. They should be used at the installer's discretion as required for particular applications.

**When connected to a municipal system, if the plumbing does not have a backflow prevention device, a check valve is required on the incoming water supply line.*

If installed on a cistern, the check valve should be passive or be eliminated.

NOTES

Franklin Electric
