The Stainless Steel Difference

Whether its the modern brushed (US32D) or the elegant polished (US32) look you desire, Deltana stainless steel products are ideal for waterside properties and outdoor use. Deltana stainless steel hinges have excellent corrosion resistance in every component including barrel pins, screws and bearings.

How to Determine the Radius of a Hinge

To determine if you have 1/4" or 5/8" radius corner hinge, measure the beginning of the curve to where the corner of the hinge would be if it were square.

How to Select the Proper Hinge Size

To choose the proper hinge size consider the following:
Door Height, Weight, Width, Thickness, Trim Dimension

Thickness of Door	Width of Door	Height of Hinge
1-3/8" Door	To 32"	3-1/2"
1-3/8" Door	32" to 36"	4"
1-3/4" Door	To 36"	4-1/2"
1-3/4" Door	36" to 48"	5"
1-3/4" Door	Over 48"	6"
2", 2-1/4", 2-1/2" Door	To 42"	5" Commercial
2", 2-1/4", 2-1/2" Door	Over 42"	6" Commercial

Check out Deltana's corner chisel tool in Section 14

Location of Hinge on the Door

Upper hinge 5" from top jamb to top edge of barrel.
Bottom hinge 10" from bottom edge of barrel to finished floor.
Middle centered between top and bottom hinges.

Number of Hinges per Door

As a general, rule you will want to use 1 hinge per every 30" of door or fraction thereof. Referring to door height: Doors up to 60" need 2 hinges. Doors over 60" but not over 90" need 3 hinges. Doors over 90" but not over 120" = 4 hinges.

NRP

Non Removable Pin: This security option provides a perpendicular adjuster that secures the pin inside the barrel making the pin non-removable from the outside.

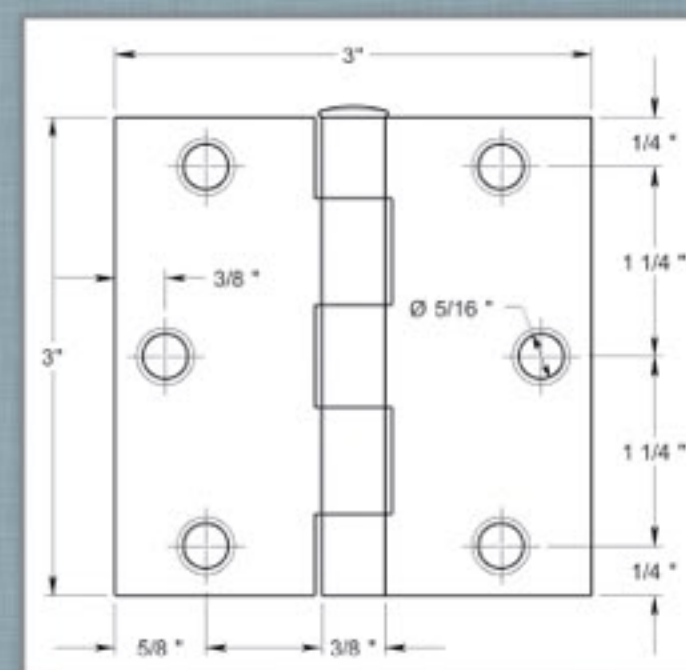

NRP can be added to any steel hinge upon request.
