## TERMS AND WARRANTIES

### WHOLESALE DISCOUNT:

Contact MIFAB® or your local representative for your applicable discount structure.

**FREIGHT ALLOWANCE:** Ex Works, MIFAB's Chicago, Illinois Factory or Manufacturer Representative's warehouse with full motor freight allowed on shipments of \$3,500.00 Net or more, within the continental U.S.A. and Canada, except Alaska, Hawaii and Puerto Rico. MIFAB reserves the right to choose the carrier and route of shipment. Alaska: Ex Works, Seattle, WA. Hawaii: Freight allowed on shipments of \$3,500.00 or more only when shipped from West Coast, U.S. Puerto Rico: Ex Works, Miami, Florida. There is no allowance for United Parcel Service, Federal Express or Shipment by air service. Full motor freight is allowed on shipments of \$3,500.00 Net or more, within the continental U.S.A. and Canada for any combination of BEECO, Counterline, No Hub Coupling, Trench Drain, Access Door and Trap Seal Primer products. Shipping dates are estimates and time of delivery is not the essence of the sale of the contract. Therefore, under no circumstances will MIFAB® have any responsibility on account of any delays in manufacture, transportation, or otherwise. Additional freight services such as construction site delivery, lift gate delivery service, re-consigned freight or notification charges, are not included in full freight allowance terms, and will result in additional freight charges.

**QUOTATION TERMS:** List Price and discount protected for 30 days from date issued by MIFAB®. Orders received within this period must be released for shipment within 30 days from date of purchase order, otherwise, prices will be those that are in effect at the time of shipment.

**PAYMENT TERMS:** Terms of payment are Net 30 days from the date of the invoice. All pricing in United States currency except for sales to Canadian customers which are priced in Canadian dollars. The Buyer shall pay all sales, consumers, and / or any other applicable taxes. Past due accounts will be subject to a 2% per month service charge from the date of the invoice. If any proceedings be instructed by or against Buyer under any bankruptcy or insolvency law, or if Buyer shall fail to make timely payment on this or any other order, or if, in MIFAB's judgment, Buyer's financial situation justifies such action, MIFAB® may, at its election, require payment in advance or cancel the order as to any unshipped item and require payment of its reasonable cancellation charges. If Buyer delays completion of manufacture, MIFAB® may elect to require payment according to percentage of completion. Equipment held for Buyer shall be at Buyer's risk and expense. In all cases, regardless of partial payment, title to the Products shall remain with MIFAB® until payment for the Products (including any notes given therefore) has been made in full. Should legal action be necessary to enforce payment of an unpaid invoice, the Buyer will assume full responsibility for any court costs and reasonable attorney fees. All orders subject to credit check and approval prior to shipment. Confirmed irrevocable letter of credit or cash in advance of shipment is required for accounts without an established line of credit. Minimum invoice amount is \$100.00. MIFAB® reserves the right to apply a minimum order charge to equal \$100.00. MIFAB's Accounting Department must be notified of potential pricing errors within 30 days of the invoice date. Any terms and conditions stated on Buyer's orders which are inconsistent with MIFAB's quotation and Terms and Warranties shall be of no effect.

**RETURNED GOODS RESTOCKING CHARGE:** Standard product may be returned within a one year period only with written permission from MIFAB®. All products in catalog are not considered Standard. Standard product to be determined by MIFAB®. Returned goods are subject to a 25% restocking charge, plus cost of reconditioning, if necessary, to make material saleable. Material must be returned to MIFAB® freight prepaid only after written permission from MIFAB® to accept the returned material. Buyer must provide copy of the original invoice on which the material was charged. The original outgoing freight cost to ship the order will be deducted from the credit. Credit allowance will be in the form of merchandise credit only-not cash credit which must be used within 12 months of the date of issue. The value of a return must total \$100.00 to qualify for credit allowance. No credit will be allowed for auxiliary tappings, discontinued, or made to order items. Products designated non stock and / or that have been specially made (require a sign off drawing by MIFAB®) are not subject to return or cancellation.

**LIMITED WARRANTY:** MIFAB® warrants each product against defects in material and workmanship for a period of one year from the date of original shipment. In the event of such defects within the warranty period, MIFAB® will, at its option, replace or recondition the product without charge. This shall constitute the exclusive remedy for breach of warranty, and MIFAB® shall not be responsible for any incidental or consequential damages, including, without limitation, damages or other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, chemicals, or any other circumstances over which MIFAB® has no control. This warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product.

**MIFAB® MAKES NO OTHER WARRANTIES EXPRESSED OR IMPLIED AS PROVIDED IN THIS LIMITED WARRANTY.**

**ILLUSTRATIONS OR TYPICAL INSTALLATIONS:** The typical installations for various products in each product section are intended to illustrate the products and their options. Under no circumstances are they to be construed as recommended installation procedures. Consult local codes and project specifications for proper installation instructions.

**ALL SALES SUBJECT TO MIFAB's TERMS AND WARRANTIES.**

**NOTE:** Prices and terms are subject to change without notice and supersede all previous quotations. The right is reserved to change or modify product design or construction without prior notice and without incurring any obligation to make similar changes and modifications to product previously or subsequently sold. Contact MIFAB® for any clarification.

## PVC FLOOR SINKS

PVC floor sinks are manufactured out of PVC material to provide the ultimate in sanitary design. PVC material has excellent resistance to chemicals such as the acids contained in fruits, vegetables and fats. The smooth, uniform surface is easy to clean and the floor sink will not chip or rust. PVC floor sinks are lightweight for easier handling, installation and transportation. MIFAB offers PVC floor sinks in either 8" or 12" square flangeless bodies with optional dome bottom strainer and with full, three-quarter or half PVC, nickel bronze or stainless steel grate configurations.

### FS520-30

#### 8" SQUARE x 6" DEEP PVC FLOOR SINK

8" square x 6" deep PVC floor sink body, less flange, with loose set full PVC grate.

with HY-9500

## HY-1500

## HYDRANT BOXES

MIFAB's HY-1500 Series hydrant boxes feature a "drip lip" to drain water away from the wall to prevent unsightly staining.

Standard with all of MIFAB's HY-1500-S hydrant boxes are four 1" x 1-1/4" slots on top and two sides of the box to receive the mounting brackets provided. Hardware is included to fasten the brackets to the box. The mounting brackets are designed to provide easy installation of the hydrant box onto the stud system for labor savings.

MODEL	DESCRIPTION	LIST PRICE	WEIGHT

MHY-CIA-18-A (FOR ALL HY-1000-NPB, HY-2000-NPB, MHY-10-NPB and MHY-15-NPB, MHY-16-NPB, MHY-20-NPB, MHY-25-NPB AND MHY-26-NPB) COMPLETE INTERNAL ASSEMBLY REPLACEMENT INSTRUCTIONS - HYDRANT REPAIR KIT

This kit includes: 2-plunger assemblies; 2-worm stem assemblies; 2-lock nuts; 1-head nut seal; 1-tube thread locker; 1-tube lubricant

## REMOVAL

Shut off water supply to hydrant and relieve water pressure. Remove hydrant stem assembly. (Do not disassemble. The old stem must remain assembled for reference dimensions.) Remove the old head nut seal.

Note: The plunger tips provided in this kit will replace all old versions of plunger tips. See inset.

## ASSEMBLY AND ADJUSTMENT

Remove the worm stem assembly from the cut rod and thread the two lock nuts onto the rod approximately 1" inward from each end.

Apply thread locker to the two ends of the threaded rod (approx. 3/8" coverage) and a small amount to the internal threads of the plunger and worm assemblies.

## MEASUREMENT

Fully thread the appropriate worm stem assembly on to the 4-1/4" uninterrupted threaded end of the fully threaded rod. Lay the old stem assembly next to the new stem, aligning the o rings on the worm stem assemblies.

Mark the groove in the threaded rod that is closest to the end of the old plunger tip, but not past the plunger end.

Using the appropriate holding fixture and a 32TPI hack saw, cut the threaded rod to the appropriate length.

**Note: The undercut grooves in the threaded rod will guide the hack saw blade without the need for thread end "clean up" after cutting. See inset.**

Thread the worm stem assembly until seated fully and then thread the plunger assembly to match the length of the old hydrant stem assembly. (Remove excess thread locker.)

Note: Align the o rings of the two stems side by side and adjust the plunger tips to match.

Once the proper length has been attained, advance the lock nuts toward the two end assemblies and tighten with a 9/16" wrench.

Generously apply lubricant to the plunger tip seals, o ring, and worm stem screw threads.

## INSTALLATION

Install the new head nut seal into the body of the hydrant. Thread the worm screw fully into the head nut using a hydrant key.

Thread the head nut and stem assembly into the hydrant body and tighten.

Shut off the hydrant and open the water supply. Test the hydrant for proper function.

## MI-NEUT

## ACID NEUTRALIZATION TANKS

MIFAB Series MI-NEUT solid construction high density polyethylene, seamless construction body with inlet and outlet, optional vent connections, acid resistant epoxy coated bolted down gasketed lid, stainless steel hardware. Neutralization tanks are used in laboratories, industrial processes or other polluting sources to dilute and neutralize harmful wastes that may be discharged.

Limestone chips are required to be placed inside of the acid neutralization tank and can be purchased separately from MIFAB.

## MI-NEUT

## ACID NEUTRALIZATION TANKS

**Function:** The MIFAB Series of MI-NEUT acid neutralization tanks are engineered to intercept and then dilute and neutralize hazardous chemicals before discharging them into the public drainage system.

The incoming wastewater is directed through the inlet into the bottom of the MI-NEUT acid neutralization tank. The wastewater passes through limestone chips inside of the tank as it flows to the outlet. The calcium carbonate in the limestone chips reacts with the acids in the wastewater to form harmless neutral salts, water and carbon dioxide. The neutralized salts are transformed into sludge and settle to the bottom of the tank. Carbon dioxide gas mixes with water to form carbonic acid, which helps neutralize alkaline wastes. The water helps to dilute the acidic, alkaline and solvent wastes. The wastewater, now neutralized, flows through the outlet and into the public drainage system.

**Sizing:** Local and National Plumbing Codes have different ways of sizing acid neutralization tanks. It is recommended to consult with the Code Officials in your area for their sizing requirements. The most common sizing method is to calculate the number of laboratory sinks draining into the acid neutralization tank and then choosing a corresponding acid neutralization tank to handle the flow from these sinks. (see Sizing Table below)

Number of Laboratory Sinks	2	4	8	16	22	27	30	40	50	60	75	110	150	175	200	300	500	600
Acid Neutralization Tank Size in Gallon Capacity	5	15	30	55	75	90	108	150	175	200	275	360	500	550	650	1200	2000	3000
(in Litres Capacity)	18.90	56.80	113.60	208.20	283.90	340.70	408.80	567.80	662.40	757.00	1040.90	1362.60	1898.50	2081.80	2460.30	4542.00	7570.00	11355.00

Note: For commercial and industrial laboratories, the number of laboratory sinks should be multiplied by a .50 use factor.

### Limestone Chips:

Limestone chips used with acid neutralization tanks must be 1" - 3" in diameter and must contain a high calcium carbonate content greater than 90%. See the accompanying table to determine the correct amount of limestone chips needed for each MI-NEUT acid neutralization tank. This table provides the approximate amount needed for a charge (one filling). Replacement limestone chips will be required as determined by the use of the tank.

### Acid Neutralization Tank Maintenance:

A regular maintenance program (replacement of the limestone chips) of one to three months is recommended.

More frequent maintenance may be required depending on the volume of wastewater and amount of chemicals in the wastewater. If a regular maintenance program is not performed, the efficiency of the acid neutralization tank will suffer.

**Note:** Limestone chips are not included in the MI-NEUT acid neutralization tank pricing on page 22. \$80.00 is the List Price for a 50 lb. bag of limestone chips. Model Number is MI-LSC.

MIFAB MODEL #	Approximate Amount of Limestone Chips (Lbs.)
MI-NEUT-5	50 Lbs.
MI-NEUT-15	100 Lbs.
MI-NEUT-30	200 Lbs.
MI-NEUT-55	500 Lbs.
MI-NEUT-100	1,000 Lbs.
MI-NEUT-150	1,750 Lbs.
MI-NEUT-175	2,100 Lbs.

MIFAB's MI-NEUT-MONITOR is designed to continuously monitor pH values directly in your reservoir. Each unit features a user selectable set-point. An LED visual alarm is activated and flashes when the pH level rises either above or below (user selected) that set-point.

All of these instruments run on a 12V adapter so there's no need to worry about failed batteries and each unit comes with mounting kit, probe, probe holder and starter calibration solution.

## SPECIFICATIONS:

<b>RANGE</b>	: 0.0 to 14.0 pH
<b>RESOLUTION</b>	: 0.1 pH
<b>ACCURACY (@25°C)</b>	: ±0.2 pH
<b>SETPoint</b>	: 5.5 to 9.5 pH
<b>ALARM</b>	: Active when measure is higher/lower than selected set point
<b>ENVIRONMENT</b>	: 0 to 50°C, 95% RH not condensing
<b>POWER SUPPLY</b>	: 12 VDC (included)
<b>DIMENSIONS</b>	: 5.85" x 3.25" x 1.25"
<b>PROBE</b>	: Equipped with a 3 meter long cable

## OPTIONS:

- ☐ - **NEMA** NEMA RATED ENCLOSURE FOR MONITOR
- ☐ - **PROBE** REPLACEMENT PROBE
- ☐ - **CAL** CALIBRATION SOLUTION

**List Price of MI-NEUT-MONITOR** \$775.00

### OPERATION:

- Connect the supplied 12VDC power adapter to the meter and to the main line.
- Connect the pH-probe to the BNC socket on the bottom of the meter.
- Always remove the probe protective cap before taking any measurement. If the probe has been left dry, soak the tip (bottom 2.5 cm) in rinse solution for a few minutes to reactivate it
- Make sure that the meter has been calibrated before taking any measurements (see Calibration Procedure).
- Immerse the tip (2.5 cm) of the pH-electrode into the sample.
- Turn the instrument on by pressing the ON/OFF key.
- Allow the reading to stabilize and the meter will start continuous monitoring.
- A blinking alarm will indicate when the measured pH value is higher or lower than selected set point, depending on user selection.

### SET POINT:

The set point can be selected by adjusting the central front knob to the desired value.

- The selectable range is from 5.5 to 9.5 pH.
- The nature of the set point can be selected by setting the switch to the desired position (ABOVE or BELOW).

### CALIBRATION PROCEDURE:

- Remove the protective cap from the probe.
- Immerse the electrode tip into a new sachet of pH 7 calibration solution and allow the reading to stabilize.
- Adjust the pH7 calibration trimmer (on the front) to display "7.0 pH".
- Open a new sachet of pH 4 calibration solution and use a small quantity to rinse the electrode.
- Immerse the electrode tip into the pH 4 sachet and allow the reading to stabilize.
- Adjust the pH4/10 calibration trimmer (on the front) to display "4.0 pH".
- The calibration is now complete and the meter is ready to take measurements.
- It is suggested to recalibrate the meter at least once a month, after a prolonged stocking time and after pH-electrode replacement.

## FLOOR DRAIN SELECTION GUIDE

### DRAIN OUTLET CONNECTIONS

Floor drains, are available in a variety of outlet connection types. The drain's outlet connection must be compatible with those of the drainage piping system to which it is connected. The most commonly employed connection types are as follows:

#### 1. NO-HUB (NH) (A/K/A Mechanical Joint)

The most widely used connection. A No-Hub connection is achieved by butting No Hub soil pipe or plastic pipe to the bottom of the drain and securing it with a NO HUB coupling. (MI-HUB and MI-XHUB no hub couplings are available from MIFAB - see page 121).

Unless specified otherwise, all of MIFAB drains are shipped standard with No-Hub connections.

	A	B
2" No hub outlet	2"	2 3/8"
3" No hub outlet	3"	3 3/8"
4" No hub outlet	4"	4 3/8"
5" No hub outlet	5"	5 3/8"
6" No hub outlet	6"	6 3/8"
8" No hub outlet	8"	8 3/8"
10" No hub outlet	10"	10 1/2"
12" No hub outlet	12"	12 1/2"

#### 2. PUSH-ON (P)

MIFAB "Push-on" is a unique labor saving compression gasketed connection designed to simply push on the stub end of the pipe. The Push-on drain body and gasket can be utilized with plastic, steel, No-Hub and service weight soil pipe. A unique pipe stop cast in each MIFAB Push-on drain body ensures that water will not accumulate around the connecting pipe. Specify suffix P for MIFAB's Push-on connections.

	A	B	C
2" Push on outlet	2"	3 3/8"	3"
3" Push on outlet	3"	4 3/8"	4"
4" Push on outlet	4"	5 1/2"	5 1/8"
6" Push on outlet	6"	7 3/4"	6 1/4"

#### SPECIAL NOTE:

MIFAB "Push-on" gaskets are designed for use exclusively with MIFAB drainage products. They are not sold separately and all warranties either expressed or implied would be forfeited if used in other than a MIFAB drainage product. MIFAB's 2", 3" and 4" gaskets are designed to be used with both PVC and service weight (cast iron) pipe.

All sales subject to MIFAB's Terms and Warranties. Please refer to inside front cover.

#### 3. THREADED (T)

MIFAB Iron Pipe Threaded connection is an old industry standard. The female (NPT) threaded outlet is often specified on industrial and institutional applications. Specify suffix T for MIFAB's threaded connection.

	A	B	C
2" Threaded outlet	2"	3 1/4"	9/16"
3" Threaded outlet	3"	4 1/2"	3/4"
4" Threaded outlet	4"	5 5/8"	15/16"
5" Threaded outlet	5"	6 3/4"	15/16"
6" Threaded outlet	6"	7 3/4"	15/16"
8" Threaded outlet	8"	9 3/8"	1 1/8"

#### 4. INSIDE CAULK (X)

The Inside Caulk drain outlet connection is a bottomless hub into which the drainage pipe is inserted. The bottom of the outlet is sealed with oakum in the annular space between the pipe and the hub and the connection is then sealed with melted lead. Inside caulk connections are compatible with No-Hub, service weight and extra heavy soil pipe. They can also be used with ABS and PVC pipe. Specify suffix X for MIFAB's inside caulk connections.

	A	B
2" Inside Caulk outlet	2 5/8"	3 1/16"
3" Inside Caulk outlet	3 3/4"	4 3/16"
4" Inside Caulk outlet	4 3/4"	5 3/16"
5" Inside Caulk outlet	5 3/4"	6 3/16"
6" Inside Caulk outlet	6 3/4"	7 3/16"
8" Inside Caulk outlet	8 7/8"	9 1/2"

#### 5. PVC/ABS Socket (PVC=-30, ABS=-31)

Socket weld connections are proven installation time saver solutions. They provide a sanitary and resistant connection to the piping system for specialized applications.

	A	B
2" PVC / ABS socket	2.385"	2.710"
2" PVC / ABS socket	3.525"	3.910"
2" PVC / ABS socket	4.475"	4.950"

## ALLSTAR® COVER

MIFAB's new, patent pending Allstar® cover is available in 5" and 6" round sizes to work with any of MIFAB's 5" and 6" round floor drain and cleanout tops.

It is manufactured from recycled plastic and is designed to fit into any of MIFAB's A1 and A4 PVC, ABS or cast iron bodies.

Contractors fit the Allstar cover into the top of the MIFAB drain body before the concrete pour, install the bodies onto the pipe and advise the concrete contractors to measure the level of the concrete floor from the top of the Allstar cover.

After the concrete pour around the top of the Allstar cover, the Allstar cover is removed with a tool placed into the recessed slot in the middle of the cover and pried off.

The 4" NPSM threads machined into the top of all of MIFAB's A1 and A4 bodies are then exposed to allow the contractor to thread in any MIFAB 5" (use the 5" Allstar cover) or 6" (use the 6" Allstar cover) round floor drain and cleanout top into the top of the bodies. The tops can be adjusted to the finished floor.

There is only a 1/8" space around the outside diameter of the floor drain or cleanout top to finish off with grout.

The Allstar cover is approximately 3/4" high and is made from smooth plastic material with angled sides to ensure removal after the pour.

PATENT  
PENDING

### There are several advantages to the Allstar cover:

- 1) The contractor can avoid taping the floor drain and cleanout tops prior to installation to ensure that they are protected during the construction process. This eliminates time to tape the floor drain / cleanout tops and also eliminates cleaning time to remove the tape from them before the project is handed over to the client.
- 2) The contractor can avoid installing the floor drain and cleanout tops until the end of the project – reducing the risk that they will be stolen or damaged.
- 3) The floor drain / cleanout tops can be adjusted to the finished floor after the concrete pour.
- 4) The Allstar cover can be purchased separately from the floor drain and cleanout bodies.
- 5) The Allstar cover can be used over and over again.

Allstar cover with any MIFAB A1 body

Allstar cover with any MIFAB A4 body

MODEL NUMBER	LIST PRICE
<b>A1-5-ALLSTAR</b>	<b>\$20.00</b>
<b>A1-6-ALLSTAR</b>	<b>\$22.00</b>

Design and dimensions are subject to modification. Prices do not include applicable taxes.

## THE MIFAB MODULAR SYSTEM

● A Floor Drain

● Is an Area Drain

● Is a Roof Drain

● Is a Cleanout

### DYNAC

(DO YOU NEED A CLAMP?)

In 90% of today's "slab on grade" installations, there is no need for a membrane clamp, as there is no waterproofing membrane installed. Because MIFAB's unique design allows the strainer assembly to install directly into the throat of the drain body, the use of a membrane clamping collar is optional.

This is an opportunity for cost savings.

Why use a drain with a membrane clamp if it is not necessary?

### The MIFAB Modular System

## OUR REPUTATION IS STAINLESS

### KEY FEATURES AND BENEFITS:

- Modular system with fewer parts, reduced confusion on job site, and fewer returns.
- Standard A1 body serves as a floor drain, cleanout and roof drain. This reduces inventory.
- Cast 304 stainless steel grates and cleanout covers for same price as nickel bronze. Prevents dishing, corrosion and discoloration.
- 4" NPSM threads at top of A1 body allows drain to be installed without
- membrane clamp for nonwater proof slab on grade floors.
- A1 body with no hub connection is only 3" deep for compact rough-in.
- A1 body always shipped tapped and plugged for trap seal primer connection.
- All area drain grates are adjustable and made of ductile iron with a load rating of over 10,000 lbs. for maximum on site adjustment and load bearing.
- Closet and lavatory carriers designed and packaged with features to save installation time and handling cost.

**NOW YOU CAN SPECIFY STAINLESS STEEL AT THE SAME PRICE AS NICKEL BRONZE. SPECIFY MIFAB STAINLESS FOR A LASTING IMPRESSION**

## AREA DRAIN FEATURES

### MIFAB AREA DRAIN STANDARD BENEFITS:

- Ductile iron grate offers greater than 10,000 lb. load rating.
- Non-tilt grate is safer in all traffic areas.
- 3/8" slots prevent large debris from entering the drainage system.
- Fully adjustable top assembly for ease of installation. Stainless Steel at the same price as Nickel Bronze.
- All sales subject to MIFAB's Terms and Warranties. Please refer to inside front cover.

All sales subject to MIFAB's Terms and Warranties. Please refer to inside front cover.
