3/8" Hex Shaft

Clean Ream Plus™

CRP150

Plastic Pipe Fitting Reamer
Escariador para conectores de tubos plásticos
Alésoir pour raccord de plastique

INSTRUCTIONS

1. Cut damaged pipe as close to fitting as possible.
2. Select proper size fitting reamer, put it in drill chuck and tighten.
3. Insert fitting reamer into broken pipe, ensure tool stays on center to prevent binding. If no chips are being made, remove tool and check.
4. Ream old pipe until proper depth is attained.
5. Remove reamer and clean out chips from fitting.

Change cutting disk by removing self-locking screw and replace. Reassemble and tighten self-locking screw.

* This reamer is projected to provide 250 reams. If the Clean Ream Plus fails to remove plastic pipe from a fitting 250 times, Reed will replace the cutting disc. All Clean Ream Plus are date stamped and the offer is valid for three years or 250 reams, whichever comes first.

Not recommended for pressurized systems.

No se recomienda para sistemas presurizados.

Non recommandé pour les systèmes sous pression.
