FUNCTIONAL DESCRIPTION

EVERLOC+ compression-sleeve fittings and sleeves are designed specifically for use with REHAU PEXa pipe. The maximum temperature and pressure ratings of the EVERLOC+ compression-sleeve fitting system is in accordance with ASTM F877 and CSA B137.5 for SDR9 PEX, see REHAU pipe product submittals for ratings. Installation is performed with EVERLOC+ compression-sleeve tools. Follow all published REHAU *Technical Guidelines*. All EVERLOC+ fittings and sleeves comply with the lead-free (LF) requirements of the U.S. Safe Drinking Water Act.

Swivel adapters connect REHAU PEXa pipe to connections with male threaded ends. The captured swivel nut turns freely to make convenient connections. This allows the EVERLOC+ connection to be made in an open space before attaching the fitting to a mating part in a more confined location. Fitting is supplied with a flat EPDM gasket for the internal seal. Swivel adapters use parallel threads, not tapered threads. Do not use pipe dope or thread sealant - the flat gasket makes the seal. Swivel adapters cannot be walled in and must be accessible for inspections.
